We will send two dozen prepaid in a handsome plush lined cherry tray to any dealer, on consignment, to be returned at our expense if found unsalable. We could not do this if they were not the best selling novelty in the hardware trade. It costs you nothing but a 2c stamp to try them. Drop us a line and we do the rest.

Davison Mfg. Co. 112 Front Street. Brooklyn, N. Y.

OUR GASOLINE LIGHTING SYSTEM

and Lamps are delighting our customers, because our Improved Generators are properly constructed; we have been improving them for four years—anyone can easily clean them. Hundreds of testimonials from merchants. We don't ask you to take our word for it—**we send them on trial.** 600 candle power Lighting Systems—Arc Lamps—Gravity Lamps—all styles. We are selling hundreds of our Improved Generators (burners) to put on other lamps where the burner has proven worthless. Reduce your light bills 75 per cent., and sell to your neighbors.

Agents wanted everywhere. Absolutely safe. Permitted by Insurance Companies. We are headquarters for all kinds of mantles. Write for catalogue and prices.

STANDARD GAS LAMP CO. (Established 1899.)

Mention "Hardware."

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Flyer Window Screens.

Were Introduced in 1894 and 1895.

All other Screen Manufacturers were obliged to imitate it as nearly as our patents allowed.

Aside from covering the edges of the wire cloth, the **"Flyer"** is now made just the same as ten years ago.

"Flyers" are Standard.

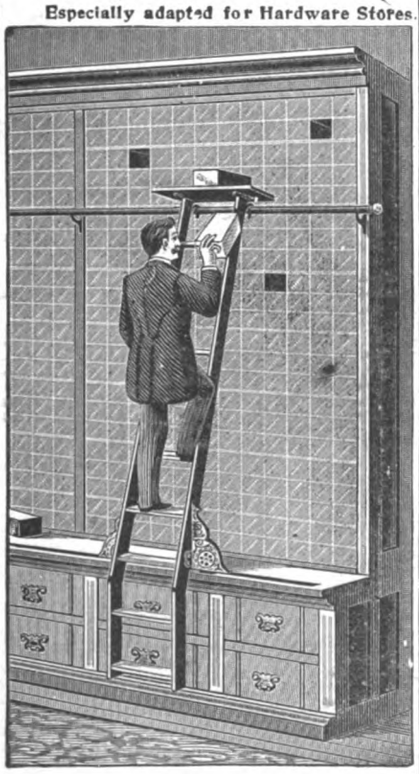
We do not have to change our pattern every year or two. Our customers do not ask it. They are satisfied.

THE SCREEN IS RIGHT, and our patents cover the very simple construction which secures the easy adjustment and holds up the center of the frames so that we avoid the necessity of having a stiff center bar for that purpose.

Our Steel Wire Cloth Binding is plenty stiff enough to hold the cloth in place, but it can be bent, and the screen can thus be kept "Fly Tight." If you cannot bend the center bar or binding, you cannot keep the screen "Fly-Tight" when the cloth commences to "bag" as it will in time. A full line of other patterns of Window Screens and Frames.

Phillips Fancy Screen Doors

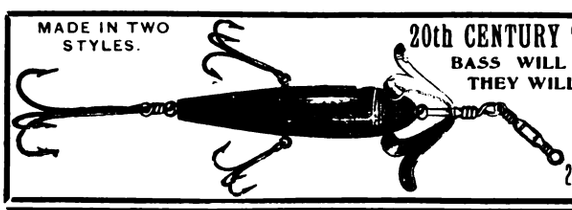
are distinguished for their smooth, handsome, hardwood spindles and the fact that the spindles are just right in length, number and location. The embodiment of good taste.



We have a good line comprising cheap, medium and fine grades. Our Door Department has recently been enlarged and improved.

The A. J. Phillips, Co.,

22 Years Experience. **Fenton, Mich.**



THE BICYCLE STEP LADDER.

Especially adapted for Hardware Stores.

The newest, neatest, simplest, easiest operated and safest store ladder made. Highest Award World's Fair. Write us. THE BICYCLE STEP LADDER CO., 65 Randolph St., Chicago, Ill.

MADE IN TWO STYLES.

20th CENTURY "WONDER" FISH SPINNER.

BASS WILL STRIKE THIS BAIT WHEN THEY WILL NOT TAKE A LIVE MINNOW.

JOSEPH E. PEPPER,

Manufacturer of all Kinds of Fishing Tackle.

217 LYNCH STREET, ROME, N. Y.

THE PASTEUR WATER FILTER

Absolutely Germ Proof

Ornamental—Attractive.

Perfect in every detail.

So constructed that ice does not come in contact with the filtered water.

EVERY dealer should handle the Genuine Buckeye Pruner, because he can carefully push it to his best trade, in preference to any other pruner made.

Because it has stood the test of actual use for over 30 years.

Because it is the strongest made---the blades being hand-forged.

Because no other made cuts so easily.

It operates just opposite from other pruners. Grasp the limb with the hook, and cut towards you. It's quicker and easier than the other way.

Size 25—inch.

One dozen in a case.

Write for prices on a Sample Order.

NOVELTY MFG. CO.

JACKSON, MICH., U. S. A.

DONT

Try to force the sale of a poor article, the American people are prosperous and want GOOD things; are willing to pay a fair price for them too.

The "Best Yet" riveter is the BEST thing for the purpose on the market regardless of price.

Ask your jobber for the BEST YET.

F. H. SMITH MFG. CO.,

Five other styles. Catalog for the asking.

CHICAGO, U. S. A.

SPECIAL OFFER

"WHAT THEY SAY:"

CENTURY CASH REGISTER CO. LTD.,
Detroit, Mich.

GENTLEMEN—We now have in use six of your Cash Registers in our various Stores and are so much pleased with them that we take this occasion to write you about it.

We considered at first buying high priced Cash Registers, but upon making a close examination of your Machine we were so much impressed with its merit that we thought it folly to pay an extra price and get no better service.

We shall doubtless need several more Cash Registers and assure you that we will use your brand. Wishing you every success, we are,

Yours very truly,
PEARSON-LINN COMPANY,
Per A. C. Pearson, Gen. Mgr.

TOTAL ADDER CASH REGISTER

CAPACITY, $1 000,000

OFERTA ESPECIAL

Cajas Contadoras de Dinero, Totalizadoras.
Capacidad, $1,000,000.

"LO QUE SE DICE"

CENTURY CASH REGISTER CO., LTD.,
Detroit, Mich.

MUY SRES. NUESTROS: — Tenemos en la actualidad seis de sus Cajas Contadoras en uso en nuestros distintos establecimientos, y nos hallamos tan satisfechos de ellas, que deseamos dirigir à Vds. la presente.

Pensamos al principio en comprar Cajas Contadores de alto precio, pero. después de hacer un examen cuidadoso de su aparto, quedamos tan favorablemente impresionados por sus méritos, que creimos un desatino el pagar un precio más crecido sin obtener mejor servicio.

Indudablemente necesitaremos varias Cajas Contadoras màs y pueden Vds. contar con que compraremos las Cajas de su marca.

Deseàndoles prosperidades, quedamos de Vds. Affmos. y S.S.

PEARSON-LINN COMPANY,
Per A. C. Pearson, Gerente.

In many cases the larger dealers after receiving the first Machine have ordered a sufficient number to equip all departments in th ir places of business. Take for example the Pearson-Linn Co., have seven Centuries in operation in their mammoth Retail Establishment at Danville, Ill.

We are sure you will be equally as well pleased as many others who have accepted our offer.

Please let us hear from you. Every machine sent on 7 days' trial and guaranteed for 5 years.

SPECIAL OFFER--We have a plan for advertising and introducing our machine to new trade which we are extending to responsible merchants for a short time, which will put you in possession of this high-grade, up-to-date, 20th Century Cash Register for VERY little money and on VERY easy terms. Please write for full particulars.

En varias ocasiones ha sucedido que comerciantes de importancia después de poner en uso la primera Caja Contadora, han pedido un número suficiente para proveer todos los departamentos de su casa. Como un ejemplo, presentamos á la casa Pearson-Linn Co., quienes tienen en uso siete Cajas de la marca "Century." en su gigante establecimiento al detal en Danville, estado de Illinois. Tenemeos la seguridad de que Vd. se hallarà tan complacido como lo han estado otros, de haber aceptado nuestra oferta. Celebraremos recibir sus gratas noticias.

Todas nuestras Cajas Contadoras se venden después de un ensayo de 7 días, y se garantizan por 5 años.

OFERTA ESPECIAL--Tenemos un sistema para anunciar é introducir nuestras Cajas Contadoras de Dinero entre nuevos clientes, y hacemos esta oferta, por algún tiempo, á todos los comerciantes acreditados, facilitañdoles así por MUY poco dinero, y en condiciones MUY ventajosas, la acquisición de nuestra Caja Contadora de Dinero del siglo 20. que es la más moderna y de superior calidad. Solicítense pormenores de los fabricantes.

"BLUE BOOK" CREDITS

OF THE

HARDWARE IRON & METAL TRADES.

We have just issued the most complete and reliable book of credit ratings for this special branch of trade that has ever been published, containing about 400,000 rated names of wholesalers, retailers and manufacturers, covering the trade thoroughly. The ratings are conservative and very reliable. The ***paying record*** is based upon ***ledger experience*** of credit men everywhere.

You buy credit information. Isn't it the part of a good buyer to post himself thoroughly on the merits of a book of ratings, gotten up especially for his trade by men with ample capital and who are thoroughly trained in this class of work and who make a ***specialty*** of it?

Terms of subscription can be had by addressing

Iron and Hardware Mercantile Agency,

BOSTON, 157 Federal St.
NEW YORK, 320 Broadway.
CINCINNATI, 106 East 3d St.

PERFECTED GRANITE ROOFING

IT is a surprising fact that in all instances where fire has occurred in buildings covered with **PERFECTED GRANITE ROOFING** and destroyed the interior, even charing the rafters and roof boards through, that the fire resisting qualities of the roofing prevented the destruction extending to other structures.

PERFECTED GRANITE ROOFING is not only safe but sightly, lasts twice as long as shingles and costs about one-half as much to lay.

THERE'S MONEY IN RAIN

and rough weather if you carry

Blizzard Storm Fronts

The front that closes up a buggy in half a minute. Cleverest, easiest adjusted, quickest selling. Millions read our ads in the popular weeklies, magazines, agricultural papers, etc. People write us all the time asking where they can get these fronts. We'll send inquiries from your locality to you if you handle "Blizzards."

THREE FREE

We will express you prepaid, as a trial order, three Blizzard Storm Fronts on the condition that if you sell them within thirty days you pay us, if not, you return them **at our expense.** Liberal, but risky? No risk at all. **We know** you will sell them and write us for more. **Order today.**

Not a drop can touch you when your buggy is closed up by the
Blizzard Storm Front
(Patented in United States and Canada.)
Fits Any Buggy
Adjusted in 30 seconds without getting out or removing gloves, sides open and close as quickly and easily as a door, large line pocket, guaranteed satisfactory. The large window, 12 x 20 inches, is a pliable transparent material that won't break. Rubber Cloth, $3.00; Heavy Rubber Cloth, $3.50.
Ask your dealer and be sure that trade-mark "Blizzard" is stamped on inside under window.
Sold by Vehicle, Harness and Hardware dealers. If yours hasn't it, write us. *Illustrated booklet free*

Every Day

is a "dull day" for the average household knife. That's why the Rose Automatic Grinder is *never out of season*. Only set it where it can be seen and tried by your customers, and it will earn more profit to the square inch of space occupied than anything in stock.

The ROSE Automatic Grinder

is a practical novelty. It is simple, durable and efficient. Drawing a knife through the slots as shown, brings it in contact with a *revolving* emery wheel, that sharpens it and does it right. Set one on your counter and see it sell itself.

WHY IS THE

O. K. THE BEST ROTARY WASHING MACHINE?

—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing **the friction** and thus making machine so **light running** and almost **noiseless.**
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without **rubbing** them to pieces.
4.—This washer is made by **experienced mechanics**, and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**

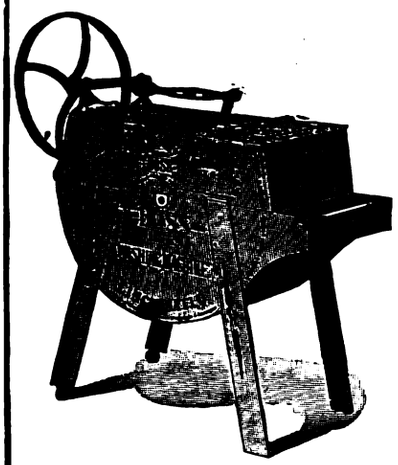
JAPANESE SWORDS.

The blades of Japanese swords are formed of a metal prepared from magnetic iron ores and ferruginous sand. The steel is produced in the form of thin laminæ, and the workmen commence by fixing one of these to the end of an iron rod, which serves as a handle. To this are soldered other sheets until the mass has a length of six to eight inches, a width of two inches and a thickness of one-quarter to four-fifths of an inch. This bar, brought to a white heat, is doubled upon itself and hammered until it has taken its original dimensions. This process is repeated fifteen times. Four similar bars are then soldered and heated, this operation being repeated five times. By this process the superimposed layers of metal become so thin that a sabre is estimated to contain at least a thousand sheets of metal. Sometime alternate layers of iron and steel are soldered together, and thus the blade presents a veined appearance.

A CLEVER ADVERTISEMENT.



At the recent convention of the State Federation of Women's Clubs, held in Grand Rapids, Oct. 13th, 14th and 15th, on the last day of their meeting the delegates were presented by the Bissell Carpet Sweeper Co. with an elegantly-gotten-up souvenir in the form of a toy sweeper. It required 260 of these souvenirs to supply the delegates, and it is evident that from an avertising standpoint the Bissell Company struck upon a very happy and effective way to make an impression upon the ladies of the convention in carrying their name into hundreds of enlightened homes throughout the State of Michigan. The souvenirs were especially prepared for the occasion and bore the following inscription in gold letters:—

"Michigan State Federation of Women's Clubs,
Grand Rapids, Mich.,
October 13, 14, 15, 1903.
Compliments Bissell Carpet Sweeper Co."

THIS IS THE COVER **THESE THE BRANDS**

Specially Prepared Brown Waterproof Duck Horse and Wagon Covers

The Wagner Mfg. Co.

CLEVELAND, OHIO

From Margam Forge, Glamorganshire, South Wales, to Martin's Ferry, Belmont Co., Ohio.

MF

Note the Coincidence:

The most favored brand of roofing tin, the MF which originated at Margam Forge in South Wales about sixty years ago, is now being produced by the American Tin Plate Co. in its works at Martin's Ferry, Ohio.

At the Martin's Ferry Works the MF old style process has been combined with the "New Method" of finishing Terne Plates. The result of this happy combination has been the U. S. Eagle N. M.

Ask W. C. Cronemeyer, Agent, 1211 Carnegie Building, Pittsburg, Pa., for our new booklet which teems with useful information.

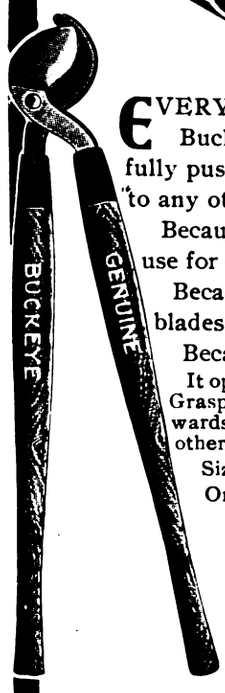
Learn Advertising

There is no thing so valuable to the man in business as a knowledge of advertising. It is the greatest force in modern business and no young man can hope to achieve a substantial and enduring success without it The advertisement writer and manager is one of the highest priced employees in any business, and his opportunities for advancement are the best. Any man with a good common school education can win for himself a place in the advertising world.

Many of those who have followed my instructions now hold positions with leading concerns and are receiving from $30 to $125 per week. Mr. Charles H. Brown, President of The Chicago Pure Food Marketing & Distributing Company, says: "About six years ago the business at which I was working paid me $20 per week. I studied advertising and in a very short time I doubled my salary. Six months ago I was elected President of a $250,000 Corporation and I am Vice-President and Manager of another large corporation with liberal stockholdings in each. The foundation of the progress I have made was laid by the careful study of Bates Literature. I am satisfied that the foundation for a career in the advertising business can be made by mail, and I am satisfied that Mr. Bates can do this better than any other person or organization in the world."

My course is the only one being given in connection with an actual advertising business. It is therefore the most practical course. "A Business Course for Business Men."



If you are dissatisfied with your present salary, if your work is uncongenial, or if you wish to learn to advertise your own business in the most effective manner, send three two-cent stamps for my handsome sixty-page prospectus telling how and why advertising can be taught, who should study advertising, and booklets "Ill Fortunes of Brother Bill," "Other People's Brains," and "How Shall A Young Man Succeed?"

CHARLES AUSTIN BATES,

28 SPRUCE STREET,

NEW YORK.

EVERY dealer should handle the Genuine Buckeye Pruner, because he can carefully push it to his best trade, in preference to any other pruner made.

Because it has stood the test of actual use for over 30 years.

Because it is the strongest made---the blades being hand-forged.

Because no other made cuts so easily.

It operates just opposite from other pruners. Grasp the limb with the hook, and cut towards you. It's quicker and easier than the other way.

Size 25—inch.

#309 Broadway, City.

Gentlemen:-

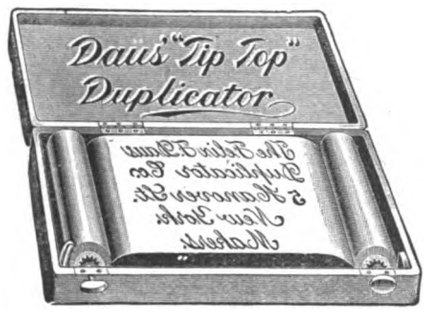
We are in receipt of your favor of the 24th inst., and beg to acknowledge the receipt of an inquiry from Manche, France.

This is, however, only one of may that we have received during the two months that we have been advertising with you. We are glad to say that we have had splendid results from Hardware, and better than from any other paper in which we are running our advertisement.

Now that we know that we can get good results we find that we cannot get along without Hardware.

We are very much pleased with the designs and the semi-monthly changes of copy which you have given us, and also for the assistance which you have given us with the foreign trade, by supplying us with names of reputable customers.

Hoping that the results will comtinue to come in during the coming year as they have the first two months and thanking you for the services, we remain,



Yours very truly,

MANUFACTURE OF HIGH EXPLOSIVES.

New Jersey Produces More Than Any Other State in the Union.

A bulletin of the State Bureau of Statistics just issued says:

Full particulars relating to the manufacture of high explosives in New Jersey will be found in the tables devoted to the statistics of manufactures of the State, which will occupy the principal place in the forthcoming report of the Bureau of Statistics for 1903.

The work of tabulating data has progressed so far that the most important facts relating to some of the principal lines of manufacture are now fully developed; among these is the compounding of high explosives.

This industry, although a comparatively new one, has reached such proportions in New Jersey as to entitle it to a place among the most important of these with which the name of the State is specially identified. The quantity of explosives manufactured here is greater than that produced in any other State in the Union, and it may be safely said, largely exceeds the product of any territory of the same area anywhere in the world. California, Pennsylvania and Ohio are the only other States in which the manufacture of high explosives and smokeless powder is carried on upon the scale that comes near approximating the size of the industry in New Jersey. Pennsylvania has a larger number of establishments, but the plants in this State are, without exception, far greater in size than any found elsewhere, not excepting the great works engaged in the industry in Europe under government auspices.

In the United States, in 1900, 22 per cent. of the capital invested in the ninety-seven establishments then engaged in the industry, outside of that which is specifically charged to building and machinery, was found in nine New Jersey plants. In the two items of buildings and machinery, New Jersey had 17.3 per cent. of the total.

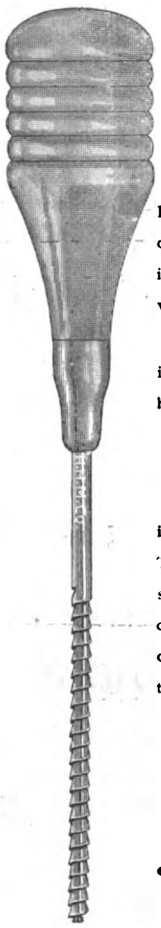
The proportions of the industry for the establishments engaged in this interesting industry is as follows:

Number of establishments	8
Capital invested	$3,175,000.00
Aggregate value of stock or material used	$2,880.000.00
Total value of products	$4,844,381.00
Greatest number of persons employed	1,270
Total amount paid in wages	$628,842.00
Average yearly earnings of employees	$507.54

Among the materials used in great quantities in the production of high explosives the principal ones are acids and glycerine, 55,170.691 pounds; nitrate of soda and wood fibre, 20,041,491 pounds, and cotton, 1,327,364 pounds.

The product embraces all the forms of high explosives known, such as dynamite, nitro-glycerine, smokeless powder, gun cotton, etc., amounting in the aggregate to 40,531,911 pounds.

The geographical distribution of the establishments engaged in this industry is as follows:



Pompton Lakes, Passaic County	2
Farmingdale, Monmouth County	1
Oakland, Bergen County	1
Landing, Morris County	1
Repaupo, Gloucester County	1
Carney's Point, Salem County	1
Linville, Morris County	1

HARDWARE

Iver Johnson Arms & Cycle Works, Fitchburg, Mass., have recently published a fine large sized calendar of an extremely attractive character. It is a reproduction of a sketch by the artist A. Von Beust showing a modern Diana clad in hunting costume sitting on a rail fence in a restful position, a dead fox lying at her feet, her dog beside her looking through the rails while she caresses with care her Iver Johnson gun in her hand. The whole get-up is exceedingly striking, and being lithographed in appropriate colors would adorn any location.

The American Cutlery Co., of Chicago, Ill., desire the trade to understand that they have no connection whatever with the American Cutlery Company of Keyport, N. J., for which a receiver has recently been appointed.

Charles Weiland, 149 Chambers Street, New York, whose prominence in the "job-lot" and bargain end of the Hardware business is acknowledged from Moosehead Lake to the Golden Gate, has on hand at the present time the most desirable lot of single and double bitted axes it has ever been his good fortune to distribute. He is offering them at such exceptionally low prices, they make the buyers feel that the quotations alone ought to come under the head of Cristmas presents. Write him promptly for further information

An artistic desk calendar, envelope size, is sent out by the Marlin Fire Arms Co., New Haven, Conn., which may be said to surpass those of previous years in point of artistic merit, the subject being remarkably fitting and attractive, and the framed effect quite unique. The company state they will gladly mail the calendar to any of our readers who will enclose a two cent stamp to pay postage.

The railroad mileage of the United States is put by "Poor's Manual," which is an established authority, at the commencement of the present year, at 203,131 miles, a gain over the preceding year of 3,464 miles. These are figures to remember. The total liabilities are stated at $13,719,000, an incalculable sum, very nearly equally divided between capital stock and bonds, with unfunded debt, profit and loss exceeding a billion. The earnings were $1,720,000 gross, and $560,000,000 net. These figures pass comprehension and the only way to realize their magnitude is that the financial, industrial and commercial operations of the railroads are woven up with the progress of every section—almost every county—of the American union, taking in the great continent bounded by two oceans, the gulf and the Canadian and Mexican lines of territory. We can not realize the grandeur of the country without reflection of the magnitude of the railroad interest. It is greater than all else, for it includes every productive force.

The Onondaga Manufacturing & Promoting Company was incorporated at Albany recently with a capital of $50,000, to manufacture and deal in engines, machinery, vehicles, machines, tools, implements, utensils, novelties, mechanical devices and personal property of every class and description excepting bills of exchange and gold and silver bullion. The directors are James D. Smith and Robert Nash Phinney of Syracuse, and Albert E. Fletcher of Canandaigua. Mr. Smith and Mr. Phinney are now interested in the Onondaga Manufacturing Company, located at 120 South State Street.

The second annual meeting of the New York State Association of Retail Hardware Dealers will be held in Rochester on March 8, 9 and 10 next. John R. Taylor, secretary, Little Falls, N. Y., will be pleased to furnish to merchants not already members, any particulars they may desire in regard to the meeting of the organization.

There is every reason to believe that the Shelby Stove & Mfg. Co., Shelby, Ohio, will double their output of gasoline and wickless oil stoves this season. Many more orders have been received at their factory than ever before for the same period, from customers who were pleased with their goods last season. They have just placed on their books one order for 3500 coming from a single customer. The Shelby Stove & Mfg. Co. have just put in a new 40 H. P. gas engine, and during the coming season will do all their enameling with natural gas ovens.

THE POPE BICYCLE DAILY MEMORANDA CALENDAR.

The re-issue of the Pope bicycle daily-leaf calendar may be considered the opening gun proclaiming the natural and healthful return of bicycling. Col. Albert A. Pope, the founder of our bicycle industries and the pioneer in the Good Roads Movement, is again at the head of the bicycle industry. Upon the 366 calendar leaves are freshly written lines, from the pens of our greatest college presidents, doctors, clergymen, statesmen, and other eminent men and women, all of them enthusiastically supporting bicycling. Half of each leaf is blank for memoranda. This calendar is free at the Pope Manufacturing Company's stores, or any of our readers can obtain it by sending five 2-cent stamps to the Pope Manufacturing Co., Hartford, Conn., or 143 Sigel Street, Chicago, Ill.

THE NATIONAL ASSOCIATION OF CREDIT MEN.

The New York Association has already begun active preparations for the next annual Convention of the National Association of Credit Men. This association is composed of representatives of one of the most important elements of modern trade. Aside from the value of the discussion of practical questions, these conventions have a recognized usefulness of an educational character in the widened outlook and enlarged circle of acquaintanceship among the class of men whose duties keep them largely confined to their desks.

The Convention will number a very large body of delegates from all parts of the United States, representing the leading houses in all lines of trade, and will be held in June, 1904. They should receive a cordial welcome from the merchants of our city, and we have no doubt that the New York Association will do everything possible to make their visit pleasant and profitable.

MONTREAL HARDWAREMEN MEET.

The annual general meeting of the Montreal Metal and Hardware Manufacturers' and Merchants' Association was held in the Board of Trade on Tuesday, December 8, with George Caverhill, vice-president, in the chair. The president's report of the business transacted during the past year was submitted and approved. The election of officers for the coming year resulted as follows:

President, George Caverhill; Vice President, Geo. A. Kohl; Treasurer, A. A. Brown; Directors, Fred Bacon, H. J. Fuller, W. S. Leslie and Thomas L. Paton.

The newly elected president, George Caverhill, was unanimously chosen as the association's nominee for election to the Council of the Montreal Board of Trade. A vote of thanks was passed to the retiring president, J. C. McCormick, and the secretary was directed to convey to Mr. McCormick an expression of the sympathy of the members with him in the very serious illness from which he is now recovering, and the hope that he may soon be completely restored to health.

The object of this association is to form a connecting link between the Hardware manufacturers and merchants of Montreal and the Board of Trade. With the very capable executive which has been chosen the association is assured of a prosperous year.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The Hardware trade in every branch closes a year of industrious activity, which it is the belief of its zealous votaries has been one of profitable employment, and which will show good results when the inventories are completed and the grand result ascertained. May there be no disappointments, for hopes like these are difficult of entertainment, and the trade looks forward to a year of promise in 1904.

There is every reason to believe that next year a better understanding will exist between capital and labor and that very few of the irritating conditions so prominent this year, will disturb the peace and harmony that should ever surround the two divisions of our great industrial army,—those who plan and those who build. Fortunes through the promotion of great enterprises were accomplished so easily during the current year it carried some classes of labor completely off their feet, and the exactions that seemed possible of achievement suggested the graft that finally accomplished the downfall of the abnormal conditions.

There will be plenty of employment at good wages for everyone willing to work. There should be every opportunity for this for willing workers, skilled or unskilled, union or non-union. There will be a sufficiency of money for the promotion of honest enterprises in which the spirit of individual greed will not be the predominating force. Some of these Wall street magnates will have to get back to earth again; they have been too long in the millionaires' heaven where even the lining was golden. The full employment of our laborers means that mining, building and planting will go forward in every direction, and comfortable conditions will surround all earnest laborers in the vineyard, who will get good pay and steady employment, while a willingness to share in the good things will be extended to his brother workman unselfishly, and with a desire to receive and confer mutual obligations.

The changes in prices which have been so noticeable in the metal markets, will doubtless cause some readjustment of special prices on goods that have been high by comparison. These prices have, no doubt, reached a top limit and will be adjusted by a movement that need not be general and so demoralize the market. It will be found the markets, will, if anything, be averaged up. It will work to our advancement when lower prices on metals prevail, by giving us a firmer hold upon Export trade. Our facilities have so greatly increased during the past five years we are for the first time fully able to keep our export connections, even when our domestic traffic would tempt by a more profitable market under advancing quotations to let the export outlet take care of itself. We have done this so often in the past it is a wonder we are able to impress the foreigner with our sincerity, and so keep our foreign customers satisfied that we always mean business when we express our willingness to entertain it.

It is of great advantage to the country that the farming millions of our population have had good crops in the past few years of products bringing good prices, and by aid of which mortgages have been paid off, more territory placed under cultivation, and to improve it and create the wealth which is the foundation of our prosperity to-day. If the farmer is having hard times, our workmen will be found in little better circumstances, and when the farmers are prosperous, depressing conditions and a hopeless outlook must take a back seat, for it is no time to expect them in evidence, that will have any influence on the times.

DOMESTIC AND FOREIGN REGISTRATION OF TRADE MARKS.

The following communication from Davis & Davis, Patent Lawyers of 220 Broadway, New, York, and Washington, D. C. on the necessity of foreign registration of trade marks presents information of considerable importance to our readers.

The person who first uses in this country any lawful trade mark in connection with goods of a given kind has exclusive right to continue the use of it, and he may prevent all other persons from using the same trade mark on the same kind of goods, or from using any mark which the ordinary buyer would be likely to mistake for that belonging to the first user. Exclusive right in this case depends entirely upon priority of use. If a person who had no right to use it should register it as his own, this fact would confer no right upon him. When it is desired to establish the date at which the use of the mark began the registry of the trade mark in the Patent Office, is useful, because it will show that the person who registered the mark was using it at least as early as the date of registration. His opponent, even though he had the same design in use before that time, may have some difficulty in establishing that fact by satisfactory proof if he has not registered the mark in his own name.

Digitized by Google

journals have recently published many instances in which American firms have suffered from a most pernicious form of blackmail in Cuba and Japan, and our Consular reports from other foreign countries are full of warnings to American manufacturers to register their trade marks in all foreign counties in which they are doing business. In many of these countries the registration of the marks gives to the registrant absolute title thereto and also gives him the right to have goods bearing such marks seized at the customs house and confiscated. The New York Times of December 10th, published an instance of where a New York merchant was forced to pay $6,000 for the privilege of selling goods bearing his trade mark in Cuba. In this case the trade mark was registered in Cuba by some one who had no right or title thereto.

It should be strongly impressed upon American merchants and manufacturers who are seeking to develop their export trade that their trade marks and trade names should be registered in every country where they are seeking a market for their goods.

In a report of a recent Commissioner of Patents this matter was carefully considered and the following quotation may be of interest:

"The importance of having trade-marks protected abroad, and in many countries registration is necessary to protection, has been forcibly impressed upon American manufacturers, who, sending their goods into some foreign country, have found the very trade-mark which has become valuable to them registered in that country by some citizen of that country who made application for registration for no other purpose than to enable him to demand of the American manufacturer a price for the right to sell goods marked with that trade-mark in that country. As in a number of European countries registration of a trade-mark is attributive of property in such mark and is granted, not to the first adoptor and user of the mark, but to the first applicant for registration, and as in these countries the registrant under the laws there in force can forbid the importation of goods marked with the trade-mark registered by him, or even compel the seizure of such goods, it is evident that such registrant has the manufacturer at his mercy so far as trade in that country is concerned."

As an instance of how the scheme has been worked in Germany we quote from a report of Consul-General, Frank H. Mason, from Berlin:

"It appears necessary to recall the attention of American exporters to a very peculiar provision of the German law for the registration of trade-marks, which is not infrequently used to the great and unjust disadvantage of Americans and other foreigners. Under the German statute, any person may register and secure right to any name or other device used as a trade-mark which has not previously been registered here by some other firm or person. In other words, the officials before whom the application is brought make no inquiry to ascertain whether the applicant has ever used the proposed trade-mark or has any right to it, but simply look over the record to ascertain whether it has been registered in Germany. If not, it is admitted to registration without further inquiry or delay.

"The readiness with which such a practice can be abused is apparent. When, several years ago, American bicycles began to be imported into Germany, certain persons interested in blocking the trade got the trade-marks of two or three makers registered in their own names, and either obliged the legitimate American owners of the trade-marks to buy them off—in other words, to pay a specie of blackmail—or to change the marks on all bicycles exported to Germany.

"In a recent case, the trade-mark on a special brand of American preserved fruit was registered here by an outsider so that the real owner had to buy from the usurper the right to use his own trade-mark in this country.

"This abuse has become so notorious that a leading patent attorney of Berlin, writing in a recent number of the *Technische Rundschau*, says of the law that its effect is to legalize and facilitate the theft of a trade-mark. The obvious suggestion to all American exporters is that before exporting or seeking to export to Germany any kind of merchandise covered by a well known name, they should have such name or trade-mark duly registered in this country, where all such rights are carefully protected, and prosecutions for infringements easy and effective." This form of blackmail has been carried on in other European countries.

AN OLD TIME NEW ENGLAND HARDWARE SHOP.

Joshua B. Grant, who ran one of the most unique Hardware stores in this country, is at present enjoying life, though counting more than four score years passed in the peaceful town of Ipswich, Mass. His was a Golden Rule shop, and it paid well, for Mr. Grant is living comfortably on a well-earned competency.

His store was deep down in Blubber Hollow, in Salem, Mass., and it was established before the war. All men in Blubber Hollow in olden days were leather makers, and "Josh" Grant made a specialty of tanners' and curriers' tools and corresponding supplies at his old-fashioned store, and so it eventually became the headquarters of the "boss" tanners within its territory.

In the course of time, the frequent visit of the "bosses" to the store gave rise to the organization known as "The Senate." No like organization has been known since. It had no laws, no officers, no dues, and no membership list. A subscription was occasionally taken up to pay for the news and trade papers, or for a clam chowder supper, and Grant threw in the rent.

But the Senate was ideally managed, though it had no laws nor officers. The first man around in the morning opened the store and swept it out, and the last man out at night locked it up. If Mr. Grant happened to be late in arriving, or wanted a day off, any "boss" tanner who happened to be near the counter of the store supplied the wants of his customers just as faithfully, selling anything called for from a pound of nails to a kit of tools, and entered the sale on the books with all the care of its actual proprietor.

It must not be supposed that the Senators belonged to the community of loafers, not by any means, for they were men who had themselves made competencies at their several trades, and had for a long time dictated the market prices of leather in the Boston and New York markets. The Hardware store was in the nature of a Tanners' Exchange, for every market day morning they invariably met there and discussed the possible fluctuations in the market, and each man assisted in the decision finally arrived at.

On the walls of the store were chalked down daily records of the leading events, such as the date of the first snow, the coldest day, the highest price of leather, the biggest sale of leather, the date of the birth of an heir to a leading tanner, or the death of a well known man. Current events were frequently recorded as they seemed important to the man with the chalk, and the "boss" tanners and the storekeepers and clerks discussed them with such worldly wisdom and grave dignity that they deservedly won the name of "The Senate" for their unstudied gatherings.

But the ruthless hand of time swept away this golden era in the history of the store where all men were contented with their simple toil, knew not the strenuous pace of the present, and thoroughly enjoyed each other's fraternal society. Death took away, in ripened years, many Senators who loved their fellow-men as their brothers, and old friends were getting fewer as the years were getting more numerous. Grant finally adjourned the famous Senate *sine die*, at his Hardware store, and Blubber Hollow recognized the fact that it had lost a time honored and valuable institution that had exerted an influence of its own.

Probably few country stores have such a page in commercial history as this unique Hardware store of Joshua Grant. The Blubber Hollow tanners, ripe with experience, who gathered there daily, led the country in their especial industry and the Senate was held in high repute in Boston and New York. Besides, the retired sea captains of old Salem often visited the store, and amid congenial surroundings reeled off to the ancient gathering their tales of far distant China, the west coast of Africa, or the many broad oceans it was their fate to be familiar with. This remarkable store was closed up after the leather trade of Salem went west, in the eighties, and Mr. Grant retired to his Ipswich farm, where he still enjoys his life and revels in the memories of other days when greater activities provided the volume of the world's allurements with a gilt edge.

REDUCED RATES FOR THE SPRING BUYING SEASON.

The Merchants' Association of New York announce that the Trunk Line and Central Passenger Associations have granted its applications for reduced rates for the Spring buying season. The special fares will be in effect from the territory of the Central Passenger Association on February 6-10, inclusive, and February 27 to March 1st, inclusive, with a 30 day return limit, while Trunk Line Association rates will be operative on February 27 to March 1st, inclusive, and March 19-22, inclusive, with a return limit of 15 days. The reduced rate will, as usual, be one and one-third for the round trip, tickets to be sold on the certificate plan.

The Trunk Line Association territory extends from the New York-New England border west to Buffalo, N. Y., Pittsburgh and Erie, Pa., Wheeling and Parkersburg, W. Va., south to the Potomac River and the line of the Chesapeake & Ohio Railroad.

The Central Passenger Association has jurisdiction over the railroads in the territory west from the points named to the Mississippi River, including the cities of Chicago, St. Louis and Louisville, south to the Ohio River.

The request for concessions from the Southwestern Excursion Bureau, roughly described as the State of Texas, Indian and Oklahoma Territories and the State of Missouri south of the Missouri River, is still pending, the organization named not having been able to take action thereon until the Eastern and Western roads had agreed to concur in rates to New York. Efforts are now being made to have the General Passenger Agents of the Southwestern Bureau take an early vote on the proposition.

The Merchants' Association will shortly begin to circulate throughout the country a large amount of literature pointing out the advantages of the New York market, as also naming the dates when and conditions under which merchants can take advantage of the rates.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

From C. N. Barnes, Grand Forks, secretary of the North Dakota Retail Hardware Association, we are in receipt of the following communication, in which reference is made to the next annual meeting of the association and the excursion to Mexico which has been arranged:

Our next annual meeting will be held in Grand Forks on January 27, 28 and 29, one month earlier than ever before. The change in dates was made so as to give the dealers a better opportunity to get out of the country in the cold months if they so desire.

Last year, as you probably recall, our association, in conjunction with the Implement Dealers' Association of this State, got up an excursion to New Orleans and other Southern cities. This year we are going to Old Mexico, the capital city being the objective point. We will leave St. Paul on the Tuesday following the close of our meeting, going from there to Kansas City; from there over the Missouri, Kansas & Texas Railway, and pass through Kansas and Indian Territory; then into Fort Worth, Dallas and San Antonio, in Texas. Thence on the International & G. N. Railway to Laredo, at the boundary line on the Rio Grande River. The route from there to Mexico City will be over the National Railway to Mexico City. We will return by way of St. Louis and Chicago, stopping at such cities as the majority of the party may desire.

The excursion is being gotten up by the two associations, but the invitation is extended to all reputable business men, and we would especially be glad to have as many ladies accompany the party as possible. The cost of the entire journey will not exceed $115, and this includes the use of a Pullman sleeper from the time we leave Minneapolis until our return. Our experience has been that in going in a party we can see very much more for our money than in any other way, and it is much pleasanter traveling with congenial company than alone.

SAVAGE ARMS CO.'S 22 CAL. RIFLE.

The Savage Arms Company are sending the following letter to their friends and customers:

To DEALERS AND USERS OF SAVAGE ARMS AND AMMUNITION.

Our attention has been called to a circular issued by the Marlin Fire Arms Co., with reference to a claim of infringement of patents made against the Savage 22 Cal. Rifle. It is a significant fact that we have not been sued for the alleged infringement, but suits have been brought against two of our customers in New Haven, Conn. We have already assumed all responsibility of these suits and are able to take care of them and intend to do so. We have the services of able counsel and experts, who assure us that our 22 Cal. Rifle is not an infringement of the Marlin patents, and, indeed, this must be apparent to all who are familiar with, or will take the trouble to compare the Savage and Marlin Rifles. Marlin was not, by any means, the first to produce or make a take-down rifle. Our rifle is not like Marlin's, we are pleased to say. We assure you that we are able to, and will protect all dealers and users of the Savage 22 Cal. Rifles against all claims of infringement. We shall continue to maintain the high standard of excellence of our arms and rely, as we have heretofore, on the trade and public to recognize real merit.

SAVAGE ARMS COMPANY,
ARTHUR W. SAVAGE,
Managing Director.

This letter clearly defines the Savage Arms Company's position in regard to these alleged infringements. This new rifle, although only on the market for a few months, is regarded to-day as an extremely popular 22 caliber repeater; and we do not believe that any methods of this kind will in the least check its progress. It is the first rifle with the "trombone action" to handle the three lengths of 22 caliber cartridges, and this it does in a very successful manner by the use of a box magazine, which is unquestionably one of the most convenient methods ever employed for quick loading of the 22 caliber rifles. The many strong points that this rifle posseses has led to its exclusive adoption in all the shooting galleries on the grounds of the St. Louis World's Fair in 1904, including the most unique shooting gallery ever constructed, to be known as "Hunting in the Ozarks."

AN UP-TO-DATE MOVEMENT.

The American Shear & Knife Co., Inc., of Hotchkissville, Conn., will build an up-to-date club house on their own property, adjoining the factory, and will lease the same to the American Social Club, membership to which will be restricted to the employees of the company. The house will be 63 feet long and 30 feet wide. It will contain a parlor, sitting room, smoking room, pool room, bowling alleys, kitchen, buffet, bath room and toilet. The purport of the club is to encourage greater fellowship among its members. The pool room and buffet rights will be leased to some trustworthy party under control of the Board of Governors. No spirituous liquors will be permitted to be sold or consumed on the premises of the club. Rhine wine and beer will be the only alcoholic beverages allowed, and excess in the use of these will forfeit membership. There will be no bar for men to congregate around, but all drinks will be served from the buffet by waiter-service. Members may invite one guest at a time; but no non-member may visit the club more than once a month. On working days, service from the buffet will be permitted only from 12 noon to 1 p. m., and from 6 p. m. until 11 p. m., and not at all on Sundays. The wives and daughters of members will be given the privileges of the club very frequently. From the foregoing one must realize that the club is intended as the home of gentlemen, where orderly conduct must prevail.

NO DIVIDED ALLEGIANCE WANTED.

The invasion of the Chicago fire department by labor unions has aroused Mayor Harrison, who says it must be stopped. "In the mechanical branches of the city's service," said the mayor, "where the employe is simply a workingman, it is all right for him to belong to a union; but where the man belongs to a department, like the firemen or policeman, he has no right to have a divided allegiance. He must owe allegiance to only one master, the City of Chicago." The voicing of the mayor's sentiments along this line was occasioned by the receipt of an appeal from engineers of the fire department, asking for increased wages. The men seeking the increase are members of a union.

COLDWELL LAWN MOWER CO.'S ANNUAL DINNER.

The annual complimentary dinner, given by the Coldwell Lawn Mower Co. to their employees, took place at The Palatine Hotel, Newburgh, N. Y., on December 9, when an admirable opportunity was afforded of witnessing the amicable relations which exist between employers and employed.

On that occasion nearly 140 men sat down to what was one of the finest dinners given in this city for years. These men, with members of the company and a few invited guests, listened to a series of addresses in which the success of the company was very properly extolled and facts were related which tend to show that there are the best of reasons why all the Coldwell people should be on the best of terms with each other. There has never been any labor trouble at the factory of the company and the secret of it is the single word "Co-Operation."

The dinner this time also partook of the nature of a welcome home to Wm. H. Coldwell, the treasurer of the company, who recently returned from a trip to Europe. At 8.40 to the music of the Neapolitan Quartette of New York, the members of the large "family party" entered the dining room and took their places at the tables. During the dinner which followed, the musicians, two of whom were mandolinists, the others playing guitars, furnished beautiful music. They also sang several selections to their own accompaniment in an artistic manner. At the head table were the following gentlemen: District-Attorney-elect A. H. F. Seeger, who presided as toastmaster; Thomas Coldwell, the honored president of the company bearing his name; A. D. Clinch, of the New York firm of Underhill, Clinch & Co., representatives of the company; Hon. Howard Thornton, Albert S. Peirce, Edward C. Ross, I. B. Sweigart, of Philadelphia, Pennsylvania agent for the company; Harry T. Coldwell, Wm. H. Coldwell, O. M. Cleveland, Albert W. Mapes, Lewis M. Smith, ex-Alderman Edwin T. Smith and Gavin R. M. Wilcox.

Mr. Seeger called the assemblage to order, and at his request Mr. Clinch invoked the Divine blessing. During the

Toastmaster's Address.

In opening the speechmaking Toastmaster Seeger made an extended address. He said that it was rather an unusual thing to find the employers and employees of a manufacturing concern sitting together at a festive board. But good results had followed events of this kind by this company in the past and it would be a good thing for other manufacturing institutions to follow its example. "All work and no play," exclaimed Mr. Seeger, "makes Jack a dull boy." There is little play, he added, in the busy season, and this fact is appreciated in all the walks of life.

On this occasion those present wanted to welcome one who was prominently identified with the Coldwell Company upon his safe return home from abroad. This would be done, although the gentleman referred to had said it would probably have been a good thing if he had stayed away altogether, as the company and its men had got along so well without him. Still, they were all glad to see Mr. Coldwell back again.

Mr. Seeger next referred to some of the great changes that had taken place in the industrial world in the last half of the last century. He said it was less than half a century ago since sewing machines and lawn mowers were first built. The first of these were crude in construction and their use was almost unknown at first. It was only by persistent work that the utility of the sewing machine and the lawn mower became known. Then large industries had sprung up for their manufacture. The lawn mower had accomplished out of doors what the sewing machine had accomplished in the house.

This industry came from small beginnings. While all the money coming from it is not distributed here, a large part of it is left in this city and goes back in trade through the homes and families built up by it. It is a pleasure to know that this institution has never had a labor difficulty; that is a remarkable achievement and speaks well for both sides interested.

In conclusion the toastmaster said that there was one among the number present who wished to say something on the subject that had brought them all together—to extend a welcome to a returning employer, Wm. H. Coldwell. He then called out George F. Knowlden, an energetic and bright young machinist at the factory of the Coldwell Lawn Mower Company.

Cordially Welcomed Home.

Mr. Knowlden spoke in part as follows:

"Mr. Coldwell: The employes of the Coldwell Lawn Mower Company have chosen me to say a few words expressive of our feelings at your safe return. While I have reluctantly accepted the honor, I must say that I do not admire their judgment in making such a selection from the array of talent

WM. H. COLDWELL.

which they must have overlooked among the gentlemen in the employ of the company.

"The greatest blessing in life is to love our friends. To know men and be known by men is not sufficient to satisfy the longings of our hearts. A mere intellectual acquaintance may be satisfactory but the real joy and happiness of life is genuine friendship; friendship that makes the eye sparkle and the heart beat with greater rapidity when we look into the faces of our friends.

"We welcome home to-night, from a far-off shore no mere intellectual acquaintance, no formal acquaintance who has been with us for a short time and then passed out of memory, but we welcome home from a foreign country one whom we love, one who has been to us a friend, faithful, tried and true. And as we look into his countenance, our eyes brighten, our pulses beat faster, and our whole being expands with the joy of our welcome.

"We greet you, sir, as one who knows us and who knows our daily life, our constant efforts, our labors and our joys. We greet you as one who has done much to make our daily lives happy; one who has appreciated the earnestness of our efforts and assisted us to perform properly and well our daily work. We welcome you as a friend whom we shall never forget, one whom we shall always love with all the sincerity of our best affections. You have crossed the seas, you have been in foreign lands, you have been among strange people and new scenes, for the purpose of regaining that health,

Digitized by Google

with which you have been wonderfully blessed. And we trust that you have come back to us as fully improved as you hoped and expected. Although you were separated from us by thousands of miles and a wilderness of water, yet your memory has ever been with us, and it has been almost as though your bodily presence was still with us. Your kindness of the past sweetened our labors during your absence, and while we have missed you from our sight, you have ever been present in our hearts. It gives us great happiness to clasp your hand once more and welcome you again to your happy home and your chosen field of labor. And here to-night, in the presence of your friends, who trust, appreciate and respect you, we give you thrice welcome to the city and to our common field of labor, and we sincerely hope that all the pleasant experiences of our past relations, may constantly increase, as the days go by, and that this business institution in which we are all interested may go forward to a prosperity which shall be greater even than its past achievements. And now again, thrice welcome to you as you again enter our homes, our lives and our hearts."

An outburst of applause followed this cordial and well expressed welcome home.

Brief and to the Point.

The toastmaster here referred to the gentleman thus welcomed as a distinguished county official and manager of an extensive business, Wm. H. Coldwell. He then called upon that gentleman to respond to the address of Mr. Knowlden.

Mr. Coldwell spoke briefly, but to the point. He said he had almost been born in a lawn mower shop. He told of some incidents of his boyhood, in which Ed. Smith, Mr. McCollum, J. Scott Wiseman and one or two others had figured. He then said that while he was in Switzerland he had received daily reports to the effect that the shop was turning out from 400 to 500 lawn mowers a day, twice the number of any other company in the world. With this showing he had been very much pleased. Mr. Coldwell returned his thanks to all for their very kind welcome, and said that if Mr. Knowlden had talked five minutes longer his (the speaker's) father would have given him his job. Mr. Coldwell, too, was heartily applauded.

On Co-operation.

The toastmaster next introduced Arthur Coldwell, of the lawn mower shop, to speak on the subject of "Co-operation."

After some pleasant preliminary remarks, The solution of "Co-operation." He said that "Co-operation" prevailed at the works of the Coldwell Lawn Mower Company and one of its fruits was the good fellowship which prevailed between employers and employes.

The next speaker was Alfred D. Clinch, of Underhill, Clinch & Company of New York, who had long transacted business with this company, and is a prominent member of the Hardware Club of the metropolis.

Mr. Seeger called out Gavin R. M. Wilcox of the Coldwell Wilcox Company, and the president of the Newburgh Business Men's Association.

The Crowning Feature.

The toastmaster next said that the crowning feature of this gathering was the presence of the founder of the lawn mower business and of this company. No man had commenced life any humbler or had encountered greater obstacles than Thomas Coldwell. He had commenced at the bottom of the ladder and had succeeded in building up a great trade. At first people did not know what lawn mowers were and it had been necessary for Mr. Coldwell to get them in a frame of mind to buy them. His success in business had been attended by a loss of health, but now the business, is in such a condition that it is taking care of itself and Mr. Coldwell can devote time to an effort to restore his health. Mr. Seeger expressed the hope that in this effort also Mr. Coldwell would meet with success. He then called upon that gentleman to speak on the topic of "Success."

Address of Thomas Coldwell.

Mr. Coldwell said he was glad to be able to be there although there was nothing for him to do on account of the flow of eloquence that had gone on. He termed "Success" a big subject, but handled it earnestly, ably and well. He expressed the opinion that there never was a time in the history of the world when there was such a chance for a young man to succeed as now, and that no country offers the opportunity to him to succeed as this. He told incidents to show that English people of intelligence fully appreciate the advantages of the United States in this respect. We see this, he said, in some great Presidents, who had come up from poor boys, and by energy and industry had fitted themselves to hold the highest position in the gift of the nation.

One of the greatest elements of success, the speaker said, is a fixed purpose. In Georgia he had found five students who did not know what they expected to do in life. The greatest men who had ever lived, merchants and manufacturers, had formed a fixed purpose in life early. In this country the opportunity to succeed is given to every man and heredity and luck have nothing to do with success. Another thing is for a man to do the best he can. In a factory there are a few men who do their work thoroughly. They get the best pay and continue to work while others are laid off. The concern that makes the best goods makes the most money. This is the case in regard to the Maydole hammer and the Ames shovel.

THOMAS COLDWELL.

Third—A thing that is worth doing at all is worth doing well.

Another thing which tends to success is industry. There is too much at present of the boy who wants something for nothing, and of the one who prefers to work in a dry goods store for $4 a week so he can wear a starched shirt and not have to soil his hands with real work.

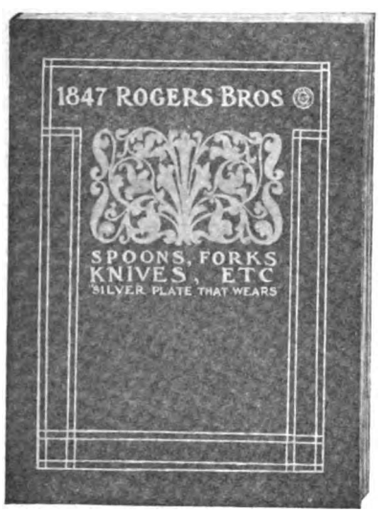
Another thing is economy. There are young men to-day who waste fortunes for things they could do without. The speaker cited Rockefeller, who when he was making three dollars a week, saved a good part of it. There is, Mr. Coldwell said, a vast difference between the man who pays interest and the man who takes it. If a young man at 20 saves $100, it will amount to $200 when he is 35, to $400 when he is 50 to $800 when he is 65. When he reaches the age of 100, if he lives so long, the amount will be $1,600. Save something, save early in life, earnestly urged Mr. Coldwell. He said that at six per cent. $1 will in 100 years amount to $340, and at eight per cent. it will be $2,000 at compound interest.

It is the same way with labor. Every day of work, when a young man gives a day of rest after passing the age of 60 years.

To succeed, he said, a man also needs character, and without it he will make a failure of life. "Pull" is good as long as we hang on to the rope. But when we let go of the rope

Digitized by Google

we are lost. Success with a product lies in the character of the work put into it. The man who leaves out the Ten Commandments and the Golden Rule will never succeed.



So don't think that you are simply laboring men, but determine to make your mark and better your position. The lower your position is when you start the greater will be the honor when you get up. Have a character and work hard and you will benefit yourself more than anybody else. Then, too, have a purpose. Make up your mind to do right and do it or die. That is what brings success and builds up a man as well as benefits him.

Great applause followed the intensely earnest, and really beautiful address of the genial and successful Mr. Coldwell.

The final speaker at the dinner was Hugh McCollom, one of the well known employes of the Coldwell Lawn Mower Company. He, too, told of the pleasant relations, which exist between the members of the company and its employes, and expressed a hope for the continued success of the company. The event was a particularly enjoyable one and reflects great credit upon company and employes alike.

"1847 ROGERS BROS." NEW CATALOGUE.

THE INTERNATIONAL SILVER COMPANY, Meriden, Conn., have issued for trade distribution a handsome booklet exploiting their 1847 Rogers Brothers plated silver ware. The illustrations are presented in groups which are arranged in an artistic manner that does credit to their goods. The cover, also, is a very fine one, showing the hand of the artist. We give herewith an illustration of it. The newer designs in "1847 Rogers Brothers" brand equal the best sterling silver in pattern, in finish and general excellence of making.

They have the shape, style and general appearance that can only result from long experience, combined with the determination to produce the best at whatever cost. Anything bearing the "1847 Rogers Brothers" stamp is guaranteed to give satisfaction in every particular; the reputation and financial standing of the largest makers of silver plate in the world is back of every piece bearing this trade mark, wherever bought. One may, with safety, buy from any dealer, any silver wear bearing the "1847 Rogers Brothers" trade mark, without argument or further investigation.

♣

A HANDSOME CALENDAR.

Harrington & Richardson Arms Co., Worcester, Mass., publish a calendar showing a handsome and attractive figure of a young lady of blonde persuasion, in evening reception dress of the most fashionable style for the central attraction of the artistic display; a handsome screen depicted by the artist, forms an admirable background for the display of feminine loveliness. The calendar proper is expressed in large figures in monthly installments, being attached to the picture alluded to; the name and address of the company embossed in the lithograph being accompanied by an illustration of a gun and revolver to identify the advertising. Readers mentioning HARDWARE while the supply lasts, will have one of the above mailed to them on application.

"WAY DOWN EAST" TRADE NOTES.

(From our Traveling Correspondent).

It may be true that there has been depressing fluctuations in the market price of securities in Wall Street—and there may be some nervous manufacturers who are reducing their output and rearranging the scale of wages in their mills; and in some parts of the country there may be a falling off in trade, but none of these things seem to have affected the Hardware dealers in Eastern New England.

Business has been exceptionally good all Summer in Maine, and Fall trade is larger than usual. This at least is the report from the jobbers in Boston and is confirmed by those of Portland and Bangor.

Rice & Miller, of Bangor, Me., are one of the representative jobbers of New England. In speaking of trade conditions Mr. Rice said: "Business has been good all Summer, and Winter trade has opened well. The demand for lumbering supplies is as good as in any former year." Rice & Miller carry an extensive stock and enjoy a good retail business which is carried on in connection with their jobbing trade. The sporting goods department is looked after by W. L. Miller, assisted by Robert O. Burr, who is recognized as one of the best-posted gun and fishing tackle men in New England.

Another well conducted Hardware business of Bangor is that of W. P. Dickey & Co. In addition to a general line of Hardware a very complete stock of paint, oils and glass is carried, as well as sporting goods. Fred. Dickey, of the firm, looks personally after the outside end of the business.

A new and very attractively arranged store is now occupied by the old established Hardware firm of Haines & Chambers Co. As this firm cater especially to wholesale business, the offices are arranged in the front half of the store, being partitioned off from the main store. The retail department is well fitted with up-to-date Warren glass covered shelving, which gives an exceeding bright and neat appearance to the store. Large plate glass show cases run the entire length of one side. A power elevator is in the middle of the store and all shipments are made from the rear. This concern's jobbing trade extends all through Eastern and Northern Maine.

One of the largest Hardware concerns in New England is located in Portland, Me. It was only about 25 years ago that Edwards & Walker opened, (then comparatively) a small Hardware store. The business has grown rapidly, until today the Edwards & Walker Co. occupy nearly a half block—in all about 9 or 10 single stores—and this in the heart of the best business part of Portland. This rapid growth is most remarkable and unusual among Eastern concerns. In the West, where the country has been fast building up by new settlement, business houses have grown, simply could not help but become large concerns. But here in Maine, where little new building is taking place, where merchants are near the source of supply, to see such development in a few years' time is proof of exceptional business ability and remarkable energy. The Edwards & Walker Co. are constantly enlarging their business by broadening the lines of goods carried.

Under the sign, "Eighty Years a Hardware Store," Talbot, Brooks & Ayer carry on a good retail business. This is one of the oldest Hardware establishments in Maine.

King & Dexter Co., of Portland, are a Hardware firm who believe in window advertising. The windows are large and in the rear and on the sides are plate glass mirrors, the woodwork being in oak. A very good line of carpenter's tools and supplies was recently being displayed by The King & Walker Co.

At 8 Free Street is the old established Hardware concern of N. M. Perkins & Co. This business now is owned by F. S. Bullard and W. G. Newhall. In speaking of trade conditions Mr. Bullard said: "We have no kick to make about trade. Business has been good. We sell the best lines of paints and oils and do a nice business on photographic supplies." In this latter line a complete stock of cameras and films are carried.

The Emery-Waterhouse Co. are a wholesale Hardware concern occupying the three large stores 143-5-7 Middle Street, and from Portland travel in most every part of Maine.

Out on Forest Avenue, Portland, C. Madison and W. A. Allen conduct the Hardware business known as Madison & Allen. A general line is carried and an up-to-date tin shop

Digitized by Google

is maintained. Plumbing supplies and stoves are found to be a practical and profitable side line in connection with Hardware.

Manchester, N. H., has always been a good shopping centre. As a wholesale distributing point it has gradually become more prominent. In no small measure is this due to the success of the J. B. Varick Co. as a jobbing Hardware concern. This concern have now become known as carrying as large a stock and as complete a line as any other jobber—complete and prompt shipments together with close attention to customers' wants and customers' interests have been the factors that have built up the jobbing end of the Varick business. The stock carried by the J. B. Varick Co. represents everything that is suggested by the modern use of the word "Hardware." In addition to this a big line of silverware and jewelry, cut glass and leather goods is carried. On the second floor a splendid line of fur coats, robes and horse blankets is shown. The fur coat business of the concern is very extensive, more than 500 being sold annually. The sporting goods and bicycle departments are also on the second floor. The wholesale stock is carried on upper floors and in warehouses adjoining, altogether the store is exceedingly attractive, being modern in its fittings, with modern methods.

W. H. Underwood, who is the genial manager of the Manchester Hardware Co., said that he could make no complaint of business. "Our country trade is good," he continued, "collections being fully as good as in former years, and the outlook is for a profitable Winter trade." The Manchester Hardware Co. have recently changed the arrangement of their store, and have very much improved the appearance of it.

Another dealer of Manchester is T. J. Briggs, who carries a general line of Hardware.

Furnaces and stoves are dealt in largely by Pike & Heald Co., who are one of Manchester's largest concerns handling the line.

F. A. Dusting & Co. carry in addition to general Hardware a full line of paints, going extensively into mechanics' tools.

W. E. Goodwin is another of Manchester's exclusive retail Hardware merchants, and a good line of Builders' Hardware forms part of their stock.

Hardly one complaint was heard through New England of poor business; a few dealers told your correspondent that although the volume of business was somewhat less than in 1901, still the profits were more, as new and more profitable lines had been added. HAMMERNAIL.

CANADIAN WHOLESALE HARDWARE ASSOCIATION.

A largely attended meeting of the Canadian Wholesale Hardware Association was held in Montreal on Tuesday, December 15. Almost every house in Canada connected with the association was represented. In the absence of President F. O. Lewis, of Lewis Bros. & Co., Montreal, who is now in England, the chair was taken by Vice-President John Bowman, of London. The following gentlemen were present at the meeting:

John Bowman, of The J. Bowman Hardware Company, London; Thos. Birkett, Sr., of The Thos. Birkett & Son Company, Limited, Ottawa; C. A. Whitman, of The Hobbs Hardware Company, London, Ont.; T. H. Newman, of Caverhill, Leamont & Company, Montreal; T. G. Dexter, of H. S. Howland, Sons & Company, Toronto; C. M. Strange, of Lewis Bros. and Company, Montreal; Wm. Starke, of The Starke Hardware Company, Montreal; T. B. Lee, of Rice, Lewis & Son, Toronto; Alfred Jeannotte, of L. N. Hebert, Montreal; James Hardy, of Jenkins & Hardy, Toronto; A. Lemieux, of Chinie Hardware Company, Quebec; William Vallance, of Wood, Vallance & Company, Hamilton; J. Seybold, of Seybold, Sons & Company, Montreal; J. S. Farrell, of The American Steel & Wire Company. A large amount of routine business was transacted.

THE HERCULES POST HOLE DIGGER.

When a manufacturer has achieved an honorable reputation for manufacturing a reputable article, which by expensive advertising, creates a field of its own, and meets with ready sale wherever introduced, the most irritating condition that confronts him, is to find that dealers, who should support his integrity of purpose, lend themselves to the foisting of the cheaper imitations of his competitor on their customers, which they are able to do, only by conveying the idea the article offered is the one called for. Such treatment has called for the following cautionary letter to the trade:

To the Hardware Jobber—

Dear Sirs: We learn there is a digger being offered that is practically an exact imitation of our Hercules, and that it is offered under that name, and also being sold by some jobbers under that name. We therefore appeal to your sense of honor, under no consideration to offer that Digger as the Hercules Digger. That name belongs to us as applied to Post Hole Digger. Our attorneys have advised us that the Courts are very liberal in protecting manufacturers against the use of trade names by competitors who imitate their goods and try to take their trade by offering them under the same or similar names that would confuse the dealer and the public. Also as against parties who sell them under the same name. The name of Hercules must not be used in offering Post Hole Diggers except for our make, nor even a similar name that is liable to confuse dealers and the public. The imitation has blades made of soft steel, with no edge whatever, which will make it difficult to dig with. We will protect you on prices against these imitations. We solicit your valued orders, and wishing you the compliments of the season, we remain, Yours respectfully,

F. E. KOHLER & Co.

ADDITIONS TO THE SLAYMAKER LINE OF PADLOCKS.

William Wilcox Mfg. Co., of Middletown, Conn., have sold their entire padlock and French Rim Dead Lock business, including tools, balance of stock, good will, etc., to S. R. Slaymaker, manufacturer of Padlocks, Night Latches and Hardware specialties, of Lancaster, Pa., for whom John H. Graham & Co., No. 113 Chambers Street, New York, with offices at San Francisco, Cal., London, Eng., and Copenhagen, Denmark, are general sales agents. The Wilcox Mfg. Company were the only makers in the United States of French Rim Locks; their line of Padlocks having been known as one of the leading lines in this country (they having been, at the time of their retirement, the second to the oldest makers of such padlocks in the United States) and there has been added from time to time such padlocks as were necessary to keep fully up to date. The addition of their lines of padlocks and French Rim Locks to the line as already made by S. R. Slaymaker, will give the Slaymaker factory a considerably larger variety of these goods, and places them in position to fill orders practically for every type of padlock now on the market. We are informed that deliveries of French Rim Locks and of the Wilcox Padlocks can be made by S. R. Slaymaker immediately after the first of the year and that all orders for the Wilcox line should in future be sent either through John H. Graham & Co., as sales agents or direct to S. R. Slaymaker's factory.

BUFFALO TRADE NOTES.

The International Aluminum Company has been incorporated at Buffalo, N. Y., with a capital of $10,000, to act as wholesale and retail dealers in aluminum and its products and articles manufactured therefrom. The directors are Clarence A. Nelson, William H. Dunn and Albert A. Fennyvessey, all of Buffalo.

♣

The Buffalo Electric Supply Company and the Buffalo Electric Construction Company have been incorporated at Buffalo, N. Y., each with a capital stock of $5,000. The directors for both companies are Lawrence J. Mayer, Joseph B. Mayer, Jeremiah J. O'Leary, William J. Niles and Peter C. Schatrum

♣

The National Gate Company has been incorporated at Deansboro, N. Y., with a capital of $15,000, for the manufacture of patent automatic gates. A factory will be erected at once and equipped with power drills, forges, pipe cutting and threading machines, saws, etc.

♣

A gentleman should always be known by the company he keeps.

RECENT TRADE PUBLICATIONS.

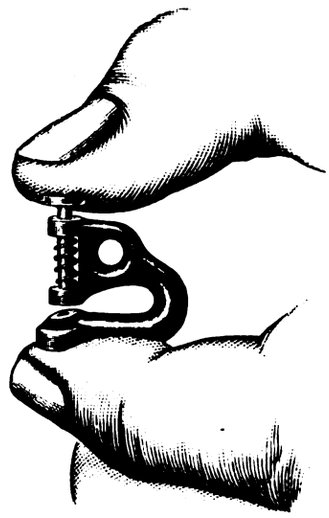
THE BALDWIN REFRIGERATOR CO., Burlington, Vt., have recently issued a very fine catalogue containing 96 pages, devoted entirely to their Dry-Air Refrigerators, metal, spruce and porcelain lined refrigerators and sectional coolers. The Baldwin Company manufacture 150 popular styles and sizes in hardwood and softwood, a larger assortment, they claim, than is manufactured by any other concern, and the dealer who handles the Baldwin, they state, is not obliged to purchase from several sources in order to get a sufficient variety to meet the wants of his different classes of customers. The Baldwin positive circulation consists of a long flue through which the cold air enters bottom of storage chamber. The cold air falls to the lowest point through an air-duct or flue, and entering the provision compartment displaces the lighter air, forcing it upward through the provision chamber to its highest point, where it escapes through an air-duct into top of ice room. The constant falling of the coldest air through the long flue, and the rising of the lighter air creates a positive circulation of pure, cold, dry air upward through its provision chamber, carrying odorous gases or vapors arising from the contents instantly into the ice chamber; all moisture and impurities are condensed on the ice, passing off through a drip pipe. The coldest and heaviest air having thus been relieved of all moisture and impurities, enters the provision room perfectly pure, cold and dry, the three necessary conditions for the preservation of any perishable article. The catalogue gives, besides illustrations of the refrigerators, views showing the circulation of air. Those interested will find much useful information in this catalogue, which the manufacturers will be glad to send upon request.

CORTRIGHT METAL ROOFING COMPANY, Philadelphia, Pa., and Chicago, Ill., are sending out an extremely handsome catalogue, being a book of ideas and suggestions about roofing for anybody who wants a good roof; telling why you ought to prefer Cortright roofing. The cover of the catalogue has on it a picture (somewhat reminding one of a certain picture of Spotless Town fame) of red roofs underneath which is inscribed "The Clinching Argument Concerning That Roof." The book itself is a work of art, the pictures throughout being made from photographs of buildings covered with Cortright roofing. It does not aim to tell the architect how to plan, or the builder how to build, or the roofer how to roof, but they do aim to convince all three, and the owner to boot, that if they "want a good roof that satisfies, they want Cortright Metal Roofing." The Cortright Roofing, by its special patented features, automatically expands or contracts without the slightest injury to the material or to its absolute storm proof tightness. The tightness of the Cortright roofing is its strongest feature. For the past eighteen years it has "been tested in the tornadoes of the tronics, the hurricanes of the West, and in the snowy gales of the North, and never has been found wanting in its power to do its duty as a protection from the elements." The booklet above referred to will be found very valuable for those interested in roofs.

THE F. B. SHUSTER COMPANY, New Haven, Conn., are sending out a very fine catalogue of 70 pages devoted to their straightening, cutting and riveting machinery, and machinery and tools for the manufacture of Hardware, bicycles, sheet metal, saddlery and wire goods; special automatic wire and sheet metal forming machinery; blanking, drawing and combination dies, sub-press, drop and forming dies and tools. The catalogue is a high grade one and the illustrations, of which there is a large number, are very fine, showing simply one machine of a certain class, representing one of the several sizes and styles of machines built by the F. B. Shuster Company. They also illustrate some of the special types of straightening and cutting machines for handling strip and sheet metal which they have at different times, been called upon to build to suit the requirements of their customers.

THE DAVID BELL ENGINEERING WORKS, Buffalo, N. Y., have recently issued an attractive catalogue under the title of "Bell's Steam Hammer," devoted exclusively to steam hammers, which they make a specialty. They are manufactured in twelve sizes, ranging from 250 to 1,600 pounds falling weight. These hammers are used by manufacturers of architectural iron, agricultural implements, bolts and nuts, bridges, bricks, boilers, cars, couplings, conveying machinery, car wheels, chemicals from wood products, engines, edge tools, electrical machinery, fire engines, forgings for mill machinery, machine tools, oil-well tools, plantation machinery, polished shafting, plumbing supplies, safes, steam pumps, ships, scales, stamped wares, etc.; also by miners of coal, copper, iron, etc.; stone quarries, dredging contractors, rolling mills, tin plate mills, etc. There are interesting descriptions and many finely engraved half-tone illustrations in the catalogue, copies of which will be sent to anyone interested in this class of manufactures.

THE CROSBY COMPANY, Buffalo, N. Y., in their 1904 catalogue of bicycle parts present a most attractive booklet of 44 pages. The company call attention to the fact that they have established themselves in a new home, 177-187 Pratt Street, a large and splendidly lighted factory building, which they have equipped with an electric power plant, and are running with power generated at Niagara Falls. In addition, they maintain an auxiliary steam power plant, so that the danger of a breakdown is reduced to a minimum. The company make a point of carrying in stock a considerable quantity of all those pieces which may be properly termed standard, such as head sets, fork crowns, rear fork ends, chain adjustments, frame braces, and the heads, clusters and crank brackets for their regular 1 inch and 1⅛ inch frames, both flush and outside joint. They are therefore able to make prompt shipment of orders for all such parts. All other pieces must be made to order, but this ordinarily does not cause much delay, owing to the large stock of steel of all sizes constantly carried in stock.



CIRCULARS, ETC. Among the large number of circular and similar matter which has been brought to our notice are the following:—THE SUNLIGHT LAVA MANUFACTURING CO., Chattanooga, Tenn., a circular illustrating and describing their Sunlight Acetylene Burners; several from IWAN BROTHERS, Streator, Ill., exploiting their serrated hay knives, post hole and well augers, volcano revolving and ventilating chimney pot and drain cleaner; FOX TYPEWRITER CO., LTD., Grand Rapids, Mich., on their typewriter ribbons; THE DIAMOND SAW & STAMPING WORKS, Buffalo, N. Y., two attractive folders illustrating, describing and pricing their Hack Saw frames and hack saw blades; COSMOPOLITAN LIGHT CO., 41-45 State Street, Chicago, Ill., a card regarding their mantles; SPRING STEEL FENCE & WIRE CO., Anderson, Ind., folder exploiting their Shimmer fence; KENOSHA JACK MANUFACTURING CO., Kenosha, Wis., and 11 Warren Street, New York, folder regarding their auto-jack; SAWYER TOOL MANUFACTURING CO., Fitchburg, Mass., circular regarding their Prouty wire valve wheel; THE DAISY MANUFACTURING COMPANY, Plymouth, Mich., folder referring to their Daisy air rifles; J. STEVENS ARMS & TOOL CO., Chicopee Falls, Mass., folder illustrating and pricing their No. 165 Shotgun; THE BLUFFTON MANUFACTURING CO., Bluffton, Ind., 6 leaf folder illustrating and describing their washing machines; DAVIS ACETYLENE CO., Elkhart, Ind., circular exploiting their lump feed generators; OHIO COOKER CO., Toledo, Ohio, two folders illustrating and describing their wire-cone incandescent toaster and their household damper-radiator; KANSAS CITY HAY PRESS COMPANY, Kansas City, Mo., a large circular extensively illustrating their line of hay-presses; F. & G. HAAG & CO., 170-172 Center Street, New York, large double page circular having reference to their line of razors, razor strops, shears and clippers; NASHUA NOVELTY WORKS, Nashua, N. H., a 30 by 15-inch circular of illustrations of their opera and folding chairs, giving descriptions of same, and a small circular from the SAWYER TOOL MANUFACTURING CO., Fitchburg, Mass., referring to their key seat rule blocks No. 27.

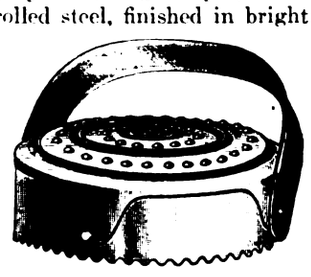
NEW GOODS AND SPECIALTIES.

THE NATIONAL CARD PUNCH.

Matt. Redlinger, Freeport. Ill., is the manufacturer of the clever device which we illustrate, showing a convenient punch that may be carried on a key chain, and which will be found useful for marking books, cards, tags, checks, etc. They



NATIONAL CARD PUNCH.

are marketed under the name of the National Card Punch, are accurately made, and neatly finished in nickel plate. They are put up on cards holding one dozen, and are designed to be retailed at 25 cents each. Dealers will find a number of other salable specialties made by Mr. Redlinger, who, upon request, will forward complete set of circulars, giving detailed information.

THE IDEAL CURRY COMB.

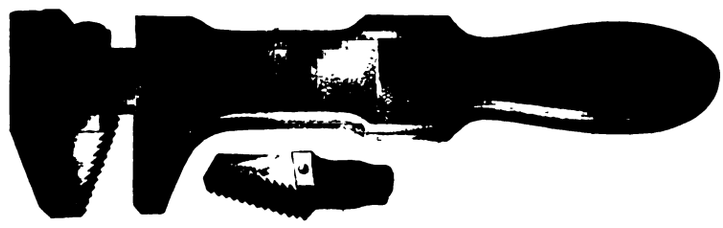
The Metal Stamping Company, Niagara Falls, N. Y., are the manufacturers of the Ideal Curry Comb, an illustration of which is given herewith. This serviceable article is really a combined curry comb and scraper, made of the highest quality of cold rolled steel, finished in bright colored enam-

IDEAL CURRY COMB.

els, the tin top with which it is crowned, being in brass finish. It is designed to be a handy curry comb and yet one capable of rapid and thorough work. It is well adapted to use one in each hand, and is a perfect self-cleaner. By revolving the body within the handle it can be changed from a comb to a scraper and back again in a second. As a scraper or rubber it is claimed to be a perfect tool for grooming a clipped, nervous or thin-skinned horse, or for cleaning the legs or other irregular surfaces. It is always ready, does not get out of order, and will last with care indefinitely.

THE SIGNAL MAIL BOX.

The Signal Mail Box Co., 104 Benton Street, Joliet, Ill., are placing upon the market, through the Hardware trade, the Signal Mail Box, designed especially for the Rural Free Delivery. We give an illustration herewith. It is substantially constructed of larger size than usual with this class of specialties, and quite handsome in appearance. Having had the special endorsement of the postmaster general, it has already become well and favorably known. It is claimed that carriers prefer it on account of its roominess, and from the fact that its construction makes it unnecessary to leave the wagon when depositing any mail. As the manufacturers make its sale an easy one by advertising its meritorious features in the leading journals, it is a favorite mail box with wide awake dealers who are glad to gain increased sales without increased expense. Dealers desiring to add this



SIGNAL MAIL BOX.

mail box to their line of salable specialties, should correspond at once with the manufacturers as a sample box to show would instigate more sales than a simple description. The advertisement of the company will be found elsewhere in our columns.

PIPE WRENCH ATTACHMENT.

The Billings & Spencer Company, Hartford, Conn., are introducing to the tool trade the pipe wrench attachment illustrated herewith. It is intended for use on the B. & S. 6 and 8-inch adjustable wrenches. It consists of a serrated tool steel jaw, with a tempered spring attachment, which serves to hold the jaw in place. The attachment is easily removed and can be used for either right or left hand threads by simply reversing its position on the wrench, or, if prefer-

PIPE WRENCH ATTACHMENT.

red, by changing the working position of the wrench. This useful addition to the equipment of these wrenches makes it possible to convert them into pipe wrenches in a few moments, and they can be used on pipe up to and including ¾-inch in diameter.

YAWMAN SASH LIFT AND VENTILATOR.

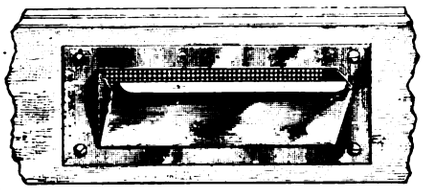
The Rochester Automatic Oiler and Supply Co., Rochester, N. Y., are introducing through the Hardware trade the Yawman Sash Lift and Ventilator, of which illustrations are here presented, it being the latest device for furnishing

FIG. 1—VENTILATOR CLOSED.

fresh air and perfect ventilation to offices, schools and private residences. The "Yawman" Lift is made of brass

Digitized by Google

plate and highly finished in polished plain brass, plain nickel, copper oxydized bronze or ebony. Screws to match finish are furnished with the lift. The lift can be fitted to any



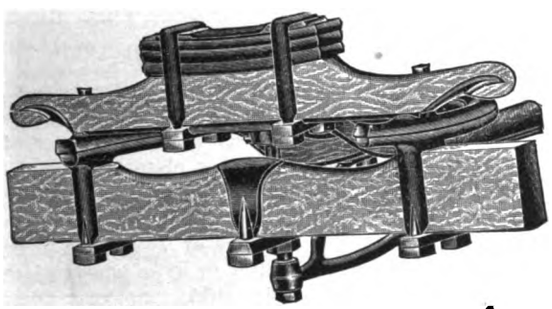


FIG. 2—VENTILATOR OPEN.

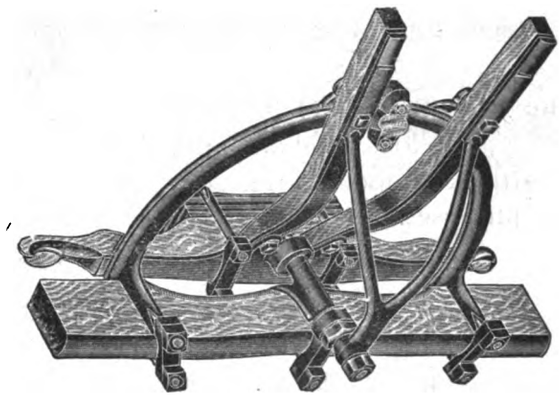
sash measuring three inches or more. The ventilator consists of a brass plate, as shown in Fig. 1, fastened on the inner side of the bottom rail of a window sash. The part that serves as a lift is curved at the top so as to afford a convenient means of raising the sash with the hands. An opening 4½ inches long and 1 1-2 inches wide is made entirely through the window sash, as shown in Fig. 3, and on the opposite or outside of the sash, covering this opening, is screwed a perforated brass plate, so as to admit the free passage of air. By pulling forward on the curved projecting piece, as shown in Fig. 1, the ventilator is opened as in Fig. 2; a glimpse of the outside perforated plate being given in Fig. 2. The ventilator can be left open little or much, as desired, the window remaining securely fastened and locked in position at all times. The "Yawman" ventilates without a direct draft and furnishes fresh air night and day. It can be fitted to a window by any one competent to use a brace and bit. On large windows two lifts may be placed, one at each end. Having no springs or parts to get out of order, and being made of solid brass, which does not rust, makes it a desirable specialty to sell.



NEW REAR KING BOLT DEVICE.

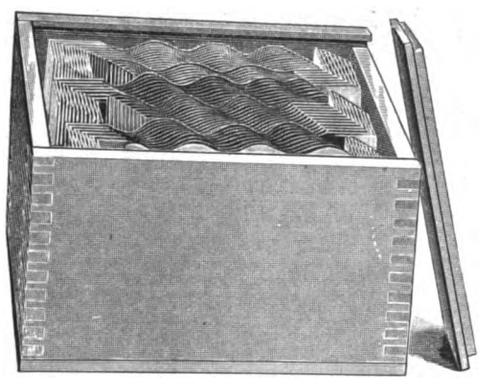
The Columbus Bolt Works, Columbus, Ohio, have recently invented and are now manufacturing a new Rear King Bolt Device that they claim will supercede both the center King bolt and the rear King bolt devices upon the higher grade of vehicles. We give illustrations herewith showing the prospective front view and the prospective rear view. It will be noticed that one leg of the King Bolt continuing downward to the brace and upwards into the projection on the rear side of the head block plate is made the axis upon

PROSPECTIVE FRONT VIEW.

which the axle turns. Beside the advantage of the vehicle turning in a shorter space the objection of the key bolt passing through the spring, it is claimed, is entirely obviated. Probably more trouble and annoyance grows out of the King bolt projecting through the head block and the spring on high grade work than any other part of the vehicle. Another great advantage is the facility with which it can be adjusted, as a little difference in the size of the wood can be taken up with the nuts upon the leg of the King Bolt which, as before noted, comprises the pivots upon which the axle turns. The upper projection is made necessarily small in order not to cut away too much of the head block in the spring, and even then the leaves of the spring break oftener through the section which have the holes in the King bolt than in any other part. This device, it is claimed not only overcomes this, but being pivoted in the rear of the axle the vehicle has a shorter turn, and any repairs which may be necessary can be made with less trouble, as the parts are few and accessible. Should a desire exist to examine the device more closely, a mounted set will be sent by the company, the only expense to the dealer or manufacturer will be the express charges; the same to be held subject to their

PROSPECTIVE REAR VIEW.

order for return or shipment elsewhere. Further information with regard to this important device will be furnished in the shape of a circular by the manufacturers who consider it as one of the best minor improvements that have been brought out for a long time.



THE NIAGARA WALL TIE OR BRICK BOND.

Among the similar specialties of this character manufactured by the Metal Stamping Company of Niagara Falls, N. Y., the Niagara wall tie or brick bond has already achieved considerable popularity among modern builders. They are ⅞ in. wide x 7½ in. long, and are made of the best steel, and galvanized. They are guaranteed to have an average

NIAGARA WALL TIE.

breaking strain of 800 lbs. each. When it is considered that, bedded in a wall, ten of these ties are claimed, represent a resistance of eight thousand pounds to any tendency to spread, bulge, crack or swerve, some idea will be formed as to their value in stiffening and strengthening a wall. Their use, it is claimed, strengthens a brick wall more than an addition of one width of brick. They make a perfect and solid connection between facing brick and the poorer brick used for backing, and are easily bent at the middle to conform to uneven surfaces. Placed lengthwise around openings, and crosswise throughout the wall, even in moderate numbers, the addition to the strength and security of the wall is something remarkable. They are abundantly strong, and once bedded in mortar an initial movement is practically im-

MODE OF PACKING ADOPTED.

possible without breaking them. They weigh about 4½ lbs. per gross, and are snugly packed three gross in a wood box with locked and glued corners and sliding cover, making them exceedingly convenient for the builder on the wall. These boxes are packed four, eight or twelve in a good case, weighing ready for shipment about 65, 120 and 180 lbs. respectively.

NEW U. M. C. PRODUCTS.

The 32 Automatic Colt Pistol is loaded with a special high power smokeless powder, giving high velocity and operating freely through the mechanism of the automatic Colt pistol (pocket model). Those with the soft point bullets will be found desirable for sporting purposes.

These cartridges are also made with metal cased bullets and are accurate for target purposes at ranges suitable to pocket pistols.

RIM FIRE CARTRIDGES.

New 22 short ungreased, 22 long ungreased and 22 Winchester ungreased are inexpensive rim fire cartridges loaded with the best grade of smokeless powder. Boys are calling for these cartridges as they can be carried loose in the pocket without the old inconvenience of the greased cartridges. They will not lead the gun.

U. M. C. ammunition shoots well in any make gun.

THE CRANDALL MECHANICAL LUBRICATOR.

The National Sewing Machine Co., Belvidere, Ill., has recently issued an extremely interesting pamphlet on "The Crandall Mechanical Lubricator" the patent for which they have purchased, and which device they are pushing, knowing the excellent merit contained in it. They are endeavoring to interest the automobile trade for the reason that a device of this nature is urgently demanded. This lubricator, however,

CRANDALL MECHANICAL LUBRICATOR.

possesses equal value for use on steam engines, stationary, locomotives and marine; and is also of great value in electric light plants and in large power plants of all kinds. The catalogue sets forth the special advantages wherein it accomplishes much that no other lubricator has accomplished. We present herewith a cut illustrating the pressure reservoir, together with the sight feeders, pressure gauge, etc. The Crandall Mechanical Lubricator can be furnished with any number of feeds desired, from six up. The equipment, as supplied, includes the pressure reservoir with sight feeders, the pressure gauge, the pressure-regulating valve, the pump complete with connections, the oil supply tank and connections, the check valves for oil feeds, briefly, the entire and complete device except the tubing, the nature and amount of which necessarily varies in different cars. Complete illustrated instructions for installation and operation are furnished with each oiler.

A HANDSOME VEHICLE CATALOGUE.

H. A. Moyer, Syracuse, N. Y., has issued a 1904 catalogue, and it is one of the very finest we have ever noticed. The cover is made to represent black hair-cloth in the center of which is an oblong, antique copper finish plate bearing the words "Moyer, 1904." The book is entirely devoted to large, handsomely engraved illustrations of their different style carriages, with just the name under each one. H. A. Moyer guarantees all goods purchased of him to be of good material, and should any breakage occur within one year from date of purchase from him by reason of defective material or workmanship, repairs will be furnished free of charge at the factory, upon production of the broken parts as evidence, but he will in no case allow charges for repairs unless a satisfactory price has been previously agreed upon with him or his agents.

A CALENDAR WORTH KEEPING.

One of the neatest and showiest calendars we have yet received is that issued by the Belfont Iron Works Company, Ironton, Ohio, depicting a very handsome fencing girl at rest, in a pose as effective as it is modest. The colors used are all in subdued harmony, making the calendar available for any position at home, in the store or office. The entire tout ensemble of the figure which forms the centre of the picture is of the most artistic kind, and certainly merits the preservation which the calendar will surely receive.

✦

A New England paper told about "a drove of hogs floating down the Connecticut River" instead of "a drive of logs."

REVIEW OF THE MARKETS.

WIRE NAILS: The market for Wire Nails is held fairly firm with a feeling that if any change takes place in the price of billets it is just as well to have contracts protected in case of a corresponding decline. With an assurance of this kind less hesitancy is shown in booking orders on which future specifications can be called for. For immediate use concessions of trifling moment are demanded and slight shading of regular price is expected. Quotations are as follows: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.90
Retailers, carload lots	1.95
Retailers, less than carload lots	2.05

New York. The demand for local requirements is fairly active, but mostly for immediate use, and in quantities not over and above extensive. The quotations are as follows:

Single carloads	$2.10
Small lots from store	$2.15 to $2.20

CUT NAILS: At the meeting of the Cut Nail Association, which was being held when our last issue was being printed, the November prices on Steel Nails were reaffirmed for December, but the Western price on Iron Nails was reduced 10 cents a keg, making them the same price as Steel Nails. It is contemplated to make a more limited output by closing some of the mills during the holidays. The resumption at a later date will depend upon the condition of the stock on hand at individual mills, no concerted action being contemplated, the desire being to brace the market as much as anything. Quotations are as follows:

In carload lots	$1.90 base
Less than carload lots	$1.95

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. A fairly satisfactory demand exists for local consumption with quotations as follows:

Carloads on dock	$2.04½
Less than carloads on dock	2.12½
Small lots from store	2.20

BARB WIRE: The demand for Barb Wire is considered light by comparison, being only for actual wants, and while an occasional shading below market prices is referred to, the following quotations represent the market: f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots	2.35	2.65

SMOOTH FENCE WIRE: With a business on Smooth Wire still prevailing in excess of quantities marketed a year ago, showing a fairly active market at this late day, prices under the circumstances have been somewhat irregular under pressure; the following are considered to represent the market as quoted: f.o.b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.80
Retailers, carloads	1.85
Less than carloads	1.95

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

LINSEED OIL. The following quotations on "City" Raw Oil are the latest announced by the Dean Linseed Oil Co.:

In lots of less than 5 barrels...38 cents per gallon.
In lots of 5 barrels or more....37 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

CORDAGE: There is not a large business being done in Rope, and even that is on the cheaper grades. The market at quotations given below is held quite firm for the grades of rope referred to, with the usual rebate for large lots. The following quotations represent the market:

Pure Manila, 7-16 inch and larger	12
⅜ inch	12½
¼ inch and 5-16	13
Pure Sisal, 7-16 inch and larger	9½
No. 2 Sisal, 7-16 inch and larger	8½
⅜ inch	9
¼ inch and 5-16 inch	9½
Lath Yarn, Medium and Coarse	8½
Jute Rope, No. 1	6½
No. 2	6

THE PITTSBURGH TRADE.

The closing month of 1903 finds the Pittsburgh Hardware trade doing a moderate amount of business. The severe slump in the steel and iron trade is felt throughout this section among merchants as it must of necessity be, but we are glad to see signs of returning activity already. Reductions of wages are being made and accepted, as they are merely a return to the rate paid a year or two since in normal times and which are necessary to produce steel at present prices. Winter weather has ruled since Thanksgiving Day, making a large demand for cold weather goods—sales of skates, gas stoves and horse blankets have been large and still continue. We wish your readers a Merry Xmas and a Happy and Prosperous New Year. LOGAN-GREGG HARDWARE CO.

THE BALTIMORE TRADE.

(*From an Occasional Correspondent*).

Business is quite dull here among the retail stores, and just to think Christmas but two weeks off. All the shoppers seem to be attracted by the large and varied display in the large department stores, where you can obtain most anything without going to any other store. They even serve dinner or meals in order so that the shopper is held until he or she has purchased what is required. My opinion is that time is coming when we will be compelled to pay for the "air we breathe"—and a charge of a "nickel in the slot" to keep warm by steam heat or by a red hot stove. The fact is the people are going at a too rapid rate in a business sense and overdoing things, as it were, and in 1904 there will be some great changes and revelations in business. Would you believe if I tell you that in making my rounds among the retail Hardware trade, that I have found several merchants taking a "nap" in the afternoon and wake up at 6 P. M.?

A. B. C.

THE CINCINNATI TRADE.

"Nothin' doin', takin' stock," is the greeting met with upon visiting the Cincinnati Hardware Jobbers just now. The traveling salesmen have all been in for the past two weeks and everybody is in the midst of stock taking. The jobbers say they cannot tell just how they will come out until the stock taking is completed which is to be very thorough and will not be completed until January 1st. All express the opinion that the year 1903 has been favorable towards placing a larger credit on the ledgers than ever before and are wishing everybody a Merry Christmas in anticipation of the looked for good year's results. Felix Bahlmann, of The Kruse & Bahlmann Hardware Company said his company as well as the other wholesale houses realize that their stocks are too low for the Spring business and are ordering goods every day. The farmers have money and the financial alarm in the East has not affected Cincinnati in the least, and there is no reason to doubt but that the new year's business will be started in with a rush for goods and we are getting ready to meet the expected demand. Very few changes in prices. The Powell & Clement gun store on Main Street has been very popular all month selling crowds by day and burglarized by

Digitized by Google

night. Three attempts at burglary have been made in one week. The Mineralized Rubber Company, 18 Cliff Street, New York, is making an effort for business in rubber goods in Cincinnati, the line being very well thought of by the trade.

THE CHICAGO TRADE.

We have experienced little interference thus far with our regular winter's trade from cheaper prices in the Hardware line. The declines that have occurred are not large, and to some extent are offset by higher prices in some other lines. From our own personal experience the demand, especially from agricultural sections, is fully as strong as one year ago at this time. Future orders are coming to us in large volume so that unless present indications fail, we will have an exceedingly large and prosperous trade for the first quarter of the new year. We have just finished our inventory and closed our books for the past year which was quite satisfactory in its results. WELLS & NELLEGAR CO.

THE SAGINAW TRADE.

We are having extremely cold weather and fine sleighing. Some of the ice companies are harvesting their ice. The cold weather has stimulated trade on horse blankets, fur robes, and holiday goods. Although the severe weather has temporarily checked all building and other out-of-door improvements, there are on the way at the present time, a one-hundred-and-fifty thousand dollar lift bridge, and a Manual Training school costing $175,000, and an electric road from Saginaw to Flint, and other improvements, and as soon as the weather moderates, we expect business to improve. The Pere Marquette Railroad within the last week have made terminal arrangements in the City of Chicago, and are running two passenger trains daily, with vestibule cars, dining cars, etc., in fact, a first-class train. This gives us the third road from Saginaw to Chicago. The farmers about here are getting good prices for their crops, and the sugar factories are still running. There is produced in this valley, sugar, coal and salt, more than enough to supply its inhabitants. We hope for a good business in 1904.

MORLEY BROTHERS.

THE OMAHA TRADE.

Trade during the past week has been somewhat below the average. The conservative disposition exhibited by our Eastern friends apparently having extended in a moderate way toward the West. The tendency appears to be to buy only actual necessities and those from hand to mouth though with an average of good fair crops, good prices, a surplus of cash and excellent prospects for the future, there appears to be no good reason for this condition of affairs to exist. It is the expectation that a fair volume of business will set in after the first of the year and in the event that general expectations are disappointing it will simply be owing to the fact that business will be slack not because of any decrease in the purchasing power of the community but simply owing to a spasm of conservatism and economy which may be short and may possibly last longer than we anticipate.

WRIGHT & WILHELMY CO.

THE ST. PAUL TRADE.

When we consider that this year has almost passed away and that everything considered it has been a year full of good things with but a slight mixture of things not good, we feel thankful that our lines have fallen in such pleasant ways. The trials of strikes, disasters and troubles of every kind have been borne and are things of the past. We have first before us the holiday season full of its pleasant surprises. Then comes again the New Year. With renewed energy we face the trials and difficulties which may arise. We make up our minds to beat them down and throw them aside being sure that honest dealing, justice and right will surmount all troubles which may confront us. How many and how great these may be is uncertain, but we will brush them aside and keep on progressing towards success. Failure is a word we will not acknowledge as existing.

From our standpoint we do not believe that unusual conditions will exist in 1904. We do not believe that the same great prosperity which has existed all over our country can be in store for us for next year as so many peculiar condi-

tions have shown their front, but we believe that a readjustment of values must be made—how great or how small these will be and how much they will affect our own business and the Hardware business is a matter of conjection which we at this time do not care to prophecy about, but we will say that no great revolution of prices will take place—simply an adjustment to new conditions. Our trade is good. Holiday goods have sold in larger quantities than ever before and the prospect for next Spring is as favorable as we could expect.

HACKETT, WALTHER, GATES HARDWARE CO.

THE PHILADELPHIA TRADE.

1903 is soon to be numbered among the years of the past, and so our thoughts to-day are mainly concerned in stock-taking and winding up the old year preparatory to making a start in 1904, and this entails the usual amount of hard work, both in the store and the office, but until it is out of the way very little can be done in the way of active business. The weather has been most favorable for retail trade, the month of December having been clear and cold and the demand for Skates, Sleds, Sleigh Bells and other Winter goods quite heavy, but it has been somewhat of a disappointment that the week immediately preceding Christmas should have had a rise in temperature. The holiday trade seems to be moving in fair volume, and judging from the activities of the express companies and the various retail stores, a large amount of money is being expended. It is the general belief that the cold weather this month has enabled the retail trade to work off their stock of Skates and Winter goods, and if so this will not only give them cash for Spring purchases, but will bring them the empty shelves which are always an inducement for generous buying. Inquiry made of the general market shows comparatively few changes in prices, although manufacturers of staple goods are complaining that profits are being squeezed out, and that such goods as Bolts are being sold at less than cost. The wild market on cotton is taking braided cord almost out of sight, but there seems to be no probability of any let-up in the future. We take this opportunity of wishing your readers the compliments of the season, and are,

BIDDLE HARDWARE CO.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED DEC. 7, 1903.

353,660. SAD IRON HANDLE, J. F. Bless, Newark, N. J.

353,678. REFLECTOR ATTACHMENT FOR LANTERNS, J. Hirth, St. Louis, Mo.

353,686. BLACKSMITHS' FURNACE, H. D. King, Hackensack, N. J.

353,722. EXTENSION LADDER, M. C. Walls, Clayton, Ind.

353,724. MEANS FOR FASTENING SCREEN CLOTH TO DOORS, C. Whitaker, St. Louis, Mo.

353,846. SPIRIT LEVEL, G. Cook, Watertown, N. Y.

353,976. SAD IRON, M. J. Shimer, Freemansburg, Pa.

PATENTS ISSUED DEC. 8, 1903.

746,113. WRENCH, C. S. Leland, Mt. Desert, Me.

746,130. SAW HANDLE, G. W. McMillian, Euston, La.

746,195. ADJUSTABLE CAN OPENER, F. L. Stork, Dayton, O.

746,213. DOUBLE H BOILER, A. J. Wentzel, West Superior, Wis.

746,272. SPRING HINGE, E. Bommer, New York, N. Y.

746,285. PLANE, J. W. Carleton and G. E. Trask, New Britain, Conn.

PATENTS EXPIRED DEC. 14, 1903.

354,090. LANTERN, C. Bergener, Rochester, N. Y.

354,113. WASH BOARD, E. Ellingen, Mineral Point, Wis.

354,123. ORNAMENTAL NAIL HEAD, J. W. Flynn, New York, N. Y.

354,151. LANTERN FRAME, F. Kaczerowski, Chicago, Ill.

354,162. SASH BALANCE, J. MacArthur, Rochester, N. Y.

354,196. SAFETY RAZOR, F. Kampfe, O. Kampfe and R. Kampfe, Brooklyn, N. Y.

354, 359. HANDLES FOR SCREW DRIVERS & OTHER TOOLS, J. C. Spencer, Rochester, N. Y.

PATENTS ISSUED DEC. 15, 1903.

746,712. MONKEY WRENCH, S. E. Landis, Cumberland, Md.

746,762. FAUCET, E. Totham and C. F. Merwin, New Haven, Conn.

NEW ENGLAND HARDWARE ASSOCIATION PRESENTS TO ITS PAST PRESIDENT A HANDSOME GAVEL.

Samuel A. Bigelow, past president of the New England Iron & Hardware Association, was presented with a handsome gavel on December 15 at the regular bi-monthly dinner of the stockholders of that organization. The gift was made to commemorate Mr. Bigelow's election in November to the presidency of the National Hardware Association. The presentation address was made by James N. Frye, of Frye, Phipps & Co. "Knowing full well, as we do," said Mr. Frye, "the tendency to ignore New England in the administration of national affairs, it is not surprising that we should view your promotion to your present office of responsibility with a certain sense of elation. We cannot help regarding your election not only as a well-earned recognition of your personal worth and business ability, but also as an honor to this section of our country, and an honor to us, whose representative you will be."

Mr. Bigelow responded happily.

The speaker of the evening was William H. Lincoln, president of the Chamber of Commerce and vice-chairman of the Good Government Association, who talked on "The Objects and Methods of the Good Government Association in Its Work to Secure a Better Municipal Administration for the City of Boston."

STANLEY RULE & LEVEL CO.
NEW BRITAIN, CONN., U. S. A.
Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

BILLINGS & SPENCER'S ADDITION TO PLANT.

Billings & Spencer Co., Hartford, Conn., have installed a pipe line, leading from their works to the yards of the N. Y., N. H. & H. R. R. to facilitate the handling of crude petroleum for use in their forge-shop. Through this pipe the oil can be taken direct from a car standing on a spur-track at the Pratt & Whitney shops, several thousand feet away, into the yard of Billings & Spencer, where it is stored in two tanks of 10,000 gallons capacity each. Two pumps, erected for that purpose, pump the petroleum as needed, into the forge-shop to supply the furnaces, while two blowers of 14,000 cubic feet capacity furnish air for burning the oil. The oil is sprayed into the furnace. The cost of installation has been considerable, nevertheless, the greater economy with which oil is handled, the saving of time and labor, the greater economic fuel consumption and the more excellent results obtained in the forging process will, in the end, outweigh the cost of this installation.

EASTERN GRANITE ROOFING CO.'S HANGER.

The Eastern Granite Roofing Co., New York, are sending to the trade a hanger which will be an ornament to any store, shop or office. It is a splendid example of lithography in eight colors, representing among other things several buildings on which "Perfected Granite" Roofing is being used. The fire-proof properties of this roofing is exhibited in one of the illustrations which shows the plant of the White-Warner Co., of Taunton, Mass., during the recent fire which destroyed the portion of the shop roofed with tin, while that part covered with "Perfected Granite" Roofing was saved. A letter from the White-Warner Co., telling of this incident, is reproduced.

One of the illustrations shows the Wells-Fargo ware room at the Jersey City station of the Erie R. R., which has been covered with "Perfected" roofing for nine years.

The middle portion of the hanger illustrates the method of applying the roofing.

A NEW ENTERPRISE.

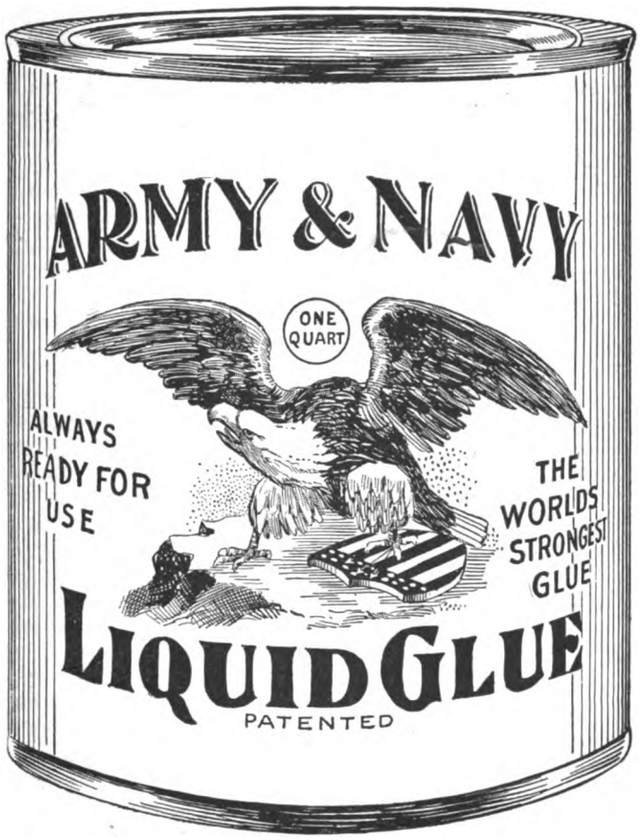
The Corbin Interests Have Acquired the Burdick Cash Register Business.

The Corbins of New Britain, says the *Hartford Courant*, have bought the interest of E. A. DuBois in the Burdick-DuBois Manufacturing Company. The business is to be continued in New Britain, more room having been engaged in the Howard Building in Asylum Street. The new company will soon have about 150 in its employ. Albert F. Corbin, superintendent of the Corbin Cabinet Lock Company of New Britain, has resigned his position with that company and he becomes the treasurer and general manager of the new company, which will become the Burdick-Corbin Company. The new directorship is formed by George W. Corbin of the Corbin Cabinet Lock Company, President Charles Glover of the Corbin Screw Company, A. F. Corbin, James S. Copeland, formerly with the Pope Manufacturing Company, and the inventor of the coaster brake; L. J. Burdick and F. L. Burdick of Sturgis, Mich., vice-president of the Branch County Savings Bank.

The officers of the new company are: President, L. J. Burdick; vice-president, Charles Glover; treasurer and general manager, A. F. Corbin; secretary James S. Copeland. The company will manufacture the Burdick cash register bank and will take up the development of inventions gotten up by Mr. Burdick, for which great results are expected. The company has recently secured large contracts for the banks from the Metropolitan Savings Bank of Baltimore and from the Dime Savings Bank of Norwich. The cash register bank has been on the market but two months.

The Burdick cash register bank is different than all others. It is not a key register, as the cash actually registers. It is not limited to any special demonination. English money can be totalized by it, and that is more difficult than to totalize American money, as pounds, shillings and pence are used instead of the decimal system. The machine detects the difference in values of the coins and counts a penny as a unit, a nickel as five and a dime as ten. Pennies, nickels and dimes are of unequal ratio, according to size and amount, and they are difficult to handle in regular machines. The United States Government in the past has gotten out several sizes of coins for which due allowance has to be made for the wear of the coins. The little difference between a penny and a dime has to be greatly multiplied by the mechanism in order to register accurately. The bank is gotten up with few working parts.

The bank is considered an ideal one for the use of savings banks, which loan them to depositors and keep the key. When $5 or $10 is saved the depositor returns the cash register, has it opened and the amount is put to his credit. The bank shows at all times the total amount of money saved and stimulates a desire to increase the amount every day.



EVOLUTION OF THE SWORD.

The evolution of the sword has passed through five distinct stages: First came the epoch of pure carnage, when men seemed to hew and hack each other for the mere pleasure it gave them. Next the era of legend, when stupendous and impossible feats of arms were said to have been accomplished. Then followed the feudel time, a curious mixture of bloodshed and religion, when the pioty of the crusaders was proved by their ability to slash the equally bloodthirsty Saracens. Succeeding this brutal period sprang the noble season of skillful fence, as a sword, no longer a weapon of pure attack, became a mixed arm of offense and defense combined. Finally we see its fall, being to-day a mere military accoutrement, after attaining a glory that no one dreamed of during the days of its first rude and barbarous use.

The most celebrated weapons in history uniting miraculous sharpness with wonderful elasticity are undoubtedly the blades of Damascus. The sabers of Japan, although as hard as a diamond, and taking an edge so acute that they will go through a pillow or poker as if it were air, cannot compete with the old Syrian swords, because they have no elasticity. This elasticity is not altogether a lost art, as even to-day one may see in Toledo, Spain, blades packed in coils like watch springs. Swords have been made during the present century in Russia that rivaled in edge and bending qualities even the famous Damascus blades. At the imperial factory of Zlateust, in the Urals, some have been turned out which bent till the point touched the hilt, and which would also cut through an iron bar. More than this no blade has ever done or can do.

The Star Tool Company has been incorporated at Buffalo, N. Y., with a capital stock of $15,000, and will manufacture patent angle bits, mechanic's tools and Hardware specialties. A factory has been rented and requisite machinery will be installed at once. The directors are: Gilbert L. Hume, William A. Pearce and Herbert A. Hickman, of Buffalo.

OUR BRITISH LETTER.

(From our Special Correspondent).

London, Dec. 12th, 1903.

THE CYCLE INDUSTRY.

A few weeks ago agents and others engaged in the cycle industries visited the two great shows of the season, which are held simultaneously at the Agricultural Hall, Islington, and the Crystal Palace, Sydenham, respectively. These events are looked forward to with interest by cyclists and cycle dealers because manufacturers make a point of exhibiting for the first time any new invention they may have developed, and every season brings forth a fresh crop of improvements and amended accessories. During the last year manufacturers appear to have devoted attention to the improvement and development of the motor cycle, and considerable space at both the shows was devoted to the display of motor cycles and motor cycle accessories. In the early days of the cycle industry British ironmongers refused to take up the trade and allowed the sale of cycles to drift into other channels, but latterly they have realized that cycles legitimately belong to the retail ironmongery trade, and as machines were perfected, by well established manufacturers, they gradually took up the business; in fact, there are now few country ironmongers who are not large traders in these goods. The motor car developments of the last few years have materially influenced retail trade, and many British ironmongers are employing these modern methods of traction for their own purposes and use them for the delivery of goods; some of the more enterprising ironmongers doing considerable business in agency work connected with motors and motor tractors, especially in the agricultural districts where motor traction has become an essential part of farm life and a valuable assistant in working labor saving implements and machines.

THE PROPOSED C. O. D. POSTAL REFORM.

In my last letter I referred to the proposed C. O. D. postal parcel scheme which the Postmaster General is ready to adopt as soon as he is assured of sufficient support from traders and consumers. The proposal has brought forth opposition on the part of ironmongers and other retail traders. The I. F. A. have addressed a letter to the Postmaster General on the subject setting forth the hardships to country ironmongers which would be entailed should the system be put in force. The Grocer's Association have also sent a deputation upon the subject. The Postal authorities are, however, convinced that the system, which is working well in other countries, would eventually benefit even retail traders here as it would open up a much wider sphere and an equal ratio of charges would enable these traders even in remote districts, to carry on an extended business in specialties, and thus materially assist the small trader indirectly, if not directly.

OUT-DOOR AMUSEMENTS.

Although Great Britain has been subject to a vast amount of damp and inclement weather during the last few months, there does not appear to be any better prospect of severe weather. Sharp and keen frosts, such as manufacturers and retailers of skates naturally look for at this season have not lasted more than a few days. The wants of skaters have been provided for by manufacturers and retailers during the last two or three seasons with but little result and the majority of ironmongers complain that their stocks have been untouched for several seasons. Doubtless this affects the manufacturers of skates in the United States as well as in Germany and in other countries, which supplement the home makers of these goods. American skates are very popular in Great Britain, especially in those Northern counties where a few weeks skating may be looked forward to with some degree of certainty during some portion of the winter. Hardwaremen regard the sale of games and outdoor sporting appliances as part of their legitimate business and are now selling footballs and such like goods, and many ironmongers have recently made interesting displays and window effects. The sale of indoor games and amusements is not encouraged by the general ironmonger quite as much as it might be, but some of the more advanced ones, who include light and fancy goods in their stocks, sell a fair amount of games and even toys in view of Christmas festivities, among which are generally included a fair sprinkling of American games, mechanical toys and other novelties, for the manufacture of which American genius has largely helped in the production of the most striking popular games of the period.

THE SMITHFIELD SHOW.

Agricultural implement agents and ironmongers who are engaged in the sale of agricultural implements and machinery have lately had their attention drawn to the newest inventions of agricultural appliances. The annual Smithfield Show held at the Royal Agricultural Hall, Islington, London, is regarded by farmers and others as only second to the Royal Agricultural Society's Show, one event being held at mid-Summer and the other just before Christmas. Although ostensibly a fat cattle show, the principal galleries, the main hall, and several minor halls are almost entirely filled with exhibits of implements and machines, together with poultry farming appliances and sundry accessories required in the pursuit of agriculture. American manufacturers figured largely at the show recently held. King Edward's Hall—which is in itself a large building adjoining the main hall—was almost entirely filled with representative exhibits of Canadian and American manufacturers. Such well known firms as The Noxon Co. Ltd., David Maxwell & Sons—both of Ontario—The Frost & Wood Co. Ltd., of Smith's Falls, and the Wortman & Ward Manufacturing Co., also of Ontario, were present. American manufacturers were well to the front and demonstrated the general excellence of their harvesting machinery, and their strong, but light, and beautifully finished implements were much admired. All the divisions of the International Harvester Company who have direct representation in Great Britain, were there. Deere & Co., of Moline, Ill.; the Richardson Manufacturing Co., of Worcester, Mass.; the Johnston Harvester Co., of Batavia; the Massey-Harris Co. Ltd., and others were in strong force, and their stands compared favorably with those of British manufacturers with whom they competed in friendly rivalry. There has been a distinct advance in the use of heavy tractors and motors for plowing, grinding, and general working of agricultural machinery and food-preparing appliances during the last few months. British farmers are assimilating their methods of procedure to those of American and Canadian farmers, who are accustomed to operate on large tracts of land. British farmers find that if they are not in a position to purchase implements and labor-saving machinery of highest type, it is better for them to combine and enter into some arrangement by which they can obtain at least a share in the use of such machines by which they will be enabled to conduct their farming operations more economically.

DULL TRADE.

Generally speaking, trade is dull all along the line. The foreshadowed fiscal policy has some little to do with it and traders are divided as to the results of such a step. It may or may not prove a blessing—should it be adopted, but it is evident that the retail as well as the wholesale trade of the country is not up to the mark and that the year closes quiet and dull. The weather has been depressing and has affected trade to some extent. A little spurt is expected in view of Christmas trade, but the festive season is always followed by a few quiet weeks which ironmongers devote to clearing up arrears of work and getting ready for the New Year, which it is hoped has brighter days in store for the British Hardware trade as well as for the manufacturer of the United States of America.

Digitized by Google

MANUFACTURE OF FIREARMS AND GUN BARRELS IN LIEGE.

The manufacture of firearms and gun barrels in Liege has steadily increased since 1880, and the exports thereof have increased in like manner, writes United States Consul James C. McNally, Liege, Belgium. The exports to all countries during recent years were as follows: 1898, $2,895,000; 1899, $3,184,500; 1900, $3,474,000; 1901, $3,667,000.

The United States is one of the principal markets for the firearms product of Liege especially for guns costing under 25 francs ($4.82). Grades, beyond that price being subject to a high duty in the United States, a large exportation of the better qualities is prevented; nevertheless, the demand from the United States for the higher grade of guns is greater at present than at any previous time. I am reliably informed that certain manufacturers turn out a large quantity of guns having imitation Damascus barrels attached thereto. This, however, cannot in any way injure the reputation of the firearms manufacturers, most of whom are thoroughly reliable in the quality of their products. In the year 1901 the export of firearms and gun barrels to the United States amounted to about 2,800,000 francs ($540,000) and in 1902 to over 3,000,000 francs ($579,000), the proportion of gun barrels and firearms being about equal.

In the last ten years the production of Damascus and steel barrels has increased, the annual production being about 500,000, of which about 100,000 single and 160,000 double barrels were sent to the United States. The Damascus gun barrel is made principally at Nessonvaux, eight miles from Liege, but in this consular district. Manufacturers report that many American houses buying from Liege factories do so through agents, and say that it would be more advantageous to importers to deal directly.

AUTOMOBILE CHAIRS A WORLD'S FAIR NOVELTY

At the World's Fair in St. Louis next year it is proposed to use automobile chairs instead of the chairs that have been wheeled around by hand at other world's fairs. These chairs will be a decided novelty, and the following description of them, which has been secured by the *Scientific American* will be found interesting: "Automobile chairs propelled by electricity will be used at the World's Fair at St. Louis next year. A concession was recently granted by the Exposition to a St. Louis company, giving them the right to operate the new style chairs within the World's Fair grounds. The chair is the invention of Semple S. Scott, and is the result of nearly three years' experimenting and designing. It is said that the machine has a uniform speed of three miles an hour, which is exactly the same running up or down a steep grade or on a level. The occupant has no control over the speed whatever. The simplicity of operation is such that any one can readily run it. The most desirable feature is the fact that the machine is provided with a sensitive guard rail. The latter is deemed the most valuable invention on the machine. If the machine collides with any object or person, a pressure of only a few ounces pushes this guard rail back and causes the wheels to become locked, thus bringing the chair to a dead stand-still before the machine strikes the object or person. Each chair will carry two passengers, one of whom may operate the machine, or, if desired, an operator will be furnished, who will not only run the machine, but will also serve as a guide to explain all the points of interest. The operator sits on a detachable seat at the rear of the chair, from which point he controls the machine, the controller and steering bar being removed from the front and attached to sockets in the rear."

For the second time within a year the monthly report of exports of bicycles and parts shows an increase. During October they reached a value of $143,862, as against the $127,445 of October, 1902. This gain is more than accounted for by British Australasia, which for several months has been a heavy buyer.

Craig Mine Crystal Corundum

NOT ADULTERATED WITH EMERY

Has an effective hardness of 9. as compared with 10. of the diamond. Wheels made from it do from two to five times the work of emery wheels, Why? CRAIG MINE CRYSTAL CORUNDUM has 95 per cent. to 98 per cent. compared with emery's 30 per cent. to 40 per cent. of crystalline alumina—the only part of emery that cuts.

Emery rubs and burns. Craig Mine Crystal Corundum cuts fast and cold.

Our booklet will explain.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Chicago, Ill.—W. V. D. Wright Company has been incorporated; capital, $20,000; general Hardware business; incorporators, William Raymond, S. I. Page, M. B. Pattiman.

Columbus, Ga.—The William Beach Hardware Company has been incorporated with $25,000 capital. The incorporators are O. C. Bullock, W. B. Beach, W. A. Crow, S. H. Fulford, J. G. Taylor, W. G. McGhee, T. W. Bates and J. S. Rogers.

Denver, Col.—Edgar Wood and Clyde Moore of Oakwood have opened a large Hardware store.

Des Moines, Iowa.—The Stark Hardware Company has been incorporated with a capitalization of $10,000. W. A. Stark is president and treasurer and C. D. Sanborn is secretary.

Elgin, Ill.—The Elgin Gold and Silverware Company has been reorganized as the Western Casket Hardware Company. The capital stock is $25,000. The following officers were elected: President, A. M. C. Todson; Vice President, W. C. Parsons, (manager); Directors: A. M. C. Todson, W. C. Parsons, W. W. Glover and W. E. Todson. The new management will greatly increase the output.

Evansville, Ind.—The Evansville Implement and Farmers' Supply Company has been incorporated. The incorporators are: John J. Stiltz and Robert D. Richardson, of Evansville, and Charles A. Buchanan of Mount Vernon, Ind. Capital stock, $10,000. Evansville will be the principal place of business, the company to conduct a store in Fourth Street.

Fort Smith, Ark.—The Webber-Ayres Hardware Company has been incorporated with $150,000 capital stock. The incorporators are John and Walter Ayres, W. W. Webber, F. B. Baptiste and others, of Fort Smith, with A. W. Boyd of Oklahoma City as territorial agent.

Gastonia, N. C. — The Standard Hardware Company has been incorporated; capital, $20,000. The stockholders are Dr. Adams and E. M. Linberger of Gastonia, and J. H. Weddington and Luke Seawell of Charlotte. The Standard Hardware Company will be ready for business about January 1, 1904.

Lakefield, Minn.—M. J. Evans has opened a new Hardware store.

Mayfield, Ky.—Carter Hardware Co., Mayfield, Ky., has been incorporated with a capital stock of $20,000 to carry on the wholesale and retail business in shelf and heavy Hardware, stoves, tinware, agricultural implements, sporting goods, buggies and wagons, furniture, etc.

Galesburg, Ill.—By a recent change the firm of Cox Bros. & Co., composed of T. M. Cox, J. D. Paulsgrove and J. A. Clark, has been reorganized and incorporated. The firm has taken in a new member, D. J. Simpson, formerly representative of the Milwaukee Harvester Co. in Galesburg. He will now represent the firm on the road selling the Bradley line of buggies and implements. The firm will conduct a wholesale and retail store, and Mr. Paulsgrove will continue to manage the retail store.

Nashville, Tenn.—J. J. Green & Son will open a retail implement and Hardware house in the building with the Milwaukee Harvesting Machine Company. They will be the sole local agents for the McCormick machines.

Sturgeon Bay, Wis.—Halstead-Maples Hardware Company has been incorporated; capital stock, $15,000; incorporators, Wm. Maples, Richard Maples and Lizzie Poehler.

Winona, Min. — C. A. Baeurlen Hardware Company has been incorporated; capital, $50,000; incorporators, C. A. Baeurlen and Bertha Baeurlen, Winona, and George P. Meyer, Sparta, Wis.

Changes.

Addison, N. Y.—J. H. Roberts has sold his Hardware business to Messrs. Fuller & Filer of Williamston, N. Y., and will give possession about January first.

Allentown, Pa.—Harvey Lauer and Edgar B. Schultz, of this city, have purchased the Hardware business of Aaron Weinberger at Macungie. They will take possession next March.

Augusta, Ga.—Messrs. Gustave Speth and L. P. Speth bought the stock of stoves, mantels and Hardware of the estate of the late C. B. Allen. The business is to be continued, at the former stand, under the firm name of Speth Bros. Further capital will be employed.

Birmingham, Ala.—I. A. Lewis of the Lewis Hardware Company, has purchased the entire interest of James Trotter in the firm of Lewis Hardware Company, Mr. Lewis, by the purchasing, becoming the sole owner of the Hardware and book store conducted by the firm. The two large and well appointed stores will be continued as heretofore at the same place.

Boonville, N. Y.—Chauncey, W. Colton has sold his Hardware business to Walter J. Porter.

Brookfield, Mo.—John Thrasher has sold his Hardware and furniture store to Will Barron and Walter Bundridge.

Emporia, Kan.—Cane & Colte, who recently purchased the old Griffith Hardware store from N. C. Francis, sold it last week to W. P. Stapleton of New Albany, Mo. This store has changed hands three times since Spring.

Escanaba, Mich. — The Schemmel Hardware Company have decided to close out their business in this city at once and their large new stock of goods will be cleared out and disposed of immediately at a great sale.

Findley Lake, N. Y.—The Hardware firm of Brookmire & Ottoway has dissolved, Mr. Ottoway retiring.

Galion, Ohio.—Harry P. Resch has disposed of his interest in the firm of Resch Bros. & Casey and on January 1st will go on the road for the Blindley Hardware Company of Pittsburg. His interest in the store has been purchased by his former partners, W. T. Resch and Forest Casey, who will conduct the business.

Greenport, N. Y.—The Hardware, tin and stove store of Lewis M. Edwards on Main Street, Sayville, has been sold to A. S. Fisher.

Hancock, Mich.—W. W. Mercier has purchased the stock of the Laurium Hardware Company and will conduct the business at the present location.

Hopkinsville, Ky.—Olney M. Wilson purchased the interest of W. E. Keith in the Hardware and implement business of Wilson & Keith, and the firm name has been changed to the Wilson Hardware Company. The new member of the firm has been connected with the firm of Wilson & Keith since it was established.

Keokuk, Iowa.—Harlan Almond has sold his stock of farm implements to Monger and Wait of Mount Pleasant.

Lakefield, Minn.—The Hardware business of Sickler & Livermore, which has been in the hands of the sheriff under an execution issued in favor of the creditors of the firm, has been sold to Harold Clark, of Windom. Mr. Clark will take possession at once.

Lanesboro, Iowa.—Charles Peters has traded his Hardware and implement business at Lanesboro to L. A. Andrus for the latter's farm.

Lyndon, Kan.—T. W. McGrath will conduct a Hardware store.

Macon, Mo.—Victor Grave bought the interest of his partner, Jethro Lefler in the Hardware and furniture business.

Madison, Wis.—The A. G. Brookes & Son Hardware Company has changed the firm name to Brookes Hardware Company.

Manson, Iowa.—(Special). Reynoldson Bros. have just closed the sale of their Hardware and furniture store to J. E. McClintock. J. E. Reynoldson of the retiring firm will continue the implement business at Manson.

Middletown, N. Y.—The Hardware firm of Colwell & Lawrence, at Warwick have dissolved partnership and the business has been sold to James B. Lawrence, father of the junior partner, Wilbur L. Lawrence.

Flawless Edge Tools

We make all kinds of Edge Tools.

Although we have been in the business since 1837, we have been growing younger every year—using the youngest machinery, the newest methods and doing everything in a down-to-date way.

Standards of Excellence

That is the recognition given them in the markets of the world. The Highest Award was given them at the Paris and Pan-American Expositions.

May be that is the reason why more of our goods are sold than of other manufacturers in our line.

Our goods and prices interest most Hardwaremen. Are you interested? Write us at once.

Mention HARDWARE.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Alton, Mo.—The Hancock Disc Plow Company has been incorporated with a capital of $300,000. The incorporators are S. H. Wyes, H. L. Winter and Levi Davis.

Augusta, Me.—The Multi-Automatic Screw Company has been incorporated. It is capitalized at $1,000,000 and organized by Massachusetts men. Its purposes are to manufacture screws, bolts and kindred commodities. Among the incorporators are Charles H. Weston, treasurer; William G. Burns, Fred. W. Ainsworth and Henry F. Cottle, of Boston.

Anniston, Ala.—The Anniston Stove Works Company has been incorporated. The capital stock is $50,000. The incorporators are as follows: Hugo Grof, of Belleville, Ill.; C. W. Fanshel, of Lexington, Ky.; J. B. Ehrlick, of Indianapolis, Ind.; C. W. Snyder, of Lexington, Ky., and Ross Blackman, of Anniston. This is a combination of three large stove manufacturing concerns.

Belleville, Ill.—The Quality Stove & Range Company has been incorporated. The officers are: Charles Shoennemann, president; Henry Ehret, vice-president; Gen. M. Jackson, Jr., secretary, and Louis, Opp, treasurer. It is occupying a plant for the mounting of the ranges 360 feet long by 50 feet wide, separate building for molding and anticipate making a line of steel ranges of the very best grade. It will probably employ in the neighborhood of 50 men and make 4,000 or 5,000 ranges annually.

Berea, Ohio.—The Ideal Novelty Company, capital $15,000, has been incorporated by J. H. Bevington, Clarence E. Fox, Roscoe Bean, W. G. Guenther and W. H. Herman.

Buffalo, N. Y.—The Star Tool Company has been incorporated. The company is capitalized at $15,000, and will manufacture and deal in tools. The directors are Gilbert L. Hume, William A. Pearce and Herbert A. Hackman.

Camden, N. J.—The Flannery Bolt Company has been incorporated with a capital of $50,000. The objects of the corporation are to manufacture and deal in all kinds of bolts.

Cincinnati, Ohio.—The Union Light and Heating Company has been incorporated, capital, $10,000, by Arthur M. Peck, E. B. Stanley, H. D. Peck, Frank H. Shoff and John Weld Peck, Acetylene gas machines.

Columbus, Ind.—The Roth Manufacturing Company has been organized, with $50,000 capital, to manufacture the Roth pitless pump, which is especially adapted for the Texas rice fields for irrigating purposes. H. M. Campbell is president; J. G. Roth, vice-president; H. H. Bassett, secretary; William G. Trum, treasurer.

Frankfort, Ky.—Southern Stove and Stave Company, of Fayette County, has been incorporated; capital $100,000.

Jersey City, N. J.—The Cloud-Marple Pneumatic Tool Company has been incorporated; capital, $100,000. Incorporators—John D. Cloud, Joel Marple, and Frank P. McDermott.

Lexington, Ky. — The Blue Grass Stove & Iron Works has been incorporated. Capital stock, $12,500. Chas. Stanley, president; Perry Crosthwait, vice-president; C. W. Foushee, treasurer and O. W. Snyder, secretary, being the incorporators and constituting the first board of directors which continue for the period of one year.

New York, N. Y.—The Columbia Nut & Bolt Company has been incorporated. Capital stock, $50,000. The incorporators are John J. Donovan, Thomas Hill Low and James B. Henny, all of New York City.

Pekin, Ill. — The American Cable Fence Company has been incorporated; capital, $25,000; manufacturing wire, iron and steel fences. Incorporators:—Daniel Beckley, Thomas H. Leonard and Levi H. Brock.

Peoria, Ill. — Globe Manufacturing Company has been incorporated; capital $7,000; manufacturing paints; incorporators, J. H. Malarkey, A. S. Howells, E. D. McCulloch.

Changes.

Anderson, Ind.—The Dwiggins Wire Fence Company bought the Pole & Shaft Company's plant in this city, rebuilt it entirely from brick, and is now operating a new plant for the manufacture of wire fence.

Armourdale, Kansas.—The Hampton Stove & Range Company has purchased 3½ acres at the northwest corner of 18th and Osage Avenue, and will erect a $20,000 plant for the manufacture of stoves.

Chicago, Ill.—The James H. Baker Manufacturing Company of Pittsburg, has bought the Solid Steel Tool Company of Chicago and will move the works to Avenue, Pa., where the plants of the purchasing company are located. The name of the Chicago works has been changed to the Solid Steel Tool & Forge Company.

Marion, Ohio.—In anticipation of next season's business the Houghton Merkel Company is erecting a two-story addition, thirty-two by forty feet, to its plant on north Main Street, which will be used as a wareroom for the implement department. This addition now gives the company over 22,000 feet of floor space in all departments.

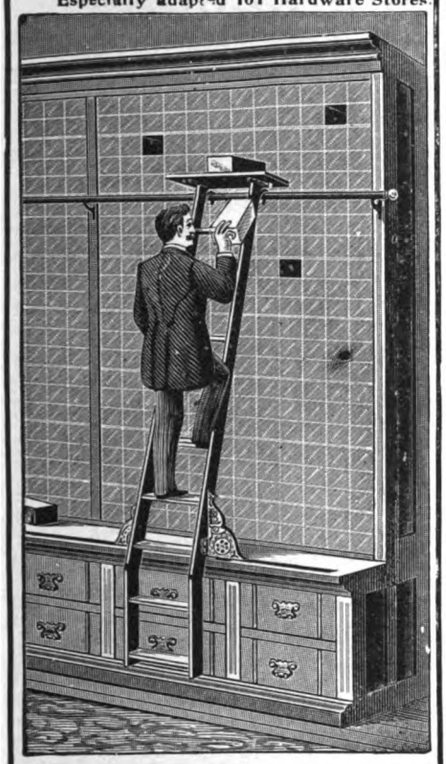
Mt. Carmel, Conn.—Owing to the need of larger quarters and a desire to get nearer New York City, the Schatz Hardware Manufacturing Company of Mt. Carmel has bought a plant at Chautaqua, N. Y., and will move there January 1, 1904.

New Albany, Ind.—The factory of the I. F. Force Company, manufacturers of handles of all kinds, will be moved after the first of next year to Clarksville, Tenn. The company has decided to change its location in order to be nearer the timber lands of Tennessee.

North Attleboro, Mass.—Herbert Straker and Louis Freeman have purchased the building, and die making business, owned by the King Brothers. The building is a brick one three stories high and is situated on the corner of East Street and Bruce Avenue. On the first floor the new concern will make dies. On the second floor the die cutting and designing business of Straker Brothers, which has been consolidated with the new firm, will be conducted. On the third floor a tool making business will be started. The new concern will conduct business under the firm name of Straker & Freeman.

Philadelphia, Pa.—The National Steel & Wire Company has increased its capital stock by $1,500,000 preferred to $4,000,000 and $1,500,000 common to $4,000,000, for the purpose of absorbing the Safety Insulated Wire & Cable Company.

Quincy, Ill.—The National Handle Company, we are told, contemplate moving their factory from this place within about three weeks and will locate in Texas where they will be near timber, thus saving the expense of shipping the raw material.



Shelbyville, Ind.—The stockholders of the Eagle Range factory at a recent meeting decided to rebuild their plant that was recently totally destroyed by fire. The building when completed will be of brick, one story high and will also contain a large basement, in which will be placed some of the machinery of the factory. The structure will contain about twice the amount of floor space of the building destroyed by fire.

The Gem Stands the Test

After using Sargent's Gem Food Chopper a New York housekeeper writes: "I must say that for economy—time, labor and money—the Gem is worth ten times the amount asked for it. I now know it is indispensable and really wonder how I got on without it." Housekeepers grow more enthusiastic over the Gem every time they use it. The steel cutters, being self-sharpening, are always ready to do good work. The Gem is adapted for cutting all kinds of foods; it is useful in the kitchen every day in the year.

Have you a stock? If not your orders will be filled promptly by the leading jobbers.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

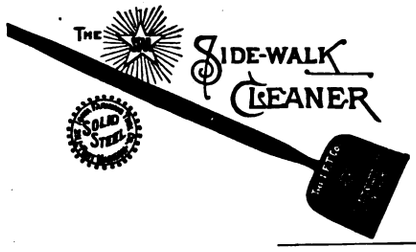
¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.



¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Chicago, Ill.—Moran & Wolfersberger Gun Company has been incorporated; capital, $10,000; manufacturing guns and shooting implements. Incorporators: Worth E. Gaylor, James P. Harold, Wm. Mannhardt.

Little Falls, N. Y.—Olin Tofft has opened a new store in the Benedict Block, with a fine stock of sporting goods. He makes a specialty of phonographs, of which he has a fine line in stock.

Plainfield, N. J.—On April 1st Harry Drier will open a sporting goods store on West Front Street.

Walpole, Vt.—W. D. Knowlton has established a new bicycle and sporting goods business.

Changes.

Belleville, Ill. Chas. Procasky succeeds Dobschutz & Procasky.

Columbus, Ohio.—The Young Repeating Arms Company will be reorganized at once. This was the outcome of the stockholders' meeting held recently at Chittenden hotel. Several committees presented reports and it was decided that the business could be operated with a profit under good management. Another meeting will be held in the near future. New capital is to be put into the concern by the present stockholders, it is said. The company is at present in the hands of a receiver but the liabilities will not aggregate $17,000, it is alleged, as against assets of $34,000. All talk of removing the plant from Columbus has been dropped.

Flushing, N. Y.—Emanuel Tuerk, who has for some time conducted a sporting goods store on Broadway, will next month remove his store to Manhattan.

Fort Wayne, Ind.—The bankrupt Hardware stock of Koehlinger & Bauer, has been purchased by Brossius & Brossius, bicycle dealers. The price paid was $4,500. The failure was caused by the sickness of Koehlinger, and the attempt of suicide of Bauer at his home in Eaton.

Geneva, Ohio.—Hugh Payne has purchased the business formerly conducted by Ray Rich.

Hagarstown, Md.—A deed has been filed here by which the American Cycle Manufacturing Company conveys all of its property in this city to the Pope Manufacturing Company. The property includes the bicycle factory and a tract of land which the Pope Company recently purchased.

Island Falls, Me.—M. Berry has purchased the business formerly conducted by H. L. Powers.

Lawrence, Mass.—A. H. Higgins succeeds to the business heretofore conducted by Edward Mosher.

Embarrassments.

Columbus, Ohio.—Edward A. Neff, a bicycle dealer, has filed a petition in bankruptcy. His liabilities are said to be $3,725.50, and his assets but $1,329.69.

Port Huron, Mich.—George E. Yokom, a bicycle and electrical appliance dealer, has petitioned to be adjudicated a bankrupt. His assets amount to $20 and his liabilities $1,921.96.

Southington, Ct.—G. Worthy Smith's bicycle and sporting goods store in Wilcox Block has been closed, Mr. Smith having decided to file a petition in bankruptcy.

Fires.

Checotah, Ind.—The store of W. L. Payne was damaged by fire to the extent of $1,000.

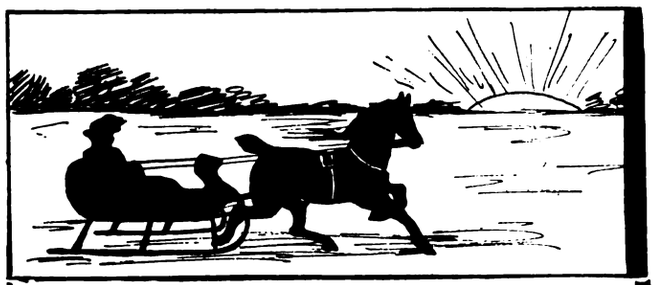
Kingston, Ont.—Angroove's Bicycle warerooms were damaged by fire.

Terre Haute, Ind.—Fire completely destroyed the bicycle shop of Harlan Rectors. Loss is covered by insurance.

Miscellaneous.

Columbus, Ohio.—Dealers in sporting goods report the most successful season in their history. President J. C. Sherwood of the Columbus Sporting Goods Company reports an increase of $15,000 in gross receipts over the season of last year.

Sterling, Ill.—The John Peck Gun Stock factory has closed a contract with the Winchester Arms Company for 100,000 gunstocks to be delivered at its factory in West Virginia. Mr. Peck recently shipped the first carload of gunstocks manufactured in the new temporary mill to the United States arsenal at Rock Island. The next eight weeks will be occupied in completing the Rock Island contract which is for 50,000 gunstocks. Mr. Peck stated that it was his intention to remain permanently in Sterling, and that next Spring he will erect a factory which will have a capacity of turning out 1,000,000 gunstocks a year, and double that amount with but little additional expense.



Watervliet, N. Y.—Arrangements have been made for the manufacture at the Army Gun Factory of twenty-four eight-inch and twenty-four seven-inch guns for the navy.

✤

For the first time in four years the ordinary shareholders of the Dunlop Tire Company receives a dividend. This was made possible by the large profits for the past year, were $1,060,000, an increase of nearly $250,000 over the 1902 earnings. Consequently the preference shareholders get their customary 5 per cent. and the ordinary shareholders 6 per cent. Some $225,000 is written off the patent account. The large sum of $1,175,000 is carried forward.

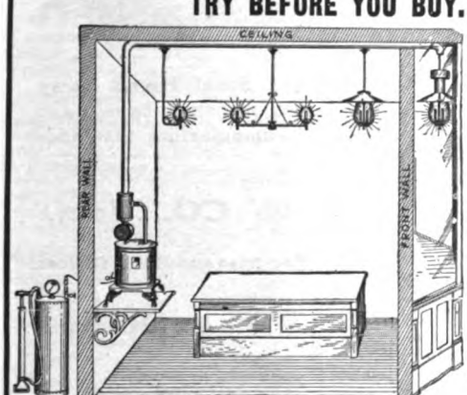
GENEVA, OHIO.



Lightning Whirling Sprayer

For household, garden and greenhouse use. Throws heavy or light spray 5-25 feet high. Durable. Send for circular, prices.

D. B Smith & Co. Utica, N. Y. U.S.A.

HOW DOES THIS STRIKE YOU?
TRY BEFORE YOU BUY.

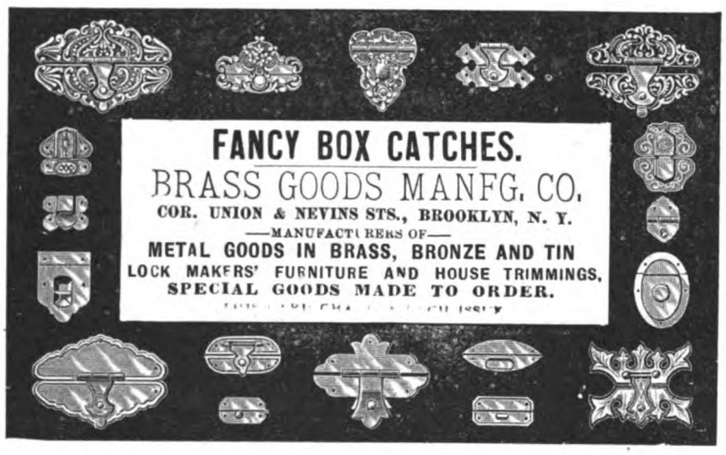
To further demonstrate to you that our Lighting System is a "Money Saver," and the most practical and safest on the market, we will allow free trial for ten days and guarantee it against imperfection for two years. Can you afford to be in darkness any longer with this opportunity before you? Send in your Diagram for Estimate. We are manufacturers, not assemblers. Avoid cheap imitators who demand money in advance.

WHITE MFG. CO. 193½ Michigan St., Chicago, Ill.

Ann Arbor Lighting System

BE INDEPENDENT

of the gas and electric light companies.



With an Ann Arbor Lighting System you can light your store better and cheaper than with electricity or gas. And the cost of operation is only about one-tenth as much. If you are using kerosene lamps, you should be particularly interested. Fuel is gasolene, absolutely safe, and permitted by the National Board of Fire Underriters.

If you want a store that will draw trade, write today for information and introductory offer. Liberal proposition to agents. Write for Booklet A on Lighting System, and Booklet C on Lamps for store and house.

SUPERIOR MFG. CO.,
210 Second St., ANN ARBOR, MICH.

Mention "Hardware."

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

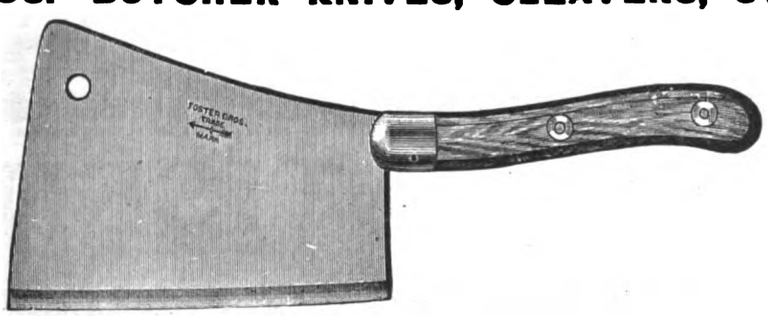
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

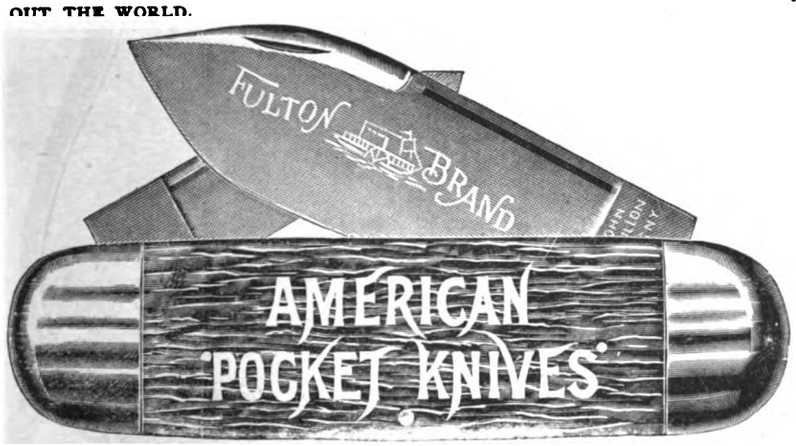


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

85 to 93 CLIFF STREET and 12 JACOB STREET.

NOT SATISFIED

Hardware Dealers who have been handling the **"Blackstone Rotary" Washer,** are not satisfied—**they want more.**

They tell us the women like 'em. Many prefer them to other makes because the **Blackstone Rotary** is less tiring and more time saving.

Saves clothes too, and washes them clean—so clean as to satisfy the most scrupulous.

Blackstone Rotary.

Could tell you more about it; supposing we send you our catalogue, it tells a convincing tale.

Our washers have given satisfaction to dealer and consumer for 27 years. They still give satisfaction.

Be sure and get our prices for 1904.

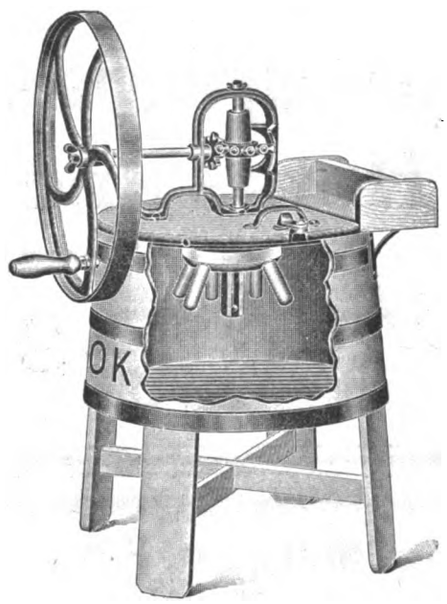
You ought to Handle THE HORTON Galvanized Rotary Washer No. 9

We Also Manufacture The Following

Well Known Washing Machines

Western	(Square)	Made in two sizes
American	(Round)	" " one size
Western Rotary	(Square)	" " two sizes
Horton Rotary	(Round)	" " one size
Globe	(Double Rubber)	" " three sizes

If your jobber does not handle them write us for prices.



HORTON MFG. CO., Ft. Wayne, Ind.

The O. K. Rotary Washing Machine

has been on the market for more than seven years and the constantly increasing sales prove that it is giving satisfaction . . . . . .

THE O. K.

is the only rotary washer that has the steel ball bearing, which reduces friction making the machine run so easily . .

The Wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soapsuds and cleaning them without rubbing them to pieces

The tub is made of Louisiana Red Cypress corrugated inside similar to a wash-board, and nicely painted and varnished with the hoops gilded.

The lid closes tightly, thereby preventing the escape of steam.

Only the best mechanics are employed to construct this washing machine and material and workmanship are of the best.

***The* O. K. is nicely and attractively finished and will attract attention in any store.**

The Wagner Mfg. Co.

CLEVELAND, OHIO

From Margam Forge, Glamorganshire, South Wales, to Martin's Ferry, Belmont Co., Ohio.

MF

Note the Coincidence:

The most favored brand of roofing tin, the MF which originated at Margam Forge in South Wales about sixty years ago, is now being produced by the American Tin Plate Co. in its works at Martin's Ferry, Ohio.

At the Martin's Ferry Works the MF old style process has been combined with the "New Method" of finishing Terne Plates. The result of this happy combination has been the U. S. Eagle N. M.

Ask W. C. Cronemeyer, Agent, 1211 Carnegie Building, Pittsburg, Pa., for our new booklet which teems with useful information.

F. H. SMITH MFG. CO.
CHICAGO, U. S. A.

BISSELL'S "CYCO" BEARING SWEEPERS

ARE sold under a positive permanent guarantee as to perfection of mechanical construction, sweeping qualities, etc., and as our goods are known to last from five to fifteen, and even twenty years, we do not have to resort to the expedient of a guarantee limited to one year, or three years. An article of inferior mechanism and destitute of salability, cannot be foisted upon the public by guarantees. A commodity must stand on its merit, and here is where the Bissell Sweeper has always been supreme. Facts are cold, unsympathetic things. The Bissell has stood the test of time, has steadily grown in favor with both the trade and the consumer, never once feeling the inroads of competition, until to day it is entrenched as it never was before, in this and every other country where carpet sweepers are used.

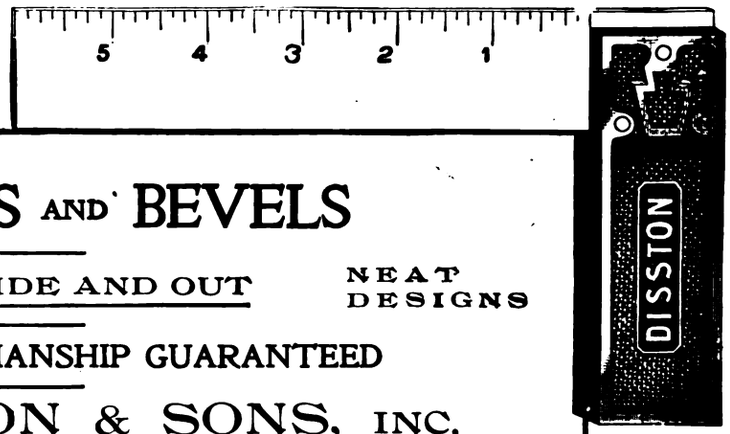
Just consider how extensively the Bissell Sweeper is advertised.

How it is in demand, and everywhere preferred.

What little effort is required to sell it.

How it practically sells itself.

And last, but not least, that it is the ONLY carpet sweeper on the market sold at a fixed retail price, which makes the dealer's profit good and absolutely secure.



Our Full line for 1904 shown at New York Furniture Exposition, Space No 109, 3d Floor.

ARMSTRONG'S

PIPE THREADING AND CUTTING OFF MACHINE

For hand or power.

No. 0. Threading Machine, Power

This machine has many points of superiority. It is light strong, compact and durable. Threads pipe from ⅛ to 2 inches. All gears and moving parts run in oil, in a dust and chip proof case. The Die Head will not wear loose as in other machines. The machine be can instantly changed from hand to power. Write for complete catalogue.

The **ARMSTRONG MFG. CO.,**

New York Office, 139 Centre St. **BRIDGEPORT, CONN**

Every Day

is a "dull day" for the average household knife. That's why the Rose Automatic Grinder is *never out of season*. Only set it where it can be seen and tried by your customers, and it will earn more profit to the square inch of space occupied than anything in stock.

The ROSE Automatic Grinder

is a practical novelty. It is simple, durable and efficient. Drawing a knife through the slots as shown, brings it in contact with a *revolving* emery wheel, that sharpens it and does it right. Set one on your counter and see it sell itself.

No man ever made money by disappointing a good customer.

This is the label that most of the women are looking for; they will be disappointed if they can't find it on some of the freezers on your floor.

We don't ask you to handle Peerless Icelands exclusively, but we know from experience of others that if you put a few on your floor, they will soon be your leaders.

There is a demand for Peerless Icelands caused by magazine advertising and sustained by the freezer itself; don't let the other fellow do all the business.

Ask your jobber.

HARDWARE

The Irvington Manufacturing Co., of Irvington, N. J., make the announcement that on January 1st, 1904, John H. Graham & Co., 113 Chambers Street, New York, became their selling agents. They will receive all orders and make quotations of prices, and goods will be billed by the company through John H. Graham & Co., to whom all remittances should be made. They express full confidence that an examination of their meritorious line will convince the Hardware trade that it is an attractive and profitable one to handle. Careful and prompt execution of orders is guaranteed and they solicit the consideration of their entire line.

♣

The J. Stevens Arms & Tool Co., Chicopee Falls, Mass., will have an exhibit of their Stevens-Duryea gasolene automobiles at the fourth annual automobile show which will be held at Madison Square Garden, New York, Jan. 16-23 inclusive. They will occupy spaces Nos. 34, 35 and 36, first balcony.

♣

In a recent advertisement of the Waynesburg Pressed Steel Company, Waynesburg, Pa., our mechanical department inadvertently used a shovel cut belonging to the Avery Stamping Co., Cleveland, Ohio, which illustrated, as was subsequently commented upon, a peculiarly unique article of its kind made only by the Avery Stamping Co. We desire to absolve everybody from having committed this error except ourselves and apologize to both the concerns interested. The Waynesburg Pressed Steel Co. will gladly forward their catalogue showing the high grade Shovel they stand sponsors for, and the Avery Stamping Company will be pleased to forward to those interested their complete catalogue to show the full line of their unique Shovels, etc., of which the cut referred to above indicated mode of manufacture.

♣

Troy Nickel Works, Albany, N. Y., as a holiday greeting to their patrons, are distributing an unusually good pocket diary for every day in the year, bound in full morocco, with gilt ornamentation on the cover. In addition to its advantages for diary purposes, a number of pages are devoted to useful information.

♣

Le Roy Leach, of Wood Lake, Neb., has recently eclipsed all of his previous records shooting at thrown objects and fully demonstrated that he is a skilled artist with the magazine rifle. On Nov. 19th, at King's Mills, Ohio, Mr. Leach shot at 1019 shotgun shell heads thrown at a distance of 25 feet, hitting the entire number without a miss. On Nov. 29th on the grounds of the Chincinnati Gun Club he excelled all known records by hitting 1601 blue rock targets thrown at a distance of 30 feet. Mr. Leach used Peters 22 Short Cartridges loaded with King's Semi-Smokeless Powder and a magazine rifle that was not cleaned throughout the entire shooting.

♣

Samuel Benner, the well-known forecaster, has issued his prophecy for 1904, in which he says: "I predict that prices for pig iron, railroad stocks and many commodities will be lower next year than for the year just passed. I predict that the Republican party will be successful in the November election. I predict that, after the year 1904 there will be a revival in trade, better times and higher prices will prevail until the year 1911. The present down cycle of prices and in general business ends in 1904. The year 1905 will be the beginning of a new up cycle in pig iron and for long prosperity in general business, lasting until the next commercial revulsion, due in 1911. The coming opportunities to catch business and prices at their lowest limits of depression will not happen again for twenty years."

♣

W. L. Barrett, Bristol, Conn., has recently moved into his new factory at the above place. It is the most modern plant in every respect for the exclusive manufacture of glass-cutters. He has facilities for turning them out at the rate of 4,000 per day. The demand for Barrett Glass Cutters has grown so steadily that the erection of the new factory is the third enlargement of his plant within the past ten years, the Barrett glass cutters having found a ready market in every country, with which we have consular connection.

♣

Moses Bamber, who has been one of the popular travelling representatives of the Savage Arms Co., Utica, N. Y., for several years, died on December 17th in Boston of typhoid fever. His many friends in the trade will miss his periodical visits which invariably proved to be episodes of congenial interest.

♣

The next annual convention of the Minnesota Retail Hardware Association will be held at "Elks" Hall, St. Paul, February 24th, 25th and 26th. The association headquarters will be at Windsor Hotel, Fifth and St. Peter Streets, where M. S. Matthews, Secretary, will welcome the members.

♣

The Diamond Saw & Stamping Co., Buffalo, N. Y., have issued a handsome and appropriate calendar for 1904, which, while exploiting their Sterling Hack Saws and blades, gives a complete calendar for the year, and on the side a handy thermometer, so the owner can tell what the temperature may be. The calendar is arranged to stand at any angle on the desk it ornaments.

♣

That American agricultural implements are meeting with great favor in foreign markets is evidenced by the success of the Morrison Mfg. Co., of Fort Madison, Iowa. A short time ago they shipped a sample plow to a large English concern in Argentine South America. It resulted in an order by cable for 500 of these plows, filling twelve cars for immediate shipment.

♣

Stowell Mfg. & Foundry Co., South Milwaukee, Wis., announce that W. S. Deighton, late Division sales manager for Milwaukee Division, International Harvester Company of America, has accepted a position with them as special representative for Missouri, Kansas, Oklahoma, Indian territory and Texas, with headquarters at Kansas City. They state that having secured floor space in Convention Hall for the Western Retail Implement and Vehicle Dealers' Convention in January, Mr. Deighton will be on hand with a line of hay carriers, slings, forks, etc., as well as a full line of their parlor and barn door hangers and fixtures.

♣

The National Sweeper Company of Marion, Ind., is preparing to make an unusually handsome display at Grand Rapids during the forthcoming Furniture Exhibition. It has been the practice of this company for a number of seasons to make an entirely different display each season and we are informed that the one for this year will be entirely different from any of the previous ones. They will also have on display some entirely new features in their line of Carpet Sweepers. The National Sweeper Company has also arranged for a permanent display of their line at the Manufacturers' Exhibition, 1411 Michigan Avenue, Chicago, Ill., where all dealers are invited to make their headquarters when they visit that city.

THE "ACCURATE" QUALITY OF A "STEVENS."

If one may judge by their page ad in this issue, of the J. Stevens Arms & Tool Company, Chicopee Falls, Mass., they intend that no letting up shall be noticed in the publicity department of their works. Although it is a well-known fact that Stevens Fire Arms are known in every corner of the Globe where "Records" are made and held, they still endeavor to impress the buyer that "Accuracy" and "Stevens" are synonymous terms, and are continually shaking hands with each other.

HARDWARE

VOL. XXVIII. JANUARY 10, 1904. NO. 7

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade.

HARDWARE is published on the 10th and 25th of each month. The subscription is $1.00 a year, payable in advance.

Subscriptions may commence with any issue.

Remittances should always be made by New York Draft, Post-office or Express Money Order.

Register your letters when you remit by cash.

Foreign Subscriptions.—For each copy to be mailed outside the United States the Canadas, and Mexico, the price is $2.50 a year, postage prepaid.

Change of Date.—It takes two weeks to change the date, after your subscription is renewed.

Change of Address.—Always give both your old and new address when you ask us to change your address.

The Name of your Post office and of the State you live in should always follow your own name when writing to this office. We cannot find your name on our books unless this is done.

Letters should be addressed

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

The end of an active year, in which hard work in plenty was found by the energetic Hardwareman and his indefatigable coadjutors, has resulted in a satisfactory state of feeling among the principals who having finished their inventories, find in the careful summing up of the profit and loss department it has not been fruitless in the way of profit. Taking inventory in a thoroughly conservative manner has not resulted in largely reducing stock valuations, as the tendency to "stand pat" which seem to be cabalistic words at present, will prevent changes at all radical, except prehaps on a few lines of heavy goods more greatly affected by the market for raw material than that of labor. The customary perils to the sanguine buyer that cling around precedents connected with presidential years will create no speculative purchasers. The buying will prove more conservative and consistent than usual for a year where good trade with satisfactory results is anticipated in every branch of our important industry and in all its analogous lines.

The holiday trade, in the large cities especially, has broken every previous record. It could scarcely have been different, as buyers in Hardware stores never before had so extensive and attractive an assortment of meritorious merchandise presented to them for selection. Finer goods than usual formed part of its tempting array, and purchasers experienced little difficulty in the way of finding a useful and suitable gift for the largest number of happy recipients by the bountiful distributor.

The year closes with a quick recovery from any depressing apprehensions resulting from Wall Street slumps, and the general feeling in the trade is one of hopefulness and expectency; drastic changes in the general trend of the markets are not apprehended, and as business surely opens strongly enough to justify the prophesy, it is believed that the Spring trade will be of a confident character, the wealth producing crops of 1903 making a background to the belief.

The fact that lower quotations on general Hardware were universally apprehended during the latter part of the year, made the fall trade of 1903 assume some of the charactristics of a hand-to-mouth business; resulting in lighter stocks for the inventory to record, and at the same time put them in better shape for the buyer when looking after Spring wants. The stocks throughout the country are in a safer condition for the future, than they were a year ago, and as the high-pressure conditions which prevailed last spring will be found missing in the season before us, it is the prevalent belief that the trade will not suffer from the change, but that conservative views will predominate during 1904.

The New Year opens under auspicious conditions that are pleasant to record. The merchants are thoroughly imbued with hopefulness believing as they do that there are no clouds in the financial sky to cause uneasiness; the country in all the active portions, especially West and South, is stronger in every point of industrial prosperity and agricultural wealth; the prospect of a profitable business being done for the first six months at any rate, is a settled conviction that will govern the action of our successful merchants; let us hope these sanguine views will be fulfilled in every particular and the pessimistic fears that were occasionally noted a few months ago will be relegated to oblivion.

OUR COMMERCE DURING NOVEMBER, 1903.

Details of eleven months' commerce of the year 1903 are just made public by the Department of Commerce and Labor through its Bureau of Statistics.

The figures for the month of November show a marked growth in exports of manufactures, the total for the month being $34,093,639, against $30,513,512 in November of last year. Agricultural products also show a marked increase in the month, the figures for November, 1903, being $114,172,255, against $83,035,850 in the same month of last year. The increase in agricultural exports occurs chiefly in cotton, of which the value of the month's exports is unusually high.

The increase in exports of manufactures is distributed through many articles, but does not occur, as had been expected, in iron and steel. Discussions in trade circles and in the press during the past few weeks have predicted a revival in the export trade of iron and steel manufactures, but the November figures of exports of this class of merchandise do not justify this prediction. The total value of iron and steel manufactures exported in November, 1903, was $7,988,415, against $8,119,924 in November of 1902, $8,180,193 in November, 1901, and $10,112,721 in November, 1900. For the eleven months ending with November the total exports of iron and steel manufactures are $89,685,201 in value, against $90,136,124 in the corresponding months of 1902, and $94,112,782 in the corresponding months of 1901. Notwithstanding the slight decrease in exports of iron and steel, the total of all manufactures exported during the eleven months ending with November, 1903, is $382,768,127, against $377,757,576 in the corresponding months of last year.

Imports for the month show a decrease of over $8,000,000 compared with November of the preceding year. This decrease is divided between manufacturers' materials, food stuffs, and the group designated as "articles of voluntary use, luxuries, etc." The largest decrease occurs in the group "articles wholly or partially manufactured for use in manufacturing," the reduction in this class being about $3,000,000, as compared with the corresponding month of the preceding year. This reduction occurs largely in iron and steel, of which the importations for the month are less than half

Digitized by Google

those of the corresponding month of last year, the figures for November, 1903, being $2,309,233, against $4,779,093 in November, 1902. For the eleven months ending with November articles wholly or partially manufactured for use in manufacturing show an increase of $15,000,000 over the corresponding months of last year, while articles in a crude condition for use in manufacturing show an increase of $11,000,000 in 1903, as compared with the corresponding months of 1902.

These figures of the commerce of the eleven months would seem to indicate that the total commerce of the United States during the year about to end will be greater than in any preceding year, but that the total exports will fall a few millions below those of 1900 and be about equal to those of 1901, but materially in excess of those of 1902, while the total imports will exceed those of any preceding year, and combined with the exports make the grand total of commerce more than in any earlier year; also that the exports of manufactures will exceed those of 1902 by several millions, but be somewhat below those of the record year 1900, and perhaps 1901.

THE PROGRESS IN OUR MATERIAL INDUSTRIES.

"The Progress of the United States in its Material Industries" is the title of a statistical statement presented by the Department of Commerce and Labor through the annual report of the Chief of the Bureau of Statistics. The table pictures conditions in the great industries and material interests of the United States in 1903, where such figures are available, and compares those conditions with those of earlier years, running back, where possible, to the year 1800.

Area, population, wealth, public debt and the interest thereon, gold and silver production, money in circulation, savings-bank deposits and depositors, value of money of the country, value of farm products, imports and exports of principal articles and total of imports and exports, railways in operation, number of postoffices, receipts of the Post-Office Department, and many other subjects indicating in various ways the financial, industrial and commercial condition of the country are included in the tables, which give opportunity to compare present conditions with those of earlier years. In area, for example, the total in 1903 is 3,025,600 square miles, against 2,980,959 square miles in 1850, and 827,844 square miles in 1800. These figures do not include Alaska or the islands belonging to the United States.

The population in 1903 is stated at 80,372,000, against 23,191,876 in 1850 and 5,308,483 in 1800. The wealth of the country is stated at 94 billions of dollars in 1900, and presumably 100 billions would not be an unreasonable estimate for 1903, while for 1850 the wealth of the country stood at 7 billion dollars, no estimate being given for any year earlier than 1850. The per capita wealth is set down at $1,235 in 1900 and $307 in 1850, having thus more than quadrupled meantime. The interest-bearing debt in 1903 is 914 million dollars, against 1,724 millions in 1880 and 2,046 millions in 1870. The per capita indebtedness of the country in 1903 is $11.51, against $60.46 in 1870, and the interest per capita, 32 cents in 1903, against $3.08 in 1870.

Gold and gold certificates in circulation in 1903 for the first time exceeded one billion dollars, or, to be exact, 1,031 millions, against 810 millions in 1900, 232 millions in 1880, and 25 millions in 1870. The total money in circulation in 1903 is 2,367 million dollars, against 1,429 millions in 1890, 973 millions in 1880, 675 millions in 1870, and 435 millions in 1860. The per capita money in circulation in 1903 is $30.21, against $26.94 in 1900, $19.41 in 1880, and $13.85 in 1860. Deposits in savings banks in 1903 are 2,935 million dollars, against 1,524 millions in 1890, 550 millions in 1870, and 149 millions in 1860. The value of manufacturers for the census year 1900 is given at 13 billions of dollars, against 5¼ billions in 1880, and less than 2 billions in 1860. Railways in operation in 1902 are 203,132 miles, against 166,703 miles in 1890, 93,262 miles in 1880, 52,922 miles in 1870, 30,626 miles in 1860, and 9,021 miles in 1850.

THE AMERICAN CHAMBER OF COMMERCE IN BERLIN.

OFFICES: Equitable-Gebaude, Friedrichstrasse 59-60.

OFFICERS AND DIRECTORS FOR 1904.

President, Ex.-U. S. Consul-General Herman Kreismann.
1st Vice-President, F. Hessenberg, (Westinghouse Elec. A. G.)
2d Vice-President, Elmer Roberts, (Associated Press).
Treasurer, I. Wolf, Jr., (Wolf Bros.)
Secretary, George S. Atwood.

DIRECTORS:

O. Behr (Bradstreet Company).
Bernard Goldsmith (N. Y. Life Ins. Co.)
Justizrat Dr. Karl Grundler (Equitable Life Assur. Society).
J. A. Hutmacher (McCormick Harvester Machine Co.)
Dean B. Mason (Vice U. S. Consul-General).
S. H. McFadden (Chesebrough Mfg. Co.)
P. A. Panckow (Panckow & Co.)
W. F. Plass (American Machinery Co.)
Hilmar Stephany (California Fruit Co.)
Fred W. Wile (Chicago *Daily News*).

APPLICATIONS FOR MEMBERSHIP.

The following applications for membership in the Chamber have been received:

American Electrical Novelty & Mfg. Co., (Electric Novelties), Berlin, New York and Chicago.
German Times, The (Anglo-American newspaper), Berlin.
Levy, Dr. Anton (Patent Attorney), Berlin.
Salomonski, S., (Advertising Agency), Berlin.
Wehner, Kreuels & von Wille (Commision and Export), Berlin.

ANNUAL REPORTS OF THE CHAMBER.

Pursuant to instruction of the Board of Directors, the editors of the *Bulletin* have in preparation a pamphlet edition of the annual reports of Standing Committees of the Chamber, a resume of which was given to members at the General Meeting on Nov. 28. They will give a good idea of the work performed by the various departments of the organization—work none the less effective because of its quiet, routine character. It is proposed to append to the reports a revised list of members and their addresses.

HENRY DISSTON & SONS.

An Example That Could Be Followed.

An unusual and interesting method was adopted by Henry Disston & Sons, embracing the 3,500 men employed in the Saw, Steel, Tool and File works, to ascertain if any cause for disagreement existed in this vast body of workmen. In token of its faith in the loyalty of its employees and its certainty that no strikes are likely to occur to prevent it from filling its orders, the firm incorporated the following in a notice recently sent out to its customers: "We are entering the new year with the most pleasant and cordial relations between ourselves and our 3,500 employees." This sentiment is assented to by all of the Disston workmen, excepting ten or a dozen. The way it came about is this: Instead of waiting for the men to prefer grievances, or to become discontented without openly manifesting their feelings, the firm addressed a written inquiry to all persons in the works, asking if they were satisfied with their wages and the conditions of their employment during 1903. They were invited to state frankly any grievances and to make any request which they thought might tend to improve and maintain harmony between them and their employers. All but a small number of the 3,500 replied that they were satisfied with the treatment accorded them by the firm and that they had never been importuned to join or to refrain from joining any labor or other organization by their employers. Some of the men who affixed their signatures to the responses have worked for the Disstons for half a century, and had a part in developing the plant from a small beginning to its present proportions. The Disstons believe that the obligations and relations of employers and employees should be mutual.

SARGENT & CO.'S CONDENSED LIST AND DISCOUNT SHEET.

Sargent & Co., New Haven, Conn., and 149-153 Leonard Street, New York, are distributing to their customers a condensed price list and discount sheet, No. 4, which will find a grateful welcome wherever sent. It is applicable to their 1901 general catalogue, contains 208 pages of catalogue size, 8x11, and the arrangement follows the pages of the catalogue. It is prepared and printed in the admirable manner characteristic of all the artistic printing issued by the catalogue department. An important page of information regarding special work is given on page 5. The pages from 7 to 74 are devoted to prices on all the goods made in special designs; an admirable feature of which is, without using much space, the design is indicated by a miniature portion of cut which illustrates it, this helpful idea is carried through all these pages, and makes constant reference to main catalogue unnecessary. Full lists of Lock Sets and other design goods follow to page 117. This is followed by the price list and discounts of all other goods made by Sargent & Co., occupying pages 119 to 199 inclusive, these pages give at a glance the list and discount of any article sought for. The pages 201 to 207 apply to discounts on the lines of goods not of their manufacture, which are shown in their general catalogue, and the discounts on which are so well appreciated by their customers, for quick and easy reference. This is a valuable book to a dealer handling "Sargent" goods, and the amount of labor involved in a project so important, can scarcely be imagined except through its correctness.

CHICAGO RETAIL HARDWARE ASSOCIATION.

The Chicago Retail Hardware Association held their annual meeting at 8 p. m., Wednesday, Dec. 30, in their hall, room 412, Masonic Temple.

There was a large attendance present and much business of an important nature was transacted.

The following officers were elected for the ensuing year:—

President—H. E. Gnadt.
Vice-President—G. A. Neeb.
Secretary—G. R. Lott.
Collector—John Hora.
Treasurer—J. L. Smith.

Buying Committee—H. C. Peppler, F. F. Porter, W. J. Krueger.

Executive Committee—H. E. Gnadt, G. A. Neeb, W. B. Costello, D. McLaughlin, Wm. Gormley.

"MORROW COMFORTS."

Eclipse Machine Co., Elmira, N. Y., as a holiday announcement give an illustration of their "New Morrow 1904" as part of a photographic reproduction showing a young lady bicyclist engaged in using it on a country road, with the customary surroundings. From the contented feeling of positive safety which is plainly visible on the young lady's face, it is safe to assume the "1904 New Morrow" is an unqualified success.

SUN COMPANY'S CHANGE OF BASE.

Will Shortly Occupy Their Fine New Plant at Columbus, Ohio.

The friends and customers of the Sun Manufacturing Company of Greenville, Ohio, will be interested in knowing how greatly they have increased their facilities for handling their growing business. The company's new plant at Columbus recently completed and to which they will remove early in January, will afford them fully double their present capacity and facilities for handling a business which has become as wide as the country. The principal building is a brick, fire-proof structure, three stories in height, 100 feet wide by 260 feet long. By locating in Columbus the factory will not only be convenient to far better transportation facilities than in its present location, but will also have the advantage of being in a larger manufacturing center with better railroad rates, and many other advantages that it does not now enjoy. The company announce that from time to time additions will be made to its line and that it will be so situated as to give the promptest service to all customers. The Sun Manufacturing Company manufactures cash registers, combination show cases, money drawers, coffee mills, woodenware specialties and rat traps.

DEATH OF PAUL COLEMAN DE VOL.

Paul Coleman DeVol, senior member of the firm of P. C. DeVol & Son, of Council Bluffs, Iowa, and president of the Wright & Wilhelmy Co., of Omaha, Neb., died at his home in Council Bluffs on Friday, Dec. 26th, of apoplexy after an illness of four days.

Mr. DeVol was born in Chatham, N. Y., Jan. 10th, 1836. His parents came West and in 1847 located at Council Bluffs, which was then known as Mormon Crossing, later as Kanesville and still later as Council Bluffs. His first business venture was at an early age when as the proprietor of a six-foot lunch stand between two buildings he supplied food and soft drinks to the public in the frontier town.

In 1861, in connection with the late Milton Rogers, he engaged in the stove and Hardware business and for 42 years without interruption he successfully conducted the business at the same location. In 1863 he bought out Mr. Rogers and continued alone until 1882, when W. S. Wright joined him in

PAUL COLEMAN DE VOL.

the establishing of a jobbing business that two years later was moved to Omaha and merged into a stock company, now the Wright & Wilhelmy Co. Mr. DeVol was the first president of the company, holding this office continuously for 20 years. He was a gentleman of quiet taste and habits, who found his greatest pleasure in the society of his family and a few personal and congenial friends. While never active in the conduct of the business of the Wright & Wilhelmy Co., of which he was the honored head, his wise and conservative counsel and means were always at the service of his associates and were a strong factor in assisting them to reach the position they occupy. Conservative in his disposition, his confidence in his own opinions and in his business associates when once established was too deep to be moved or shaken, and as his genial disposition which endeared him to his friends will be missed by them, so his confidence and support will be missed and mourned by his business associates, who feel that they have lost not only a wise and conservative counsellor but a loyal and trusty friend.

PUTNAM NAIL COMPANY.

The Putnam Nail Company, Neponset, Boston, Mass., are sending by mail samples of their new Putnam horseshoe nails when asked for. These nails are made by their newly patented, up-to-date process, and are referred to as giving perfect satisfaction wherever they are introduced. The attention of the trade is called to the fact that the Putnam Nails are marketed only through regular trade channels, and are not sold direct to horseshoers.

IT NEVER DISAPPOINTS.

The Peerless Inland Freezer, manufactured by Dana & Company, Cincinnati, Ohio, has a record for excellence which the page ad in this issue of our paper will certainly justify. Liberal in their advertising they let the trade know that the freezer that never disappoints the purchaser whether jobber, retailer or consumer, is the "Peerless Iceland" which doesn't "let the other fellow do all the business."

Digitized by Google

RECENT TRADE PUBLICATIONS.

THE LANSING WHEELBARROW COMPANY, Lansing, Mich., have placed in the hands of the trade catalogue No. 7-A, which is a very compact little pamphlet of 158 pages in which the contents are well illustrated and fully described and covering their line of products, such as wheelbarrows, warehouse trucks, field rollers, fence machines, etc., etc., and in addition, horse pokes, hods, skids, rubber tired wheels, hand carts, etc. The concern possesses facilities for a most complete line of their goods as indicated by the catalogue, their Lansing plant covering 15 acres, every foot of which is in use; having been organized in 1881, at that time they manufactured but three styles of wheelbarrows. At the present time they claim to be the largest manufacturers in this line in the country. Many of the goods shown in this catalogue are not ordinarily kept in stock by the trade, so that it is an advantageous catalogue for the dealer to have, and he will find it a desirable one to have conveniently at hand to fill some unexpected call. It is certainly a very complete little pamphlet to get into the hands of every one of our readers to whom it might be useful.

THE INDIANA MANUFACTURING COMPANY, Peru, Ind., are placing before the trade a very neat catalogue devoted to their Refrigerators, having an extremely characteristic cover, remainding one of an iceberg. At the top is a large white star, below which are two polar bears partly covered by a green sign bearing the words "North Star Refrigerators" and from the bottom of this appears what seems to be a heavy icicle. The company state that they have endeavored to turn out only such goods as would serve their purpose well, accomplishing this by using the highest grade of material obtainable, and employing only the best workmanship. The North Star Refrigerators are made in all desired sizes and are placed on the market at as low a price as is consistent with first class material and workmanship. They are also prepared to build special refrigerators and cooling rooms to order, and will, upon application, furnish plans and specifications for any desired size and design. Those of their "North Star" are made of kiln-dried oak, and ash lumber. The ice-chambers are lined throughout with galvanized steel. They also make a cheaper line of refrigerators which they style the "Indiana" which is first class, and at the same time cheap enough to compete with the cheap softwood boxes that are now on the market.

THE OHIO CULTIVATOR COMPANY, Bellevue, Ohio, have recently issued a pamphlet catalogue containing 16 pages devoted entirely to their Ohio hay-press, a twentieth century product, which is fully described and illustrated. In its construction, the company state they have avoided the weakness to be found in the old types of hay-presses, while they have incorporated all the desirable features, combining with them some peculiarly their own. In it is found strength and durability with great speed and ease of operation. While the Ohio is comparatively a new machine, it has already demonstrated its value. Those most deeply interested in hay-presses have quickly recognized its superiority. The very best of steel is used largely in the construction of this machine. A point worthy of mention is the fact that while the Ohio is one of the strongest presses made it is also the lightest of its class. This is due to its scientific construction, the most metal being at the point of greatest strain. The 14x18 press weighs 3700 lbs.; 16x18, 3800; and 17x22 weighs 4000 lbs. On the last pages of the pamphlet the company give an extended telegraphic code for parts and extras which greatly simplifies the matter of telegraphing for same.

THE KEYSER MANUFACTURING COMPANY, Chattanooga, Tenn., publish an exceedingly attractive catalogue relative to their Odorless Refrigerators which they illustrate very extensively, giving sectional views showing construction. Seven pages in the center of the book are devoted to testimonials in favor of their Odorless Refrigerators. The Keyser Mfg. Co. also make the Imperial, which are opal glass lined. These are also fully illustrated and graphically described. Another of their productions is the Frigidzone Refrigerator, and with this a freezing temperature can be obtained by application of salt to the ice in the ice chambers. The construction of this refrigerator makes it a valuable wine closet, as the bottles can be kept very cold without the direct application of ice. It is arranged to have the water from the melted ice drawn therefrom without opening the doors to the food and storage chambers, thereby preventing the escape of the cold air, and the inrushing of warm air, resulting in a great saving of ice. These are built to order according to desired specifications.

GEORGE ERTEL CO., Quincy, Ill., have just brought out their annual catalogue of Improved Gem and Victor Baling Presses. This was established in 1867 and claim for their motto "Honesty, Integrity and Reliability" and also claim as a result "The best hay presses that skill and ingenuity can devise." On the first page of their catalogue they present illustrations representing the different styles of Baling Presses as invented, patented and manufactured by them from the years of the '60s up to the present time. The Ertel wrought steel full circle Gem hay and straw baler is illustrated, showing the press as it appears moving from stack to stack. It is a (continuous travel) full circle press, two feeds to each round; no driver is necessary, the pitman being provided with an automatic brake device preventing all jerk and jarring when rebounding. The pitman always rebounds before the team crosses—hence no danger for the horses, and as the pitman at that time does not move it is easy for the feeders to place big charges of hay or straw in the press before the movement of the plunger starts forward. No tongue is necessary for operating the Gem, thus avoiding the cruel treatment of the team as there is no jar or jerk on the team when the pitman rebounds. Another good point in favor of the Gem is the facility with which it can be put into operation or removed.

F. H. & E. B. VROOMAN, 225 Dearborn Street, Chicago, Ill., have published an envelope size pamphlet of 16 pages, devoted entirely to their sanitary Sink Strainer which is a receptacle to receive the waste material that was formerly thrown into the sink. Through holes in its front and bottom, water and other liquids flow from it into the sink. All the contents, save the liquids, it retains, and these are thrown at leisure into the refuse barrel. Economy alone, irrespective of other needs, would recommend its use. By keeping solid substances out of the water pipes, it saves many plumbing bills, in addition to doctors' bills saved by it in the prevention of disease. In form it is like a lamp shade, made of plain or japanned tin as preferred, and is extremely light in weight. The pamphlet devotes a page to the cost of freight per 100 lbs. to all of the principal cities, so that a dealer anywhere can tell just what the rate of freight will be.

IVER JOHNSON'S ARMS & CYCLE WORKS, Fitchburg, Mass., have issued their 1904 catalogue, the cover of which is very artistic; in fact, the entire pamphlet is high grade, being well printed on excellent paper. The booklet gives brief and concise descriptions of their 1904 models and of the materials of which they are made. They claim that nothing better is obtainable, and that their product is backed by twenty years of bicycle manufacturing experience. Their model 90 is equipped with their new truss frame which they state is a strong seller, universally liked, and is one of their very best features, giving evidence of a new and up-to-date bicycle and not an old one enameled over. For strength, speed and durability, they claim it is superior to anything made, and they are willing to substantiate the claim. The catalogue is gotten up very neatly throughout as regards illustrations, printing, style and paper, the appearance of it being such as to impress a prospective purchaser of the character of the concern behind it.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Libel Tending to Injure One in His Trade or Corporation.

QUESTION: Some time ago I gave a house a large order for certain articles. When the shipment arrived I found that the articles were inferior to those which I had ordered, but at the same price as the goods I had ordered. I wrote the house from whom I received the goods and told them that I would accept their shipment, but not at that price. We carried on some correspondence, which resulted in this house refusing to do business with me. Shortly after this incident another dealer showed me a letter he had received from this house stating that the house would no longer do business with me for the reason that when I received goods I always "squealed" at the price and refused to pay the full amount of the bill, and that I was not to be trusted. Kindly inform me whether this statement would enable me to sue this house for libel, as my reputation is excellent and this charge is absolutely false.

REPLY: We are of the opinion that to write of a business man that he always "squealed" at the price of the goods after he had received them, and that he was not to be trusted, is libelous *per se* as a statement tending to injure him in his trade, occupation or employment. Each libel case, however, must rest upon its own state of facts, and it is for the court or jury, as the case may be, to say whether or not the writing is libelous. If the statement is unquestionably injurious to one in the course of his employment it is as a matter of law libelous, and the injured person is entitled to recover without any proof on his part of any special damages he has sustained by reason of the publication of the libel.

Collection of Alimony.

QUESTION: In 1898 my wife obtained a divorce from me and the decree of divorce directed me to pay her $20 per week alimony as long as she should live. I have not paid this amount regularly and my wife's attorneys have been endeavoring to serve papers on me. Kindly inform me what the effect would be, if I am served with papers, and whether I could be sent to jail for not paying the alimony directed by court.

REPLY: Where the defendant, in an action for divorce after judgment is obtained against him, has no property which the plaintiff could sequestrate, the plaintiff must proceed to collect alimony in the following manner: She must first demand the payment of the alimony, and, if the demand is not complied with, an order to show cause why the defendant should not be punished for contempt for his failure to pay alimony is obtained from the court. On the return day of this order, unless the defendant can show good reasons why he should not pay the alimony, the court will make an order adjudging him guilty of contempt, and will also issue a warrant of commitment directing the sheriff to take the defendant into his custody and to hold him until the amount of the alimony which the plaintiff claims at that time is paid. If, therefore, the defendant fails to pay and he can be found by the sheriff within the county where his commitment is issued, he will be arrested and sent to the county jail, where he will have to remain until he pays the sum specified in the commitment or is lawfully discharged. If the amount of alimony is under $500, the defendant cannot be confined in jail more than three months. If, on the other hand, the amount of the alimony for which he is committed is $500 or more, he may be confined as long as six months, but no longer.

Question of Title.

QUESTION: A owns a piece of property twenty-five feet wide and one hundred feet deep. B owns the adjoining piece of property. For the past twenty-five years or more, and until a survey was made of the property some time ago, A was under the impression that he had twenty-five feet front of property, and B also was of the same opinion, but the survey revealed the fact that B had in his possesion one foot of the twenty-five feet, the width of A's property. During all this time, when A paid the taxes on his property he also paid the taxes on the one foot of property in question, which really belonged to him, but which was in the possession of B without the knowledge of either. Would you kindly inform me (1) Has B the right to hold this one foot of property, claiming the same by adverse possession? (2) If he has, is there any way in which A can redeem the same? (3) Does the fact A paid the taxes on this one foot of property during all this time effect B's title by adverse possession, if he has any at all?

REPLY: We are of the opinion that B has acquired no title to the property in question by adverse possession. In the facts before us for consideration, it is expressly stated that both A and B were of the opinion that A had twenty-five feet front of property. It cannot be said, therefore, that B held this property under an adverse claim of right. He was in possession, but was entirely ignorant of the fact, as was also A. It is one of the essential elements of a title by adverse possession that the claim to the property be asserted as a matter of right (Burbank vs. Fay, 65 N. Y. 57-65) and it is held that "Any possession to be adverse must be accompanied with a claim of right or title; a mere naked possession or intrusion without claim of right will inure to the benefit of the owner." (Gerard on Titles to Real Estate, 4th Ed., p. 754). The fact that A continued to pay the taxes on the full 25-foot lot effects the case only as it is strong evidence to show that A was not aware of any adverse claim to the property.

MORE THAN USUALLY USEFUL.

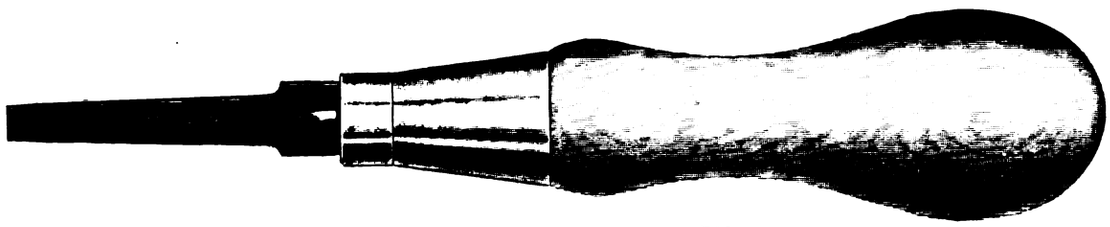
Among the vast number of calendars with which the mails are flooded at this time of the year, the greater portion of them rely upon the artistic feature to stimulate a desire in the recipient to retain it, and by giving it a prominent place in the office, keep the name of the distributor constantly before them. But of all the calendars received by us, we think that for usefulness and appropriateness combined that one projected by the well-known pump makers, F. E. Myers & Co., Ashland, Ohio, "take the cake" as the boys would say, and we consequently "take off our hat to Myers." This Poster-calendar is designed to be hung up, being a pretty good sized hanger, and as it contains nearly every cut in their catalogue under its appropriate catalogue number, many an item of pumps or their repairs is selected in the store by a casual perusal of this useful poster. It is certainly significant of intelligent advertising, and will bring better results than most people would surmise.

HIBBARD, SPENCER, BARTLETT & CO.

Hibbard, Spencer, Bartlett & Co., wholesale Hardware dealers, Chicago, have elected the following officers for 1904:—

President, A. C. Bartlett; vice-presidents, Charles H. Conover, Wm. G. Hibbard, J. J. Charles, Frank Hibbard; secretary, A. M. Graves; treasurer, E. G. Clark; assistant secretary, C. B. Whipple; assistant treasurer, H. J. Sawe; credit manager, F. L. Macomber. A new director was elected in the person of Wm. A. Sickles. Mr. Bartlett, the president, was previously first vice-president. Wm. G. Hibbard, the new second vice-president, is a son of the deceased president. He was formerly a director. Mr. Conover was formerly secretary of the company, while the new secretary, assistant secretary, assistant treasurer and third and fourth vice-presidents were formerly only directors. Mr. Clark, the new secretary, had formerly the title of cashier.

THE HOTEL PIEDMONT.



The Piedmont Hotel, of Atlanta, Ga., have forwarded to us one of the handsomest Hotel souvenirs we have had brought to our attention. The graphic descriptions and magnificent illustrations of the elegance in detail for which this superb hotel is noted, would indicate that the Southern Hardware Jobbers' Association made a wise selection when Atlanta was picked out as being the most desirable spot to hold the next convention, taking place on May 24th to 27th. The hotel has a unique location, by which the rooms are all outside, there being no closed courts. The Piedmont standing on almost the highest point in the city provides a superb view from all parts of the building.

NEW GOODS AND SPECIALTIES.

MAYHEW'S DOUBLE END SCREW DRIVER NO. 710.

H. H. Mayhew Co., Shelbourne Falls, Mass., are placing upon the market something novel and useful in the way of a screw driver having two blades, of which we give illustrations. The two blades are constructed in a simple manner that makes them as strong as any single blade could possibly be, the two ends of which measure respectively 3-16 and 5-16 inches. The double blade is pivoted in the center, allowing the use of either end by simply pushing the other end into a malleable iron socket, which is grooved to hold frictionally the shank of each blade when ready to be used. A tapered steel ferrule adds strength to the construction, holding firmly two lugs on the socket so that it is claimed twisting is impossible. The tool has no detachable parts which is a commendable feature.

DOUBLE END SCREW DRIVER NO. 710.

SHOWING THE MANNER OF ADJUSTMENT.

GOODWIN'S STEEL JACKS.

R. E. Rodriguez, 91 Chambers Street, New York, is the manufacturer of the Goodwin Steel Jacks suitable for carriages, wagons, automobiles, cars and heavy work generally.

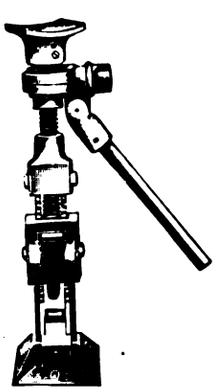

FIG. 1.—GOODWIN'S B. B. STEEL JACK.

FIG. 2.—GOODWIN'S REVOLVING LEVER JACK.

In all the principal parts steel is used. The mechanism is exceedingly simple, presenting but few points to frictional wear, and all parts are interchangeable. Goodwin B. B. jack Fig. 1, has a lifting capacity of 2500 pounds. By means of a pall acting automatically, the adjustment is securely held at any required height. Besides this adjustment, the jack has a screw lift of 5½ inches which is regarded as very important in connection with automobile use. By turning a simple spring device, the operation of raising or lowering the jack can be changed instantly. Of the sizes now made, No. 1 is suitable for heavy automobiles, construction work, etc. Carpenters will find this size a very useful article to add to their tool chest. Height closed 11½ inches, adjustment 3 inches, screw lift 5½ inches; height over all 19 inches, weight 7¼ pounds. No. 2 is for carriages, wagons, and where larger adjustment is needed. Capacity same as No. 1; height closed 16 inches; adjustment 8 inches; screw lift 5½ inches; height over all 29 inches; weight 8½ pounds. Goodwin's Revolving Lever Jack is shown in Fig. 2, and is suitable for light automobiles, vehicles, wagons, etc. The adjustment is very quick and on the same principle as in Fig. 1. The eccentric movement in connection with the lever handle permits of a quick action in lifting a load, and the construction is such that no matter how the jack is placed, the user can always instantly bring the lever so as to be directly in front of him for convenient use. These jacks are made in two sizes, Nos. 11 and 12, which weigh 7½ and 8½ pounds respectively, and with a lifting capacity of 1,000 pounds. No. 11 height, closed 11½ inches, adjustment 3 inches, lever lift 1½ inches, height over all 15 inches. No. 12, height closed 16 inches, adjustment 8 inches, lever lift 1½ inches, height over all 25 inches.

MANN'S RAZOR SPECIALTIES.

Wm. T. Mann & Co., 535 Euclid Avenue, Cleveland, Ohio, are the manufacturers of a line of razor specialties, which through intelligent advertising, have become extremely popular in the Hardware trade. In Fig. 1 we give herewith an

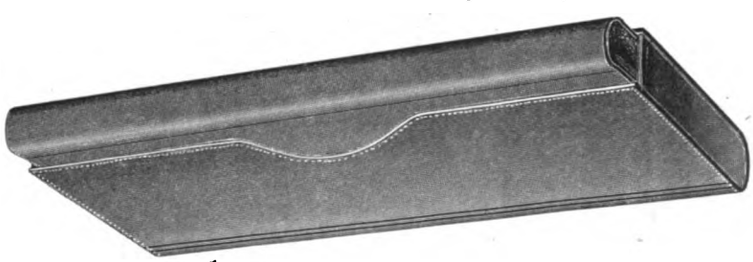

FIG. 1.—THE MANN RAZOR CASE.

Digitized by Google

illustration of their razor case which they make in four sizes to hold from two to seven razors. The case is made in two pieces from the best leather suitable for the purpose, one part sliding into the other, and containing a small "Mann's" razor strop for travelers use, forming a close and compactly made case that is popular wherever introduced. We also illustrate in Fig. 2 the manner in which Mann's razor paste is distributed to the trade. Standing upon the counter it attracts attention, and at the nominal price of ten cents a box, meets with a ready sale. The paste is one of the most meritorious articles of the kind sold by the Hardware trade, when placed upon the finishing side of the strop the razor clings to it in the operation of stropping, giving it an inimitable cutting edge of the most desirable kind. Our readers should write to the makers as above for further information.

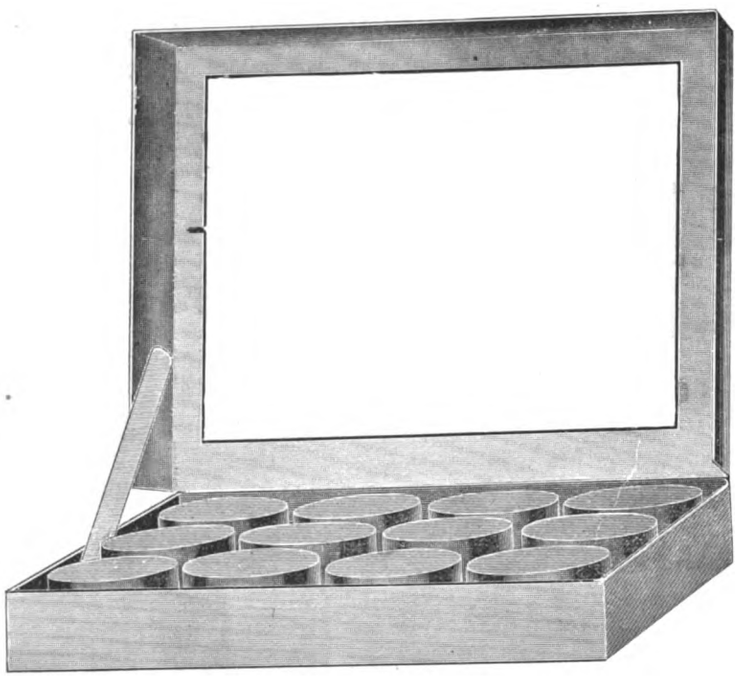

FIG. 2.—MANN'S RAZOR PASTE.

THE MYERS POWER SPRAY PUMP.

F. E. Myers & Bro., Ashland, Ohio, are the manufacturers of the power spray pump shown in Fig. 1, which is designed to meet the requirements of fruit growers who wish to use a gasoline engine for spraying. In Fig. 2 the pump is illustrated in a dismantled condition to show the ease with which the valves and parts liable to get out of order can be reached for repairing. The pump is referred to as being built of sufficient weight and strength to withstand the pressure necessary for supplying four strings of hose. It is fitted with concave brass valve seats, ground brass poppet valves and removable brass cylinder, with the cylinder so arranged that it can be removed when worn. The valves are located on the top, and can be reached by removing the top cap and air chamber. The pump is fitted with a check valve between the air chamber and pump, to retain the pressure in the air chamber, thus to relieve the pump from all strain except on the movement of the piston. A brass piston rod is supported by a strong yoke attached directly to the head of the pump to secure perfect alignment. The pump is furnished with a yoke and stub pitman to attach to a back geared engine. The safety valve can be set to regulate the pressure desired, and the pressure gauge registers 200 pounds.

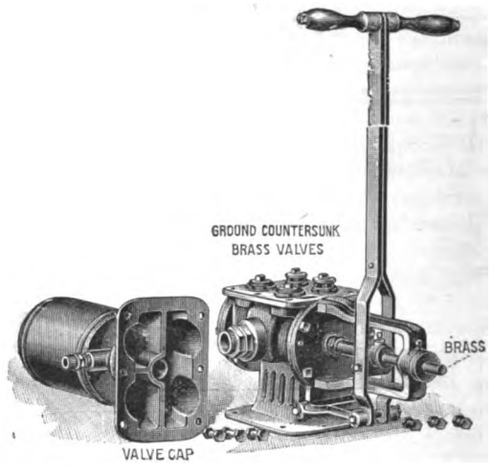

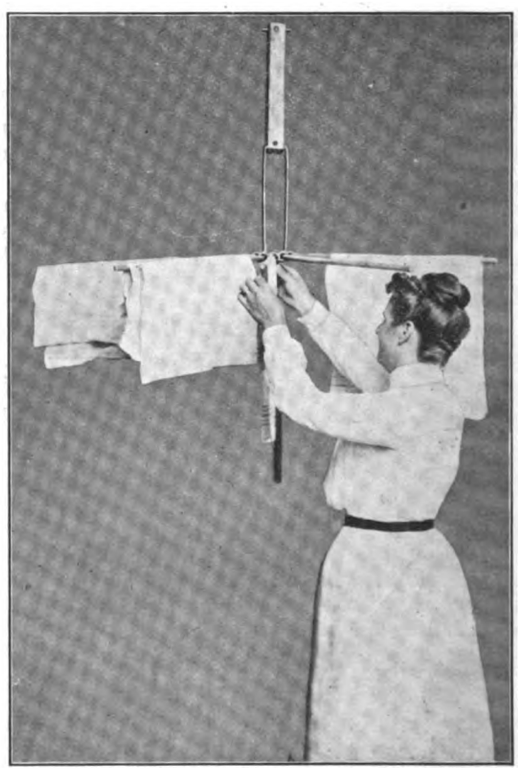

FIG. 2.—THE MYERS SPRAY PUMP DISMANTLED.

NATIONAL CLOTHES DRYING RACK.

Among the many desirable household appliances which Matt. Redlinger, of Freeport, Ill., is introducing through the Hardware and housefurnishing goods trade, the National Clothes Drying Rack, which is graphically illustrated in the engraving herewith, has proved exceedingly popular. It is claimed to be unsurpassed for usefulness, convenience and simplicity of operation. This rack is strongly made and nicely finished. The handle and arms are fastened in an iron casting which has a double wire arm that is pivoted in the same, and the lower end of these arms pivot in the lower end of wood block which is screwed to the wall. By tilting the handle forward it unlocks, allowing rack to lower 26 inches. They are finished in varnish and black baked enamel.

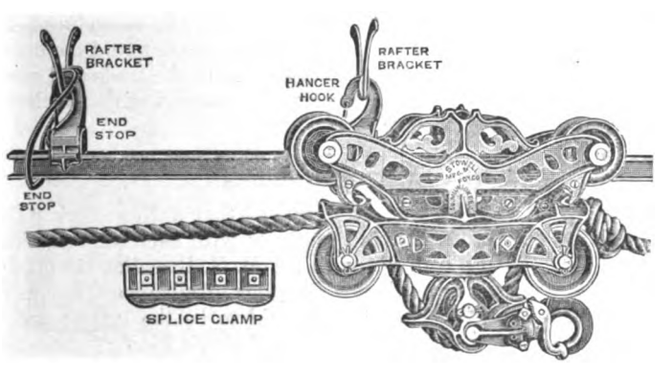
BONNEY COMBINATION WRENCH.

Bonney Vise & Tool Works, Inc., Philadelphia, Pa., are introducing through the Hardware and Supply trade a new Combination Wrench which is claimed to possess a number of special features which commend it to the artisan requiring

BONNEY COMBINATION WRENCH.

such an appliance. We give an illustration of the same herewith in which it will be noticed that the gripping jaw carrying the wheel has concaved extension, or shoulder on side supported by convexed wings on wrench jaw, forming a perfect support for the gripping jaw, and relieving all strain



WITH GRIPPING JAW THROWN BACK.

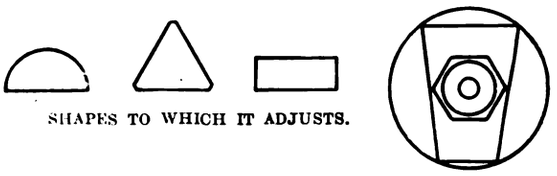
from pin. The slot in jaw does away with the screw pin, which was apt to be lost or become so tight that it could not be removed. By throwing jaw all the way back, it can be taken out and reversed instantly. The pin is made solid with the gripping jaw, and cannot become detached. The double cap on back end of wrench jaw fitting over collar on end of sleeve not on opposite sides prevents any cramping of nut, or any liability of collar slipping over. The eccentric wheel is a feature of great utility as it enables it to cut pipe with the greatest rapidity and ease, and only needs to be shown to be appreciated.

STOWELL'S NO. 3 STEEL TRACK HAY CARRIER.

The Stowell Manufacturing & Foundry Company of South Milwaukee, Wis., have recently added to their production a complete line of Hay tools. The illustration herewith shows their No. 3 steel track hay carrier, which is manufactured under the patents and personal supervision of J. M. Boyd, who is well known throughout the country as the inventor of the

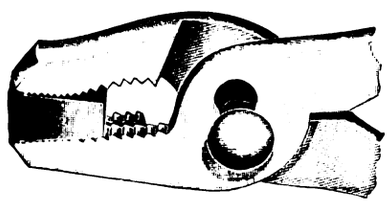
STOWELL'S NO. 3 STEEL TRACK HAY CARRIER.

Boyd wood track carrier. The No. 3 carrier is an unusually strong and well made carrier. It has a long bearing on the track with large wheels and roller bearings for the pulleys. The carrier frame is connected by a cross tie which also supports the ends of the collar or swivel band over the pulleys, a feature said to be found in no other carrier. The fork pulley used with all of the carriers manufactured by this company, it is claimed, allows the load to be drawn in closer to the peak than any other pulley on the market.



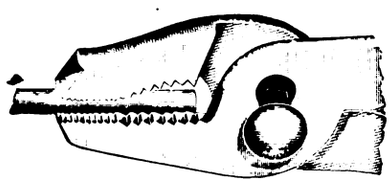
THE VICTOR UNIVERSAL PLYER.

Krauter & Co., 577-579 Eighteenth Avenue, Newark, N. J., in the line of serviceable tools manufactured by them, are the makers of the Victor Universal Plyer, an illustration of which is presented herewith. This is claimed to be the only Universal Plyer that will adjust itself to any taper, half round,



VICTOR UNIVERSAL PLYER.

three square or parallel. In taking hold of either of these, the flat side always lays itself to the straight jaw. The plyer is 7 inches in length and is constructed from the best quality of material such as is necessary in good side-cutting plyers



SHAPES TO WHICH IT ADJUSTS.

and is finished either in black or nickel plated. The lower part of the jaw has a V groove for holding wire and rods, which it does effectively. It is claimed that it will do the

HOLDING A TAPERED SHAPE.

work of a 10-inch plyer. Additional leverage is given the wire cutter by removing it from the jaw of the plyer where it is usually placed and putting it on the handle side of the

HOLDING A WIRE ROD.

fulcrum. It will take in pipe from ⅜ to 1¼ inch in diameter, making it a useful tool for plumbers and gas fitters, as well as other mechanics requiring the use of plyers.

WHEN YOU DREAM

On a warm Summer day of the pleasures of Winter driving, it all seems delightful—the spirited horses, the crisp air, the scintillent snow. But when you try to enjoy it, in its season—the real thing—how different. The only sensation you can think of is that you are cold. The luxurious vehicle only serves to remind you of the comfortable, warm rooms at home; the jingling sleigh bells become a jengle, harsh and irritating. But if you have at your feet a Clark Heater, why, then, it's quite another matter. Your feet are warm; in fact, you are warm all over. There is "no fun" without it. Manufactured by the Chicago Flexible Shaft Co., La Salle Avenue and Ontario Street, Chicago, and for sale by jobbers everywhere.

HARDWARE TRADE NOTES IN CANADA.

(From our Traveling Correspondent).

Never has the Canadian Hardware trade been in better condition than now. The year 1903 just closed has been the most satisfactory, all things considered that the Hardware dealer has ever known. Canada has had three or four years of exceedingly prosperous business. The western farm and ranch lands have been undergoing rapid development, many new mines have been opened, and no small amount of new building in all parts of the Dominion has made a large demand for building materials of all kinds.

Each year finds Canada more of a manufacturing country. Especially is this true in woodenware, lumbering tools, farm implements, as well as in shoes and gloves. The per capita consumption has rapidly increased with the growth in individual wealth and the manufacturers are gradually gaining an export business, especially with the north country and the other English colonies. With the increased and enlarged business has also come a demand for a better grade of goods. In speaking of the higher tone of the trade a Quebec Hardwareman said: "A few years ago we were selling a large percentage of German Hardware, especially in cutlery and tools. At that time we could not get goods cheap enough—now we are selling English cutlery and American tools—and its now not so much a question of price as of quality." This alone shows the improved condition of the people.

One of Quebec's old established Hardware dealers is Wm. Doyle. Starting in 1875, Mr. Doyle has succeeded in building up a business that is known in all parts of the province of Quebec. An extensive retail trade is enjoyed and considerable wholesale business is done, especially in farm implements and garden tools. Mr. Doyle said business was good; in fact better than usual at this season of the year.

At 269 St Joseph Street, Quebec, is located the Hardware store of J. P. Bertrand. In addition to builders' Hardware Mr. Bertrand carries an extensive line of sporting goods, including guns, rifles and fishing tackle. A specialty is made of high grade salmon and trout tackle, which is especially adapted for Canadian fishing. The store is well arranged being fitted up by Mr. Bertrand for the business two years ago; the stock being all new is up-to-date in every department. Mr. Bertrand said that business was very good, although the recent strikes in the Quebec shoe factories had affected the small pick up cash trade somewhat. One of the largest Hardware concerns of eastern Canada is the Chinic Hardware Company of Quebec. An extensive wholesale business is carried on by this concern, not only in shelf and builders' Hardware but also in blacksmiths and wagon makers' supplies, lumbering and mining tools and iron and steel. The managing director, W. Shaw, is a man of wide experience and an opinion from him is of value and importance. In answer to the question as to what would be the final outcome of the Canadian tariff agitation Mr. Shaw said: "No doubt exists but that Canada will put a Sur-tax on American goods; this will result in more English manufactures being imported, and certainly in some lines less goods from the United States being brought in; also favorably more goods being manufactured here in Canada. Generally speaking Canada has never been in any more prosperous condition, and the outlook is good."

Two stores are operated by Shaw & Company, another of Quebec's enterprising Hardware concerns. This firm cater for the best retail trade, and carry a large line of high grade goods. In speaking of the Canadian trade Mr. Shaw said: "The business of a Hardware merchant here in Quebec is quite different from that in an American city; here we are obliged to carry everything in the Hardware line, and a vast assortment of it. You notice that in stoves we sell both wood and coal burners. Our stock comprises tinware and enameled ware, and from cheap cutlery to highest priced Sheffield goods." Mr. Shaw is an ardent follower of Walton and is a recognized authority on all things pertaining to fishing. A very complete stock of salmon tackle of the highest grade is carried.

Sherbrooke is well located as a jobbing point, and here J. S. Mitchell & Company have built up an extensive wholesale business. The travelers from this concern reach out in all parts of Quebec, and work the trade east to Nova Scotia. An extensive trade is done in builders' Hardware, farm tools and dairy supplies. Ottawa being one of the greatest lumber markets in the world, is naturally a large market for lumbering supplies. Two of the Montreal jobbers have sample rooms here where a large line of saws and axes are shown; but no better line of these goods are shown in Canada than is carried by Ottawa's largest jobber Thos. Birkette & Sons Company. This concern work the northern territory closely and are in a position to hold and control that trade against all comers. Thos. Birkette & Sons Company occupy a large four story brick warehouse built especially for their business. The street floor being devoted to offices and sample room. The arrangement of the sample room is exceedingly attractive and well lighted.

Graves Bros., of Ottawa, carry one of the largest stocks in Canada of fine Builders' Hardware, and show much taste in the display of their goods. The store is light and bright and in every way is exceedingly attractive. This enterprising firm believe in advertising and the success of their business is one of the proofs that good advertising pays. Graves Bros. also make a feature of window display and feel that many sales are made from the proper display given to goods in the window.

One of the city's younger firms is the Ottawa Hardware Company. Starting less than three years ago this concern have rapidly come to the front and by close attention to business have succeeded in building up an extensive retail trade.

Another of Ottawa's successful Hardware retailers is Wm. Strachan in whose store can be found about everything that a Hardware merchant should carry, or a customer demand. When asked how business had been during 1903, Mr. Strachan said: "I have no complaint to make of trade, although in some departments it has been below the average—upon the whole, however, business is ahead of last season."

A large double store is occupied by McKinley & Northwood who are extensive dealers in house furnishing goods and farming tools in addition to general Hardware.

One of Ottawa's oldest French Hardware firms is E. G. Lavendure & Company. Beside a good city trade this firm enjoy a large out-of-town retail business, going extensively into dairy supplies and small farm implements.

HAMMERNAIL.

THE SAVAGE ARMS CO.'S ARTISTIC CALENDAR.

The Savage Arms Co., Utica, N. Y., have ready for distribution their 1904 calendar, one of the most graphic and appropriate to their business of any seen this season. It is a reproduction of a masterly painting by Carl Rungius, the well known painter of wild animals, and depicts in the most natural way imaginable a group in the woods of the hunter with his Savage rifle who has just brought down a fine buck which occupies the foreground, and the eager look of the sportsman, the intelligent look of the horse beside him, with the winter foliage and rocks and distant hills give the true conception of the born artist here so faithfully reproduced. It is a work of art worth having in one's possession and the company are only sending them to art lovers in the trade and elsewhere who will forward ten cents in stamps with which to pay packing and postage.

A RECORD ORDER.

We note in the *Syracuse Standard* that a New York publishing house, which gives premiums with each subscription received, closed a contract with the M. S. Benedict Manufacturing Company recently for an order of silverware amounting to exactly $90,625. This is said to be the largest order ever placed by an individual house for this kind of goods in the United States, which probably means the largest anywhere. The company is given the entire year of 1904 to fill the order, making equal shipments every day. The New York house giving this order has taken from the Benedict Company $12,000 worth of goods for the holiday trade. The $90,625 order together with other large orders booked and much prospective business means a busy year for the Benedict Company at its factory in East Syracuse. Employment will be given to 225 men and women. The spoon department will be enlarged by adding a considerable amount of new machinery.

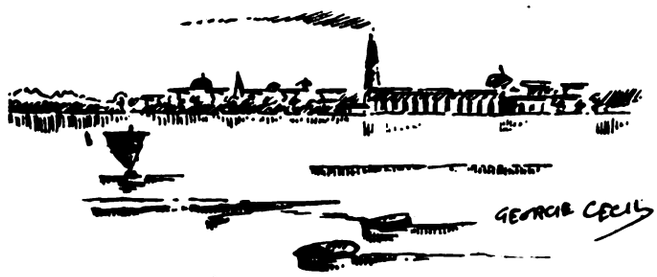
SELLING HARDWARE IN THE ORIENT.

THE NATIVE IRONMONGER IN INDIA.

By George Cecil.

Those readers who have had installed into their minds that under the beneficial rule of England India has gained immensely in civilization, will, perhaps, be under the impression that the establishment of the native ironmonger is furnished with such articles as are turned out by a Grand Rapids firm, and provided with an electric light installation. They

GEORGE CECIL.



may also imagine that the black shopmen disport themselves in store shirts and European pantaloons, and that they speak English with that purity of accent which appertains to the Harvard graduate or the leading members of New York's Four Hundred. But this is not so, and it is proposed in this article to point out to the seeker after information in what way the shops and native ironmongers of India differ from those to be found in America.

MEAN SHOW-ROOMS.

It must, in the first place, be stated that the show-rooms themselves are very different to those to be found in the States. being, for the most part, of small and mean appearance, inasmuch as the space is much cramped, whilst the white-washed walls and ceiling are, generally speaking, exceedingly dirty. This, however, does not disturb the peace of mind of the proprietor, who, having been brought up amidst surroundings of the filthiest and most unsanitary description, sees nothing improper in unclean business premises. Nor does he object to his stock being half an inch deep in dust, or to the presence on his walls of fly-blown calendars of the year before last and colored advertisements which have sadly faded in the fierce glare of the Indian sun. Attention may next be drawn to the fact that owing to the abnormal heat, which prevails for the greater part of the year, it is necessary to employ "punkahs" in the show-room—unless the establishment is only patronized by the half-caste and native, a description of customer who possesses a Salamander-like-affection for a Turkish-bath-like atmosphere. It is also worthy of note that the smaller amongst these ironmonger shops are not provided with windows, the open door supplying the necessary (?) amount of life and air, though in the respectable Parsee *emporia* (which are to be found in all the large "stations"), the show-rooms are both large and lofty and provided with suitable apertures.

POOR STOCKS.

Although the European ironmongers of India carry a full line of stock, and one which, moreover, compares favorably with that on view in the show-room of an American store, the small native ironmonger contents himself with an exceptional meagre display of goods. Indeed, many of the small concerns in Calcutta and Bombay only profess to keep in stock a few samples, depending on their more wealthy brethren to

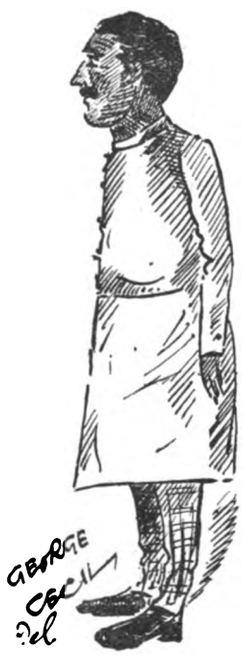
CALCUTTA, FROM THE RIVER.

supply them should they succeed in bringing about a sale. It will perhaps surprise the reader to learn that this method of business in no way prevents the native ironmonger from advertising in all the leading papers that he holds a full stock of goods, and that he is ready to execute the largest order on the shortest notice, a form of trading which is exceedingly annoying to his legitimate competitors, be they white or black. But as the tradesman in question takes for his motto "Business at any price," it does not matter to him if he is received with open arms by his fellow-ironmongers or whether they pine to poison him. It should, in the above connection, be borne in mind that these pranks are chiefly confined to the Bengali "Baboos" (educated natives) of Calcutta, a class who are renowned for their readiness to indulge in such tricks. As to the lines stocked by both the large and the small native establishments, they are much the same as are to be found in an American ironmonger's store, with this difference—that all articles of recent invention are strictly

AN UP-COUNTRY ESTABLISHMENT.

tabooed by the native ironmonger, who, finding he has no demand for up-to-date goods, naturally declines to invest in them.

LOW PRICES.



The black ironmonger may be said to work at a bone-cut profit, in as much as he undersells both his European and Eurasian competitors, often marking his goods at as little as two and a half per cent. over their cost prices. He will sometimes, with a view of securing a good bargain, purchase bankrupt stocks and goods which have been damaged in their transit from England, and attend salvage and other sales where ironmongers' requisites are to be picked up cheap—in many cases to be had almost for the asking. Thus equipped, he is able to sell at a remarkably low rate—much to the envy and hatred of those of his brother ironmongers, who, not having been able to purchase on such favorable terms, cannot compete with him. Another interesting fact in connection with

Digitized by Google

the native ironmongery business in India is that the black men will frequently tender for contracts to supply corrugated iron roofing, wire netting and other building materials in unlimited quantities, blissfully impervious to the fact that, beyond a collection of samples, his store does not contain more than a few square feet of the goods which he professes to be able to supply. He, however, gets over the difficulty in the manner already described, namely, by purchasing from wholesalers. In former years the native ironmonger would withdraw from the competition should he discover that he could not comply with advantage to himself with the terms of his tender, thus putting the person whose advertisement he answered to unlimited trouble and annoyance. Nowadays he is forced to deposit a certain amount of earnest money when tendering, which sum is confiscated should he fail to comply with the terms of the contract. It may be added that this method of safe-guarding the interests of those who call for tenders is strongly condemned by the black man, and that he easily succeeds in enlisting the sympathies of the native press on his behalf.

THE WORKING ESTABLISHMENT.

The working establishment of the native ironmonger is regulated by the extent of the business and the forbearance of those employed, for the colored proprietor is, like many of his European customers, an exceedingly bad paymaster. Indeed, so dishonest are his motives, that he will often avoid paying his employees until such time as they seek the protection of the law. In the large businesses, amongst which are several important Parsee firms in Calcutta, Bombay and Kurrachee, from four to six natives are employed, one of whom acts as bookkeeper, another as store-keeper, and the remainder as assistants. These people are paid from fifty to five rupees $16.50 to $1.70 a month, according to their capabilities or the financial position of their employer. Sometimes these worthy people succeed in feathering their nests very comfortably by robbing their masters, or else by dint of discovering his malpractices and blackmailing him they may gain their hearts' desire, namely, a partnership—whilst others, through laziness or stupidity, never succeed in obtaining even a rise of salary, or in other ways bettering their prospects. Occasion may also be taken to point out that since shop rent is (with the exception of Calcutta) exceedingly moderate, the native ironmonger succeeds in keeping his working expenses well within the bounds of moderation. And when one bears in mind that he does not pay his staff highly and that he is an adept at seeking voluntary liquidation, it will readily be understood that he has no difficulty in running his business at a profit—provided that he secures sufficient custom.

A NATIVE IRONMONGER.

COMPETITION.

A word as to the competition which exists in native ironmongery circles, and which serves to increase the keenness of those engaged in the trade. Being able to work at a low profit, owing to the cheapness of native living in India, the colored ironmonger can afford to reduce the selling price of his goods to a fraction over cost price, thus enabling him to follow suit when his competitors periodically reduce their rates. As an instance thereof, it may be observed that table-knives, which were originally offered at two rupees (68 cents) each, have been reduced to as little as half that sum, other goods being disposed of in like manner.

HOURS OF BUSINESS.

The working hours of the black ironmonger cannot be described as excessive, since though this individual is not adverse to commencing business as early as six or seven o'clock in the morning, he considers himself very ill-used if he does not devote some two or three hours in the middle of the day to religious exercises, eating and sleeping. Moreover, he will often knock off work an hour after returning to it in order that he may again seek repose and smoke his "hookah." He is also only too ready to avail himself of the absurdly large number of holidays which occur during the year, and should he fall a victim to a slight touch of fever he will, as becomes a fatalist, gently murmur "Kismit!", and, rolling himself up in a blanket, he awaits death with a patience worthy of a better cause. After spending several days in idling of this nature, he will come to the conclusion that he is not so ill as he first imagined himself to be, and will once again condescend to spend a few hours every day in his shop, disposing of meat-knives, kitchen spoons, mouse traps, kerosene oil lamps and other articles of domestic use, or in devising schemes whereby he may succeed in securing a contract without going to the expense of stocking the lines for the supply of which he has had the audacity to tender. It must, in the above connection, be noted that although the vast majority of native ironmongers are lazy and apathetic, there are a few—notably in the North of India—who are (for natives) extraordinarily alert; whilst the Parsee ironmongers often possess business characteristics which are the reverse of those appertaining to their Hindoo and Mahommetan competitors. Indeed, so energetic are some of the fire worshipping fraternity to be found in Calcutta, Bombay, Lahore, Rawal Pindi, Peshawar and Allahabad, that they easily put to shame many of the Europeans employed in the Indian ironmongery trade, in addition to being a standing reproof to the few half-witted Eurasians who are to be found engaged in managing such a hard business. It may be added that a certain portion of the black ironmonger's business day is devoted to sending threatening letters to those of his customers who are too dishonest to recognize their obligations to him, amongst these ill-conditioned people being Anglo-Indian Generals, Colonels, Clergymen and other high-placed officials. A correspondence of this nature is conducted in English and very marvellous are the results, as may be deducted from a perusal of the following letters, the same being verbatim copies of those seen by the author when lately in India:—

Huzrat Gunge,
Lucknow.
May 1st, 1899.

Kind Sir,

This is to say you not paying what you owing me so unless you pay quick I bringing some actions I am poor man and you are a rich one which is very wrong for you not to do the pay up quick so if you not wanting summonses please to do the needful your faithful

---

Burra Bazaar,
Calcutta.
July 1st, 1888.

Honourable Sir,

You have not paid me what you owing for three years this is not all right so you must pay me tomorrow or I taking out a summons against you which is very bad thing for a officer if you likes to pay me per bearer who is my servant I will not charge some interest but if you do not do this thing I will write to commander-in-chief who being very angry. Yours obedient

---

Cantonments,
Bareilly.
July 8th, 1900.

Sir,

I have write you pay up you not pay so now I says there will be a case against you. Yours faithful

---

Occasion may be taken to observe that the average British resident in India entertains some extraordinary notions on the subject of paying his debts, and that the more exalted his social position happens to be the greater difficulty does the tradesman experience in securing from him a cheque which it is possible to negotiate, though the customer in question is frequently known to draw cheques which he knows full well will be dishonored.

THE LIVING EXPENSES OF THE NATIVE IRONMONGER.

The living expenses of the native ironmonger are so arranged by that economical person that they need not be more than three rupees ($1) per head per month, though, should he be well-to-do he may spend as much as twenty rupees ($6.75) a month on himself and an extra ten rupees upon the wife of his bosom, the additional sum being devoted to the purchase of sweetmeats and jewelery. In fact, should the native ironmonger be so fortunate as to possess a flourishing business, he will devote all his spare cash to buying fattening food, it being the habit of the black men to make his stomach keep pace with his banking account, a practice which may be commended to those readers of this journal who are inclined to live beyond their means. In the event of his being a very poor man, he may so arrange his expenditure that for eight annas (16 cents) he will be able to provide himself with sumptuous meals—consisting mainly of boiled rice and native vegetables. His wife, being possessed of a smaller appetite (or, according to the native idea, an inferior person), will need but two-thirds of the amount of food which is necessary to the physical support of her spouse, whilst the children will be expected to make the best of the parents' leavings. As to his house, he will either live in a miniature barn above his business premises, or he will rent a small and evil-smelling tenement in the back slums of the town in which his shop is situated, where he, his wife, his children and his father and mother, possibly, will all live together under conditions which are the reverse of sanitary and moral. Indeed, so adverse is the native ironmonger to proper sanitation and ventilation, that his house is often teeming with cholera, typhoid, and other undesirable baccili—a state of things which does not disturb his serenity in the very slightest degree; in fact, upon being brought to book by the municipal authorities, he not only shows great surprise at the unwarrantable intrusion, but he even threatens them with an action for house trespass. In the matter of clothing, the native ironmonger is put to no great expense, since his output, consisting of a white linen turban or cap, a loose jacket and pantaloons of the same material and of quaint cut, and a pair of native-made shoes complete his costume, the whole wardrobe costing about four rupees ($1.75). And when it is borne in mind that these garments will last at least four or five years, the boots only being worn upon occasions which are as few as they are far between, and the clothes being wonderfully durable, it will readily be understood that there is no ironmonger in the world who need spend as little upon his wearing apparel as need the colored ironmonger of India. In the Winter he supplements this outfit with a warm rug or shawl, rubbing his body with cocoanut-oil every morning—with a view to keeping out the cold. Should he be a person of wealth he will be the proud possessor of a green plush cap of the pork-pie order, which is profusely decorated with gold lace and braid, a coat of the same material which is ornamented in a similar manner, a pair of patent leather shoes with mother-of-pearl buttons and elastic sides, and a dress shirt of the soft fronted and embroidered variety. Sometimes he even allows his fancy to dwell upon the style of undergarments worn by European ladies, investing largely in black silk stockings and garters which bear appropriate devices. Anything more extraordinary and incongruous than the figure which the black ironmonger cuts when thus attired can better be imagined than described.

THE AMUSEMENTS OF THE NATIVE IRONMONGER.

The word "Amusements" is really out of place when dealing with the recreations of the colored ironmonger, since they are such as cannot possibly appeal to a civilized person, consisting, as they do, of sleeping, eating, smoking a loathsome form of native tobacco, and lolling about the "Bazaar" (native quarter) doing nothing at all. The native, however, is quite happy when thus employed, and asks for nothing better than to be allowed to pass his time in the manner set forth above when his day's work is ended. Occasionally, he varies this performance by devising schemes whereby he may collect his outstandings, or which will enable him to buy in a cheaper market—with a view to increasing his profits.

AMONG OUR ASIATIC CUSTOMERS.

THE EAST INDIAN MARKETS.

We ought to sell more goods in farther India and Hindoostan. The markets there are not appreciated by us. Farther India is now being opened up by new railroads, and it will be connected with China. General Grant predicted that Rangoon would at some time be one of the great ports of the world, and his prophecy is coming true. It is already a trade centre, and has considerable imports of American goods. The most important field, however, is Hindoostan. That country is one-half the size of the United States, and it has a population of 300,000,000, or one-fifth of all the inhabitants on earth. Its people are industrious and business-like. They are good farmers and raise quantities of wheat and cotton, as well as rice, opium and other things. They have enormous factories, many of them managed by the English, and they manufacture for export. Their foreign trade already amounts to $700,000,000 annually, and they export goods to the amount of $400,000,000.

A large part of the Indian exports is in cottons, which are shipped to Eastern Asia, as well as to Africa and Europe. The best of modern machinery is used in the mills, and the labor is exceedingly cheap.

THE GROWTH OF INDIA'S COMMERCE.

The foreign trade of India shows what can be made of a colony when properly handled. The English have developed industry and trade there, and of late it has gone ahead by leaps and bounds. The Hindoos are buying ten times as much as they were in 1840, twice as much as they bought in 1860 and 20 per cent more than in 1890. In 1840 the imports amounted to only $28,000,000; in 1890 they were $231,000,000, and this year they will be probably $30,000,000 more. At the same time the exports have increased from $51,000,000 in 1840 to $403,000,000 in 1902, so that the balance of trade is largely in India's favor.

Of the imports we supply only about 2 per cent., although we use 7 per cent. of the exports. Our trade might be greatly increased if American goods were put on sale. Our consuls to Calcutta and Bombay are urging that drummers be sent to India, and the Calcutta man thinks we should establish a museum or sample warehouse there for the display of American products. He says that all sorts of our machinery and electrical supplies, American shoes and food stuffs, as well as Hardware and cutlery, can be sold. The East Indies want cheap umbrellas, watches, clocks and toys of all kinds. There are openings for American farm tools and for heavy farm machinery.

India has wheat fields as large as the State of Ohio, and it produces at times as much as 7,000,000 tons of wheat in a year. It needs reapers, mowers and threshers. It is a country of railroads, but most of the rolling stock is supplied from Europe. Within recent years a few American engines have been tried, and that with success.

OUR NEW STEAMERS TO ASIA.

Our connections with Japan and China are steadily improving. When I first crossed the Pacific, about fourteen years ago, there were only two steamship lines. There are now about five times that many, and two of the lines belong to the Japanese. You can get ships from San Francisco, Portland, Tacoma and Vancouver for Yokohama, Shanghai and Hong Kong, and there are also steamers from San Diego, Cal., sailing at irregular intervals to the same ports. Two of the biggest ships of the world are just about ready to make their first voyages across the Pacific. These are the Minnesota and Dakota, built by the Great Northern Railroad to accommodate its transpacific trade. They have each a displacement of 38,000 tons, and can carry 280,000 barrels of flour. The Dakota is 14,000 tons bigger than the Great Eastern and 16,000 tons bigger than the Kaiser Wilhelm der

Digitized by Google

Grosse. The ships are 630 feet long, 73 feet wide and 56 feet deep. Each has accommodations for 3,000 passengers, including the crew. They will travel to Asia by the shortest route, which is that from Puget Sound to Japan, and will make the best time across the Pacific.—Frank G. Carpenter, in Newark (N. J.), *Sunday Call.*

COL. J. R. NUTTING ON "A CAREER OF THRIFT."

"Thrift" is the title of a new magazine of creditable appearance, the first number of which has just appeared at Cedar Rapids, Iowa. Among its contributors we find our esteemed correspondent, Col. J. R. Nutting of the wholesale Hardware house of Sickels, Preston & Nutting Co., of Davenport, Iowa.

In answer to a query from the editor of *Thrift* he was asked "What in your estimation, are the essential qualifications that should be possessed by a young man or woman to fit them for a thrifty career in the business world?"

Colonel Nutting replies as follows: "Good, common sense, a well balanced brain, an active and progressive mind, good moral character, ambition, a natural love for work, a desire to earn more than is received thus placing and keeping the employer under obligations; absolute honesty and truthfulness, a feeling of interest and responsibility as of personal ownership, devotion of a part of each 24 hours to the study of such subjects as may be helpful when promotion occurs or greater responsibilities are undertaken. There are many accomplishments besides shop knowledge necessary for the greatest success in a business career. Politeness, a pleasant address, graceful manners, regard for the feelings of others, reasonable deference to the employer, a determination to succeed and a desire to ultimately become the head of the business engaged in, are qualifications that attract those who desire assistance, whether clerks, heads of departments, partners or managers of their capital." The experience of a life time has been epitomized in the above answer.

EX-RADIUM HEATER.

The Novelty Mfg. Company, Jackson, Mich., are the manufacturers of an extremely desirable addition to the comforts of the dining room in the shape of a heater for the table which they call the "X-Radium Heater." It is nothing more nor less than a neat little stove which gives out heat without consuming any fuel or costing any additional expense. It is made in two parts, first a heating pad of stamped steel filled with X Radium, second a stamped steel bowl-shaped stand, with asbestos mat in the bottom, into which the pad is placed after being heated. Both parts are finely finished, polished and heavily nickel plated making a handsome and quite ornamental addition to the dining room equipment. It is 4 inches high, and 7 inches in diameter. There is no extra cost connected with the use of the X Radium Heater. You are compelled to have a fire to prepare the meal, and all that is necessary is to place the pad upon the stove or range while the meal is being prepared. The pad will absorb the heat, and in 20 minutes time it will be hot enough it is claimed to keep the coffee or tea, etc., hot for two hours. X Radium, which is a new substance discovered recently, and having a natural affiinity for heat, quickly gathers to itself the heat rays in unlimited volume and retains them a long time. It is made to be sold at the moderate price of $2 at retail, and from its attractive appearance and novel utility should meet with a ready sale wherever introduced.

SOMETHING WORTH REMEMBERING.

In time of peace prepare for war, and a war of extermination of those pests, flies and mosquitoes, is always justifiable. The A. J. Phillips Company, Fenton, Mich., are calling attention elsewhere in our columns to the fact that by running their factories without laying off a day throughout the year, they are able, if ordered early enough, to promptly deliver the Flyer and 20th Century Screens, which were so much in evidence last year. While at present costs, which are lower than ever, these screens prevent the manufacturer from getting fat dividends, they are still leading the industry.

A WOMEN'S INVENTION THAT IS POPULAR.

Mrs. Emeline B. Vrooman, as her portrait we present herewith would indicate, is possessed of an inventive mind; when by personal observation in her own domestic life, the

MRS. E. B. VROOMAN.

necessity for something that would concentrate in a small space for easy removal the usual accumulations of organic matter in every household sink; the fittest article for the purpose, the Vrooman Sink Strainer, dawned upon her at once, and the result was the largest distribution of a kitchen necessity of the kind, was made possible, when properly brought by advertising before the buying public. The year 1903 was noted as a year of business that like the name of Abou Ben Adhem "led all the rest," for no housewife who used one knew what it was to have a daily headache. Send to F. H. & E. B. Vrooman, 225 Dearborn Street, Chicago, for their latest illustrated booklet.

NATIONAL SWEEPER COMPANY'S 1904 LINE.

The National Sweeper Company, of Marion, Indiana, manufacturers of the National Roller Bearing Carpet Sweepers, has made some decided improvements in its line for the season of 1904, one being their Anti-Tipping Device. Manufacturers of Carpet Sweepers for years have been working to invent a device which would prevent a sweeper from tipping up, thereby ejecting the dirt from the dust pans, when drawn back quickly or with undue force. Some improvements have been made in this line, but they have not so far been satisfactory, as they do not accomplish their purpose. The National Sweeper Company states that by the use of their device "it is impossible to tip up a National Sweeper when drawn back quickly or when catching on a fold or wrinkle in the floor coverings. It is not a make-shift or make-believe—it is made of sheet steel, has no springs to break or weaken in tension or get out of order." This device is shown in illustration in the advertisement in this issue, to which your attention is called. As may be noted, the bail has two points of contact, one at the lug, which plays back and forth in the groove in the ear, and one at the stud at the bottom of the stamping, over which the slotted fin end of the bail fits. This throws the point of contact off the center, and also acts as a counter lever, which keeps the sweeper box level—parallel with the floor at all times. On the upper part of the stamping is a corrugation, which holds the sweeper handle upright when not in use. The stud on the bottom of the stamping, also, serves the purpose of preventing the bail from springing out of place. This is not only an extremely simple contrivance but along advanced lines and accomplishes all that is intended. Another new device of this line for 1904 is the Brush-Releasing End Band, also shown in cut in advertisement. This device is so simple that illustration alone is sufficient to clearly define its construction and method of operation. The higher priced sweepers have been fitted with a brush releasing spring for some time, but this is the first instance where the medium priced sweepers have been supplied with a device for the easy removal of the brush, the advantage of which the trade will readily grasp. These new devices are furnished by the company without extra charge. To those interested, the National Sweeper Company, upon request, will send descriptive circulars.

will send descriptive circulars.

AMERICAN HARDWARE IN GERMANY.

By ERICH NOLTE, *(Our German Representative.)*

At the request of your Editor, I have called on a number of prominent wholesale and retail Hardware merchants in several of the largest cities of the Empire. Summarizing the information thus gathered, I am glad to inform you that American-made goods, as a rule, are much liked over here, and are bought and sold in ever increasing quantities.

It will no doubt be of interest to your readers to learn what German Hardware merchants think of American-made goods and of American methods.

ERICH NOLTE.

One of the most prominent jobbers in a large city on the Rhine, when asked about his opinion regarding American iron and steel manufactures, made the following statement:

> "Up to some years ago I bought American Hardware, chiefly small tools for carpenters, blacksmiths, farriers, tinsmiths, and plumbers, through an import commission house at Hamburg, but when I found out that the sale of such goods could be increased, I got into direct touch with several American manufacturers and by means of strong efforts I succeeded in establishing a business in these goods on quite an extensive basis. All my bills were paid for through a New York banking house against bill of lading. During the period of about two years everything went on all right, and I had little to complain of with the possible exception that once in a while the method of packing left something to be desired—this was especially the case with some shipments of stoves—but suddenly, without any previous notice, one of my orders, amounting in value to about 2,400 marks, was rejected. I immediately asked for an explanation, but did not receive a reply. The goods in question were badly wanted, and I went to the expense of sending a cable to the manufacturer in question. To this cable I received, after a delay of *sixteen days*, a postal card informing me that on account of accumulated domestic orders, no foreign orders could be filled for two or three months. I wrote again, in polite, but strong terms, that I had worked for years to create a demand for their goods, at my own expense, and that I expected that *at least* part of my order should be shipped at once. No reply. Another cable. Result: Letter with a two-cent stamp (I had to pay 20 pfenninge to get that letter) simply stating that they had already informed me that they 'didn't care for foreign orders just now.'"

This case is a typical one. At various places I have been told almost the same story, and herein lies a great drawback to the German jobber pushing American goods more vigorously. There is a general opinion prevailing among German firms that your manufacturers want only their business when dull times are decreasing the demand in the States, and fear is expressed that "American manufacturers can not always be relied upon." There is certainly much truth in that statement!

Another jobber, a man who employs over a dozen traveling salesmen, one day received an English letter from an American manufacturer, and as it happened that he could not read English, but thinking that the letter might contain something of high importance, sent it to a translater, paid about six marks for the translation, and thus was informed that the sender would like to do business with him in a certain kitchen article. The latter seemed to be of interest to the jobber, and as the article was listed at only $1.50, he wrote the manufacturer an English letter, paying again for the translation, asking him for one free sample, so as to be afforded an opportunity to see the thing, and promised a good-sized order if it turned out to be all right. Instead of the sample, he got a brusque reply, "that business was not done that way in America, that they did not manufacture their goods with a view of distributing them as free samples, and if he—the German merchant—did not care to send an order, they would not care to do business with him!

Comment is unnecessary!

Fortunately, there are many American manufacturers who know better how to do business abroad, but I thought I should mention the above instances, as they show that there are others who, instead of securing perhaps a good customer, spoil their own reputation.

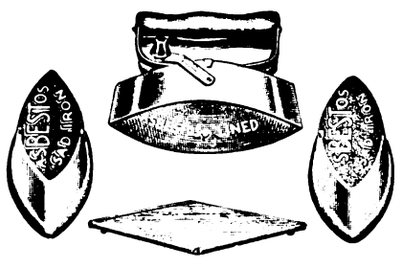
Before leaving this subject I would like to call the attention of your readers again and again to the fact that the postage on foreign letters is five cents for every half ounce. It is almost incredible how many letters I receive myself in every American mail bearing only a 2-cent stamp! A large number of German merchants have made it a rule to refuse every letter with insufficient postage. Another serious drawback is the fact that most of the catalogues sent over by your friends are printed in English. If a manufacturer intends to do any large amount of business in this country, he must have German catalogues. Great care should be taken in the translation of these catalogues. I have seen many in which the German was so poor that it could hardly be understood. This is particularly the case with technical terms. Then, again, prices should always be quoted f.o.b. New York, or still better, c.i.f. Hamburg or Bremen. If a manufacturer out West quotes his prices for goods taken at his factory it will be utterly impossible for the German importer to figure on those quotations, as he does not know, and has no facilities to ascertain, the freight rate from factory to port. Prices should always be quoted for a certain quantity of articles packed and delivered free on board steamer New York, Philadelphia, or Boston. The Atlantic rates are generally known by the importer, and adding the duty to those, he can easily find out what the goods will cost him on the spot. It should not be forgotten how essential it is to mention the approximate weight of a certain quantity of goods packed for trans-Atlantic shipment.

If your manufacturers will comply with these important conditions so necessary for entering foreign markets, they will soon be repaid for their efforts by satisfactory results.

As to the goods chiefly in demand, I take pleasure in adding herewith a list of articles submitted to me by a number of prominent wholesale Hardware dealers, viz.:—

All kinds of small tools; domestic machinery and kitchen tools; household novelties; stoves and ranges; radiators, agricultural implements and garden tools; light carriages and wagons, bicycles, typewriters, cash registers, modern incubators; electrical novelties; office furniture, especially desks and chairs; filing cabinets; shooting guns and rifles; whetstones; refrigerators; Builders' Hardware; saddlery Hardware; brass goods; sanitary ware; edge tools; contractors'

Digitized by Google



tools; steam specialties; rubber goods; optical goods; photographic articles; leather goods; wire goods, etc., etc.

The German market is broad and should be strenuously cultivated. Business should not only be done with some of the import merchants at Hamburg, but connections should be established with prominent Hardware dealers in large cities like Berlin, Hannover, Cologne, Dusseldorf, Brelau, Dresden, Leipzic, Munich, Magdeburg, Darmstadt, Stuttgart, Metz, Frankfort, M., Dortmund, Stettin, Bremen, Kiel, Wiesbaden, Tlberfeld, Barmen, Nuremberg, etc. In all these cities there are many prominent and reliable Hardware firms, which certainly would like to establish direct connections with your manufacturers.

DORTMUND, GERMANY, December, 1903.

ASBESTOS SAD IRON SPECIALTIES.

The Dover Mfg. Co., of Canal Dover, Ohio, during the past 90 days have greatly increased their already extensive facilities for the manufacture of the Asbestos line of Sad Irons with which their name is so successfully identified. They have expended several thousand dollars in revising and improving their patterns, dies, etc., so that now they feel they are admirably equipped for the year 1904, which they intend shall be the most successful year in the history of their busi-

ASBESTOS SHIRT WAIST SET.

ness. Their recent additions to their line of the Tourist, Sleeve and Shirt Waist Sets, of which we give an illustration, have made their line so complete it leaves nothing to be desired; placing as they do the "Asbestos" Sad Irons in a class by themselves, and which they back up with confidence by intelligent advertising in all the leading journals that reach the consumers of such goods, and which has created and sustained the sanguine demand for Asbestos Sad Irons so gratifying to the manufacturer.

Their Pressing, Polishing and Shirt Waist Sets, also their regular Laundry Irons, are now packed in neat lock-cornered sliding cover wood boxes, one set to the box, and the boxes crated. The Sleeve, Tourist and Baby Irons are put up in neat cartons, one to the carton. The trade cannot but appreciate and endorse the efforts of the manufacturer to make this line a handy one to distribute as well as a profitable one.

AMERICAN WOOD IN GERMANY.

Kolnische Zeitung, a German commercial journal, says that imports of wood into Germany from the United States have more than trebled since 1880, amounting in 1902 to more than $5,850,000. It consisted mostly of pitch pine. This wood is more resistant to the weather and costs much less than oak, which averages $3.47 per 35.3 cubic feet, while pitch pine costs only $1.66 for the same amount. Owing to its utility and cheapness the pine is handled in the most remote parts of Germany. It is used for making doors, windows, floors, etc., while oak is used in the manufacture of the finer grades of furniture.

DID A BIG BUSINESS.

The Blacklock Foundry, South Pittsburgh, Tenn., closed the year, 1903, with the knowledge of having done the best year's business in their history. This doesn't surprise those of their patrons who are familiar with the fact that they have the largest and best equipped foundry in "the Sunny South" for the manufacture of that class of goods so admirably exploited in their graphic advertisements in each issue of HARDWARE.

HARDWARE PATENTS.

The followin list of Patents, Trade Marks and Designs of interest to the Hardware trade re furnished by Davis & Davis, solicitor of American and Foreign Patents, Washin_ton, D. C., and St. Pau Building, New York City.

PATENTS EXPIRED DEC. 21, 1903.

354,445. RESERVOIR BLACKING BRUSH, J. T. Gaige, Penn Yan, N. Y.
354,550. SASH HOLDER, J. P. Hendrick, Flemingsburg, Ky.
354,551. DOOR CHECK, H. A. House and H. A. House, Jr., Bridgeport, Conn.
354,561. NOZZLE FOR CANS, R. Marsh, New Brunswick, N. J.
354,571. COMBINED FILING AND POURING NOZZLE, E. Norton, Chicago, Ill.
354,600. DUST PAN, M. N. Hemenway, Mexico, N. Y.
354,612. EXTENSION LADDER, J. Potter, Boston, Mass.
354,620. SASH CORD FASTENER, O. Beebe, Hornellsville, N. Y.

PATENTS ISSUED DEC. 22, 1903.

747,403. WINDOW LOCK, E. Foster, Chicago, Ill.
747,567. LEMON SQUEEZER, W. H. Ostrander, San Francisco, Cal.
747,568. SAFETY MATCH HOLDER, E. A. Parker, Meriden, Conn.
747,570. STOP FOR DETACHABLE SPRING HINGES, G. P. Bickop, New Britain, Conn.
747,680. SPRING HINGE, E. Bomme, New York, N. Y.
747,746. BRACE, A. S. E. Metcalf, Moville, Iowa.
747,757. DOOR CHECK AND CLOSER, F. H. Ogden, Reading, Pa.

PATENTS EXPIRED DEC. 28, 1903.

354,908. CARPET SWEEPER, W. T. Johnston, Grand Rapids, Mich.
354,914. SASH FASTENER, A. Y. Leake, Marietta, Ga.
354,970. LANTERN GLOBE SUPPORT, F. Dietz, New York, N. Y.
355, 020. CASTER, S. T. Lamb, New Albany, Ind.
355,150. TOOL HANDLE, J. Donoghue, Cleveland, Ohio.
355,170. EGG BEATER, F. A. Houck, Holden, Mo.
355,276. BIT STOCK, A. W. Mogran, Washington, D. C.

PATENTS ISSUED DEC. 29, 1903.

747,940. COMBINED RATCHET & DRILL BRACE, F. J. Cleaver, Oak Station, Pa.
747,976. TROLLING SPOON OR SPINNER, P. Junod, Celina, O.
748,048. FOLDING VISE, M. D. Colt, Minneapolis, Minn.
748,199. MATCHING PLANE, A. Mason, Salem, Mass.
748,391. CUTLERY POLISHING MACHINE, W. C. Mallinson and J. B. Mallison, Newark, N. J.

CULTIVATION OF THE CORK TREE.

The cork tree is an oak, which grows best in poorest soil. There are two barks on the tree, the outer one being stripped for use. The method of cultivating is interesting. When the sapling is about 10 years old it is stripped of its outer bark for about two feet from the ground; the tree will then be about five inches in diameter. The inner bark is blood-red, and if split or injured the tree dies. It takes the outer bark eight or ten years to grow in, and then the tree is stripped, four feet from the roots. Each 10 years it is stripped, and each time two feet higher up, until the tree is forty or fifty years old, when it is in its prime, and may then be stripped every ten years from the ground to the branches, and will last 200 years. The study of the trees of the Philippines reveals a wonder world which we shall want to know more about.—Mrs. S. W. Powell, in *Lumber Trade Journal*.

POSSIBILITIES FOR 1904.

The Arcade Mfg. Co., Freeport, Ill., have on another page, the entire space occupied in bringing before the Hardware buyer a few of what they are pleased to designate as "the business bringers for 1904." Scarcely an item enumerated but what would endorse the judgment of the one who selected the few specialties from the large number controlled by the company. We hope our readers will not fail in this study of possibilities for 1904.

Digitized by Google

OUR FOREIGN MARKETS.

By HENRY L. GEISSEL.

During a recent commercial tour abroad, I stayed a few days in Tangiers, Morocco. After having seen all the sights of this old Moorish town, and on the point of taking one of the dirty little boats for Gibraltar, I discovered a so-called Moorish Hardware store. It was a splendid opportunity to become acquainted with a native Hardware dealer, and, to my good fortune, the man in the turban spoke Spanish! After the usual introduction (the Moorish gentleman of course took me for a buyer, and was so extremely polite that I at first bought a few curiosities), I asked him whether he had any American-made goods in his bazaar? which question he answered in the negative; thereupon he showed me around, and I found cutlery from England and Germany; three second-hand German sewing machines; cheap French-made oil lamps; locks and keys of German and English make; saws from England, and finally a few American files; I took one and saw the name of a well-known American firm on it; the Arab saw that I laughed; and I told him that I had discovered "something American." But my friend told me that he knew better, that that was a German file, and a good one too, but so high in price that he could sell only a very limited quantity of them. By and by I learned that he had bought these files from a German merchant in Seville, Spain; and he really had paid "more" than a good price for them.

A few weeks later I was in Seville and called on the German merchant; we talked about files, he thought that American files were "almost" the best, and said he was importing them from a German agent in Paris; he gave me that gentleman's name and address, and when I was in the French capital several weeks later, I made it a point to interview that gentleman also. To make a long story short, he represented a Hamburg import house for France and Spain! In other words, the American files came to Morocco by way of Hamburg, Paris and Seville. The Paris agent, of course, did not keep any stock; he placed orders on a commission basis, and shipments to his customers in France and Spain were made from Hamburg. No wonder that the poor Arab in Tangiers could sell but "a few of them" in a year.

Unfortunately, this is a typical case of how American goods are introduced into foreign markets. Instead of cultivating a good field, the average American manufacturer seems to be satisfied to receive from time to time a small order from a foreign commission merchant; and there are so many countries where our modern Hardware articles, our domestic machines, our tools and kindred goods would find a steady and ready sale, if they were only properly brought to the attention of the prospective buyers.

On the other hand, it is gratifying to state that our foreign trade in Hardware and kindred goods has tremendously increased of late, but not in the proportion that should have been the case. Taking a country like Italy, for instance, we find that out of a total importation of iron and steel goods amounting, during the last twelve months, in value, to over $12,000,000, less than five per cent. were manufactured in the United States. A fact like that clearly indicates much is yet to be accomplished if we want to get on the same footing as England and Germany.

That our goods are appreciated abroad is safely shown by some figures, which speak for themselves. During the first eleven months of last year we exported $21,452,476 worth of Agricultural Implements; the three largest customers having been the Argentine Republic, British North America and Russia; each of which countries bought over $3,000,000 worth of Agricultural Implements from us.

During the same eleven months our exports of instruments and apparatus for scientific purposes were valued at $7,419,333 (nearly half of it to Great Britain). Those of Builders' Hardware at $11,031,041. In the latter line, the United Kingdom, Canada and Australasia were the largest buyers.

Our exports of machine tools amounted to $2,897,260; pumps and pumping machinery to $2,493,955; sewing machines to $4,797,813; typewriting machines to $4,095,318; lamps and chandeliers to $1,261,117; scales and balances to $690,366; stoves and ranges to $912,148; pipes and fittings to $5,346,349; musical instruments to $3,005,558; paints and colors to $2,361,941; varnish to $613,615; and furniture to $4,276,270.

The above figures show that in many lines our export trade is well under way and fairly established; we should do all in our power not only to keep our foreign business at its present level, but to increase it from month to month. There is little doubt that dull times will sooner or later seriously affect our domestic market, and when that period arrives the manufacturer who has his foreign connections well established, and an outlet for his production assured, will then be in the happy position where he can confidently hope to keep the wheels in his shops moving with industrial activity.

NORTHROP, COBURN & DODGE CO.

The announcement is made under date of January 1, 1904, that the two well known firms of Henry S. Northrop and Coburn and Dodge have consolidated their business interests and have incorporated under the firm name of Northrop, Coburn and Dodge Co., to be located at 40 Cherry Street, New York City. Henry S. Northrop has long been known as the pioneer of the metal ceiling business, and Messrs. Coburn and Dodge, previous to their going in business for themselves, had long been associated with him as business managers and designers. The high standing in the trade of both of the consolidating firms, together with the well equipped plant, will assure their patrons that any business intrusted to their care will have prompt and intelligent attention, and that they will obtain the most experienced architectural and decorative results possible.

♣

To commemorate his retirement after forty years of active management and the presidency of the Reading Hardware Co., Reading, Pa., Matthan Harbster tendered a banquet on the 17th ult. to the salesmen and managers of the various departments. He has appointed his son, John E. Harbster, the president of the company.

JOHN S. LENG'S SON & CO.

John H. Leng's Son & Co., dealers in Bicycle Parts and Sundries, who for 43 years have occupied the building at 4 Fletcher Street, New York, have purchased the Bicycle branch of the business done by C. B. Barker & Co., at 93 Reade Street, which will be consolidated with their own and carried on by John S. Leng's Son & Co. hereafter at the latter address, C. B. Barker & Co. continuing their business as heretofore in Sewing Machine Needles, Oils and Supplies, without change, in the upper portion of the same building.

♣

THE PHILADELPHIA LAWN MOWER CO., 3101 to 3109 Chestnut Street, Philadelphia, Pa., have issued their 1904 annual illustrated catalogue and price list of their Philadelphia Lawn Mowers. This is their 35th annual catalogue, and it cancels all previous prices. While list prices remain the same, discounts are changed on some lines, and full discount sheet will be furnished to the trade upon application. Many styles of hand and horse mowers are contained in this catalogue, some of which are adapted to any use, and "cannot fail to supply the demand of the most fastidious." Very fine colored illustrations of their mowers are presented together with description and prices. Included in the contents are hand and horse mowers, grass collectors, horse sweepers, lawn sprinklers, etc.

NEW U. M. C. PRODUCTS.

The 32 Automatic Colt Pistol is loaded with a special high power smokeless powder, giving high velocity and operating freely through the mechanism of the automatic Colt pistol (pocket model). Those with the soft point bullets will be found desirable for sporting purposes.

These cartridges are also made with metal cased bullets and are accurate for target purposes at ranges suitable to pocket pistols.

RIM FIRE CARTRIDGES.

New 22 short ungreased, 22 long ungreased and 22 Winchester ungreased are inexpensive rim fire cartridges loaded with the best grade of smokeless powder. Boys are calling for these cartridges as they can be carried loose in the pocket without the old inconvenience of the greased cartridges. They will not lead the gun.

U. M. C. ammunition shoots well in any make gun.

NATIONAL RETAIL HARDWARE DEALERS' ASSOCIATION.

The next annual convention of the National Retail Hardware Dealers' Association will be held in Indianapolis, Ind., March 15, 16 and 17.

DATES OF RETAIL DEALERS CONVENTIONS.

During January and February the following State conventions of retail Hardware dealers have been arranged for, to be held at the place designated on the dates specified:

January 4th—St. John, (N. B.), Iron & Hardware Association.

January 6th—Philadelphia, (Pa.), Retail Hardware Dealers' Association.

January 12th—Milwaukee, (Wis.), Retail Hardware Dealers' Association.

January 13th—St. Louis, (Mo.), Retail Stove & Hardware Merchants' Association.

Jan. 14-15—East Tennessee Retail Hardware Dealers' Association, Knoxville.

January 19th—Philadelphia, (Pa.), Hardware Merchants & Manufacturers' Association.

January 20th—Pacific Retail Hardware Association, Sacramento, Cal.

January 23d—St. Paul, (Minn.), Retail Hardware Dealers and Sheet Metal Workers' Association.

Jan. 27-28-29—North Dakota Retail Hardware Dealers' Association, Grand Forks.

February—Southern California Hardware and Implement Dealers' Association.

February—East St. Louis, (Ill.), Retail Hardware Dealers' Association.

February—East St. Louis, (Ill.), Illinois Retail Hardware Dealers' Association.

February—Louisville, (Ky.), Kentucky Retail Hardware Dealers' Association.

February—Louisville, (Ky.), Retail Hardware & Stove Dealers' Association.

February—St. Louis, (Mo.), Missouri Retail Stove & Hardware Dealers' Association.

February—Minneapolis, (Minn.), Retail Hardware Association.

Feb. 3-4—Wisconsin Retail Hardware Dealers' Association, Wilwaukee. Headquarters, Republican House.

February 4th—Detroit, (Mich.), Retail Hardware Dealers' Association.

February 5th—Ottawa, (Canada), Retail Hardware Dealers' Association.

Feb. 9-10—Nebraska Retail Hardware Dealers' Association, Omaha.

February 10th—San Joaquin Valley, (Cal.), Retail Hardware Association.

February 10th—Boston, Mass.), New England Hardware Dealers' Association.

Feb. 10-11-12—Iowa Retail Hardware Dealers' Association, Des Moines. Headquarters, Kuund Hotel.

February 11th—Albany, (N. Y.), Eastern New York and Vermont Hardware & Iron Association.

February 12th—Western New England Iron, Steel & Hardware Association.

Feb. 16-17—Pennsylvania Retail Hardware Dealers' Association, Williamsport. Headquarters, Park Hotel.

Feb. 16-18—Indiana Retail Hardware Dealers' Association, Indianapolis. Headquarters, Dennison Hotel.

Feb. 23-24—Illinois Retail Hardware Dealers' Association, East St. Louis.

Feb. 23-24-25—Ohio Hardware Association, Cleveland. Headquarters, Hollenden Hotel.

Feb. 24-25-26—Minnesota Retail Hardware Dealers' Association, St. Paul. Headquarters, Windsor Hotel.

Digitized by Google

REVIEW OF THE MARKETS.

WIRE NAILS. The mills have already booked contracts enough for the coming season to present an extremely encouraging outlook as to the amount of business that will be done. Quotations are as follows, f.o.b. Pittsburgh, 60 days or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.85
Retailers, carload lots	1.90
Retailers, less than carload lots	2.00

New York. There is but little doing in a local way, as the demand is quite light. Zero weather, especially, is unfavorable for the demand. Quotations are as follows:

Single carloads	$2.00
Small lots from store	2.10

CUT NAILS. At the meeting of the Cut Nail Association, held in Pittsburgh on the 7th inst., it was decided to make prices for January as follows on both Steel and Iron Cut Nails:

In carload lots	$1.70 base
Less than carload lots	1.75

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination, terms 60 days, less 2 per cent. off for 10 days.

New York. Only a limited demand exists in the local market on account of unfavorable weather. Quotations are as follows:

Carloads on dock	$1.84
Less than carloads on dock	1.89
Small lots from store	2.00

BARB WIRE. The demand for present wants is a light one, although an excellent business is anticipated for the approaching season. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.15	$2.45
Retailers, carload lots	2.20	2.50
Retailers, less than carload lots	2.30	2.60

SMOOTH FENCE WIRE. While the regular business shows no heavy demand, prices on unfilled contracts are being guaranteed, as quotations are reported as somewhat irregular. The following quotations may be said to represent the market, f.o.b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.80
Retailers, carloads	1.85
Less than carloads	1.95

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BUILDERS' HARDWARE. Outstanding prices on Builders' Hardware given previously by the leading manufacturers in that line, were withdrawn January 1st, 1904, with the view of issuing in the immediate future revised list prices founded on minimum net prices, which it is hoped will make the quotations from either manufacturer more in harmony than they have ever been hitherto. There is a great amount of labor in revising these several lists and discounts, on so complex a line of goods, although the net prices on which they will all be founded have already been agreed upon. All orders after January 1st received by either manufacturer will be priced in accordance with the new scale of prices, and where lists and discounts are not already prepared and printed, quotations will be given on application.

THE STANLEY RULE & LEVEL COMPANY. The Stanley Rule & Level Company, New Britain, Conn., and 107 Chambers Street, New York, have issued a discount sheet dated January 1, 1904, applicable to their catalogue No. 28. The changes are immaterial, the base discounts on Jack Planes and Fore Plane Handles being now 30 per cent. instead of 40 per cent., Saw Handles 35 per cent. instead of 40 per cent. and Assorted Patent Peg Awls 20 per cent. instead of 50 per cent. discount.

CORDAGE. But little is being done in the way of business in the Rope market, which is as dull as usual at this time of the year. Quotations that represent the market are as previously quoted:

Pure Manila, 7-16 inch and larger	11½@12
⅜ inch	12@12½
¼ inch and 5-16	12½@13
Pure Sisal, 7-16 inch and larger	9¼@ 9½
No. 2 Sisal, 7-16 inch and larger	8¼@ 8½
⅜ inch	8¾@ 9
¼ inch and 5-16 inch	9¼@ 9½
Lath Yarn, Medium and Coarse	8½@ 8¾
Jute Rope, No. 1	6½
No. 2	6

LINSEED OIL. The following quotations on "City" Raw Oil are the latest announced by the Dean Linseed Oil Co.:

In lots of less than 5 barrels...38 cents per gallon.
In lots of 5 barrels or more....37 cents per gallon.

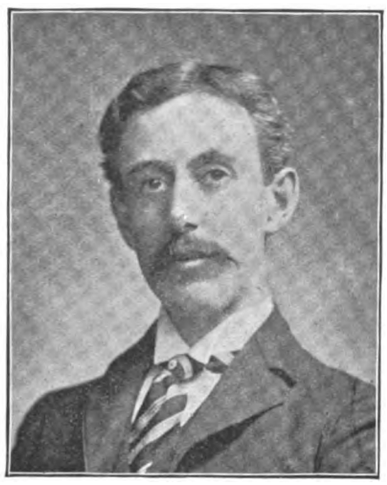
The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

The year 1903 will go into Hardware history with rather a curious reputation. The two or three months immediately preceding in 1902 had shown such a declining market that many fears were entertained that a serious slump would mark the first half of 1903. This, however, turned out exactly to the contrary, and the early part of the year showed an advancing market with sales increased over the same period of 1902. This advancing market was well maintained until early Summer, when re-action began in some lines near the raw material, and which we are still feeling, although the prevailing opinion now seems to be that the worst of the slump is apparently over, and that a firmer market and good trade will be expected in 1904. We greatly doubt whether jobbers have large stocks. As for our own, we know that we shall be obliged to order quite liberally during the coming Spring—not for any speculative purposes, but simply to secure goods to fill our orders, and we feel quite confident that other jobbers throughout the country are in a similar condition, while mail orders from our customers apparently indicate that retail stocks are badly broken also. In fact, the whole country seems to have pursued a hand-to-mouth policy, and liberal purchases in the early part of the year seem inevitable, so that the year 1904 opens with considerable promise.



During 1903 the Hardware business had the usual number of propositions, more or less new, calling for an expression of opinion from Hardwaremen. One of these which received considerable attention at the National Jobbers' Convention at Atlantic City was the proposed Parcels Post Law, in regard to which there was not an assenting voice, both jobbers and manufacturers believing that the adoption of such a law would work serious injury to a large number of small retailers through the country, while imposing upon the U. S. Government an enormous amount of work, which it would not be justified in undertaking, especially as the object of the bill seemed to be mainly to benefit catalogue houses. The bill was heartily disapproved, and we believe the Hardware trade to be a unit in their belief on this subject.

Another question has been that of mutual fire insurance, and this has to a certain extent been forced upon the Hardware trade by reason of the heavy advances made by insurance interests in the last few years. These advances have been enormous, and in some instances hardly appear justifi-

Digitized by Google

able. It has been realized that a very large portion of this advance has simply been consumed in the cost of administering the insurance business, and feeling this to be unfair to insuring interests, both jobbers and retailers have gone largely into mutual or co-operative insurance associations, but while this movement has had a very liberal endorsement it is one which must be handled with a great deal of care. The first requisite of insurance is responsibility, and it behooves every insurer to see that he obtains perfect responsibility, and complete insurance, and that he does not involve himself in any risks as a co-insurer. No doubt, these matters have been kept in mind, but a word of caution in this particular will perhaps not go amiss.

On the whole, prospects for the new year seem quite encouraging, and with the arrival of the labor question at a

JAMES H. RITTER.

promising and satisfactory basis, we see no reason why a reasonable amount of prosperity should not continue to be the portion of our fortunate Government. We some times think that living as we do in a free country our blessings are accepted so much as a matter of course that we do not sufficiently recognize the benefits of peace, protection, prosperity, and security enjoyed in a land which is covered by the flag of our country.

BIDDLE HARDWARE CO.,
J. H. RITTER.

THE PITTSBURGH TRADE.

Your request for our semi-monthly letter reached us on the day of our annual dinner, which is given on the last day of the year, when inventory is completed, all travelers at home, and at a season of good cheer. We may perhaps therefore be excused for reference to ourselves more than is usual in these letters. This is the 72d annual dinner that we have so held, our house dating from 1831. The first years there were but few employees and it was customary to meet at the house of one of the partners, but that was impossible as numbers increased, and for many years past we clear a section of the sales and office floor where the dinner is served. We find it an excellent time for the meeting of employer and employees on a social basis, where unthought-of qualities are brought out. With the fun and merriment it is possible to bring in some talk of a more serious nature which is remembered, and the good feeling engendered is one of our best business assets. The year 1903 was a good year in the Hardware jobbing trade, the first 8 or 9 months especially so, the last 3 months Pittsburgh felt the slump in the iron business severely, and merchants had to expect to take a share of it. We are glad to say, however, that so far as we are concerned the year resulted in sales about the same as 1902, which in view of the circumstances was not bad. The year had the usual amount of hard work, competition and difficulties to be overcome, among which we notice perhaps an increased disposition upon the part of the retail trade to return goods purchased without consultation with the jobber. Errors occur through faults on both sides, sometimes the retailer knows what he wants but fails to make himself clearly understood in ordering, and as the jobber is not a mind reader the goods are not sent as

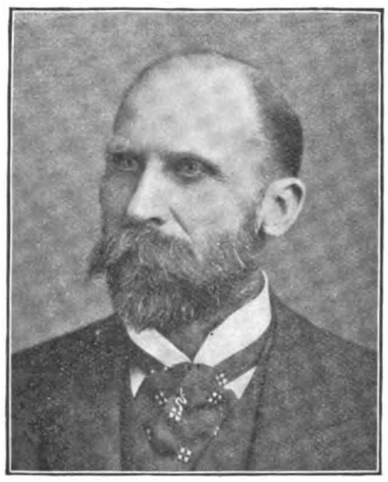
wanted. Sometimes it is the clear fault of the wholesale house, but whatever the reason the first step should be a letter advising of the error, giving the shipper a chance to dispose of the goods as he may find best without paying return charges. Competition in leading goods is sharp, sometimes resulting in a whole season's output of certain items being sold without profit. This is a senseless practice. It had

GEORGE B. LOGAN.

some excuse when retailers were ignorant of values, and the wholesaler who baited his hook with cost price on a seasonable item made up the loss by adding it on less well known goods, but now that all retailers are fully posted in prices they cannot be fooled in this way. They take the baits and then shut up their order book and wait until the man comes along with whom they prefer to deal for the rest of their order. Some manufacturers think their goods so well introduced that the jobber is compelled to handle them, so they provide no proper differential for him. This may be the case for a time, but the jobber cannot live without a margin of profit to cover the service he renders, and he soon finds a way to push to the front some other make of goods to take the place of the unprofitable item. There are, however, an increasing number of manufacturers who recognize the fact that their interests are best served by using the jobbers as their distributors to the retail trade, and who fix the price at which their goods shall be sold. These have the preference with the jobbers, whose thousands of traveling salesmen cover the entire country and whose influence for, or against, certain makes is very strong.

The outlook for 1904 is cheerful. In iron and steel an improvement is felt already and many works that have been shut down for months are starting up with a full force of men, having good orders in hand. The crops of the West and South have been so abundant and are bringing such good prices that the country is able to use great quantities of Pittsburgh products. The railroads use 40 per cent. of the output of iron and steel, and as their business is larger than ever they must buy for replacements during this year. When the manufacturing interests of Pittsburgh are busy our merchants share in it, so that we have reason to expect good business for the merchants during 1904.

LOGAN-GREGG HARDWARE CO.



THE COLUMBUS TRADE.

Another year has gone and what a sad ending. It almost makes one feel like believing our "Get Ready Man" who walks the streets of our city and boards street cars daily, calling out, "Get ready, dear friends, the day of judgment is not far distant. Don't you see the signs of the times in the numerous accidents and wars? Oh, get ready before it is too late." There is no doubt but this "Get Ready Man" has a button off, but his warnings seem opportune lately. We are glad to say that the ending from a business standpoint was all that could be expected. There has not been such golden opportunities for making money on advances as we had from 1899 to 1903; but these chances come but once in a lifetime as a rule, still we have reasons to be thankful that prices have remained as firm as they have. The advances will not offset the declines, but no one has been hurt much, and with the beginning of the year there is a much healthier tone of the market with good indications of some slight advances. Some goods seem to be too low. We might mention bolts, strap and T hinges and japanned steel butts as being safe purchases at present prices. There seems to be no good reason why cotton goods should be so high, and we might pretty safely say as of old—Cotton is King. It would be nearer the truth if we would say the Manipulators of Cotton are Kings. We doubt if they are enthroned on a very substantial throne. If they get a little more rope, they will hang themselves and we doubt if anyone would cut them down. No doubt you have heard the experience of the old darkey who was raising cotton on shares. The land owner thought they could figure on three bales to the acre and he was to have two-thirds and the darkey one-third. When the cotton was picked, there were but two bales, so the land owner took the estimated quantity (two bales) and when the darkey protested, he was told there were only two-thirds raised and according to the contract he would get nothing. It is to be hoped that under present conditions, land owners can pick full three-thirds so the darkey will not get the short end of the bargain.

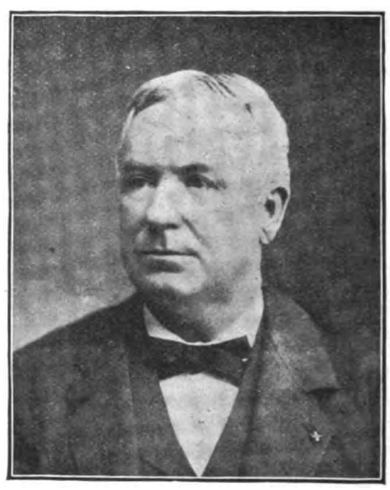
The past year has been the largest in volume of business in our history, and while we have not completed our inventory yet, we know from our daily records that the balance will be on the right side of the ledger. We also know that it will be less than it was for some of the previous years; but we expected that, so are not disappointed. We can't expect to have all "boom" years. We think 1904 is going to be another good year for business, but do not expect as free buying as we have enjoyed during the past five years. We expect orders to be smaller but more frequent. In other words,

Digitized by Google

business will be more on the hand-to-mouth order. We believe this has been a growing tendency in all lines for several years. With the numerous jobbers in the country, merchants know they can get goods in a day or two and by keeping close tab on their stocks, need not lose any business; and that policy will be pursued more closely this year than usual as the tendency of the market is lower rather than higher. We may say, however, that we do not anticipate any

J. H. SMITH.

radical changes in prices and the pessimistic merchant who is afraid to buy a dozen tacks for fear they will decline a cent, is going to be disappointed as to results. The country is in too good shape financially to expect any panic during 1904. We think, however, that all wise merchants will keep their sails trimmed and be ready for a squall should there be one. Especially is this true as to credits and collections. Too many retail merchants are afraid of offending a customer by asking him to settle. If they knew the facts, in many instances they would find the man who is owing them (and paying no interest) is loaning money at 7 to 8 per cent. We have in past years been up against just such propositions. Farmers are being educated to the fact that yearly settlements are a thing of the past. At least they should be so educated, for the reason that merchants appreciate the fact, that when they fail to avail themselves of the cash discount, they are losing a sure profit and one that would more than likely pay their rent, insurance and taxes. They can't pay cash unless they get cash, consequently they are each year getting their customers nearer the cash system. There is no credit when they send to some catalogue house for goods, but the cash must accompany the order or be paid before goods leave the hands of the carrier. If home merchants would do some figuring on a strictly cash basis, they would see why catalogue houses are able to sell goods lower than they care to. If the Parcels Post Bill becomes a law, the retail dealer will be obliged to change his business methods or retire. He can't sell goods on credit to Tom, Dick and Harry and let them pay at their will, lose the cash discount and be known as slow; and stay in the race. On the other hand, he must be able to get the last penny in the way of cash discount in order to compete successfully with those who do business on a cash basis. We cannot believe that "Uncle Sam" wants to become a dray, and that is what it would come to if the Parcels Post Bill passes. The rural free delivery one-horse wagons would have to be displaced by two or four-horse wagons to distribute the goods. Catalogue houses, patent medicine venders and some other classes would be benefitted but it would be no benefit to the farmer and an expense to the Government.



The weather so far this winter has been of the old sort, but strange to say, it has not been a good year for some seasonable goods and has been a record breaker on others. The first orders for horse blankets and robes were large, but retailers have not as a rule had their usual trade on them. With good roads, plenty of snow and cold weather, it is natural to expect a good trade on blankets and robes. We can only offer one suggestion and that is—every one had money during the past two or three winters and bought enough to last them awhile. The wise ones are predicting an early Spring and we trust they will be correct. It makes a great difference in business if we get a month ahead in the Spring. Farmers can husk the corn that should have been husked in the Fall; they can also dig their mowing machines, cultivators, plows, reapers and other utensils out of the mud, sand paper the rust off and get them ready for use, providing they are not past redemption. It is strange that farmers will leave implements scattered all over the farm to rust and rot and be obliged to buy new ones—while if they were cared for they could not wear them out in a natural life-time; but they do it.

We hope all our friends have had a profitable year and wish them one and all a Happy and Prosperous New Year.

THE SMITH BROS. HARDWARE CO.,
J. H. SMITH.

THE DAVENPORT TRADE.

In three or four more hours the business of 1903 will close. It has been a year of health, happiness and reasonable prosperity; and taken all in all, fairly satisfactory. It has, however, been a year of unusual anxiety. The evident feeling of

COL. J. R. NUTTING.

unrest among the different peoples and countries has caused much talk of wars and rumors of wars. The cold Summer and Fall kept the people of the Western corn-belt anxious for

REMEMBER THE GUARANTEE

National Roller Bearing Sweepers

for 1904 will be supplied with new and unique patented features, that place them still further in advance of any other makes for practicability, efficiency and general good quality for which they are so well known.

The National Patented Anti-Tipping Device

is the first and only Anti-Tip that fully meets with all the requirements. The only one that prevents the sweeper from tipping up, throwing the dirt from dust pans, when drawn back quickly or when catching in a fold or wrinkle in the floor coverings. Not a make-shift—not a make-believe—No springs to break or weaken in tension—nothing to get out of order. Made of a neat sheet steel stamping and finished in keeping with other trimmings.

National's Patented Brush Releasing End Band

as applied to our Monarch Roller Bearing and similar models, permitting of the easy removal of the brush for cleaning. A slight pull on the clasp, indicated by the hand, allows the brush to drop out—a child can do it—extremely simple and absolutely nothing to get out of order.

All good—all tested and proven—new—different—better than can be obtained elsewhere.

IT WILL PAY YOU—PAY US—if you will talk with us before buying sweepers.

Our line will be on display during January at Grand Rapids in Sheppard Building.
At Chicago, the year round, in the Manufactures Building, 1411 Michigan Avenue.

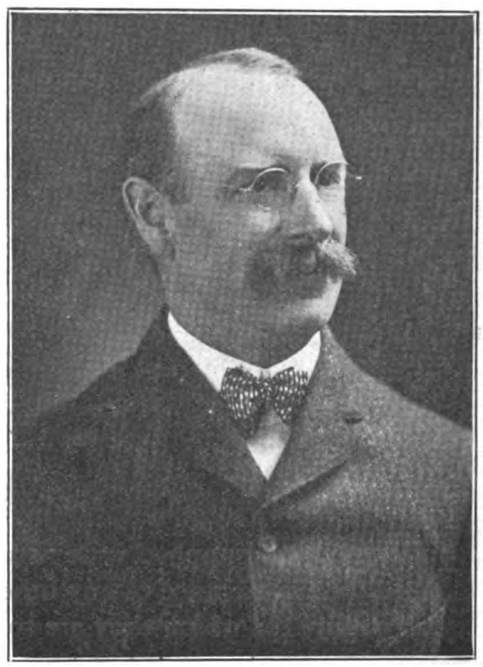
a number of weeks, in fear of early killing frosts and the great slump in industrial and other listed stocks has given much uneasiness to conservative, thoughtful business men. Possibly, if it had not been for these conditions, there might have been a few more sales made and a few more dollars added to the profit accounts which will be footed to-night. The compensation for what "might have been," however, is in the fact that houses have been put in order by reducing stocks and liabilities to the minimum, and the business men are in much better condition to stand a financial storm, should one occur, than they were a year ago. It has been stated that the decline in listed stocks during the last few months aggregated a loss to the holders of several billions of dollars. If this be true, this loss must have been distributed generally throughout the country and must have fallen more or less heavily upon people in moderate circumstances in many towns and villages, as well as in the larger cities. Had this loss been confined to the speculative element in the great cities, it would be difficult to explain how it could materially effect the general commercial interests of the country at large, but, on the other hand, if the loss has fallen upon the people who have owned these stocks, thinking they were safe investments for their small savings, the result may be more disastrous. Yet we worried about wars that have not disturbed our peace, fretted of early frosts that did not come, and the declines may amount to no more than squeezing out enough water to place them on a sound basis, whereby they may be used for safe investments of the savings of the great mass of the people of this prosperous country.

If any transportation company should charge as much for carrying a package or parcel from New York to Philadelphia as from New York to San Francisco, it would hardly be considered fair, and the U. S. Government will probably not undertake an unfair proposition.



Through local, State and National organizations there has been a pleasant and profitable improvement in the cultivation of personal acquaintance and friendly feelings among competitors and as these feelings further develop there will be more pleasure in transacting business and more profit to all concerned. There is, at present, no evidence that indicates lower values or general depression. The large crops, fair prices, continued building and increasing demand for buildings, for factories, stores and residences, construction of interurban electric lines and railways; soundness of our local banks; thrift of our merchants and mechanics; a demand for labor greater than the supply; apparent contentment and peace among all classes of wage-earners; general good health and favorable climatic conditions; certainly suggest reason for hope that the present season of prosperity may continue indefinitely. SICKELS, PRESTON & NUTTING CO.

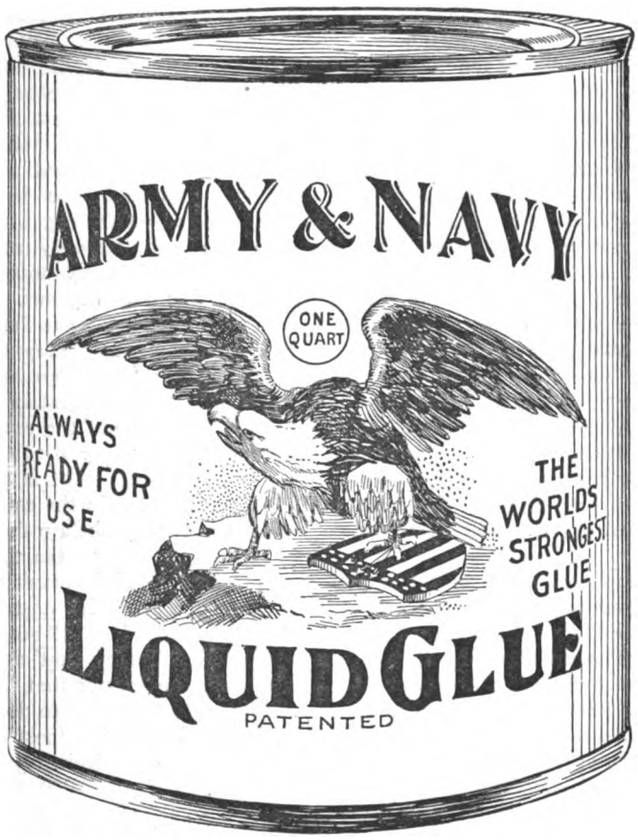
THE MINNEAPOLIS TRADE.

Generally speaking, the jobbing and retail business of Minneapolis as a whole has undoubtedly been somewhat less in 1903 than 1902, which was the banner year, and possibly may hold the mark for some time to come. We do not believe that there is any good reason why this should have been the case, excepting that there was a sort of general wave of conservatism that started in the East and spread out over the whole country, we feeling it here perhaps as little as any other section; in fact, we ought not to attempt to speak of any other section, for we certainly know very little about it, of course, excepting as we read in the newspapers.

The farmers started in this year in the most prosperous condition ever known. Many new banks established at the thriving villages springing up all over the prairies, attracting money in the way of deposits from the farmers and being in position to grant accommodation to those who needed it, whether farmers or merchants and not finding sufficient employment for the funds locally, but entering competition here with our own banks and so for the first time, at least to a greater extent than ever before, have the Northwest been able to handle their enormous crops with their own money and without being obliged to go to Halifax, Boston, Hartford, New York, Chicago and other money centers, as has been the case for so many years, and we have not been affected by disasters in Wall Street, but that undoubtedly made an impression in price of stocks there and has had more than anything else to do with the reduced volume of business here.

The farmers as a rule take the papers and read them, and they have been too full of this subject. There is no class of people on earth that are in such independent position as they are. They can practically stop buying, anything but tea, coffee and sugar, for six months or a year if to each individual family it may seem necessary and those items they can readily get in exchange for eggs, cream and butter. They can very easily wear their old clothes, they can patch up their old machinery to do another season's work and as a matter of fact their machinery would last a third longer if they would only take care of it. For a person brought up in the New England States, it seems such a shame to see valuable pieces of machinery left out wherever the horses happen to

W. K. MORISON.



be unhitched the last time, exposed to the weather with no attempt to protect it in any way.

As to the crops. Wheat being the principal item, the secretary of the Minneapolis Chamber of Commerce, who should be considered an authority, as Minneapolis undoubtedly is the largest primary wheat market in the world, states that undoubtedly the government report of 173,000,000 bushels of wheat for Minnesota and the Dakotas, for this last year's crop is short by about fifteen million bushels of the actual crop, for there is every indication that the crop was fully as large as in 1902, which was 187,000,000 bushels. He further states that undoubtedly there is not more than 55 per cent. of the crop marketed, that seems that 45 per cent. is still held by the farmers, waiting for $1 wheat. He further states that $1 wheat is almost a dead certainty, regardless of the question of war in the East, that the world's conditions fully justify this assumption. The war in the East would simply make it an absolute certainty. The farmers seem to realize this and are simply letting go of a little wheat at a time, as it may be needed for such articles as they seem to absolutely need, or to settle up store bills when they cannot put off Mr. Storekeeper any longer.

This also explains the reason why the jobbing houses are complaining more or less of collections when it is freely admitted that there is more money in this section of the country than ever before. The farmers won't sell their wheat, therefore haven't money to pay the store bills or don't buy goods in sufficient quantities from the country dealers as was anticipated, therefore the country dealers are slow in paying the jobbers and are not replenishing their stock as usual, and millions of money lying idle in the hands of banks and elevator and wheat men, ready for business; but they are simply obliged to wait until the farmer gets good and ready to let go of his wheat and they don't seem to be in any hurry about it.

We understand it is quite a serious question with the millers to get sufficient wheat for grinding purposes, with cash wheat at premium. Less flour was made in Minneapolis

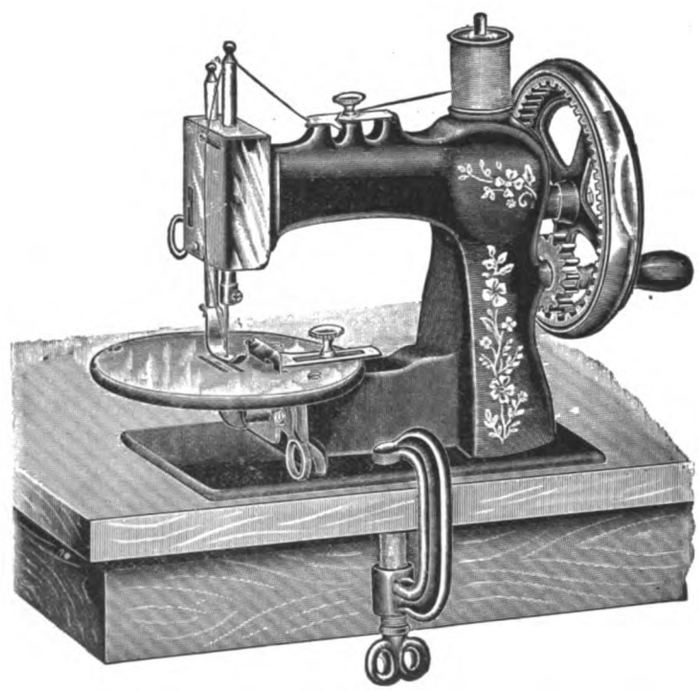
mills in 1903 and 1902, and we understand that was the reason for it, because of scarcity of wheat of proper milling grade; still something over 15,000,000 barrels was made here. This state of affairs naturally has effected the retail stores to quite an extent and we hear of disappointment as to volume of business; especially was this true during the holiday season. We think to some extent more or less of this dissatisfaction with the results is occasioned by the fact that each succeeding year has shown an increase and now when a year comes along where conditions are not better than the previous year, or not quite as good they feel a little dissatisfied. As far as we are concerned personally, our business has shown an increase over 1902 which was the largest year we have ever known, but the increase this year is small. We question if we make quite as much money, expenses are gradually increasing, particularly in our labor account. The men with practically no exception, expect a little increase each year in their salaries and of course it costs a little more to live than it did and those who have growing families, as children grow older, require more expensive clothing and other incidentals. These matters we have to take into consideration, then there has been some shrinkage in values and a little settling down in certain lines. How much figure this will cut in our total results we cannot tell until we get through our inventory, which we are working on at this time, but we have no fear but that we can say that 1903 has used us well.

We think the general retail Hardware trade in the city also can say the same. The responsibility for this condition of affairs lies very largely with the Retail Hardware Association and the friendly relations brought about by this organization. For the past two years we have had a very energetic President, H. O. Roberts, who has devoted considerable of his time to the affairs of the Association and has been very successful in smoothing over many petty jealousies and also in investigating many sources of complaints, between some of the larger dealers and the jobbers. Much work has also been done in the line of getting the various department stores to stop the ruinous price cutting on many of the Hardware lines that they seem to take particular delight in using as a leader for "one day" only, consequently a person may look over the advertisements in the daily papers carefully and compare notes and you would be surprised that every one advertise 12-inch lawn mowers at $2.48, 14-inch at $2.98, 16-inch at $3.48, prices that on an average would pay a pretty good margin of profit. Same thing applied to ice cream freezers, that had always been a source of trouble.



This is a very critical time with the Association. There are some things working, that may seem necessary for at least one of the largest and most prominent retailers to withdraw and work on independent lines, and should such come about we fear that the organization, even if kept up will not be able to accomplish very much in the way of maintaining prices, but we sincerely hope that it may be possible to straighten this difficulty out.

PROSPECTS FOR THE FUTURE.

Starting in on the theory that the farmers have material with which to buy, and going a little farther along in that line, we have no doubt that in spite of rather wet harvest and thrashing season, that the crop for the year 1903 will bring more money than any previous crop ever harvested. Now when this is moved, what is going to prevent business moving and as it moves in the country it will move in the cities, and the longer they abstain from buying the sooner and more they will have to buy. On this theory why cannot we reasonably expect good business for 1904. It is presidential year to be sure, but the most of us here firmly and honestly believe that President Roosevelt will be nominated and elected, and believing that that question is already practically settled, the farmer that has got money to buy with and needs the goods is going to do business. That means he will buy our lumber, which most of the people perhaps know is quite an important industry still at Minneapolis, we sawing something like 500,000,000 feet the past year. Through these sources our citizens will have money to spend. Those that want to build will naturally do so, unless—now comes

the labor question and that seems to be in pretty critical condition at this time, with the prospects of its growing more so. Our leading contractors and manufacturers have organized and declare for open shop, the United Trade Labor representative declares 98 per cent. skilled labor in Minneapolis is organized and they simply won't stand for it.

The flour mills fought the battle squarely and manfully and at a critical time, the men taking advantage of the Fall business, when the mills are especially run to their utmost capacity to get all possible shipments out via lake and rail before lake navigation closes, but to the credit of the millers they stood by it, they fought it through to a finish and won out.

The serious problem among the building trade here is the large portion in number of small contractors, who have gradually worked their way up through the rank to position as foreman and then working on their own account. These men with everything to gain from their standpoint in keeping at work, are controlled by union labor, they having so recently been among their number and worked with them and at least will be inclined to take advantage of the situation, regardless of whether it is for the interest of the class that they now belong to as a whole or not. On this labor question hinges the entire question as to building operations in Minneapolis for the year 1904. We cannot predict what the outcome will be. In many cases that the writer is aware of, work was not begun the past year for fear of labor trouble, and we do not believe at the present writing that the situation is such that these same men can feel any encouragement to go on.

PARCELS POST LAW.

We do not feel that we are familiar enough with this proposition to write you intelligently on this subject. Will simply say that we are against it. Do not feel it is for the best interest of the country at large. It seems to us it would be of advantage to the catalogue houses and department stores seeking to do mail order business and on that account should be condemned by every local dealer in every line.

MUTUAL FIRE INSURANCE.

We do not belong to the Minnesota State Hardware Organization, but they, I believe, were the originators of the Hardware Dealers' Mutual Fire Insurance feature and have every reason to believe that it has been very successful. It certainly seems an excellent proposition.

Regarding cultivation of friendly feeling among our competitors we are great believers in this and know from personal experience that there is money in it. It is a winner and there is no way like sitting down to a table with a lot of your Hardware competitors and talking the thing over, after having had a good meal, and while enjoying an after-dinner cigar. We have our annual banquet the evening of the 5th. The writer will not be able to be present and of course cannot give you any notes as to the meeting at this time, but may be able to later on. This is an annual event and is somewhat on a formal order, generally we have two or three informal affairs of the same nature during the year. While we have known men—competitors—doing business within a few blocks of each other, that have met at one of these meetings for the first time and got quite "chummy" after a while, and another case where rather friendly relations have been brought about, was where two partners had separated, each running an independent business, could not say mean things enough about each other. They now, while not "chummy," by any means, are quite decent towards each other and each is willing to concede that the other has the right to live and have a share of the business.

It may be interesting to many of our Eastern friends to learn that Minneapolis mills are grinding wheat in quite big chunks, and shipping out to the Sound and way across the Pacific to Japan. While some smaller shipments have been made heretofore to the East, no great amount has gone from here until recently, this being brought about by the expectation that war was likely to be between Japan and Russia. It seems a long way to ship flour, especially the long and expensive railroad journey from here to the Pacific.

We wish to apologize for the length of our letter, but to cover the various points that you expressed a wish for us to do, makes it seem necessary and the further fact that now the writer has more time on his hands than he well knows what to do with.

OUR TRADE WITH GERMANY.

Exports from the Empire in 1903 Not Far Short of One Hundred and Thirty Million Dollars.

BERLIN.—The exports from Germany to the United States during 1903 did not fall short of $130,000,000, or from $14,000,000 to $15,000,000 more than in 1902, which was the previous record year. Detailed figures of the year's transactions in all the consular districts are not yet available, but the average increase is 12½ per cent. over that of 1902. For instance, the Berlin district exported goods to the value of $9,686,841, a gain of $1,018,621. This was due to the great variety of manufactures. The increases, taking all Germany, was chiefly in textiles, steel, chemicals and leather goods.

FOR EXPORT TO RUSSIA.

Russia, with its 141,000,000 people, offers an inviting market for American manufacturers, and that country's industries are as yet in their infancy. Among other advantages offering opportunities for favorable competition in Russia is the 20 per cent. reduction in import duties on all direct shipments to Russian ports of entry. Messrs. M. Gradstone & Company represent the interest of American manufacturers for export to Russia exclusively. They have representatives in all the large cities, and their own experience in the custom-houses on the Russian-German frontier perfects their facilities to serve manufacturers. Messrs. Gradstone & Company have their offices at 2 and 4 Stone Street, New York.

THIS IS O. K.

H. F. Brammer Mfg Co., Davenport, Iowa, who are the manufacturers of the O. K. Rotary Washing Machine, state they had in 1903 the most successful season for the sale of O. K. Mowers, of all the seven years it has been before the public. It certainly has sufficient advantages as may be noticed by reading the ad in this issue, to warrant the belief that the same report will be in order for 1904. Any user of it would O. K. that belief.

TRADE WITH CUBA.

Figures recently published by the Department of Commerce and Labor show that while the balance of trade between the United States and Cuba is in favor of the island, it is open to interesting fluctuation on account of revolutions, hurricanes, wars, droughts, and the changes in the price of sugar and tobacco. In 1855 it was $26,000,000; in 1872, $80,000,000; 1874, $105,000,000; 1875, $80,000,000; 1878, $68,000; 1882, $82,000,000; 1885, $51,000,000; 1893, $103,000,000; 1898, $24,000,000; 1903, $84,000,000.

THE OHIO CULTIVATOR CO.'S SPECIALS.

The Ohio Cultivator Company, Bellevue, Ohio, on a special page in this issue, press upon the attention of our readers who handle high grade implements, the important fact that the Ohio Hay Press, Bellevue Anti-Friction Disc Harrow and the Little Giant 5-Tooth Cultivator, are leaders in their class, and dealers who desire to handle goods that fairly sell themselves, when exhibited, would do well to write for information concerning them immediately after reading this reminder.

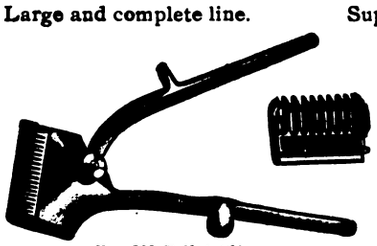
ABOUT MAHOGANY.

For Every Tree Felled Two Others Are Planted to Keep Up the Supply.

It will undoubtedly be news to many that the vast mahogany forests of Nicaragua are controlled at Boston. The cutting and shipping of the immense exports from that country is a great enterprise in itself, to say nothing of bringing it here and manufacturing it into lumber. One steamer plies regularly between this port and Central America engaged in this trade. At present she is on her way out from this port. Five hundred thousand to 700,000 feet is her usual cargo. While the steamer is now on her way to the lumber ports, there are somewhere on the seas bound to Boston four scooners laden with mahogany logs. Their cargoes are each about 250,000 to 300,000 feet.

Employed in Nicaragua and the United States of Colombia are from 1,000 to 1,500 native workmen and lumbermen. These are under American bosses. The trees from which mahogany furniture is made vary in age and size. When cut they range in age from twenty-five to thirty years, and some of them are even seventy-five years old. They average twenty-five inches or more in diameter and run as large as forty inches, and even more. For every mahogany tree that is cut two others are planted, and thus the forests are practically inexhaustible.

From the time that the tree is felled to the hour that it is dumped off the steamer at the Chelsea docks is an eventful life for the mahogany log. The tree is cut into the proper lengths and then comes the tedious journey to the coast, where it is taken on board the vessels bound for this port. The greater part of the cutting is done during the dry season which in the United States of Colombia begins about the 1st of December. The natives of this country seem to make better loggers and are better adapted to lumbering than the Nicarauguans. In Nicarauga the season is more irregular, and for lumbering is less to be depended upon. After the tree is cut it is hauled to the nearest waterway and rafted to the coast. The logs are hauled by teams of oxen from one to six miles in Nicarauga, but often the distance is very much greater, the journey sometimes taking two days. The roads consist of paths through the forest that are nothing else than swamps and morasses, through which the oxen and horses flounder along. Only animals trained to this kind of work would ever make any progress, and American beasts would wallow about perfectly helpless.



FAILURES IN 1903.

Fewer in Number, According to Bradstreet's Report, but Liabilities Largest Since 1897.

There were 9,768 failures reported to Bradstreet's in the calendar year 1903, with liabilities of $154,277,093 and assets of $84,060,471. This marked a decrease in number of just 2 per cent. from 1902 and of 8 per cent. from 1901. With the exception of 1899, the increase over which is 1.4 per cent., the year 1903 shows the smallest number of failure casualties reported since 1887. Liabilities, however, owing primarily to the increase in suspensions of financial institutions, but also because of the considerable number of heavy manufacturing concerns suspending, were larger by 45 per cent. than those of 1902, and the heaviest, in fact, since 1897.

THE VALUE OF A SCRAPBOOK.

So invaluable is a scrapbook to a man engaged in any line of business that it is surprising to find tradesmen and retail merchants who have never availed themselves of this most useful institution. We would strongly recommend all such to start a scrapbook without delay. The ideas and suggestions that may be gathered together in a collection of clippings extending over a few years will represent a fund of information that money could not buy, and that no ambitious business man can afford to neglect. The long, Winter evenings are upon us, when most men have more time on their hands for other occupations than the daily routine of their business. This is the best opportunity to begin the work of systematically collecting and pasting up in a scrapbook articles from newspapers or trade journals that are likely to be of use. Frequently, in perusing the trade or daily paper matter is noticed which contains information worth preserving. It is easy to clip such articles for the scrapbook, and once a week or so, paste them in. Such work will take perhaps an hour's time, and no time can be more profitably spent. Many men, who are interested in special lines, do not trouble to file the entire copies of their trade papers. There may be only one or two articles in an issue that appeal to them especially, and these articles are worth preserving. If the reader has the scrapbook habit, he will not fail to cut them out and add them to his collection. But it is not the reading matter only that is worth keeping. A man in business is always interested in the advertisements of his trade paper, and he can readily secure a valuable directory of manufacturers in the lines he may handle, with cuts and descriptions of their specialties, by clipping their advertisements and filing them in his scrapbook for future reference. If he is himself an advertiser, the scrapbook should contain copies of all his own "ads." and those of his competitors, as well as good specimens of the advertising matter of firms engaged in other branches of business. Thus the scrapbook may be made of invaluable assistance in the preparation of advertising matter. If a manufacturer, a scrapbook collection of cuts and descriptions of new goods and appliances, with information about new processes and methods, will in time become a mine of information from which may be dug valuable ideas to be developed in the extension of his business. Similarly, the retail store keeper can gather articles relating to business methods, store arrangement, show window dressing, novel fixtures and kindred subjects that will be suggestive and helpful. In fact, there is no limit to the possibilities for usefulness that a systematically kept scrapbook affords. Many a successful business man will be found to attribute a large share of his success to the fact that he adopted the scrapbook habit early in his career.—*The Metal Worker.*

♦

Louis Iwan, of Streator, Ill., is the inventor of a combination tool for which he has applied for a patent. It is made entirely of steel, is about as large as a razor and looks like one except that it has two blades, folding up like a knife, and from either side. Mr. Iwan claims that the instrument may be used for a score or more purposes—as an inside or outside caliper, a compass, a bevel, a square, a six-inch rule, a cigar clipper, a nut pick, a fork, a tooth pick, a nail cleaner, a pencil sharpener, a dagger and many other things. As soon as the necessary machinery can be obtained, Iwan Bros. will begin the manufacture of the tool and have it placed on the market.

♦

An editor discussed the political situation in a comprehensive editorial and headed it. "Let Us Explore." He neglected to read the proof, and it appeared under the caption, "Let Us Explode."

At the Telephone.

Casey—Who did yis say?
Grogan—Dunnohue, Dunnohue.
Casey—Well, if you dunno who, how do I know who?—

HOW WHISK BROOMS ARE MADE.

Broom corn, from which brooms are made, comes principally from Western States. The seeds are sown in May or June, about one foot apart, in rows. In about three months' time the stalk reaches to the height of from 8 to 12 feet; the top ends, which contain the whisks, are then ready for cutting. The stems are first bent over about one foot below the whisks and then cut off and packed into wagons and carted to the barns to be scraped and dried. After drying it is packed into bales weighing from 250 to 400 pounds each and shipped to the broom manufacturers.

The first operation is sorting or selecting the stock, the finest and greenest being used for the best brooms. After sorting the material is scraped. The scraper consists of a circular revolving cylinder 19 inches in length and 12 inches in diameter, the surface of which is covered with iron pins. These pins are placed in V-shaped rows about 6 inches apart, each row containing about 15 oar-shaped pins 2 inches in height and about 1 inch apart. The operator presses a bunch of the whisks containing the seeds against the revolving cylinder, the teeth of which, traveling at the rate of 350 revolutions per minute, tear through the material, scraping off the seed from the whisks. If the material is old, having lost its green appearance, it is dyed. The stalks are then clipped off and the whisks made of an even length. The best and straight whisks, which is called hurl, grows in the center of the stalks. It is kept separately from the rest and is placed on the outside when forming the brush.

The next operation is winding or forming the brooms. A circular piece of wood about three inches in length and about three-quarters of an inch in diameter is fastened into what is called the broom barrel. Connected to the machine is a reel of No. 22 iron wire, the end of which is tacked to the circulator stick in the barrel. The operator then takes a quantity of the poorer quality of the whisks and places them around the stick, starting the machine in motion, which causes the barrel to revolve, which, in turn, wraps the wire tightly around the whisks to the stick. After two or three turns of the wire have been taken the shoulder of the broom is then formed by putting a bunch of the material on each side and wiring and tacking them down as before. The hurl is then fastened on the outside in about the same manner. The rough edges are then trimmed with a knife and the broom sawed off from the barrel. A good hand can form about 150 brooms in about ten hours.

The brooms are then taken to the sewing vise to be stitched. A broom is fastened securely in the jaws of the vise, the top part projecting above about three inches. The operator then takes a flat, oval-shaped steel needle threaded in the center with fine linen cord or silk and passes it through the brush, securing the end. The cord is then wrapped tightly around the outside of the brush and the needle pushed through back and forth, each stitch passing over and under the outside cord, which is drawn taut, securing the whisks and giving shape and form to the broom.

Brooms are sewed with from one to three strings. The needles are six inches in length and double pointed, having the eye in the center. From ten to twelve stitches are taken in every seam, taking up about thirty-six inches of cord. A good hand can stitch about 600 single seam brooms per day. After sewing they are rescraped and then clipped into sizes. The ends are then sheared and curried to free the brooms of surplus seed. The handles, which are made of bone, ivory, wood, etc., are then glued on and the brooms stood up to dry. They are then packed into boxes and are ready for market. Twenty hands can turn out about from 75 to 80 dozen brooms per day. The green stock is the best for broom making, it bringing from five cents to six and one-half cents per pound by the ton wholesale. If too ripe, the color of the material being reddish, the stock loses in value about three cents per pound.

A New Game.

"We've invented a new guessing game."
"What is it?"
"Why, we get out in the park, throw away the almanac, and try to guess the season of the year from the weather."—*Chicago Post.*

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Atwater, Minn.—The Atwater Hardware & Machine Company has been incorporated with a paid-up capital stock of $50,000. The first board of directors consists of Martin Olson, G. A. Glader, George H. Feig, Edward H. Hoensing, Sumner B. Glader, B. S. Covell and Hans Dahl. Martin Olson is president, B. S. Covell, vice president; Sumner B. Glader, secretary and George H. Feig, treasurer.

Belleville, Mo.—The Lengfelder Stove & Hardware Company has been incorporated; capital $25,000. H. A. Lengfelder, Anna Lengfelder and Fred Schirmer are the incorporators.

Centertown, Mo.—The Centertown Hardware & Implement Company has been incorporated to deal in Hardware and implements; capital stock, $3500, all paid. Incorporators: Benton Heaton, Bailey W. Landsdowne, John Inglish, Sr., Jonathan W. Chambers, August F. Helemkamp and William Inglish.

Columbia, Kan.—The firm of Mackie & Anderson have opened up a furniture and Hardware store.

Columbia, S. C.—The Hartsville Supply Company, a Hardware and general supply firm capitalized at $10,000, has been incorporated. The incorporators are: L. S. Willing, M. Bonnoitt and A. W. Willing of Darlington and W. S. McKinnon of Hartsville.

Collins, Mich.—A Hardware store has been opened by Janes & Croel. They have put in good stock.

Erie, Pa.—Patrick M. Donohue and F. L. Schael have embarked in the Hardware business.

Graham, Va.—The Fowler-Richardson Hardware Company has been incorporated: W. E. Fowler, president; capital stock, $3,000 to $25,000.

Jefferson City, Mo.—The Clark-Brutten Mercantile Company of Kansas City has been incorporated to deal in leather goods, cutlery and jewelry, capital stock, $2,100. Incorporators, W. H. Clark, Ross C. Brutten and Charles J. Clark.

Massillon, Ohio.—Wilson Hawk, of Richville, has opened a Hardware store in the east room of the new Graber Block, in West Tremont Street. A general stock will be carried. The firm will be known as Hawk & Company.

Raleigh, N. C.—The Rowland Hardware Company has been incorporated. The authorized capital was $25,000. The incorporators are L. Z. Hedgepath, A. B. Baker, V. G. Pleasants and Alex. Watson.

Seattle, Wash.—Millard F. Jones and son-in-law, F. A. Batchelor, of Utica, N. Y., have formed a partnership and opened a Hardware store and plumbing shop Mr. Jones was for many years a member of the firm of John O. Jones & Sons and Mr. Batchelor was with Julian Batchelor & Sons.

Spartanburg, S. C.—The Spartan Hardware Company has been incorporated. This enterprise is capitalized at $10,000, the incorporators being Randolph Watkins of Virginia; H. O. Beacham and E. H. Everett, of Spartanburg.

Trenton, Ill.—Leonard, Brefels & Sauter Hardware Company has been incorporated; capital $10,000; general Hardware business. Incorporators—Adolph Leonard, A. C. Brefels, J. H. Sauter.

Waterbury, Conn.—The Waterbury Hardware Company has been incorporated.

Changes.

Andover, N. Y.—The Atwood Hardware store has been sold to Mr. Lynch, of this place. Mr. Atwood was one of the most successful if not the most successful Hardware and vehicle dealer in Alleghany County, having amassed a fortune in the business. Mr. Atwood is largely interested in the oil business in the Andover field and retires from the Hardware business for the purpose of devoting more time and attention to his oil interests. Mr. Lynch is a well-known Andover business man of capital and experience.

Birmingham, Ala.—The Morton Hardware Company have recently increased their capital stock, and have taken into the firm one of their employes, Doyle H. Ramsey, and have made him secretary of the company.

Boston, Mass.—George D. Appleton is back again at the old stand at 294 Washington Street. Mr. Appleton has been in the cutlery trade for 40 years, and in reopening a store in New Old South Building he has stocked it with reliable cutlery of every kind.

Carthage, Mo.—The lumber firm of Thompson & Setton is clearing ground to erect a large building to be occupied by their extensive stock of furniture and Hardware to be moved from North Neck City.

Coatesville, Pa.—The entire Hardware stock of Nathan Lukens, a bankrupt was sold in bulk to Levi Lukens, his father, for $10,950.

Coffeyville, Kan.—W. S. Churchill states that he intends to build at once a two-story brick building and expects to be carrying on his Hardware business by Spring.

Cunningham, Wash. — The Ritzville Hardware Company is moving to Lind, where the company bought out the Lind Hardware Company.

Davenport, Ia.—Announcement has been made that the Hardware store of P. & P. Feddersen, at 332 West Second Street, had been sold to Hugo and Herman Rohlffs. The new firm who are to take possession are well able to maintain the high standard set by the Feddersen Company. Hugo Rohlffs has been in the business for nearly fourteen years. He was with the Feddersen Company for twelve years and three years ago went with Rascher, Schricker & Rascher, where he is at the present time. He thoroughly understands the Hardware business and is counted one of the most efficient men in his line in the city. Herman Rohlffs is now with the Davenport Malting Company as bookkeeper. He will look after this end of the business for the new firm.

Hartford, Conn.—Chas. Harris has bought the Hardware store of the administrator of the Ralph Barber estate for something over $9,000. He has resigned his position at the American mill, where he has been for many years.

Holcomb, N. Y.—C. Donahue has moved his Hardware business into the new Jones Block.

Horton, Kan.—Reichers & Son of Adams, Neb., have bought out the Hardware firm of C. M. Lambert & Company.

Ida Grove, Iowa.—The Hardware firm of Mitchell & Simpson sold its business to William Colvin & Son, who take charge at once.

Johnstown, Pa.—The Swank Hardware Company has added to its business a complete house furnishing department. The store has been remodeled and is modern in every respect.

Merrill, Wis.—Wenzel & Duteau, who for several years have conducted a Hardware store on West Main Street, have dissolved partnership. Mr. Wenzel will continue the business as heretofore.

Olean, N. Y.—A deal was completed by which the Miller Hardware Company of this city purchased the stock of furniture of the Conkling Furniture Company's store and also a lease of the store and five floors over it.

Phelps, N. Y.—The stock of Hardware and fixtures belonging to M. D. Crosier who recently went through bankruptcy have been sold to Charles Crandall of Penn Yan, the consideration being $3,500. Mr. Crosier will assume the management of the store.

Plattsburg, Mo.—R. L. Eberts has bought the lot on Main Street, formerly occupied by him and will erect a two-story brick building 90 feet long to be occupied entirely with his Hardware stock.

Randolph, Iowa.—Buol Bros., who have been in business here since the establishment of the town, have sold out their large Hardware store to Messrs. S. W. Mosher and J. L. Chapman of this city.

A Long (K) Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

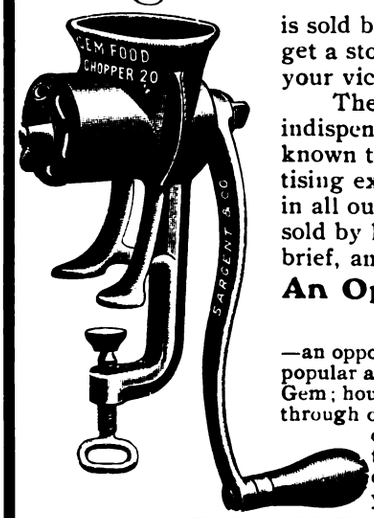
Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.



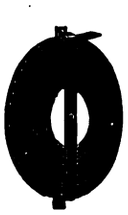
¶ It improves the appearance of your store *100 per cent*; enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

J. D. WARREN MANUFACTURING CO.
900 Masonic Temple, Chicago

Sargent's Gem Food Chopper



is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.

The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations.

Auburn, N. Y.—The Mead Cycle Company has been incorporated to do a general bicycle business at No. 38 Market Street. Incorporators, Fielding W. Mead and Arthur W. Jones.

Yonkers, N. Y.—Empire Sporting Goods Manufacturing Company has been incorporated. Capital $10,000 and directors: Michael Finkelstein and Abraham Schemel, of Yonkers and Morris Chavin, of New York City.

Changes.

Chicago, Ill.—Two transfers of factories from the American Cycle Manufacturing Company to the Pope Manufacturing Company have been recorded. They were the Ames & Frost and the Gormully & Jeffery Works, both of Chicago. The transfers were in line with those of the Hartford & Hagerstown plants.

Ft. Wayne, Ind.—J. S. Van Tochine, proprietor of the Indiana Bicycle & Supply Company has been chosen for mechanical inspector for Burroughs adding machine by the American Arithmometer Company, of St. Louis, to inspect and take care of their machines.

Hagarstown, Md.—The old bicycle plant is to be put in operation again; this time to build automobiles. One thousand machines are to be built as soon as possible.

New York, N. Y.—A. H. Funke, after January 1st, will remove to 83 Chambers Street, which, extending through to Reade Street gives him a larger place.

Portsmouth, Ohio.—Lloyd, Adams & Simpson will lease the ground floor in the Branch Building after the first of January, and use the same for their pistol factory.

San Francisco, Cal.—Morgan & Wright have opened a branch at No. 1067 Mission Street, with F. W. Paige in charge. A full line of Morgan & Wright goods will be carried.

South Onondaga, N. Y.—The real estate, stock and business of the bankrupt firm of I. A. Weston Company, of Jamestown and Syracuse has been sold to Calvin McCarthy of this place for $6,075. The property consists of the bicycle and automobile parts plant at Jamesville and the nickel plating goods at that place, as well as those stored at the Syracuse storehouse. Mr. McCarthy, with his partner, Albert Spencer, will reorganize the company and commence business again. The plant will be refitted with all modern improvements and placed on a sound basis, and will operate under the firm name of the Jamesville Mfg. Co. They will continue the manufacture of the Champion and Vulcane hubs, which formed part of the Weston line.

Embarrassments.

Oakland, Cal.—A petition in insolvency has been filed by J. S. Witherell of Oakland, a jeweller and bicycle repairer. He owes $686 and has $324 assets.

Southington, Conn.—Garrett. W Smith filed a voluntary petition in bankruptcy on December 18. His liabilities were given as $3,992.17 and his assets as $4,208.71. The liabilities include two claims of $1,000, each secured by mortgages on real estate in Southington included in the list of assets at a valuation of $2,500.

Miscellaneous.

New Haven, Conn.—The Alling Rubber Company has issued 240 additional shares of capital stock. The par value of each share is $25, making the amount of the additional issue $6,000 The Alling concern conducts five stores in the State of Connecticut, in each of which bicycle tires and other sundries are handled in considerable quantities.

Rochester, N.Y.—The East End Cycle Club has elected officers for the ensuing year as follows: President, W. F. Martens; vice-president, Earl Bissell; recording secretary, Charles Meier; financial secretary, William Hotchkin; treasurer, James Irwin; board of managers, George R. Herschell, Bert Bissell, Sidney Williams and F. Wedgren.

♦

"The demand for shotguns, rifles and other sporting goods has been unprecedentedly great this fall and winter," said a prominent Hardware dealer recently. "We have already sold twice as many as last year, and there is no abatement in the rush for goods of that character. We sold the last of the third shipment this season of Belgium shotguns yesterday. They were high-priced, but that was no barrier to their sale. This can only be attributed to the general prosperity of the people. The fact that game is plentiful this season may have something to do with the call for guns and ammunition."

♦

At the two English cycle shows, the Stanley and the National, there were exhibited 623 motorcycles—nearly double the number exhibited the year before.

♦

A Melbourne importer, writing to an English contemporary, makes out that trade in the Antipodes during 1904 should be remarkably good. He says:

"Trade prospects for the coming season, as far as Australia and New Zealand are concerned, are very good, and I fancy this will be a phenomenal year. I am working, with my staff, as hard as possible to cope with an ever-increasing business in cycle material, and am at my wits' end how to supply the demand for the rapidly expanding motor trade; and considering the bad times our country has gone through, owing to droughts and a little too much government, it makes matters all the more remarkable."

After telling us that he has just returned from a little business trip to Wellington in New Zealand—a trifling journey of 1,800 miles each way—and jotting down a few of his experiences by the way, he says: "In the Maori capital, and indeed all through New Zealand, trade is booming, and owing to the splendid seasons and high prices the settlers have obtained from their beef, mutton, wool and general produce, the country is rolling in wealth, and everything is sold at about 25 per cent. higher retail than in Australia. Wages are high, first class cycle mechanics being greatly in demand; and workmen—folk who take their coats off and put their shoulders to the wheel—are having a very prosperous time; though living is correspondingly high, and house rent and clothing are dear. The climate from Wellington to Invercargill is much the same as you get in England—wet and cold in winter, with plenty of snow and ice.

"Bicycles in New Zealand are sold at a big price. Local made machines, mostly built of Eadie and B. S. A. fittings, 18 to 22; other fittings, 16; Humber bicycles, 30, and Rudge-Whitworth, Swifts and Masseys, 25 to 30. I found since my last visit that the locally built or assembled machine is taking the place of the imported whole bicycle, owing, no doubt, to the fact that the builder advertises his own wares with his own transfer on. Also, that he does not have to pay an exorbitant price for the duplicate fittings."

♦

Utica, N. Y.—The following directors of the Utica Drop Forge & Tool Company were reelected at the annual meeting of the company held at the office of William Pierrepont White recently: William Pierepont White, H. Lawrence White, Charles A. Miller, John P. Campbell and Frederick S. Kellogg.

♦

Taunton, Mass.—Albert M. Field has been made the manager of the United Tack Company in place of J. M. Fraga, who resigned to accept a position with the Atlas Tack Company of Fairhaven. Mr. Field is a member of the family which began the manufacture of tacks in this city and has been connected with the business for years.

ASBESTOS SAD IRONS

FOR HIS HEARTY SUPPORT DURING 1903.

We desire to thank every jobber and retailer in the Country, whether he has sold one set or many car loads of

ASBESTOS SAD IRONS

The year has been very kind to us. We realize the debt we owe to our friends the Hardware men, large and small, and have endeavored to show our appreciation of this by enlarging and improving our entire line of Asbestos Sad Irons in every way, so that we are now placing before you the only complete line of sad irons ever made, comprising every iron which could possibly be required for use in the home.

We have recently expended several thousand dollars in revising all patterns, dies &c , which go to make up ASBESTOS SAD IRONS. These improvements have put our goods in a class by themselves and they now conform very closely to the high-class advertising we are giving them.

"The Laundry Sets, Pressing, Polishing Irons and Shirt Waist Sets are now packed in neat lock cornered sliding cover Boxes, one set or iron to the box and crated.

Sleeve, Tourist and Baby Irons are packed in cartons, one iron to the carton and boxed.

This is not alone an ideal method of packing the goods, but also insures their reaching the consumer in the very best of order.

We shall continue to show our appreciation by giving your wants our best and most careful attention.

ASBESTOS SAD IRONS

are carried in stock by the leading jobbers. If yours does not have them, we will thank you to advise us and we will see that your needs are supplied.

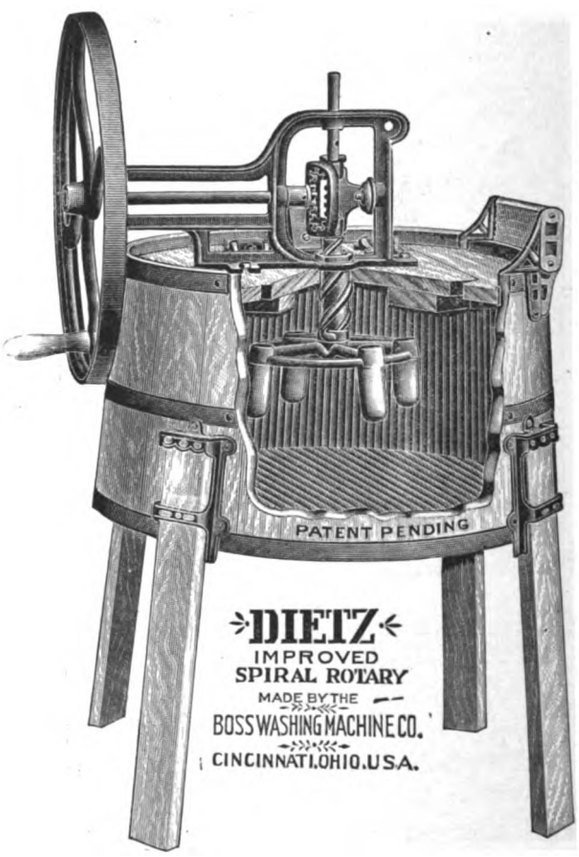
THE HIGHEST MARK

Of popular approval is enjoyed by our Boss Washers

A SPLENDID RECORD.

Over 3000 Hardwaremen are selling them at a good profit every day in the year. Every day **"The Boss"** is growing in favor with thrifty housewives.



The Reason For This?

Plain enough. Our every Washer is a model of perfection in construction and utility.

The interior, the exterior, the adjustment—in fact every detail of the Boss Washers have been conducive to their popularity.

We manufacture 11 styles. Note our two latest improved 1904 Patterns.

Easy Going?

That's their distinctive feature. Every "BOSS" moves along easily without wear and tear on the finest or coarcest fabrics.

The quality and quantity of work done by THE BOSS has yet to be surpassed.

Easy going, too, when it comes to selling them. No Hardwareman ever experienced trouble on that score.

The "BOSS" For 1904.

Say! Write us, and we'll put you next to our proposition for 1904.

To handle the "BOSS" washers means money for enterprising Hardwaremen.

Be wise and investigate in time.

Mention HARDWARE.

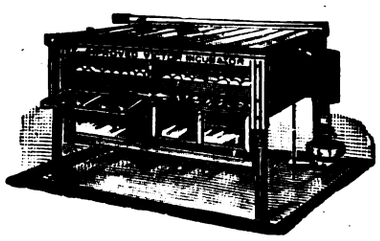
"'Make Hay While The Sun Shines'

but *by all means*, before selling it bale it with

THE 'GEM' BALER,"

is the consensus of opinion of thousands of satisfied users the world over. It's no small wonder. 35 years' experience has made The "Gem" the Best. As a Continuous Full-Circle Steel Baler



THE GEM IS PEER

among Hay Presses. Because of its construction it is the most simple, most durable and most easily operated.

It bales the largest amount of hay or straw, 10–18 tons, in the shortest possible time with the least amount of wear and tear on the team or horse—one only being necessary to operate the largest press.

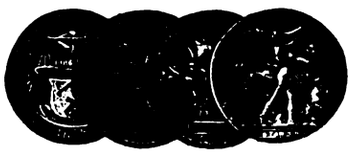
A BUSINESS BREEDER

Six carloads shipped in a single day and over 100,000 pleased customers is the enviable record of

THE VICTOR INCUBATOR

Its' increasing popularity among poultry breeders is phenomenal for no other reason than this: The Victor is built on scientific lines and is mechanically perfect in every respect.

It does the business as a Breeder and breeds business, and one pleased customer brings you others.



Send for our catalogue and prices. They will interest you.

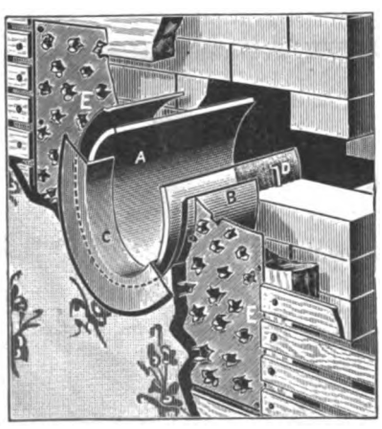
"BLUE BOOK" CREDITS OF THE HARDWARE IRON & METAL TRADES.



We have just issued the most complete and reliable book of credit ratings for this special branch of trade that has ever been published, containing about 400,000 rated names of wholesalers, retailers and manufacturers, covering the trade thoroughly. The ratings are conservative and very reliable. The ***paying record*** is based upon ***ledger experience*** of credit men everywhere.

You buy credit information. Isn't it the part of a good buyer to post himself thoroughly on the merits of a book of ratings, gotten up especially for his trade by men with ample capital and who are thoroughly trained in this class of work and who make a ***specialty*** of it?

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

Mention "Hardware."

Polygon Conductor Pipes Won't Burst.

The twist in the corrugation checks the sudden fall of ice and water, thus protecting the joints. It stands hard knocks because it is corrugated. Again, it is much handsomer than plain pipe. Made in copper and galvanized iron.

BUILD UP YOUR SAW TRADE.

You can easily do it if you handle **Atkins High Grade Silver Steel Hand Saws.** Their superiority and fine cutting qualities have firmly established an enviable reputation among carpenters and users of hand and small saws. First class mechanics prefer them for fine work above all others.

ATKINS ALWAYS AHEAD!

Atkins High Grade Silver Steel Hand Saws excel in Material, Temper, Workmanship, Design and Finish. Nothing overlooked in manufacture that adds quality to the saw.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

1 to 20 gallons. Weight 5 to 69 lbs.

We have the largest and best equipped factory in the south for the manufacture of Sad Irons, Country and Stove Hollow Ware. Ground and Unground. Sugar Kettles, English Pots, Cast Iron Shoe Lasts and Stands, Kitchen and Corner Sinks, Grates, &c.

BLACKLOCK FOUNDRY
South Pittsburgh, Tenn.

POST HOLE DIGGERS

That sell because:

They are made of malleable iron castings and blades are pressed and not rolled. This makes them as durable as shovels. All riveting is done by machinery. The blades are absolutely tight and cannot work loose.

Handles are clear selected maple and are 54 inches long.

Blades are sharp and nicely japanned.

These talking points will help you make sales.

We make tacks and nails, too.
Send for circular.

Learn Advertising

There is no thing so valuable to the man in business as a knowledge of advertising. It is the greatest force in modern business and no young man can hope to achieve a substantial and enduring success without it The advertisement writer and manager is one of the highest priced employees in any business, and his opportunities for advancement are the best. Any man with a good common school education can win for himself a place in the advertising world.

Many of those who have followed my instructions now hold positions with leading concerns and are receiving from $30 to $125 per week. Mr. Charles H. Brown, President of The Chicago Pure Food Marketing & Distributing Company, says: "About six years ago the business at which I was working paid me $20 per week. I studied advertising and in a very short time I doubled my salary. Six months ago I was elected President of a $250,000 Corporation and I am Vice-President and Manager of another large corporation with liberal stockholdings in each. The foundation of the progress I have made was laid by the careful study of Bates Literature. I am satisfied that the foundation for a career in the advertising business can be made by mail, and I am satisfied that Mr. Bates can do this better than any other person or organization in the world."

My course is the only one being given in connection with an actual advertising business. It is therefore the most practical course. "A Business Course for Business Men."

If you are dissatisfied with your present salary, if your work is uncongenial, or if you wish to learn to advertise your own business in the most effective manner, send three two-cent stamps for my handsome sixty-page prospectus telling how and why advertising can be taught, who should study advertising, and booklets "Ill Fortunes of Brother Bill," "Other People's Brains," and "How Shall A Young Man Succeed?"

CHARLES AUSTIN BATES,

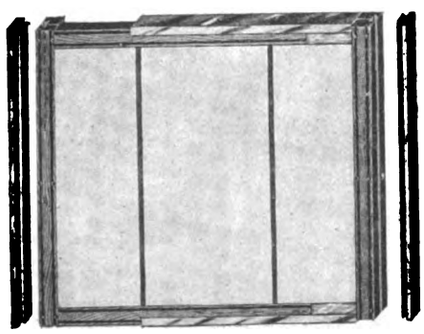
When Screen Doors and Window Screens are sold for less than cost

of manufacture, who makes the best goods, the fellow who cut the price expecting afterward to make goods to fit the price, or the manufacturer who makes goods all the year, carries a heavy stock and is in the business to stay, *but who meets the price?*



The "Flyer"

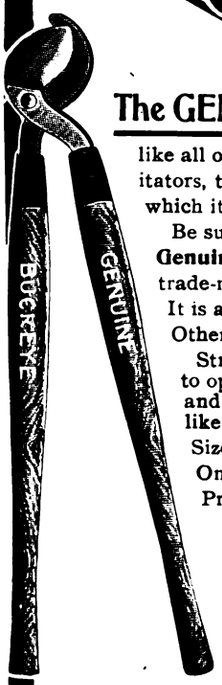
The **Phillips Factories** run practically the year round, offering steady employment to good mechanics, thus securing the best service.

It now costs more to make good Screen Doors and Windows than it ever did before. Yet prices are lower than last season.

There never have been enough Phillips Screens to supply the demand. Last year when most factories were running light we were obliged to run at full capacity to the close of the season.

For the coming season, we have increased our capacity and made larger preparations. Order early and be sure of good service.

20th Century



It's a good time to turn your attention to the 20th Century Window Screen, an adjustable screen that slides up and down on dovetail runners. It will yield a profit. (By the way, did you ever make any money on a 10 cent screen?)

The patents and sales of the 20th Century Screen are controlled by our New York sales agent, Mr. F. P. Wilkinson, 90 W. Broadway.

The A. J. Phillips Co., Fenton, Mich.

22 YEARS EXPERIENCE.

The GENUINE BUCKEYE PRUNER

like all other good things, has a number of imitators, that seek to grow fat on the reputation which it enjoys.

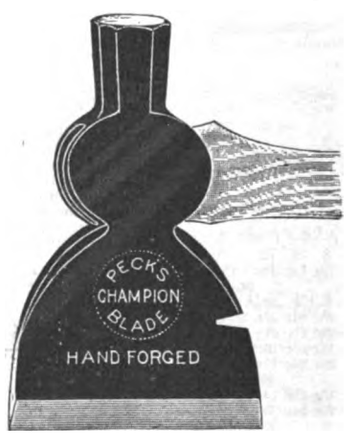
Be sure that you offer your customers the **Genuine Buckeye Pruner.** See that our trade-mark, (Buck's Head,) is on the label. It is a Pruner that will give satisfaction. Others may, but it's doubtful.

Strong, with hand-forged blades, easy to operate—grasp the limb with the hook and cut towards you. No other pruner like it.

Size:—25-inch.

One dozen in a case.

Prices sent on request.



Write to-day about a Sample Order.

NOVELTY MFG. CO.

JACKSON, MICH., U. S. A.

Peck's Policy

Is to furnish good Edge Tools at lowest prices; never to do less than we promise, but more if possible; and to make friends of our patrons.

Why lose a single customer by selling a poor tool when you can gain one and keep him by selling Peck's? How about your Tool Trade for 1904? Write us. Maybe we can help you.

Peck Edge Tool Co.

CRONK & CARRIER SPECIALTIES

OUR CATALOGUE TELLS ALL ABOUT OUR COMPLETE LINE.

SHALL WE SEND YOU A COPY WITH PRICES FOR 1904?

CRONK & CARRIER MFG. CO., ELMIRA, N. Y.

THERE'S MONEY IN RAIN

and rough weather if you carry

Blizzard Storm Fronts

The front that closes up a buggy in half a minute. Cleverest, easiest adjusted, quickest selling. Millions read our ads in the popular weeklies, magazines, agricultural papers, etc. People write us all the time asking where they can get these fronts. We'll send inquiries from your locality to you if you handle "Blizzards."

Blizzard Days Now!

If you haven't the **Blizzard Storm Front** in stock you send trade to your competitor who has.
Write us to-day about our liberal proposition to dealers.

Not a drop can touch you when your buggy is closed up by the

Blizzard Storm Front

(Patented in United States and Canada.)
Fits Any Buggy

Adjusted in 30 seconds without getting out or removing gloves, sides open and close as quickly and easily as a door, large line pocket, guaranteed satisfactory. The large window, 12 x 20 inches, is a pliable transparent material that won't break. Rubber Cloth, $3.00; Heavy Rubber Cloth, $3.50.

Ask your dealer and be sure that trade-mark "Blizzard" is stamped on inside under window.

Sold by Vehicle, Harness and Hardware dealers. If yours hasn't it, write us. *Illustrated booklet free*

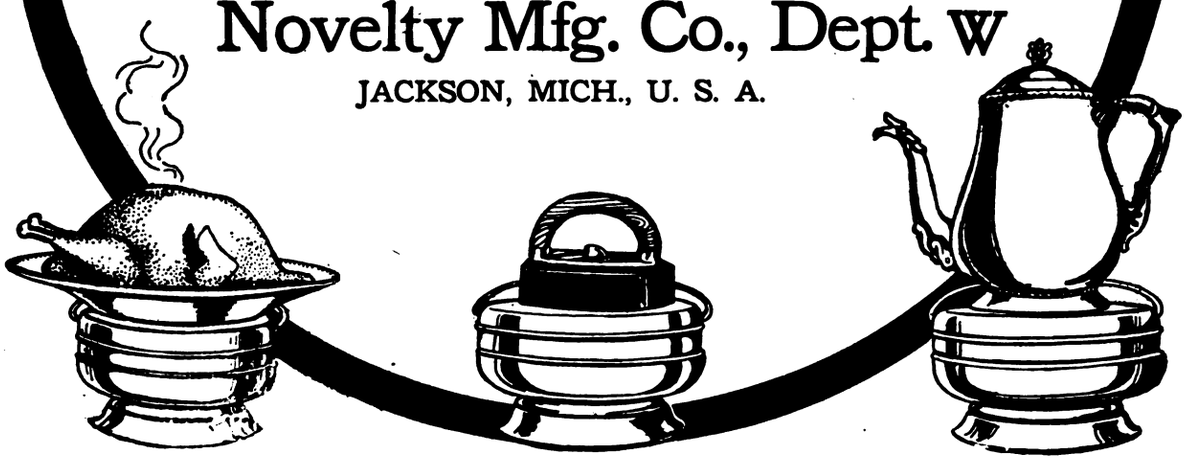
X-Radium Heater

A recent discovery and invention of universal utility. Meets and fills a want in every home. Retailing for only $2.50, sells at sight.

We are creating the demand and helping the trade by aggressive advertising in standard mediums of general circulation.

The X-RADIUM HEATER will be advertised in February Magazines: McClure's, Munsey's, Everybody's, Review of Reviews, Strand and Good Housekeeping—in Collier's Weekly, Literary Digest, Ladies' World, Modern Priscilla, Housekeeper, Normal Instructor, and World's Events—a total circulation of nearly four million copies, reaching twenty millions of readers.



In March still greater efforts will be made, including full pages in The Ladies' Home Journal, McClure's, Munsey's, Strand, Review of Reviews, Everybody's, etc.

Surely we are doing our part to help the trade.

The demand for X-RADIUM HEATERS will be immense. Prepare for it by placing an order now with your jobber, or sending direct to us. You can't get in touch with a good thing any too quick.

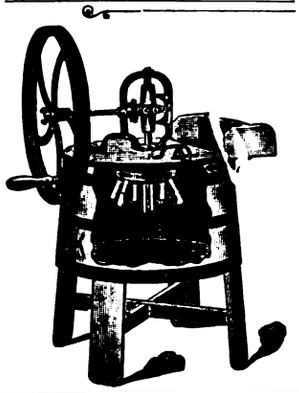
HAVE YOU SEEN THE

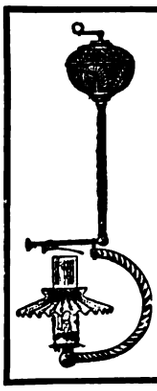


B. B. Rotary Washer?

It is the simplest, most durable and easiest running machine on the market. We also make the Brammer Rotary, Schroeder Rotary, Great Western and Columbia Washers. Ask your jobber for them or write to

Benbow-Brammer Mfg. Co.,
ST. LOUIS, MO.

WHY IS THE



O. K. THE BEST ROTARY WASHING MACHINE?

—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing,** reducing **the friction** and thus making machine so **light running** and almost **noiseless.**
2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish;** the legs are **solid with tub** (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without **rubbing** them to pieces.
4.—This washer is made by **experienced mechanics,** and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, **no escape of steam.**

Specially Prepared Brown Waterpreof Duck Horse and Wagon Covers

The Wagner Mfg. Co.

CLEVELAND, OHIO

From Margam Forge, Glamorganshire, South Wales, to Martin's Ferry, Belmont Co., Ohio.

MF

Note the Coincidence:

The most favored brand of roofing tin, the MF which originated at Margam Forge in South Wales about sixty years ago, is now being produced by the American Tin Plate Co. in its works at Martin's Ferry, Ohio.

At the Martin's Ferry Works the MF old style process has been combined with the "New Method" of finishing Terne Plates. The result of this happy combination has been the U. S. Eagle N. M.

Ask W. C. Cronemeyer, Agent, 1211 Carnegie Building, Pittsburg, Pa., for our new booklet which teems with useful information.

Every Day

is a "dull day" for the average household knife. That's why the Rose Automatic Grinder is *never out of season*. Only set it where it can be seen and tried by your customers, and it will earn more profit to the square inch of space occupied than anything in stock.

The ROSE Automatic Grinder

is a practical novelty. It is simple, durable and efficient. Drawing a knife through the slots as shown, brings it in contact with a *revolving* emery wheel, that sharpens it and does it right. Set one on your counter and see it sell itself.

Of your jobber or write

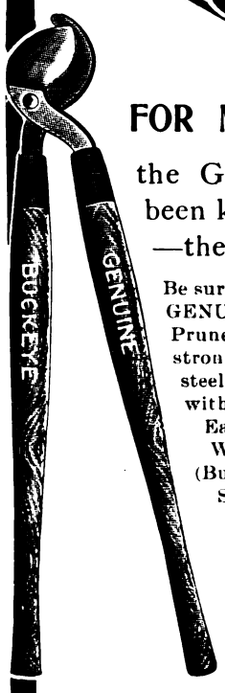
Learn Advertising

There is no thing so valuable to the man in business as a knowledge of advertising. It is the greatest force in modern business and no young man can hope to achieve a substantial and enduring success without it The advertisement writer and manager is one of the highest priced employees in any business, and his opportunities for advancement are the best. Any man with a good common school education can win for himself a place in the advertising world.

Many of those who have followed my instructions now hold positions with leading concerns and are receiving from $30 to $125 per week. Mr. Charles H. Brown, President of The Chicago Pure Food Marketing & Distributing Company, says: "About six years ago the business at which I was working paid me $20 per week. I studied advertising and in a very short time I doubled my salary. Six months ago I was elected President of a $250,000 Corporation and I am Vice-President and Manager of another large corporation with liberal stockholdings in each. The foundation of the progress I have made was laid by the careful study of Bates Literature. I am satisfied that the foundation for a career in the advertising business can be made by mail, and I am satisfied that Mr. Bates can do this better than any other person or organization in the world."

My course is the only one being given in connection with an actual advertising business. It is therefore the most practical course. "A Business Course for Business Men."



If you are dissatisfied with your present salary, if your work is uncongenial, or if you wish to learn to advertise your own business in the most effective manner, send three two-cent stamps for my handsome sixty-page prospectus telling how and why advertising can be taught, who should study advertising, and booklets "Ill Fortunes of Brother Bill," "Other People's Brains," and "How Shall A Young Man Succeed?"

CHARLES AUSTIN BATES,

28 SPRUCE STREET,

NEW YORK.

FOR MORE THAN 30 YEARS

the Genuine Buckeye Pruner has been known as the standard pruner —the strongest and best made.

Be sure that you offer your customers the GENUINE BUCKEYE PRUNER. No other Pruner made can compare with it. It is strongly made, with blades of hand-forged steel. It is easy to operate. Grasp the limb with the hook, and cut towards you. Easier and better than the other way.

When buying, see that our trade-mark (Buck's Head) is on the label.

Size:—25-inch.

TRADE NOTES.

South Bend, Ind.—Samuel Studebaker and S. G. Chard recently purchased an interest in the Hildebrand Hardware Company, South Michigan Street. Now they have purchased the entire stock and the firm will hereafter be known as Studebaker & Chard.

Vinton, Ohio.—The firm of Butler & Son, Hardware dealers, has made a change in their business. W. F. Butler, the senior partner, who owned a one-half interest in the business, retires, making his son-in-law, Dr. W. C. Feltman, a present of his interest in the business. The new firm will be known as Butler & Feltman.

Washington, Ia.—The Geo. Stewart Hardware Company will erect a brick warehouse, 30x70.

Waterville, Wash.—Ray Stanley, a Hardware merchant of Hartline, has closed out his business in that place and come to Waterville to go into partnership with his father.

West Newton, Pa.—S. K. Montgomery has purchased the large business and residence building of George S. Walker, on Railroad Street; consideration, $3,000. Mr. Montgomery will occupy his new purchase as headquarters for the tinning and roofing business in which he is engaged, and will also keep a line of Hardware.

Moline, Ill.—Wm. H. Taylor, one of the managers for the Moline Plow Company for the last three years, will take a prominent position with the Kingman Plow Company, of Peoria.

Ottawa, Kas.—The contract has been signed between the Ottawa Business Men's Association and the Warner Fence Company, of Waverly and Melvern, for a consolidation of the company's two factories at Ottawa. The company will erect a new building.

Pendleton, Ore.—Al J. Goodman, of Independence, has purchased a half interest in the large Hardware business of the Thompson Hardware Company.

Syracuse, N. Y.—The Syracuse Stove Company will build a 100x75 foot, four-story brick factory building in connection with its present plant in North

SHEET METAL STAMPING, BLANKING, FORMING COMBINATION AND DOUBLE ACTION DIES made to order.

TRADE NOTES.

Akron, Ohio.—The Aultman-Miller Buckeye plant was to have opened Dec. 1st for the first time since the failure of the Aultman-Miller Company last Spring, but it was deferred one week because of the non-arrival of material to start the factory. The plant was purchased by G. W. Allen and Judge W. A. Vincent of Chicago, and a company was organized, supposed to be independent of the trust. It has been manufacturing binder twine for two months, and expects to manufacture reapers on a large scale, employing nearly 1,000 men.

Watertown, S. D.—The International Harvester Company of America has established its offices in Watertown. Nels Johnson of Aberdeen is in charge as general agent. W. L. Eals of Denver, Col., is assistant general agent. C. L. Woodward of Sioux Falls is cashier, with F. R. Hoagland, of Council Bluffs, Iowa, assistant.

Moline, Ill.—The American Plow Co. has completed the plant at Madison, Wis., and has equipped it with machinery. The main building is 100x216, one story. The company expects to enlarge the plant in the near future. It will manufacture plows, harrows and hay tools. The capital stock of the corporation is $200,000 and the officers are as follows: President, James Barclay; secretary, A. E. Johnson; treasurer, J. Reuter; superintendent, A. M. Dahl.

"BLUE BOOK" CREDITS OF THE HARDWARE IRON & METAL TRADES.

We have just issued the most complete and reliable book of credit ratings for this special branch of trade that has ever been published, containing about 400,000 rated names of wholesalers, retailers and manufacturers, covering the trade thoroughly. The ratings are conservative and very reliable. The ***paying record*** is based upon ***ledger experience*** of credit men everywhere.

You buy credit information. Isn't it the part of a good buyer to post himself thoroughly on the merits of a book of ratings, gotten up especially for his trade by men with ample capital and who are thoroughly trained in this class of work and who make a ***specialty*** of it?

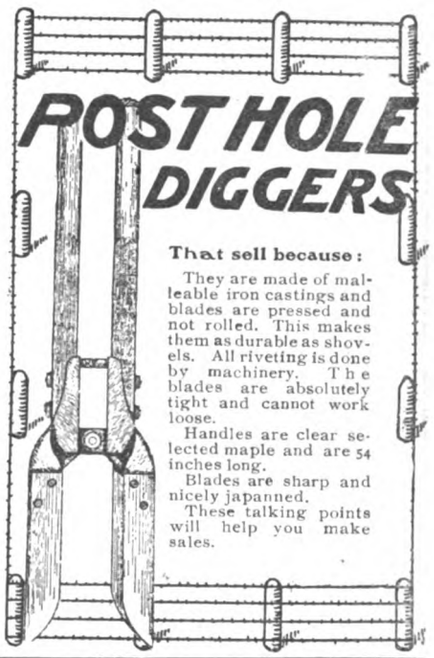
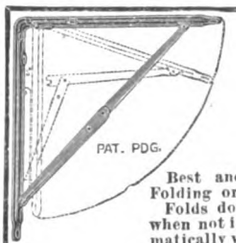
STEEL TERMS.

What Some of the Much Used Words Really Signify.



In recent discussion of the steel and iron industry the newspapers have used such terms as pig iron, kentledge, ingots, billets, bloom and slab. A good deal of misapprehension exists as to these trade terms, and the manner in which they have been recklessly used in recent discussions of the reaction in the steel industry has been a source of amusement to practical steel and iron experts.

Pig iron is the product of the blast furnace. It is of absolutely no use except as a raw material for further manufacture. Even for a temporary use as ballast it is frequently cast into different form from the ordinary shape, and it is then called kentledge. Minor points being neglected. Bessemer pig used to make steel by the Bessemer or blowing process; basic pig, to make steel by the basic, open-hearth process; and forge or mill pig iron, for the manufacture of wrought iron in the puddling furnace.



Originally, the blast furnaces that produced pig iron and the steel mills that manufactured pig iron into steel were entirely separate. All of the pig iron produced passed through the open market. Through the consolidation of the last twenty years the blast furnaces and steel mills have been largely brought under one ownership. Out of a total production of about 18,000,000 tons of pig iron over 10,000,000 tons never changes ownership nowadays. In fact, it never becomes solid, going into the steel making process from the blast furnace without cooling. The remainder of the pig iron still passes through the market.

Pig iron is manufactured into steel, and this steel is cast into ingots, each usually weighing over a ton. In the process of rolling these ingots out into finished forms it becomes convenient to make a resting point at the billet, which is usually about four inches square and thirty inches long. All of these are crude steel forms, useful only to make finished product. Formerly the great bulk of crude steel, like pig iron, passed through the open market. The consolidations, however, that brought under one ownership the blast furnaces and the steel mills also absorbed the works that roll down the crude steel into finished forms.

At the present time, less than 10 per cent. of the total crude steel passes through the open market. As already stated, the larger part of the pig iron never becomes solid, but at once goes into the steel making process before cooling. Much of this crude steel, in turn, never becomes cool, but is rolled into finished forms, such as steel rails at once.

We make tacks and nails, too.

HARDWARE

The Voorhees Rubber Mfg. Co., of Jersey City, have issued an attractive garden hose pamphlet, descriptive of their different brands of hose. They have a very large business in this line, extending all over the country, and anyone interested would do well to send for one of their little books. They will find it interesting and suggestive.

✤

John D. Bethel has been selected by the Hopkins & Allen Arms Co., Norwich, Conn., to represent them in the Southern territory. As the "Hopkins & Allen" line for 1904 will be strictly up-to-date, they anticipate a cordial welcome will be extended to their indefatigable representative, who will be found worthy of every attention.

✤

E. H. Mason, Woodhull, N. Y., whose stock of Hardware was recently damaged by fire which destroyed all his catalogues, requests the favor from Hardware manufacturers of a fresh supply of catalogues in the shape of their latest issue of Hardware and specialties and house-furnishing supplies that would assist in replenishing his stock for 1904. We trust the manufacturers will respond without delay.

✤

The Josey Hardware Co., Scotland Neck, N. C., have in contemplation the building of a new Hardware store that will largely increase their present facilities for transporting their rapidly growing business. They request the catalogues of manufacturers of store fixtures, also shelf ladders, shelf boxes, show cases, nail-bin counters and elevators to be used in the store when completed.

✤

The New Year's Number of "The Arrow" has been received; this is an interesting little publication issued by N. & G. Taylor Co., Philadelphia, the contents of which are devoted to the exploitation of the merits appertaining to "Taylor Old Style." The original design on the cover in which old Father Time is teaching the young (1904) idea how to shoot, exhibits in its illustration an extremely artistic conception worthy of a larger reproduction. The contents of this monthly brochure are always of interest to the tinner, and wise is he who sends his address requesting at least a sample copy of the New Year's Number.

✤

The Vehicle Apron & Hood Co., of Columbus, O., was incorporated Wednesday, Jan. 13th, 1904, for $100,000. They will manufacture and sell Blizzard Storm Fronts, Aprons, Hoods, Horse Covers, etc. The incorporators are: John P. Gordon, J. E. Jones, F. O. Henson, O. A. Charles, E. M. DuBois. The business was started in a small way March 15th, 1900, by John P. Gordon and has been enlarged time and time again until the present capacity is 2,000 aprons daily and the firm is so far behind with orders that new capital has been secured to enlarge the capacity to 10,000 aprons daily as soon as buildings can be erected.

✤

C. I. Markham, who has for the past nine years been sales manager for the Eastern territory for Cleveland Twist Drill Co., resigned the position on January 1, as he desired to take up a line of special work on his own account. From the successful manner in which he handled the interests of his old company, he will undoubtedly achieve distinction in his new field. We wish him every success.

✤

Ira E. Douglass, who for a long time has been the New York manager of the Shelton Company, manufacturers of Tacks, Nails, etc., since January 1 has become the manager of the Tack and Nail Department of Topping Bros., who will carry a complete line of Tacks, ails, Wire Brads, Wire Nails, Rivets and Burs, Glaziers' Points, Escutcheon Pins, etc. Topping Bros. are the New York agents of the Plymouth Mills, Plymouth, Mass, leading manufacturers of this class of goods.

E. B. Brinker, of Neal & Brinker Co., manufacturers' agents and dealers in Hardware, 18 Warren St., New York, sailed for Europe on the liner *St. Louis*, January 9th, intending to make a combined business and pleasure trip which will not only include Great Britain, but as many leading cities on the continent as can be visited during an absence of six weeks.

✤

J. H. Van Newkirk, formerly manager of the Philadelphia branch of the Russell & Erwin Mfg. Company, is now manager of their New York house, succeeding Edward Meyer, second vice-president and manager, who withdrew January 1, to organize the Meyer & Cherry Company, 26 West Twenty-sixth Street, New York, now the New York representatives of the Chicago Hardware Company.

THE ATLANTA CONVENTIONS.

The annual convention of the Southern Hardware Jobbers' Association will be held in Atlanta, Ga., May 24-27 next. The semi-annual meeting of the American Hardware Manufacturers' Association will be held at the same time and place. The headquarters of the jobbers will be at the Kimball House, the manufacturers assembling at the Piedmont Hotel.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The annual meeting of the New England Hardware Dealers' Association will be held at the United States Hotel, Boston, on February 10. As usual a dinner will be associated with the business meeting. William D. Parlin, Natick, Mass., (chairman), Sewall D. Balkam, Jamaica Plain, and George J. Mulhall, Boston, constitute the nominating committee.

"TRADE PRESS LIST."

One of the most valuable papers for professional reference is the *Trade Press List*, edited and published monthly in Boston. It contains a selection of reliable lists of class journals, trade directories and newspaper directories of the United States, Canada and Europe. Its reading matter, in brief pithy style, is crowded with unique information, and the publication possesses a practical value which reflects credit on its editor and publisher, Robert M. Floyd.

TENTH ANNUAL SPORTSMEN'S SHOW.

The tenth annual sportsmen's show, to be held in the Madison Square Garden, New York, during the two weeks from Friday, February 19, to March 5, inclusive, will include a lake on the Fourth Avenue end of the building 70 x 190 feet, designed principally for practical demonstrations of high power automobile launches, varying in length from 25 to 35 feet, it being the intention to make the marine feature of the show a specially strong one. The entire lake frontage has been given up to Marine Exhibits in the way of Marine Engines, Power Launches, etc. Thus far space has been assigned to the following representative concerns in this line: Western Gas Engine Company, Mishawaka, Ind.; J. W. Newbury, New York; Pierce Engine Company, Racine, Wis.; C. H. Blomstrom Motor Company, Detroit, Mich.; Lozier Motor Company, Plattsburg, N. Y., and New York City; Panhard & Levassor, Smith & Mabley, Hollander & Tangeman, Gas Engine & Power Company, Charles L. Seabury & Co., Wm. H. Brodie Company and Fairbanks Company, New York City; Electric Launch Company, Bayonne City, N. J.; Eagle Bicycle Mfg. Company, Torrington, Conn.; United States Long Distance Auto Company, Jersey City, N. J.; Lackawanna Motor Company, Detroit, Mich.; Chas. A. Strelinger Company, Detroit, Mich.; Buffalo Gasolene Motor Company, Buffalo, N. Y., and Reeves & White, Port Richmond, N. Y.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

Reports from salesmen already on the road indicate that the stocks of both jobbers and retailers are correspondingly light, but few overstocks being heard from, and the winter goods, on account of the recent continued cold weather with but little let up to change the demand, have worked off in good shape lots of seasonable specialties which previous to the holidays looked in the stock as though they were moving too slowly to suit. The dealers in their well assorted specifications to average up stock requirements, are not speculating on any possibilities much beyond a thirty days leeway, the immediate consumption being kept in view as a basis to work on. Orders that are being received, however, are the more easy to fill promptly for this reason, and but few express any fear whatever but what under current conditions the Spring trade will be found to show an active demand for general supplies, with few if any material changes in leading quotations. With collections very comfortably kept in hand, plenty of money seems to be within the range of possibilities, and a general feeling of confidence in the future permeates every section of the country that is extremely gratifying to witness.

The change in the price of Cut Nails was a surprise to the trade on account of the depth of the cut. It may possibly result in a greater number of contracts being made for the future that will have a tendency to increase the output of this leading staple, which at prices higher than Wire Nails were quoted and sold, was slow in moving. The natural fear would have been that Wire Nails would definitely follow suit, and the fear of it would have made a waiting market; but the advance of five cents a keg on the more salable commodity braced the market promptly, and the trade would not be surprised to find advanced quotations on both grades of Nails, those staple articles furnishing a commercial barometer which gauges a buyer's views on the future trend in prices generally, to a greater or less extent.

The dread of a presidential year, and the natural commercial conservatism that used to affect the Hardware trade when supplies were ordered to meet semi-annual demands, has gradually been relegated to the background of anticipated events; the present generation of buyers are not so pessimistic in their views in regard to the effect which political palaver might have upon the current demand.

The wheels of interstate commerce at the present time have to cover too large an area, the country is becoming too big to have such currents of publie opinion affect the ordinary channels of business progression. Crops must be planted if selling prices make a record that seemingly guarantee profitable results. Buildings will continue to be erected for the industrious workmen who can afford to rent them. Public improvements were never so generously provided for to give employment to industrious thousands, and no matter who may, next summer, be nominated for the presidential office, business will be prosecuted as usual, profits will be gathered and distributed, without any abiding fear that the "liberties of the people" are in danger in any event.

OUR EXPORTS FOR 1903 MAKE A RECORD.

The calendar year 1903 and the month of December, 1903, showed, respectively, the highest record of annual and monthly exports from the United States. The year's export figures, as presented by the Department of Commerce and Labor, through its Bureau of Statistics, were $1,484,668,127, and those of the month of December, $174,734,368. The highest preceding record for any calendar year was that of 1900, when the total exports were $1,477,946,113; and the highest preceding record for a single month was that of October, 1900, when the total was $163,389,680.

It was not until October, 1891, that the exports of any month reached as much as 100 million dollars, and it was not until 1896 that the exports of any calendar year reached as much as one billion dollars. During the four months of October, November and December, 1891, and January, 1892, exports were for the first time above the 100 million dollar line, but in February, 1892, dropped again below that line, and so continued until near the close of 1896, when October, November and December again passed, respectively, the 100 million dollar line. From that time forward monthly exports in excess of 100 million dollars were frequent, and from August, 1899, to the present time they have never fallen below 100 millions, except in the mid-Summer months of June, July and August of 1902 and 1903, respectively.

The annual exportation nearly touched the one billion dollar line in 1891 and 1892, being in 1891, 970 millions, and in 1892, 938 millions, but dropped to 876 millions in 1893, 825 millions in 1894, 824 millions in 1895, barely crossing the one billion dollar line in 1896, but moving steadily and rapidly forward since that date. Comparing conditions in 1903 with those of comparatively recent years, it may be said that the total exports in 1903 exceeded those of 1891 by 53 per cent. and those of 1895 by 80 per cent. Extending the study still farther back, it may be said that the exports of 1903 were, in round terms, double those of 1888, two and a half times those of 1873, and four times those of 1869.

Owing to the very marked decrease in imports in Decem-

Digitized by Google

ber, which month showed a fall of about 17 millions, as compared with December of the preceding year, the total of imports did not touch the billion-dollar line as had been expected, but was within about 4½ million dollars of that sum, being $995,473,101. This leaves the table of calendar years without a billion-dollar record up to this time, though the fiscal-year statement did show more than one billion dollars of imports in the year ending June 30, 1903.

A comparison of conditions in the foreign commerce of the United States in 1903 with those of 1893 shows that the imports of 1903 exceeded those of 1893 by 219 millions, and that the exports of 1903 exceeded those of 1893 by 608 millions. Carrying the comparison still further back, it is found that the imports of 1903 exceeded those of 1883 by 308 millions, and that the exports of 1903 exceeded those of 1883 by 689 millions. A comparison with 1873 shows that the imports of 1903 exceed those of 1873 by 400 millions, and the exports of 1903 exceed those of 1873 by 917 millions. Thus imports increased 67 per cent. from 1873 to 1903, while exports increased 161 per cent. during the same time.

The following table shows the total imports and total exports of the United States in 1873, 1883, 1893, and 1903:—

Year.	Imports.	Exports.
1873	$595,248,048	$567,757,867
1883	687,066,216	795,209,316
1893	776,248,924	876,108,781
1903	995,473,101	1,484,668,127

All of the above figures, it should be understood, relate to calendar-year imports and exports, the year ending December 31, and not in any case of the fiscal year ending June 30.

The following table shows the exports during the month of December in 1873, 1883, 1893, and 1903:—

Month of December—	Total exports.
1873	$61,159,130
1883	75,611,413
1893	93,551,729
1903	174,734,368

The following table shows the total exports of the United States in each calendar year from 1890 to 1903:—

Calendar year.	Total exports.
1890	$857,502,548
1891	970,509,646
1892	938,420,660
1893	876,108,781
1894	825,102,248
1895	824,860,136
1896	1,005,837,241
1897	1,099,709,045
1898	1,255,546,266
1899	1,275,467,971
1900	1,477,946,113
1901	1,465,375,860
1902	1,360,685,933
1903	1,484,668,127

WE SINCERELY REGRET!

In the December number of "The Corbin," that artistic and valuable publication which, though devoted principally to advancing the interests of the "P. & F. Corbin" Builders' Hardware, was invariably filled with "good stuff;" we regret to see the following valedictory:—

> It has been decided to discontinue *The Corbin*, temporarily at least, this issue being the last for the present. We are glad to note the appreciative reception it has had from our customers and friends in the trade, and we sincerely thank all for the kindly interest they have taken in the publication. To our readers and contributors is due the measure of success it has had, and we hope that whatever the form of publicity it shall be decided to adopt for our goods in the future, that it will be favored with as cordial a reception as has ever been given to *The Corbin*.

Under the editorship of J. B. Comstock, "The Man in the Corner," it has achieved considerable popularity that was well deserved.

THE CONVERSION OF THE KEY.

Written for HARDWARE).

Note: The lock and key of the remodelled ancient Quaker meeting house of Salem has recently been loaned to the Essex Institute, in Salem, Mass., for its historical collections. The institute also possesses the lock and key of, as well as the whole meeting house, of the first Puritan Church in America.

THE KEY'S INTRUSION.

"Out! Out of here. Such wicked things as thee should have no place among godly people."

"Peace be unto thee" was the meek reply.

The great key of the old First church spoke harshly to the new comer in the Institute collection, the key to the old Quaker meeting house, for the Puritans hated the Quakers as Godless men.

"Away from my sight, sinner and false preacher, lest I call the tything men and have thee soundly thrashed" went on the zealous key of the Puritan Church.

"Verily, I fear not thy threats. It often pleaseth the Lord to chastise those whom He loveth, even through the hands of wicked men," calmly answered the Quaker key. "I preach out the gospel of peace. If thee smiteth me upon one cheeck I turn the other to thy blows."

"Gospel of peace? Falsifier! You but make discord and dissension in our church and state. Surely, I approve of the bold Gov. Endicott, who thrashed your friends with good leather thongs, and even hanged your leaders on Boston common.

"And what hath thee and thine done to give thee rule over the body and soul of men."

"Done! Why, of my service any might be proud," replied the Puritan key. "Feel of my hardness after near three centuries use. Of the finest iron of Norway am I, fashioned by the smiths of old England. Four ounces above a pound is my weight, and my height is ten inches. Yea, I am built of sturdy mould, such as the times needed. Did I not guard the doors of your ancient meeting house many a time against the savage Indians, who would disturb my Puritan friends at devout worship? Did I not many times open that same door for the stirring discussion of questions of public import? And did I not many times hold in durance vile those who too often quaffed at the cup which inebriates, those wretches who cheated the simple in trade, the scolds, the wicked who dared to criticise the good preacher's sermon, and those, like our friends, who conspired against the church and state? Forsooth, did I not guard the witches, those disciples of Satan who vainly tried to hold their evil sway over this fair land?"

"Even so," meekly replied the Quaker key. "Thou indeed may have done thy duty well. 'Tis not for me to judge, for I shall be judged; but harken you. I am of no less strength than thou. From the iron bogs of the Saugus River, near the great town of Boston, was I dug, and in the blazing smith of Joseph Jenks, the famous iron master of Saugus, was I fashioned. I, too, have guarded a sacred meeting house, but I have ever kept open my door to let sinners pass in to repentence.

"But, my brother, I know full well that the days of such giants as thee and me have passed. Men no longer could carry us in the pockets of their doublets, for, verily, there is enough metal in either of us to make a dozen bunches of keys such as men of this 20th century carry. Little dwarf-specimens that we could hide in the intricate windings of our many wards unloc doors to-day to far greater treasures than we could conceive withal. Our day is gone, forever. We have but to lie here for the curio seeker to look upon us, and wonder at our unfamiliar strangeness. Like mortal men, now that the world is done with us, we have no use nor purpose, save as relics of other days."

"Forsooth, I do not know but what you are right," answered the Puritan key. "In my day, I heard Roger Williams preach the doctrine of liberty to worship according to one's conscience. I saw Endicott cut the cross from the British flag. I saw the witches sentenced to death for signing the big book of Satan. But for more than a hundred years now, no man has disturbed me save to poke me over to

Digitized by Google

look at my odd points. Surely, I am no longer of use."

"Then peace be unto thee" said the Quaker key.

"Even so, friend" concluded the Puritan key.

F. A. G.

LEGAL CORRESPONDENCE.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Law Editor "HARDWARE," No. 309 Broadway, New York City.

Books of Jersey Corporation—Where to be Kept.

QUESTION: I am the Secretary of a New Jersey corporation and should like to be informed whether I am required by law to keep the books of the company within the State of New Jersey. My office is in New York and most of the business of the company is transacted there, and it would be very inconvenient if I were obliged to keep the books of the company in the New Jersey office.

REPLY: By a recent amendment of the corporation law of New Jersey the stock book and transfer book of every corporation organized under the laws of New Jersey are required to be kept in the regular office of the company in charge of their agent within the State. In the annual report, it is compulsory upon the officers making it to state under oath that the stock and transfer books of the company have been continually at their office within the State of New Jersey. The penalty for a failure to make the report is a fine of $200. The law imposes a further penalty for this omission, in that it disqualifies all the then directors from holding office for the ensuing year.

Insurance—Surrender of Policy.

QUESTION: Some years ago I took out two small policies on my own life. One policy was for $50 and the other for $100. I have paid my premiums regularly, and now the premiums I have paid in amount to more than the sums for which I am insured. Must I continue to pay premiums on these policies in order to be entitled to the principal sum at my death?

REPLY: Whether or not you must continue to pay premiums on these policies depends upon the kind of policies you hold. If the policy is what is known as an "industrial," in some companies, if you do not continue to pay your premium your policy will lapse, even in a case such as you describe, where you have already paid in premiums a sum exceeding the principal of the policy. If, on the other hand, your policy is what is known as a paid-up policy, or a policy entitling you to the issuance of a paid-up policy at a certain time, when this time arrives you would no longer be obliged to pay premiums. You should write the company in which you are insured and ask them what offer they will make you on your policy. If they will not make you a cash offer for your policy, it is not unlikely that upon the surrender of your present policy the company will issue to you a paid-up policy for an amount probably somewhat less than your present policy. If this is done you would no longer be obliged to pay premiums.

Loss of References—Damages.

QUESTION: About a year ago I took a position with a house as travelling salesman. When I was employed I was informed by head of the firm that it was their custom always to require of their employees that they should deliver their letters of reference to the firm during their employment. I was assured by the head of the firm that they would be perfectly safe and that they would be kept in the firm's safe deposit vault. I therefore delivered all my letters of reference and recommendation, which covered fourteen years of my business life, to the firm for keeping in accordance with their rules. Many of the letters I had recommended me most highly and were from men of prominence, many of whom are now dead, so that it is impossible for me to replace them. I recently decided to leave this firm, but when I wrote to them requesting them to return my papers they wrote me a letter stating that the papers had been lost and they did not know where they were. Kindly inform me through your legal column whether I have any redress.

REPLY: We are of the opinion that you have a cause of action against this firm for damages resulting from the loss of these valuable papers. The deposit of the papers with this firm under their rules and explicit instructions constitute a bailment in which they made themselves responsible to you as bailees at least for ordinary care of the papers so deposited. If, therefore, they failed to exercise due care in keeping these papers they are liable to you in damages. We consider this to be a case where, under all the circumstances, the loss of the papers is in and of itself negligence on the part of this firm, and that you would make out a prima facie case against this firm by proving the delivery of the papers under the circumstances named and by proving their loss. The burden would then be upon the firm to show that they had exercised reasonable care in the keeping of the papers named.

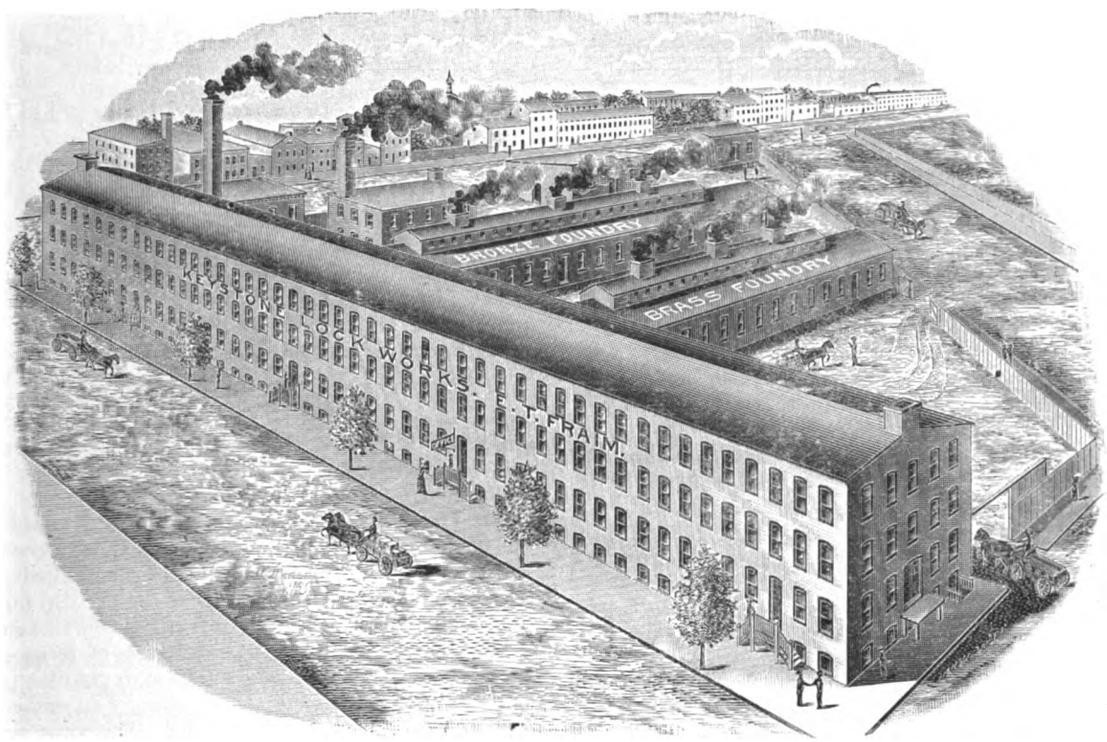
Annual Report of a New York Corporation.

QUESTION: Last year a New York Corporation, of which I am a director, filed its annual report as usual at the proper time. The secretary of the company was away on business at the time, so the president of the corporation alone signed the report and sent it to the Secretary of State for filing. I was in some doubt at that time as to whether a report so signed by the president alone was sufficient, but I was assured that it was all right and so thought no more about the matter. A creditor has since threatened to sue me as director of this company because he says no report was filed. We hold the receipt for the report, so that I know it was filed. Could any individual action be brought against me in a case of this kind?

REPLY: It has been held by the courts of this State that an annual report is not a proper report when signed by the president alone. It has also been held that as such a report is defective the corporation law of this State is not complied with by the filing of a report signed by the president alone, and that if no other proper report is filed the company and its directors are in the position of having failed to file the annual report required by law. We are therefore of the opinion that if your creditor has such a claim against your company, for which, if no report has been filed, he could have brought suit against the directors individually, he would, under the circumstances of this case, have a cause of action against the directors individually.

PERIODICALS FOR BUILDERS.

An important advantage to all seekers for information on a subject is its bibliography consisting of a list of the books which describe and discuss it. The best bibliography for a business man is the meritorious trade journals which cover the field of his business and its auxiliaries. Valuable publications to architects, engineers, builders and dealers in builders' supplies and materials are:—



National Architect and Builder, Washington, D. C.
National Builder, Chicago.
Architects' and Builders' Journal, Baltimore.
Kansas City Architect and Builder, Kansas City.
Record and Guide, New York.
Scientific American (Building Edition), New York.
The Builder, Pittsburgh, Pa.
The Clay Worker, Indianapolis.
Hardware, New York.
Electrical Review, New York.
National Electrical Contractor, Utica, N. Y.
Architectural Record, New York.
Lumber Trade Journal, New York.
Architects' and Builders' Magazine, New York.
Construction News, Chicago.
American Architect and Building News, Boston.
Stone, New York.
Cement and Engineering News, Chicago.
Contract News, New York.
Electrical World and Engineer, New York.
Engineering Record, New York.—*Architects' and Builders' Journal.*

The man who goes about wishing he was never born is not the only man who regrets it.

KEYSTONE LOCK WORKS' NEW CATALOGUE.

The Keystone Lock Works, Lancaster, Pa., of which E. T. Fraim is the proprietor, have recently issued to the trade their most important catalogue (No. 15) since the commencement of their progressive business, which has been of a steady growth, the full importance of which is given evidence of in the illustration we give herewith of their present plant. The catalogue under review is intended to embrace their entire production of Pressed Steel, Wrought, Cast and Malleable Iron, Steel, Bronze, Brass, Nickel and Aluminum Padlocks and Night Latches. In presenting this new catalogue to the trade, it is stated, the volume contains goods only of the production of this factory; most of which are of original designs and construction, and in such great variety as to justify the claim of being the leading Padlock factory in the business. The numerous additions to their line during the few years past includes padlocks for every known purpose, as will be judged by a glance at the contents of this new catalogue. The volume embraces in its contents a number of new patterns and designs calculated to become popular with the trade, and bring to the retailer a commendable profit. Among these new goods may be mentioned the "Canine" line on page 45; the 3 lever "Keystone" and "Defender" locks on page 52; the armored steel "Fraim" locks on page 71 with bronze inside work, seamless armored steel shell and solid steel shackle. A new high grade pin-tumbler night latch is illustrated on page 111, which is claimed to have no rival on the market. The catalogue is one that should be called for by the dealer, so many new and novel additions to the usual padlock assortment are illustrated in its contents.

KEYSTONE LOCK WORKS, LANCASTER, PA.

THE PENNSYLVANIA RETAIL HARDWARE DEALERS' ASSOCIATION.

The following letter has recently been sent to the Retail Hardware Dealers of Pennsylvania by the energetic secretary of the Association, and the convincing matter contained therein should assist materially in bringing together, in the close community of interests afforded by the State Association of retailers, every progressive Hardware dealer in the State:—

A CHANCE TO COMBINE BUSINESS, PROFIT AND PLEASURE.

DEAR SIR:—The third annual meeting of the Pennsylvania Retail Hardware Dealers' Association will be held at the Park Hotel, Williamsport, Pa., Feb. 16th and 17th, 1904. The Association is growing in membership rapidly, having added about 50 names during 1903. Permit us to cite a few reasons why Hardware merchants should be affiliated with it. The Pennsylvania Association should be at the head of the column in the movement. Other and younger States of the Union have organized several years before we have, consequently have large and strong organizations. We have every reason to believe that the meeting will be well attended, and an enthusiastic success. Can you afford to miss it? We need all the good members we can get.

The great majority of the manufacturers and jobbers of Hardware recognize the retail Hardware dealer as the legitimate channel through which to reach the consumer, and are loyal to them. A few, however, do not seem to use methods satisfactory to all retail dealers. Organization will better these conditions. You need the Association possibly more than you know. The catalogue and mail order house competition is a new born pest, and would never have been born but for the apathy and want of organization among the retail Hardware dealers of the United States. If there was no other reason for all live dealers to belong to the organization, this reason alone should suffice, for at the next session of Congress an effort will again be made to pass a Parcel Post Bill, which would put many, very many, merchants out of business. The bill is drafted, the Lobby at Washington are planning to influence legislation. Are Trading Stamps a pest to you? Organization will teach you how to get rid of them. Mutual Fire Insurance will save you money. In fact, you will realize more benefit, more actual profit, more *bona fide* dividends out of a day or two spent among your fellow toilers in the Hardware trade, than you can possibly realize to stay at home.

You cannot afford to miss this meeting, the times and conditions demand your attention, to a matter that concerns every retail Hardware dealer in the State.

We trust you have so arranged your affairs to be with us at Williamsport, Feb. 16th and 17th, 1904.

Yours very truly,

J. E. DIGBY, Secretary,

HARDWARE MERCHANTS' AND MANUFACTURERS' ASSOCIATION.

The annual dinner of the Hardware Merchants' and Manufacturers' Association, of Philadelphia, will take place at the Hotel Bellevue, on January 26th. From the complete arrangements that have been made, it is expected the coming banquet will prove one of the most entertaining in the history of this extremely influential association.

The Distinction.

"I don't see what right you have to turn up your antennae at me," said the clam. "I am as good as you are."

"I deny it," said the lobster. "Anybody can be a clam, but in order to be a lobster one has to be born a lobster."—*Chicago Tribune.*

CONVENTION OF SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

The following letter was recently forwarded to the members of the Southern Hardware Jobbers' Association announcing a change of date for holding their convention, placing it in the week following the date originally named, owing to the fact that the annual convention of the "National Association of Manufacturers" would be held in Pittsburgh on the dates originally selected by the Southern Jobbers, which would have prevented many of the manufacturers from attending at the convention of jobbers, who have always made it a point to be present and participate in the proceedings.

To the Members of the Southern Hardware Jobbers' Association.

GENTLEMEN:—We wish to announce that the dates of the fourteenth annual convention of the Southern Hardware Jobbers' Association—which will be held in Atlanta, Ga.—are May 24 to 27, 1904. We ask that you fix these dates upon your memory and so shape the affairs of your company that one or more of your representatives will be on hand at the convention—which we wish to assure you, even this far in advance—will be one long to be remembered, both from a business and social standpoint. Inasmuch as the meeting point is in our own territory and at a very central point, there is no reason why we should not have a representative from each member of the Association and your officers are going to leave no stone unturned in their efforts to secure this result. The American Hardware Manufacturers' Association have given us assurance that they would be well represented and are pleased that the convention is going to be held in May. The traveling men are especially invited to meet with us and we ask you to extend them this invitation.

Official headquarters of our Association during the convention will be at the Kimball House, while the Piedmont Hotel will be the official headquarters of the Manufacturers' Association. Arrangements have also been made with the Hotel Aragon as well as with the Hotel Marion. We attach herewith rate card of the various hotels. Reservations will be made in the order in which they are received and you can stop at any of the hotels you choose. We would suggest that you write and engage your room at once, in order that you may be nicely located during your stay in Atlanta.

Again impressing upon you the fact that you must make arrangements to be represented at the convention, and with kindest regards, we beg to remain,

Yours very truly,

SOUTHERN HARDWARE JOBBERS' ASSOCIATION.

MAKING HEAVY SHIPMENTS.

The Syracuse Chilled Plow Company began making heavy shipments of spring goods during the past fortnight, and it is now necessary to operate some of the factory departments six days a week. Large orders, both foreign and domestic, have been booked and the company looks forward to a volume of business equal to last year.

AN OCCASION OF SOLID ENJOYMENT.

The Stowell Mfg. & Foundry Co., South Milwaukee, Wis., gave an exceedingly congenial dinner to their officers and salesmen on January 5th. Among those present were Charles E. Sammond, Robert Moscrip, Thomas W. Ferguson and A. J. Ricker. The salesmen were R. T. Brady, Chicago representative; J. J. Dalton, of St. Paul, representative for Minnesota, Iowa, Nebraska and the Dakotas; W. S. Deighton, of Kansas City, representative for Missouri, Kansas, Texas and Oklahoma; W. L. Bigelow, of Detroit, representative for Michigan, Indiana, Ohio and Southern Canada; M. J. Evans, of Milwaukee, representative of Wisconsin and Illinois, and J. M. Boyd, of Fond du lac, inventor and manager of the Hay Tool Department. The St. Louis, San Francisco, Denver, Los Angeles and Portland representatives were unable to attend, but it is hoped that they will be able to do so next year, as it proved such a profitable and pleasant reunion that the company has decided to make it an annual affair.

BISSELL CARPET SWEEPER COMPANY'S ANNUAL BANQUET.

As has been their custom for many years past, the Bissell Carpet Sweeper Company gave their annual blow-out to their officers and traveling salesmen at the Lakeside Club house, Grand Rapids, Mich., on the evening of January 4th. Robert E. Shanahan, the general manager of the company, presided, and after the banquet had been served the evening was spent in story-telling and other pleasantries. A very handsome souvenir commemorative of the occasion was placed at the plate of each guest. The Bissell Company closed in 1903 the best year in the history of their business, and have mapped out their plans for their campaign for the coming year in a very formidable way. They are just bringing out their first announcement to their customers, which is very interesting reading. Many new features will be presented this year by the Bissell Company, which will be of interest to their customers, and the company assure us that they feel very optimistic over the outlook for 1904.

THE WHITON HARDWARE CO.

The Whiton Hardware Co., Seattle, Wash., tendered a banquet to its employes on January 1 at Hotel Washington. The following persons were in attendance; C. W. J. Reckers, John F. Welborn, John Reckers, Fred Martine, C. F. McNealy, Frank B. Collins, Lloyd Martine, Guy Dickie, Louis Cragin, Tracy James, William McPhee, L. J. Cruttenden, Arthur Sherrick and Chester Klieves.

THE SEAVEY HARDWARE CO.

The Seavey Hardware Company, of Fort Wayne, Ind., played the role of host at the Randall Hotel, on January 2, when an elegant dinner was served, at which the employes of the company and the contractors of the city were the guests. Those who gathered about the festal board numbered thirty. This is the second annual banquet given by the Seavey Company to its employes. The pleasant dining room at the Randall never looked prettier than it did on this occasion. The lights were shaded with clusters of red paper and the table was laden with a profusion of ferns. Candles lighted up the whole and gave an exceedingly pleasing effect. Music was rendered during the evening by an orchestra. The menu cards were on the unique order. The cover conveyed a New Year greeting and the menu itself was in the parlance of the Hardware trade. From the "blue paint" oysters to "Seavey's Manila rope" smokers, the card teemed with wit best appreciated by men familiar with the line. As a bit of business suggestion the following line followed the celery: "Nothing to do with salary except that they are both raised by hot air." Walter Seavey acted as master of ceremonies and toasts were responded to by J. O. Brown, J. M. Heary, Henry Hilgemann, Ed Jump, William Geake, Albert E. Carroll, P. A. Randall and others.

FARWELL, OZMUN & KIRK CO.

Farwell, Ozmun & Kirk Co., wholesale dealers in Hardware, gave the seventh annual dinner to its heads of departments and traveling salesmen recently at the Commercial Club. The event afforded opportunity for mutual congratulation upon the achievements of the past and prospects for the year to come, and was heartily enjoyed by all who were of the number. H. A. Kirk, president of the company, is one of the oldest Hardwaremen in the city, and for many years has been prominent in the advancement of the commercial interests of St. Paul and its civic improvement. The house of Farwell, Ozmun & Kirk Co. is one of the foremost jobbing institutions in the Northwest, and is an important factor in the business life of the city.

PACIFIC HARDWARE & STEEL CO.

The representatives of the Pacific Hardware & Steel Co., of San Francisco, Cal., held their twelfth annual banquet recently. Assembled around the tables were 120 employes of the concern, including agents from all over the coast. Louis Walsh, the wit of the organization, presided as toastmaster and contributed much toward the merriment of the occasion.

It is always considered unlucky to get married on Friday—and quite frequently on any other day.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED JAN. 4, 1903.

355,299. SHEARS, F. Celce, Holyoke, Mass.
355,323. LIFTING JACK, F. Jordon, Mobile, Ala.
355,332. CLOTHES LINE FASTENER, F. Meckel, Brooklyn, N. Y.
355,333. TRUNK OR BOX FASTENER, F. W. Mix, New Britain, Conn.
355,373. CUTTING NIPPERS, C. F. Bowman, New Haven, Conn.
355,392. SCREW DRIVER, N. Fellers, McComb, Ohio.
355,444. WRENCH, C. Farner, Milwaukee, Wis.

PATENTS ISSUED JAN. 5, 1903.

748,641. AWNING ROLLER, C. E. Newell, Saginaw, Mich.
748,664. CARPET SWEEPER, T. J. Sheets and Z. T. Sheets, Columbus, Ohio.
748,665. FOOD CUTTER, C. J. Whirreff, Brockville, Can.
748,719. TOWEL RACK, P. H. Germain, Worcester, Mass.
748,864. FINGER NAIL CLIPPER, H. C. Hart, Unionville, Conn.
748,879. SCREW DRIVER, G. E. B. Parkin, Toronto, Can.

PATENTS EXPIRED JAN. 11, 1903.

355,680. LATCH, W. B. Cantrell, Portland, Ore.
355,835. SASH HOLDER, G. H. Noble, Lowell, Mass.
355,866. LIFTING JACK, M. G. Crane, Newton, Mass.

PATENTS ISSUED JAN. 12, 1904.

749,167. WRENCH, W. E. Carter, Baker City, Ore.
749,230. POCKET KNIFE, E. A. Seferance, Antrim, N. H.
749,233. VISE, E. Shupe, Racine, Wis.
749,363. SAD IRON HOLDER, J. H. Cox, Erie, Kans.
749,469. SASH FASTENER, A. Assorati, New York, N. Y.
749,525. IRONING BOARD, L. I. Buehl, Massillon, Ohio.
749,548. CAN OPENER, C. A. Ford, Madison, Ind.

THE CORBIN CABINET LOCK CO.'S NEW CATALOGUES.

The Corbin Cabinet Lock Co., manufacturers of Cabinet and Trunk Hardware, New Britain, Conn., and 11-15 Murray Street, New York, have just issued for the business of 1904, four new catalogues covering their several important divisions of their extensive production. One, of about 150 pages, embraces in its contents the entire line of Trunk and Suit Case Locks and Trimmings, taking in valise and bag locks, hat box and buckle locks; all of which are handsomely illustrated and with list prices attached. Another composed of 67 pages, covers the unique assortment of high grade Padlocks with which the name of "Corbin" is associated, embracing a number of original and meritorious styles and designs that are leaders in that line. A catalogue of 97 pages is devoted to the miscellaneous Hardware made by the company, which includes in its contents such goods as Plain Bronze Metal Knobs and Escutcheons, and a large assortment of plain and ornamental Cabinet Hardware, such as escutcheons, box corners, hinges, hinge hasps, brass name plates, card holders and pulls, box and draw pulls and lock strikes. Included in the contents will be found heavy chest fittings, brass sliding door sheaves and rail, coin boxes, office building and apartment house letter boxes, mail boxes, etc. The fourth catalogue of 180 pages is entirely devoted to Keys and Key Blanks of what is considered as one of the most extensive assortments within reach of the Hardware dealer; even including quite a line of brass key checks and split key rings. It is the intention of the company to add to the catalogues above referred to one which will include their complete line of Cabinet Locks, then the five catalogues will be bound together to meet the approval of those in the trade handling the combined assortment. The divisional catalogues being kept ready to distribute to parties interested only in one particular line to which the special catalogue is devoted. In the class of goods shown and illustrated in the catalogues we are here referring to, few as important, or as well printed and illustrated, are within reach of the Hardwareman who will extend a glad welcome to this addition to his library. They reflect much credit on the catalogue department of the company.

CANADIAN TRADE NOTES IN HAMILTON, TORONTO AND KINGSTON.

(From our Traveling Correspondent).

During the past few years there has been a great development and expansion in the Hardware trade of the United States. It has often been noted in these columns. The progress made by the Canadian dealers has been no less rapid. The Canada Hardwareman has been quick to grasp the opportunity of enlarging his business by taking up new lines of goods—and increasing his trade by carrying larger stock.

One of the most progressive concerns in the Dominion is Wood, Vallance & Co., of Hamilton. The business of this firm has been constantly pushed westward, until its salesmen were known from the Great Lakes to the Pacific Coast. Then as the Western country became more fully developed, and more thickly settled the firm opened a branch in Winnipeg under the name of Geo. D. Wood & Co., and from that point have built up a large trade. Moving on West as though following the Star of Empire, another branch was opened at Vancouver, B. C., known as Wood, Vallance & Leggat, Ltd. Here, too, a large stock is carried and an extensive business is done. The firm are known as leaders in many lines, and carry as large a stock of cutlery and guns as any house in Canada, being agents for some of the best known English makers. The Gun and Sporting Goods departments are looked after by Frank Vallance, who is recognized as one of the best-posted gun men in Canada.

Another Hamilton, Ont., Hardware firm is the F. Hamilton Co., who are large retailers and have one of the most attractive retail stores in the city. Mr. Hamilton said that business was very good, that the demand for high grade goods was constantly growing, and that there was no reason but that 1904 would be a good year for the Canadian Hardwaremen.

One of Toronto's exclusively wholesale concerns is H. S. Howland Sons & Co., whose warehouse and offices are at 35-39 Front Street. A general line of Hardware is carried, and a steady business is done in builders' and contractors' supplies.

Rice, Lewis & Co. are extensive retailers, having the largest retail Hardware store in Toronto, and make a specialty of high-grade goods. This firm also do considerable wholesale trade, having a number of travelers on the road.

Another wholesale Hardware firm of Toronto is Aikenhead Hardware Co., with offices and warehouse on Adelaide Street. The Vokes Hardware Co. do considerable wholesale business and have a very attractive store at 111 Yonge Street.

A well arranged and up-to-date store is that of Thomas Meredith & Co., located at 156 King Street. Being in the heart of the best retail district of Toronto, Meredith & Co. enjoy a large "pick up" trade and they reported business good.

Another of Toronto's progressive retailers is A. F. Beven, 502 E. Queen Street.

Wm. H. Lake has for many years successfully carried on the Hardware business at 608 Queen Street, and has recently added some new lines, which have added much to the attractiveness of his store. Most of the Hardware retailers are making an effort to secure some of the trade in skates and other sporting supplies used in the Winter sports. The business in these lines seems to be growing rapidly in Canada and each year skating, snow-shoeing and all out-door sports become more and more popular and have a greater number of enthusiastic followers.

Another line that is often found in the Canadian Hardware store is gloves and mittens—especially the heavier kinds used by teamsters and workmen generally. In speaking of gloves and mittens as a side line for the Hardware store, A. Strachan, of Kingston, Ont., said: "These goods show a fair profit. The Winters are severe here and almost every man needs one or two pair of mittens through the Winter. The Hardware is a 'man's' store and therefore this line can be handled well by the Hardwareman."

A splendid new store and warehouse has recently been built by E. Chown & Son, of Kingston. The building being erected for a jobbing Hardware business and is a model for convenience; every feature for the rapid getting out of orders and packing and shipping has been introduced. An

Digitized by Google

electric elevator connects all floors; the offices are on the street floor and shipping room in the rear, while the upper floors are used for stock rooms. Mr. Chown said: "Although we have been in the midst of building and have been bothered in keeping stock in shape, our business in 1903 was ahead of that of 1902 and the outlook is exceedingly good."

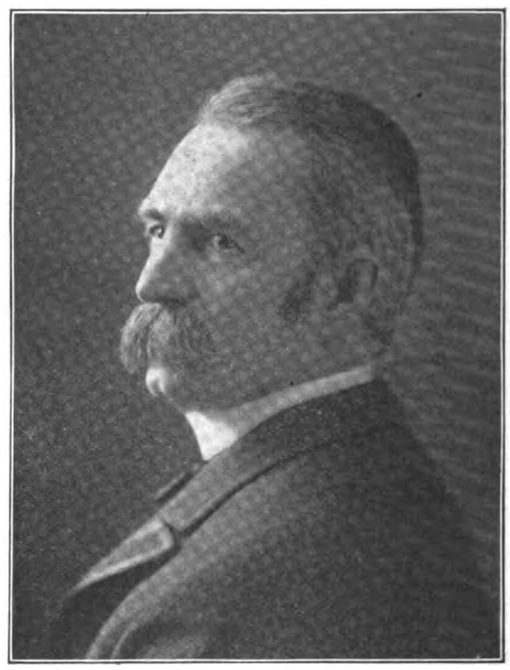
Dalton & Strange, of Kingston, also carry on an extensive jobbing business in connection with their retail trade. This firm make a specialty of light Hardware and such goods as are used by the country trade. Dalton & Strange reported business in good condition and had no complaint to make of the outlook for Spring trade.

Another Kingston firm doing considerable wholesale business is A. Chown & Co., whose business is largely in Carriage Hardware. A large line of horse blankets is carried, and business in these goods was reported very satisfactory. One of Kingston's exclusively retail Hardware stores is that of John Corbett; a good line of general Hardware is carried, and in addition a large assortment of men's mittens.

A large amount of American-made Hardware is seen in all the Canadian stocks, and the same reasons that have given the manufacturers of the United States preference in this market, could give Americans the trade in other parts of the world. In the first place, American-made Hardware, especially in shelf goods, are attractive and nobby in style. The Americans invariably make styles and patterns that the Canadian likes. They have worked the trade in an intelligent manner and followed up inquiries with personal representatives. Shipments have, as a rule, been more prompt from the United States than from England. The Canadian dealer in the past has for these reasons favored American goods, and the attractive way in which American goods are boxed and labeled has in no small measure helped to make them popular.

HAMMERNAIL.

NEW YORK CREDIT MEN'S ASSOCIATION.



The New York Credit Men's Association, 320 Broadway, are distributing to their members the following letter, with the view of concentrating every effort to the furtherance of making their ninth annual convention something they may feel proud of. The influence for good which has been exerted by the Association since its organization has been felt in every branch of trade connected with American commerce, and its growing importance is recognized and sustained by the leading houses in all the principal cities of the country.

NEW YORK, January 15th, 1904.

DEAR SIRS:—As the Ninth Annual Convention of the National Association of Credit Men will be held in this city in June next, we again wish to call attention to the work the Association has done during the few years of its existence. The influence of the organization has been strongly demonstrated in the work accomplished in connection with the Federal Bankruptcy Law and amendments thereto and the adoption in various States of the Bulk Sales Law. It has prosecuted fraudulent failures; it has practically put an end to fake mercantile and collection agencies; it has induced merchants to take faithful inventories at regular intervals and to furnish detailed statements, and it has largely increased the efficiency of the credit man generally, by widening his circle of acquaintanceship among his fellow credit men and by furnishing him with literature in the shape of essays and copies of addresses directly bearing upon his work. The convention to be held in this city next June will, it is anticipated, be the largest gathering of Credit Men in the history of the Association. A great many prominent merchants engaged in different lines of business throughout the United States have signified their intention to attend, and it is certain that a large number of questions pertinent to general business and to credit department work will receive attention. The work of the Convention Committee has progressed very satisfactorily, and it now devolves upon each member of the Association to use every endeavor to inspire an interest in the forthcoming convention that will insure at an early date an individual co-operation in all respects.

F. E. MYERS & BROS.' TWENTY-FIFTH ANNIVERSARY.

January 1st, 1879, twenty-five years ago, F. E. Myers and P. A. Myers formed their present partnership, and it was then that the firm of F. E. Myers & Bro., first became a factor in the commercial world. Previous to this time, P. A. Myers had been employed by his brother in the capacity of salesman in his large agricultural implement business. On this self same day, the junior member of the firm took another most important step and formed a life partnership with Miss Samantha Chase. The commercial partnership has met the fondest expectations of its originators. The life partnership formed at the same time has been no less happy and fortunate. January 1st, 1904, was, therefore, the twenty-fifth wedding anniversary of Mr. and Mrs. Myers. Over 1,000 invitations were issued to their many friends to attend a reception in the afternoon and evening of New Year's

F. E. MYERS.

Day. Their beautiful and spacious home was decorated in a manner which made it seem to those present that the genii of Aladdin had transformed it into a veritable fairy land. A profusion of cut flowers, the rarest products of the florist, filled the air with a rich perfume in pleasing contrast with the reign of stern winter without. A Cleveland orchestra discoursed the choicest musical selections during the day. An elaborate lunch was served by a professional caterer. The reception was pronounced the most notable society function of an unusually brilliant season. In this connection, it is quite fitting that some reference be made to the commercial union of these two brothers. When making their annual inventory, a necessity in every well regulated business, they came across a tiny daybook and ledger, which held the accounts of this venture of twenty-five years ago upon the stormy sea of commercial life. To-day, it requires five 1,000 page ledgers to contain the 20,000 odd accounts of the firm. All the civilized lands of the globe contribute names to their pages. Nearly 500 men are constantly employed by them in the various departments of their splendidly organized and equipped plant. The word "Myers" has always been synonymous with excellence of construction. These brothers have been admirably adapted for the development of their business. The one has ably supplemented the other in his special department. They have always worked together harmoniously and to this happy combination of talent and energy is due their marked success and well earned position in the commercial and manufacturing world. F. E. Myers was interested in the early inception of the National Association of Agricultural Implement & Vehicle Manufacturers. He has given this organization, which has been of so much benefit to manufacturers in these lines, his earnest and enthusiastic support. Two years he was at the head of the Freight Committee, another of the Executive Committee, and now is the President of the Association. P. A. Myers for a number of years has been the Chairman of the important Committee on Patents.

RECENT TRADE PUBLICATIONS.

THE WOOD SHOVEL & TOOL CO., Piqua, Ohio, are the authors of an exceedingly fine envelope size Price List of 24 pages, having an attractive cover of army blue, the booklet itself being well printed on bond paper, evidently intended for service as well as beauty. It is an exploitation of their plain and hollow back shovels, spades, scoops and drain tools. The opening page of the book contains a complete index, making a ready reference possible. The prices are arranged in a very systematic manner, making it a pleasure to use the booklet. It is a work that reflects credit upon the firm issuing it.

YALE & TOWNE MFG. CO., 9-13 Murray Street, have recently issued an interesting booklet folder under the title of "Three Labor Savers" being the latest addition to the series of chain block printed matter which they have published during the past year. This is regarded as an improvement over the previous booklet "Triplex Hoisting Hints" inasmuch as it contains more detailed information required by users of hoisting and conveying machinery. In this day of close competition the problem of transferring material economically is of vital importance, especially to the smaller plants which must necessarily compete with large power equipments. The Triplex block to the exploiting of which this booklet is designed is believed to have solved the problem for the small manufacturer in view of the fact that it requires no initial expense for power or transmission, and is always available when wanted, while at the same time is costing nothing when not hoisting. Those of our readers interested in the subject should write for this interesting literature, which will be forwarded on request.

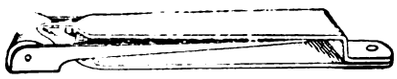
THE IRVINGTON MANUFACTURING COMPANY, Irvington, N. J., for whom J. H. Graham & Co., 113 Chambers Street, New York, are selling agents, have recently issued their 1904 catalogue covering their lines of drop forged goods, such as Lineman's Side Cutting Plyers, Mechanics' Combination Plyers of new and convenient shapes and styles, Farmers' and Machinists' Universal Plyers and a number of unique styles of plyers for the use of telephone and switchboard builders, plumbers and machinists, and also for general household use. They make an assortment of splicing clamps, embracing all the possible varieties demanded by the consumers. They make also Combination Wire and Sleeve Clamps that are warranted and may be relied upon. Dealers handling forged steel goods should send for this catalogue.

W. L. BARRETT, Bristol, Conn., has recently sent to us one of their catalogues and price lists of glass cutters which are products of their manufacture. They illustrate and describe ten different styles of glass cutters. Their No. 4 they describe as being a combination glass cutter, putty knife and point driver making a complete glazier's outfit. The No. 6 is a circle sweep for cutting circles, rounding lights, etc., made in two sizes, 20 and 40 inches. The metal parts are nickel plated throughout, and bottom of disc, rubber covered. No. 7 is a glass tube cutter which is very handy for engineers, steam-fitters, or any one wishing to cut glass tubes. They are nickel plated and packed one in a paper shell with full directions for using. For further information, write manufacturer as above for catalogue.

THE PORTER SCREEN MANUFACTURING CO., Burlington, Vt., have recently issued their 1904 catalogue which is a very unique and attractive one, exploiting their high grade screen doors and adjustable window screens. The catalogue is arranged systematically and is finely illustrated and printed on excellent paper, having between each page an oiled sheet bearing a suggestion regarding the selection or purchase of adjustable screen doors and windows. All doors are made of pine and are packed one half-dozen in a crate, unless otherwise specified in their catalogue. Window screens are packed one dozen in a crate with the exception of their Klondike and Fairview, which are packed two dozen in a crate. The average weight of doors is 200 lbs. per doz., average weight of windows 40 lbs. per dozen. They do not make any of their doors in special sizes, except their No. 70 and common doors.

ENERGY ELEVATOR COMPANY, No. 411 Cherry Street, Philadelphia, Pa., are placing in the hands of their patrons a catalogue of very attractive appearance exploiting their hand elevators and dumb waiters, of which they make a specialty, including all attachments and appliances for same, consequently, by confining themselves to the manufacture of this line exclusively, and having had many years experience in the construction of this class of machinery, they claim they are enabled to produce the best for the very lowest price. Included in the contents, fully illustrated and described, are side post and back guide hand elevators, carriage or warehouse elevators, ornamental brass tube dumb waiters, etc. Their hand elevators are simple in design and thorough in construction. The shafts are of turned steel revolving on roller bearings and in boxes accurately and smoothly bored; the pinions are shrouded, the gears strong and well proportioned, and all wheels are fastened to shafts by keys. The machinery is bolted to rails supported by posts. They claim to have the most secure and reliable brake on the market, which consists of a friction band operating on the outside diameter of the large rope wheel, thereby securing the greatest friction surface in the place where it is the most effective, giving a powerful brake amply sufficient to hold the full load at any point, operated by a check-line which holds the platform stationary by a downward movement of the operator, or an upward movement to start the platform. For further information regarding their several styles, write the manufacturers as above.

THE NICKEL PLATE STOVE POLISH CO., 459-461 Illinois Street, Chicago, Ill., are sending out a neatly arranged envelope size catalogue and price list exploiting their stove polish, stove putty, asbestos cement, roofing cement, metal polish, aluminum enamel and iron enamel. The manufacturers state that in the manufacture of their goods they use only the best materials, endeavoring to see how good they can make them. They guarantee their products to be as good as they represent them. The brands they manufacture are as follows:—Black Jack, Black Eagle and Black Kid stove polish; Peerless iron enamel, Peerless aluminum enamel and Wizard metal polish; Russian asbestos cement, Russian stove putty and Russian roofing cement.



J. M. MAST MANUFACTURING CO., Lititz, Pa., have issued an extremely neat envelope size catalogue exploiting their rat traps, patent buckle tip floats, slaw cutters, shavers for shaving chocolate, potatoes, apples, etc., and corn graters. They have made animal traps for ten years and their annually increasing sales have twice compelled them to double the size of their factory. Their patent floats, they claim, are made of a material tougher, lighter and more buoyant than cork, the patented loop-tips make them readily attachable to the line and easily adjusted to the proper depth. They offer in their "Combine" cutter two efficient utensils in one, and costing little more than the price of a good slaw cutter without the corn grating attachment. The No. 2 slaw cutter, the company state, is "the kind our grandmothers used." Those were hand forged and tempered to retain a keen cutting edge. This knife is made from the best steel and tempered just like those. The name and address of the J. M. Mast Mfg. Co. is stamped into the wood on this cutter and they guarantee them to be just as represented. Their "Little Shaver" shaves chocolate so thin that it dissolves without stirring. The knife is of fine tempered steel and carries a keen cutting edge. Their "Favorite" corn grater is made of good hardwood and fine steel. To operate you pass the corn forward over the teeth, which will puncture the grain and the smooth edge will scrape out all the nutritious elements and leave the shell of the grain on the cob.

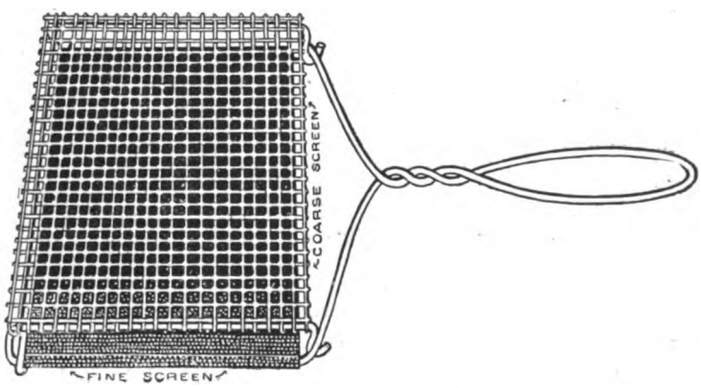
NEW GOODS AND SPECIALTIES.

THE KLIP-KLIP.

The Klip-Klip Co., Rochester, N. Y., are the manufacturers of the "Klip-Klip" which is a salable little specialty that has met with great success throughout the Hardware trade. We give herewith an illustration of it, which is shown in the exact size of the article. It is a unique article for the toilet being a practical combination of a knife and a file all set

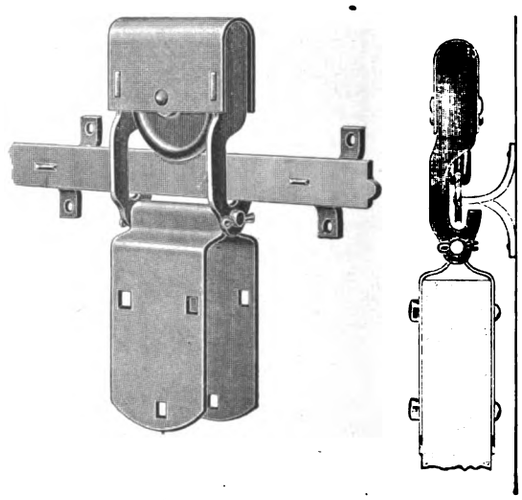


EXACT SIZE WHEN CLOSED.

in one instrument, the dimensions of which are 1½ inches long and ¼ inch thick. It very cleverly clips around the corners of irregular shaped nails, shapes them and files them, and in its action prevents them from being cut too short or from cutting the flesh. The cutting blade is made from fine cutlery steel, the remainder of the article being manufactured from solid German silver. As it is designed to be marketed at a moderate price, it has won its way and is regarded as a popular novelty.

THE SCIENTIFIC TOASTER.

The Onondaga Manufacturing Company, 120 South State Street, Syracuse, N. Y., are placing upon the market what they claim is the most scientific toaster now before the trade. This toaster, it is stated, is the result of many experiments in endeavoring to obtain a toaster which under all conditions could be relied upon to obtain the quickest and best results.



THE SCIENTIFIC TOASTER.

The method of construction secures this, two degrees of fineness being used in the steel wire screens by the aid of which its success depends. The coarser mesh is for coal stoves, while the finer mesh is more appropriate for the gas or oil stoves, so that by simply turning it over, it may be made to conform to either. They are well made and designed to sell at a moderate price. Further information may be obtained by addressing the manufacturer as above.

LANE'S HINGED DOOR HANGER.

Lane Bros. Co., of Poughkeepsie, are placing before the trade a new Barn Door Hanger for 1904, for which a number of marked advantages are claimed over similar devices now on the market. The hanger is of the hinge joint "tied on the rail" variety, and permits some side flexibility at the top of the door, which will compensate for slight warping or binding of the latter. It has a detachable door piece which has proven a great convenience in the case of hangers having a guard back of the rail. By reference to the illustration it will be noted that the wheel is not only covered as that term is ordinarily understood, but protected at the ends as well. The hanger frame is made entirely of steel and is exceptionally strong as the supporting strains are nearly direct tension. In suspending the load it is carried but a very short distance from the center around the rail as will be noted particularly by the end view, and as the metal is wide in section there is but very little tendency to straighten out at this point, while the hinged pin itself on which the clevis is supported passes through holes in the lower part of the main frame. The clevis is very wide permitting three bolt holes, that are not in line, and is supported the whole width on the hinge pin; but it is not prevented from rising independently of the latter as far as the underside of the track, therefore jamming a door so that one edge jumping up cannot possibly strain the hanger.

LANE'S HINGED DOOR HANGER.

With this hanger the bottom of the door is not only free to swing outwardly on the pivot, but may be raised to a horizontal position or even higher if it is desired to use the door as an awning. The wheels are fitted with the regular Lane Roller Bearings having a separate bushing for the rollers to run on. It is manufactured in the three popular sizes, suitable for 1, 1¼ and 1½ inch rail.

THE U. S. MAIL BANK.

O. B. Fish, cor. Hudson and Harrison Streets, New York, is the manufacturer of the "U. S. Mail Bank," recently presented to the consideration of the Hardware trade and which has already achieved a popularity of its own. We

THE U. S. MAIL BANK.

give an illustration of this desirable specialty herewith. It is substantially made of cast iron and nicely finished in aluminum bronze, being an exact *fac simile* in style of the regular Government box seen on every block in the city. It is regarded as being a unique and attractive design for the purpose. It is provided with a patent up-to-date combination lock, similar to those in use on Marvin or Herrings safes; also a patent device which prevents money being shaken out of opening or slot in which deposits are placed. It is 6½ inches high, 4¼ inches wide, 2¾ inches deep and weighs 3 pounds and 3 ounces.

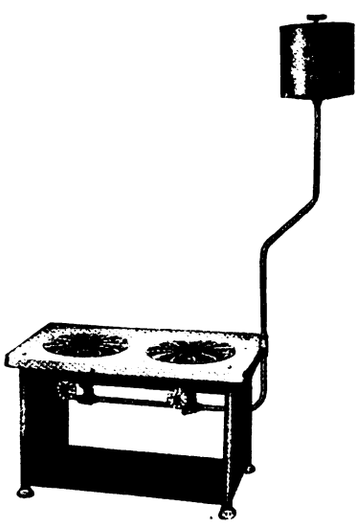
THE NIAGARA VENEER TIE OR BOND.

The Metal Stamping Co., Niagara Falls, N. Y., are the manufacturers of the Niagara Veneer Tie or Bond we illustrate in the course of this article. They are designed for securing brick to frame in brick veneer buildings. They are of the best steel, galvanized, 7-16 in. wide, and reach 3½ in.

NIAGARA VENEER TIE.

into the brick wall free from the sheathing. They weigh about three pounds to the gross, and are snugly packed three gross in a wood box with locked and glued corners and slid-

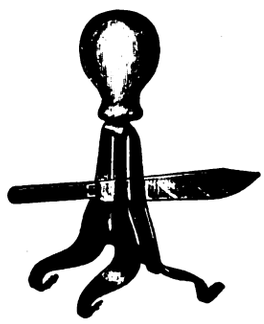


MODE OF PACKING ADOPTED.

ing cover. These boxes are packed four, eight or twelve in a good case, weighing, ready for shipment, about 50, 90 and 125 pounds respectively. Thus they are exceptionally convenient for the jobber and the retailer while the builder will find them the handiest possible shape to take on the wall. They are fastened to the sheathing easily and rapidly with a common roofing or other nail, for which there is a hole punched. Bedded in mortar, they are practically immovable, as every part—top, bottom and sides—resists movement, uniting the frame, sheathing and brick wall into practically one strong and solid body; and under ordinary circumstances it is claimed to be impossible to produce the slightest approach to a separation of the parts.

"RELIANCE JUNIOR" CABINET GASOLINE STOVE.

Cabinet "Reliance" Junior Gasoline Stoves herewith illustrated are manufactured by the Shelby Stove & Mfg. Co., of Shelby, Ohio. These stoves are designed to meet all

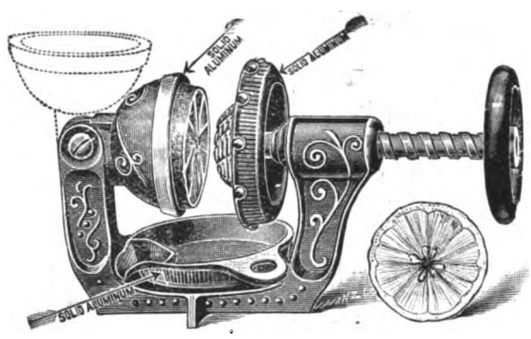


"RELIANCE JUNIOR" CABINET GASOLINE STOVE.

conditions necessary for a perfect Junior Gasoline Stove at a moderate price. The burners are constructed with a full brass angle, having a brass standpipe, thus eliminating the necessity of gasoline passing through an iron base. The top is claimed to be the largest offered and is fully guaranteed to satisfy those wishing a stove of its capacity. The manufacturers also make other styles for use without being placed on a table or range—of just the right height for perfect results. These stoves are of neat design and easily cleaned. They are handsomely ornamented and are by far one of the most attractive stoves of their class on the market. The Junior step is a point that will interest any housewife, and help to make the stove a ready seller for the dealer. The chief aim of the manufacturers, it is claimed, is to produce a stove which for general utility cannot be excelled. Their rapidly increasing business would indicate that they have struck the popular fancy, and that dealers who are handling their goods think well of them. The manufacturers will be pleased to send catalogue and quote prices to dealers.

THE "BEST YET" KNIFE SHARPENER

The F. H. Smith Mfg. Co., 18-30 W. Randolph Street, Chicago, among the many salable specialties emanating from their works, are turning out an extremely convenient knife sharpener illustrated by the accompanying cut. It is marketed under the suggestive name of "The Best Yet," and is



THE "BEST YET" KNIFE SHARPENER.

made of nickel plated steel throughout, with a hardwood handle. It is so complete in its construction it does not have to be clamped or screwed down. The knife being placed in the slot, is pressed gently between the cutters and a smooth keen edge is produced from heel to point. The simplicity of the operation required, and the moderate price at which it can be sold should cause it to meet with a ready sale. Circulars will be forwarded by the manufacturer upon request.

THE 20TH CENTURY JUICE EXTRACTOR.

Matt Redlinger, Freeport, Ill., among a number of useful specialties that have met with a widely extended sale, is the manufacturer of the 20th Century Juice Extractor, of which we present an illustration. It is provided with a solid

THE 20TH CENTURY JUICE EXTRACTOR.

cast composition brass screw, which is run through babbit metal to ensure its quick and easy operation. For bar use, it is furnished with a solid aluminum saucer, holder and plunger, making it impervious to acid or water. It is claimed to make a perfect beef juice extractor and this fact has assisted greatly in its distribution. Circulars giving full particulars will be forwarded on application. It will be found a salable addition to any Hardware stock.

NEW U. M. C. PRODUCTS.

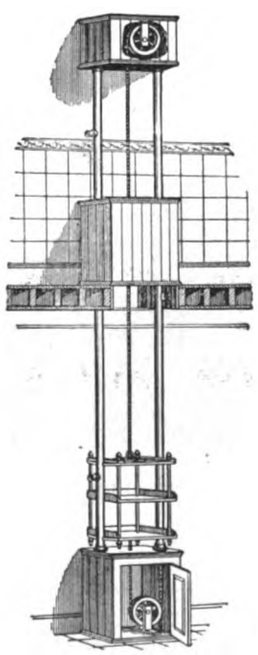
The 32 Automatic Colt Pistol is loaded with a special high power smokeless powder, giving high velocity and operating freely through the mechanism of the automatic Colt pistol (pocket model). Those with the soft point bullets will be found desirable for sporting purposes.

These cartridges are also made with metal cased bullets and are accurate for target purposes at ranges suitable to pocket pistols.

RIM FIRE CARTRIDGES.

New 22 short ungreased, 22 long ungreased and 22 Winchester ungreased are inexpensive rim fire cartridges loaded with the best grade of smokeless powder. Boys are calling for these cartridges as they can be carried loose in the pocket without the old inconvenience of the greased cartridges. They will not lead the gun.

U. M. C. ammunition shoots well in any make gun.



The Union Metallic Cartridge Co.,
BRIDGEPORT CONN.

Agency.
313-15 Broadway,
New York City.

ORNAMENTAL BRASS TUBE DUMB WAITER.

The Energy Elevator Co., 411 Cherry Street, Philadelphia, among the many styles of Dumb Waiters and similar safety appliances, are the manufacturers of the Brass Tube Dumb

ORNAMENTAL BRASS TUBE DUMB WAITER.

Waiter, which we illustrate herewith. This Waiter is for light service. The car is made of highly finished hard wood trays, with polished brass fittings, and may be accessible from one or two sides as preferred. It is guided on two polished brass tubes, one of which is used as a speaking-tube, while the other contains the counterweight which balances the car. The operating gear consists of cotton rope, passing over free-running, noiseless wheels, one at top and one at bottom of shaft. It is claimed to be a very satisfactory elevator for quick, light work, and is well adapted to places where ornamental effects are desired, such as restaurants, offices and hotels. Prices will be furnished on application.

E. C. ATKINS & CO.'S NEW CATALOGUE.

E. C. Atkins & Co., Indianapolis, Ind., are distributing to the trade the Hardware edition of their catalogue for 1904, which consists of a pamphlet of over 200 pages. It is the most complete of any they have issued and will be found more than usually useful by the trade. Incorporated in its contents will be noticed the entire line of their goods which is distributed through the extensive Hardware trade whose friendship they have zealously succeeded in obtaining and holding; embracing as it does, Hand, Panel and Rip Saws of every grade and variety in which they are produced by their works, the registered trade marks connected with which will be found on page 12. Circular and Cross Cut Saws, Hand Saws, Gang, Drag and Mulay Saws, One Man Cross Cuts in large variety, Cross Cut Saw Handles, Hack Saws of every description, Corn Knives, Plastering Trowels, Vegetable Slicers, etc., etc. To this catalogue in comparison with previous issues, a large assortment of new goods has been added not usually found in a Saw Catalogue of the usual compilation. A number of changes have been made in list prices, so it is important that the dealer should be in possession of this catalogue, the latest. An excellent telegraph code of wide importance is condensed on 6 pages that will be found worth studying up for "rush" orders, covering as it does so many features connected with the ordering department, it denotes that considerable care has been given this division of the pamphlet.

REVIEW OF THE MARKETS.

WIRE NAILS. The small advance in the price of Wire Nails made recently by the leading producers, setting the pace for the market, was a very politic move on the part of the producers and had the effect of bracing the market at a time when many in the trade thought weakness might be shown, especially as its natural competitor had dropped so far and so unexpectedly. Further advances are now anticipated, and orders have been stimulated to a degree that make the order books smile encouragingly. If orders should be largely required for early delivery, a shortage is apprehended, as the stocks at the mills are not unprecedented as to quantity. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots $1.90
Retailers, carload lots 1.95
Retailers, less than carload lots 2.05

New York. There is only a fair demand in the local market, and mostly for small lots from store. Quotations are as follows:

Single carloads $2.05
Small lots from store 2.15

CUT NAILS. The drop in price of Cut Nails, noted in our recent issue, of 20 cents a keg, has not materially increased the current demand, although stimulating stock orders for those localities in which Cut Nails are held in steady request. The present quotations, based on present cost is referred to as being abnormally low to last any length of time, and higher figures may prevail at the next monthly meeting, more in sympathy with Wire Nails. On either Steel or Wire Nails, with no discrimination as to locality, quotatons are as follows:

Carload lots ..... $1.70 base
Less than carload lots 1.75

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. The local demand is a limited one as stocking up is hardly in order. Quotations are as follows:

Carloads on dock $1.84½
Less than carloads on dock 1.92½
Small lots from store 2.00

BARB WIRE. The recent advance in price of this active staple has stimulated a good supply of orders in good quantities, as the anticipated business this Spring is a sanguine one. The recent quotations in the face of a good business are held firmly; as requisitions are booked in generous demands, the market assumes a stiffening that may predicate a higher range of quotations in the near future. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots	2.35	2.65

SMOOTH FENCE WIRE. Business is reported by the leading mills as being up to anticipations, many requirements being booked at the slight advance made recently which has been the means of bring in a number of orders covering possible requirements for weeks to come. In many cases the present quotations are regarded as being too low to last very long, and a large tonnage is already reported as being secured for future delivery. Quotations are as follows, f.o.b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads $1.85
Retailers, carloads 1.90
Less than carloads 2.00

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

BINDER TWINE. It is anticipated that no settled prices will prevail in the Binder Twine market earlier than was the case last year when the International Company controlling the production largely, waited until April before announcing current quotations, booking orders as they did at a price to be agreed upon under a guarantee. Eastern manufacturers to some extent are quoting a possible range, based on 10 cents for Sisal and Standard, with a qualified guarantee against decline until May 1st, with the usual rebate for carload lots.

CORDAGE. A moderate business only is reported, with quotations held as previously quoted:

Pure Manila, 7-16 inch and larger ..... 11½@12
⅜ inch ..... 12 @12½
¼ inch and 5-16 ..... 12½@13
Pure Sisal, 7-16 inch and larger ..... 9¼@ 9½
No. 2 Sisal, 7-16 inch and larger ..... 8¼@ 8½
⅜ inch ..... 8¾@ 9
¼ inch and 5-16 inch ..... 9¼@ 9½
Lath Yarn, Medium and Coarse... 8½@ 8¾
Jute Rope, No. 1..... 6½
No. 2..... 6

LINSEED OIL. Under date of January 20, the following advanced quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels...41 cents per gallon.
In lots of 5 barrels or more.....40 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

The New Year has opened with considerable promise and it is noticeable that the salesmen now on the road are finding results not only equal to last year, but in some cases better. This is apparently a very sure indication that stocks are very low as with but few exceptions there is very little temptation to speculate, and it would be safe to say that goods are being bought for immediate consumption. The remarkably cold winter has cleaned out all seasonable goods, so that with shelves bare of winter articles and with money in the bank, dealers are in good shape to anticipate a fair business in the Spring, and despite the fact that the Spring of 1903 was not a seasonable one there is now an active demand for many Spring and Summer goods. The only eventful recent change in price has been that of Wire and Nails, which advanced 5 cents per 100 lbs. on the 14th of the month, with a probability of a further advance in the near future. Cut Nails, however, parted company and instead of being higher than Wire Nails as they were last year went the other way and are now quoted about 15 cents per keg less, but whether this will have any effect in increasing the demand remains to be seen. It is gratifying to report that there seems to be a marked improvement in the demand for pig iron and raw material and now that the buying movement has started by the Jobbers the factories should be kept well employed. Some pessimists lay stress upon the fact that 1904 is a presidential year, but we are inclined to think that this is rather a popular delusion, as a careful examination of our records for the last thirty years reveals the fact that Presidential years do not show any apparent falling off in sales compared with other years. On the contrary, one or two presidential Falls showed a marked increase in the amount of sales. It does not do, therefore, to become unduly scared and we are inclined to think that the evil effects of presidential years are largely imaginative and subject to discount.

BIDDLE HARDWARE CO.

THE SAGINAW TRADE.

Business has been quiet the last two weeks in this section of the country, and most of the dealers have been taking inventory. We have had a severe Winter and good sleighing, and the ice crop is harvested, and the ice is very thick and nice. Michigan ships a good deal of ice South. The continued deep snow on the land is likely to make the Winter wheat crop better than usual. The coal mines in this vicinity have been working to their full capacity, also the plate glass factory, lumbering tool factory, collar and harness factories and piano factories. The late advance of a dollar per ton on nails and wire has led the country merchant to believe that the bottom has been reached. There seems to be a healthy feeling, and collections are better, and we look forward to a normal Spring trade. MORLEY BROS.

THE CHICAGO TRADE.

The commencement of the New Year finds us in a good state of preparation for the Spring trade. Our force of employees is well organized. Our salesmen on the road as well as in the city are actively engaged in taking orders for present and future delivery so that in comparison with one year ago, we seem to be fully as busy if not more so than last January. The low prices that have been prevailing for Plain and Barbed Wire, Wire Nails, Fence Staples, Galvanized Iron, Sheet Steel, Tin Plate and many other goods has induced free buying and we look for a large volume of business during February and March. Steel Goods, Netting, Wire Cloth, Freezers and Screen Doors are all going off in good shape and our salesmen inform use that indications point to a good demand for Builders' Hardware. The advanced price of one dollar per ton on heavy goods seems to have been expected and as stocks of goods were reduced considerably in December, staple articles are now in urgent requst. WELLS & NELLEGAR CO.

THE COLUMBUS TRADE.

The business year of 1904 is now on in earnest. Inventories are completed and such changes in storing stock and other details that seem to be necessary yearly (especially when you are crowded for space), have been made. Salesmen are making their regular visits and we believe dealers are glad to see them. A popular salesman is always welcome and his visits are looked forward to with pleasure by the buyer. Then there are others that could stay away forever and not be missed. That kind, however, don't last long on the road. Dealers are buying freely, indicating confidence in the future. Prices on some goods are badly demoralized and pay no profit to the jobber; but that is an old story and will always be with us. The advance on wire and nails made many a dealer prompt in accepting any real or conditional option he may have had. We think it advisable for dealers to get their specifications in without delay as it looks very much as though manufacturers will have more than they can do in March, April and May. Our Winter is still with us. We have had no warm weather or rain for nearly two months but the rivers are covered with ice from 12 to 14 inches thick and the ground with snow. If we have a rain when warm weather comes, there will be considerable damage. Our city is threatened with an epidemic of typhoid fever. A flood would no doubt be a good thing to wash the polly-wogs, dead rats, etc., out of our river. It is surprising how many people are improving the opportunity to drink beer as a steady drink. The water is bad you know or I would not drink beer; but the chances are the same fellow hasn't used water only to bathe in for years, but an excuse sounds nice.

THE SMITH BROS.' HARDWARE CO.
J. H. SMITH.

THE ST. PAUL TRADE.

So far in January, business has been beyond our expectations. It is somewhat of a worry to us as to how the retail man will treat his account, as so many have been unable to pay up and he is now starting on a new year with the old balance still hanging over his head, but we must carry him through, whether we desire to do so or not. It is pleasant to see the steadiness of the market. So many goods have held their prices, some have advanced and some declined, but alto-

gether the market is steady. This is gratifying and shows that some have been frightened without cause. We certainly have passed through a critical time, and trust that the future is assured to the extent that values will be maintained.

HACKETT, WALTHER, GATES HARDWARE CO.

THE PITTSBURGH TRADE.

The year 1904 opens for the Hardware trade in this city with smaller business than the same month a year ago. Then everything was at the top notch of prosperity, while at present the steel trade and its attendant branches are just beginning to emerge from a severe depression. That it is improving we think there is no doubt. Coke ovens by the thousands are starting, mills that employ thousands of men are opening and the expectation is that when Spring comes it will find this section again prosperous with a good amount of business for all. Continuous Winter weather for two months has completely closed our rivers with ice and reports of heavy snows at the head-waters make us apprehensive of high waters and damage when the break-up comes. The movement throughout the Ohio Valley to improve the river with locks and dams, making a depth of 9 feet from Pittsburgh to Cairo, is awakening much interest. The National Government should take hold of the matter in earnest as it deeply concerns the people of 14 States with a population of over 13 millions and would be of incalculable value to the commerce of this region. LOGAN-GREGG HARDWARE CO.

THE SAN FRANCISCO TRADE.

It is a dry, Summer-like Winter we're having this January, and "Sleigh Bell trade" as usual is a blank in this market. Yet, notwithstanding the absence of Eastern snow-weather, bells of delightful memory the California trade is not without music; the air is full of it, albeit of a discordant brand, veritably traceable to the iron-steel slump.

When the writer called this week at Miller, Sloss & Scott's it was distinctly plain that heartfelt gloom was all-pervading among principals and employees on account of the death of the nine-year-old son of the last named member of the firm, A. L. Scott. The sorely-stricken and prostrate father had been present during most of the two weeks' illness at the bedside of the little sufferer from pneumonia. The funeral occurred on the 14th instant.

C. A. Bowman, in the trade in early days in connection with Wright's Hardware store in this city, the original of the present Philpott & Plummer store, and with Pierce & Co., Oakland, is now materially increasing lines in his Hardware store established three years ago far out in the Western addition of this city at 1707 Devisadero Street, a then distant location that has proved under his personal management an exceptionally good investment.

Many Hardwaremen in San Francisco are in receipt of an invitation from Marysville, from Secretary Boyd, of the Pacific Retail Hardware Association, to visit Sacramento with their wives and attend the "Pacific's" sixth annual convention. The envelopes enclosing the illustrated serio-comic invitations are besmeared with a grease spot on the upper land-hand corner over this announcement in red ink: "This is all there'll be left of you." Many members of the San Francisco trade purpose going.

San Francisco wants it known that it's to be the next "It" after St. Louis as a world's fair city. The project to have an event of this kind in full development in 1915 was the sole matter of consideration at a December 12th meeting of the Merchants' Association, and called forth the heartiest approval of the members.

INDUSTRIAL PRESS ASSOCIATION.

THE OMAHA TRADE.

The usual rush incident to the closing of one year's business and the opening of another is about over and the smoke is clearing away to an extent that enables us to look back over the year past and see what the results have been and plan for the coming year with the experience gained from the one just closed. In a general way the volume of business transacted by the Hardware trade appears to have been somewhat below that of previous year, but the balances generally appear to be satisfactory and no complaint is made in regard to the results of the past year's business. Trade throughout November and December was rather light and there was an uncertain feeling on the part of the trade as to the future. This condition of affairs, however, appears to have undergone a marked change since the first of the year and while dealers are buying light on account of the difficulty in keeping up their collections, yet there is a firmer feeling and a better tone to the trade than was exhibited during the closing months of last year. Collections have also improved to a material extent and there appears to be nothing in the way of an average year's business for this year at prices stronger and more satisfactory than seemed possible three or four months ago.

WRIGHT & WILHELMY CO.

THE BRISCOE MANUFACTURING CO., Detroit, Mich., have issued a little booklet about their O-Rib-O stoves and galvanized ware, on the front cover of which is an attractive view of their press department. They also give numerous illustrations of their heaters, pails, tubs, oil cans, sap buckets, etc., all of which are corrugated. Their wood heaters are made of extra heavy refined steel and are reinforced with heavy steel lining. There is both lower and upper draft both nickel plated, and an ash door at the bottom. There is also a check draft in the pipe collar. These parts are pressed out by special machinery exactly alike every time, insuring a perfect air-tight fit. One of these little booklets explaining their goods in detail will be mailed upon application to the Briscoe Mfg. Co.

Improved Carpenters' Tools.
SOLD BY ALL HARDWARE DEALERS.

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

The North Dakota Retail Hardware Association, which will hold their seventh annual convention at Grand Forks on January 27, 28 and 29, have prepared the following program. From present indications it is anticipated they will have an extremely interesting meeting, with the largest attendance in its history. All the railroads that operate in that State have granted a "one and one-third" rate, on the certificate plan, and the same will be granted from all points in Minnesota to Grand Forks, so that any person living in the Twin Cities or Duluth can take advantage of the low rate and attend.

PROGRAMME

Wednesday, January 27th, 1904.

MORNING SESSION, 10 A. M.

Meeting of Executive Committee.

AFTERNOON SESSION, 2 P. M.

Address of Welcome—Mayor Dinnie.
Response, Vice-President, H. F. Emery.
Roll Call to Members.
Enrollment of New Members and payment of dues.
Appointment of Committees.
Paper "Uniform retail prices and fixed terms of sale by Retailers"—H. J. Hellekson, Fairmount.
Discussion.
Paper "Efficient Salesmen"—W. H. Pinkerton, Lakota.
Discussion.

NOTE:—The Question Box to be found in Convention Hall.

Thursday, January 28th, 1904.

As much of both sessions this day as required will be devoted to the jobbers, manufacturers and their traveling salesmen, for discussion of matters of mutual interest.

MORNING SESSION, 9 A. M.

Enrollment of New Members and payment of dues.
Paper, "Our Troubles," G. W. Wolbert, Bismark.
Discussion.
Paper, "Should the Hardware Jobber Handle Stoves," Geo. L. Nye (prop. Minnesota Stove Co.), Shakopee, Minn.
Discussion.
Paper, "Trials and Tribulations of the Hardware Man," U. S. Conn, Fargo.
Discussion.
Address, "Some ways in which the interests of the Retail and Wholesale Hardware Merchants can be benefitted," R. A. Kirk (ex-Pres. National Hardware Jobbers' Association), St. Paul, Minn.
Discussion.

AFTERNOON SESSION, 2 P. M.

Paper, "Invisible Assets," R. A. Grim (Northwestern representative Michigan Stove Co.), St. Paul, Minn.
Discussion.
Paper, "The Merchant and the Local Editor," W. E. Davis (Editor *Hardware Trade*), Minneapolis.
Discussion.
Traveling Men "at the bat."
Discussion.
Paper, "Just a Little Nonsense," H. H. Walther, Casselton.

EVENING SESSION.

The business men of Grand Forks have provided an entertainment in the Pioneer Club Rooms, to which all Hardware and implement dealers, their guests and friends are cordially invited.

Friday, January 29th, 1904.

BOTH SESSIONS THIS DAY FOR MEMBERS ONLY.

MORNING SESSION, 9 A. M.

Enrollment of New Members.
Annual Report of President H. N. Joy.
Annual Report of Secretary.
Annual Report of Treasurer.
Report of Auditing Committee.
Report of Nominating Committee.
Election of Officers.
Report of Other Committees.

AFTERNOON SESSION, 2 P. M.

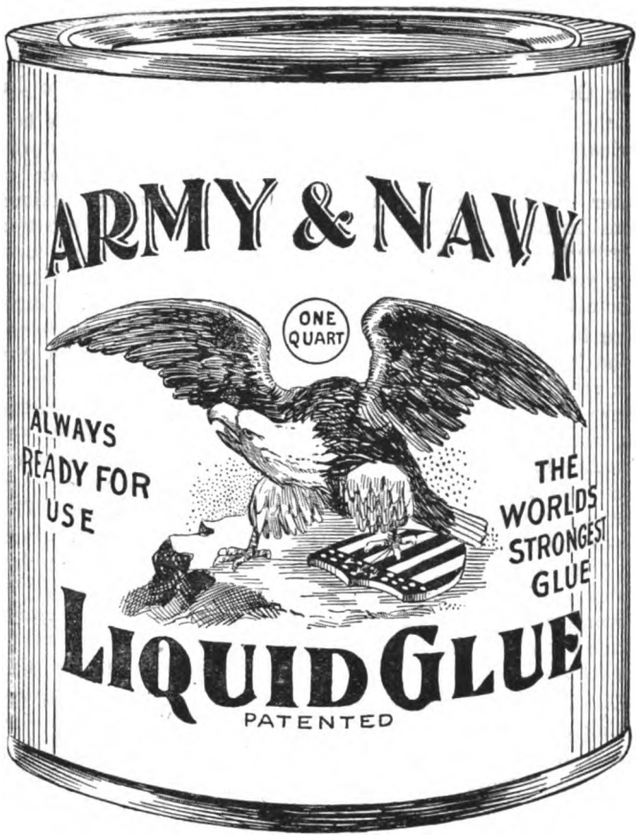
This entire Session to be Devoted to the Discussion of Question Box Topics.

NOTE.—At close of this session there will be a short meeting of Executive Committee.

RUSSELL & ERWIN MFG. CO.'S NEW PRICE LIST.

Russell & Erwin Manufacturing Co., New Britain, Conn., and 43-47 Chambers Street, New York, under date of January 1st, and in conformity with the agreement among leading manufacturers, have issued their Revised Price List No. 5 to accompany their 1899 catalogue No. 9. The first 95 pages are devoted to their Special Design Builders' Hardware, all of which is priced throughout, from Knobs, Escutcheons, etc., to the various other articles included in this assortment. The list of finishes with their factory numbers occupy a representative page, while another page is devoted to an excellent index enabling a dealer to readily find in this price list, any special design required to facilitate reference. Marginal indexing is used, by the aid of which every department of Price List is easily consulted. The Price List is subdivided for convenience in use, the list prices on regular goods occupying 85 pages of this second part; the remainder, up to page 134, being required for the discounts on miscellaneous goods, that form an important part of the catalogue Volume 9 to which this Price List applies.

THE McKENNA BROS. BRASS COMPANY.



The McKenna Bros. Brass Company, of Pittsburgh, on the 14th inst. distributed among their employees a proportionate share of the profits of 1903. The amount to each workman who had been employed throughout the year ranged from $50 to $70. The company is composed of the seven sons of Thomas McKenna and C. S. Dick, and they succeeded the firm of A. & T. McKenna, who founded the business in 1856. During all this period there never has been a strike of employees. They employ about 100 workmen, mostly skilled machinists.

INDUSTRIAL ESTABLISHMENTS IN RUSSIA.

According to official statements just published there were in Russia, at the beginning of 1902, 17,786 industrial establishments employing 1,710,735 persons, of whom 73.2 per cent. were males and 26.8 per cent. females. The female employees have increased in number, especially in the establishments engaged in the manufacture of cotton textiles, matches, and cigars and cigarettes. The Russian factory inspectors during 1901 made examinations of 70 per cent. of all industrial works.

When we know the weakness of eminent persons, it consoles us for our own inferiority.

OUR NEW ORLEANS LETTER.

(From our Special Correspondent).

New Orleans, January 15.

Developments and extensions in the activities of the leading Hardware dealers of New Orleans are taken by them, and by the trade generally through the city to augur good for the ensuing year. Every jobber in New Orleans, and almost every agency of size, is considering considerable extension of his trade facilities. The trade is as one in asserting that the outlook for the coming year is bright, and that 1904 has opened with a splendid fortnight's record.

Export and domestic business are together attracting the attention of the managements. The local situation is considered to be well in hand, and the retailers are doing their best to prepare for what they believe will be a season remarkable in even more ways than was that just gone. At least three of the larger wholesale houses in New Orleans are preparing extensive departures in their business facilities and at least four large agencies are contemplating extension of their trade territory and the development of hitherto virgin fields both in domestic and in foreign lands. This last has been rendered possible by the inauguration of new steamship lines, and the completion of several new systems of railroad connection that render large districts in the United States more easily reached from New Orleans.

Behind all the prosperity of the Hardware business, which has been estimated to range above that of any other one line of New Orleans, is the undoubted and almost unprecedented prosperity of the agricultural section upon which this city depends; cotton just now selling at prices which are just twice those current seven years ago, and nearly $20 per bale more than was current fourteen months ago, and $15 per bale more than was current one year ago; with a rice crop just harvested that surpassed the fondest expectations of the most sanguine land boomers from Western Louisiana and Eastern Texas with even the sugar planters still possessed with the wherewithal to purchase enough for their needs; well being has been spread broadcast over a section of territory larger than all New England, with New York and Pennsylvania added—and this territory trades largely with New Orleans. The population of course, is far less than that in the territory just named in comparison, but the purchasing power, and the purchasing habit is, if anything greater in proportion.

Figures and estimates placed upon the New Orleans Hardware for the opening of the new year place the increase in business during the past two weeks, over the first two weeks in 1903, at fully 30 per cent. This increase is said to be largely in the lines of heavy goods, iron bars, sheet roofing, nails, etc. Structural Hardware, base goods, and those articles which were affected some time ago by the fall in iron and steel, and which experienced the slight improvement in values during December, have been the best sellers.

It will be remembered that several weeks before the holidays a slight weakening in the prices sent out from Pittsburg affected the Southern region to a certain extent, but only through the heavier goods. Lighter goods and those requiring considerable workmanship to prepare for the market were little affected. However, the trade was largely that which answered to a direct demand, and in consequence actual buying and selling was little affected. Since the holidays there has been a firmer tone, and the jobbers and wholesale dealers as well as the retailers through the country adjacent to New Orleans have been willing to get in larger stocks than usual to prepare for what they deem to be a promising season. This has been particularly noticeable into Mississippi and Eastern Texas, along the route of the Southern Pacific and the Texas & Pacific. The demand from these sections has been for nails; Stauffer-Eshleman & Co., having shipped fifteen carloads in ten days along this route. Woodward Wight & Co., have also ordered heavily from the factories to fill this demand as has A. Baldwin & Co., while their agents report that the little St. Louis trade still going into the New Orleans territory have also done this. Builders' tools, building Hardware, and large shipments of housefurnishing Hardware have gone into the rice belt to supply the new settlers in that section from Iowa and Illinois, and other States of the North and West which are now emptying their dissatisfied population into the cheap lands of the Southwest.

The implement agencies, it is understood, are to send men to Cuba after the rush of January orders is over.

Particular attention is being paid just now to the establishment of a direct line of steamships to South Africa, which will begin running next autumn. The implement men are particularly anxious to be upon the ground when this means of communication is established. Fairbanks, so it is said, will continue to handle its South African trade through New York, but Deere, McCormack and Moline will endeavor to do this through New Orleans. The general wholesale Hardwaremen have already arranged with the representatives of the South African Trading Company, the Macheca Bros., of this city, to be well posted upon the situation and to throw as much trade as possible into the new territory. During the Boer war steamships were running to South Africa, but there was little demand then in the distracted country for the very goods which New Orleans would be in a position to sell. There has also been established a new line of steamships direct to Northern Italy, with Genoa as the terminal. This has been brought about by the reversion to New Orleans of the Italian fruit business which has been entered into the United States through New York for several years.

In the mill supply business there have been great strides within the past month, and remarkable developments during the last two weeks, developments also that the trade hardly felt were justified despite the growth in prosperity of the region catered to. The Southern yellow pine belt has been receiving larger and larger influxes of Northern lumbering capital, and a number of large plants have had to be supplied. Much of this has come to New Orleans. The mills are also taking a breathing spell after the half year's run which follows the mid-summer cleaning up and stock taking. The cypress lumber territory to the West of New Orleans has rather ceased to spread its industry, but this is compensated for by the development of the hardwood mills in Northern Louisiana and up and down the Mississippi river from Baton Rouge and Natchez, Miss.

However, the mill supply business has not quite kept pace with the trade in Hardware which goes peculiarly to a clientele earnestly engaged in building new houses and barns, erecting new fences and bridges, and repairing the wear and tear in farms and business houses incident to a strenuous year. It is also certain that household Hardware has not kept pace with mill supplies, for people have been too deeply engaged in elementary industry to notice worn out pots and pans and stoves.

Local trade in building Hardware and tools has been threatened with a war between the building trades council and the building trades employers. This has now been averted, apparently, and the chances are for a rousing year of business which will create good demand. The laborers and the employers have both shied from the danger of any such chaotic conditions as ruled in New York last year, and will probably straighten their differences without recourse to strikes or lock outs.

Implements have maintained their usual runs of excellent business into the entire agricultural region, although the sugar section is not purchasing as heavily as it did last year. The cotton implement demand, running in improved implements more than is usual, has greatly increased, as the cot-

Digitized by Google

ton acreage will increase perhaps ten per cent., a certain part of that in Louisiana is at the expense of the sugar acreage. John Deere, Moline, and McCormick agencies, and the Avery Agency are putting extra men in the field for the Spring trade. These agencies, with Stauffer-Eshleman & Co., and A. Baldwin & Co., are endeavoring to cut into the St. Louis and Dallas hold in the Texas neutral ground. Ship chandlery is the one line which has not shown any increase, as the actual tonnage has increased not so very much during the past twelve months, and that which has come in addition, has purchased its supplies apparently at the other ends of the various voyages.

Attention to export business is just now very keen. The Cuban excursion was abandoned, owing to the close approach of the Carnival season, but will be carried out in March. However, a number of Hardware houses are to get up an excursion of their own which will leave New Orleans next Saturday for a twelve days' tour of Cuba and Porto Rico. Fairbanks, Baldwin, Eshleman and Wood-Wight & Co., will each have a man in this enterprise. Fairbanks is to do much of its future West India trade through this port, so the local management has stated, and the other firms are making strenuous endeavors to gain control of the Cuban market.

RECENT TRADE PUBLICATIONS.

THE BRIDGEPORT CHAIN CO., Bridgeport, Conn., are placing before the trade their new catalogue No. 8 having reference to wire and flat metal chains, shelf and saddlery Hardware and metal stampings. They call particular attention to the revised lists which appear in this catalogue. They state that shortly after issuing their last catalogue they secured the cooperation of other makers of wire chains in adopting entirely new schedules of prices which could be considered standard, and it will be seen that they have adopted such lists for their "Triumph" and "Brown" coil, halter and tie-out chains. A very complete and attractive assortment of aluminum kennel chains and dog leads has been added to their line of fancy chains. Among other new goods they call attention to their "Triumph" hame fasteners which have proven to be a good seller. The catalogue is profusely illustrated, giving cuts showing the exact size of links and wire, also quoting prices and give the tensile strength of the different sizes. They also make aluminum, brass, bronze and composition chains in their "Triumph" and "Brown" patterns. Aluminum chain in their "Triumph" style has a tensile strength of 33⅓ per cent. of the strength shown by their steel chain of the same pattern. This chain is particularly adapted for purposes where a thoroughly non-corrosive and acid-proof stock is required. Brass and bronze chain can be supplied from stock and is very popular on board launches and yachts. Composition chain made from specified mixtures will be delivered promptly. They state they are prepared to make chain from anything that can be drawn into wire.

THE HART & COOLEY CO., New Britain, Conn., and 79 Chambers Street, New York, have issued a very handsome catalogue of their wrought steel registers and ventilators. The cover is a very delicate shade of green and the design is white, making an extremely artistic effect. They claim, regarding their registers, "They will not break or warp; the air space is greater than in other registers; they weigh much less than cast iron registers with a consequent saving of freight. Each register is packed in a straw board box, protecting the dealer against shelf-worn goods; they are of such a shallow depth that they are adaptable for wall use." The company call especial attention to their solid wrought brass and bronze registers, faces and borders which they claim are unsurpassed in strength and finish. The catalogue is illustrated throughout and list prices accompany each article. The concluding pages of the catalogue are devoted to extensive list prices of all styles and finishes of registers manufactured by the above company, giving sizes of each one with and without the border, making this an extremely valuable catalogue for those interested in registers.

Craig Mine Crystal Corundum

NOT ADULTERATED WITH EMERY

Has an effective hardness of 9. as compared with 10. of the diamond. Wheels made from it do from two to five times the work of emery wheels, Why? CRAIG MINE CRYSTAL CORUNDUM has 95 per cent. to 98 per cent. compared with emery's 30 per cent. to 40 per cent. of crystalline alumina—the only part of emery that cuts.

Emery rubs and burns. Craig Mine Crystal Corundum cuts fast and cold.

Our booklet will explain.

HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, etc.

Boston, Conn.—Chandler & Farquhar Company has been incorporated to deal in Hardware; capital, $50,000. Promoters, Frank Chandler, C. S. Farquhar, F. A. Chandler, R. J. Lynd and W. N. Schofield.

Brattleboro, Vt.—A. E. Wood will open a Hardware store about the middle of January in Ray's Block.

Chatfield, Ohio.—D. G. Heiser has opened a new Hardware store.

Dunkirk, N. Y.—W. J. Lawrence Co. has been incorporated to deal in clothing and Hardware. Capital stock $15,000. Incorporators, W. J. Lawrence, J. A. Holstein and W. H. Broughton.

Elysian, Minn.—The Elysian Hardware Company has been incorporated. Capital stock $10,000. Incorporators: Henry L. Chaffie, Minneapolis; James A. Grissler, Sr., and James A. Grissler, Jr., Elysian.

Gilman, Ill.—Gilman Implement and Transfer Company has been incorporated; capital, $15,000; deal in agricultural implements; incorporators, A. Powell, B. B. Powell, J. H. Gleason.

Nashville, Tenn.—The Mitchell-Ashley Hardware Company of Maury County, has been incorporated, with $10,000 capital stock.

New Milford, Conn.—Frank E. Rowe Company has been incorporated to deal in lumber and Hardware. The capital stock is $6,000.

New York, N. Y.—Washington Heights Hardware Company has been incorporated. Objects, to deal in Hardware, etc.; capital, $5,000. Incorporators and directors for the first year: C. H. Totten, New York City; Wm. F. Preston, Brooklyn; George B. Curtiss, New York City.

Point Richmond, Cal.—About February 1st, V. A. Fenner will open a Hardware store.

Sulphur Springs, Ohio.—V. J. Robertson will open a tin shop in one of H. Heibertshausen's rooms. He will carry a stock of pumps, Hardware, etc.

Temple, O. T.—The Leader Hardware Company has been incorporated, with $10,000 capital stock. The incorporators are John J. Branen, R. A. Brown and James H. Thomason.

Tremont City, Ohio.—Edgar B. Hilton has opened a new agricultural implement store.

Youngstown, Ohio.—Geo. D. Gluck has opened a new Hardware store at 1011 Market Street, under the firm name of the South Side Hardware store. It will be equipped with the very best stock of light Hardware and fittings.

Changes.

Albert Lea, Minn.—George R. Scott and A. J. Berglund have purchased an interest in the Peterson Bros. Hardware store and will take an active part in the management of the business after January 1. The firm will be changed to Peterson Hardware Company, and for the time being both the present proprietors, P. A. Peterson and George W. Peterson, will retain an interest in the business.

Alexander, N. Y.—Broadbrooks and Banger of Attica have purchased the Hardware stock of W. E. Glasier Company who will discontinue that branch of their business.

Arion, Mich.—A new Hardware firm has come into existence through the absorption of an established firm, that of Caluda & Meyer, the new member being George W. Littleton. The firm name will read Caluda, Meyer & Littleton. The new firm will broaden out, remodeling the store at 28 North Main Street and equipping it more largely with a complete line of Hardware.

Ashland, Ky.—Millard Field has closed a deal whereby he becomes a member of the Ashland Hardware Company.

Batavia, N. Y.—W. J. Goade has purchased the Hardware business of J. B. Templeman in Ellicott square and has taken possession. The store will be remodeled and Mr. Goade will greatly enlarge the stock, doing a general Hardware, plumbing and tinshop business.

Birmingham, Mich.—J. Lee Truax has purchased the Hardware business of C. Schlaack & Co.

Jewel, Ohio.—Wm. Owen and L. Seipel of Florida have purchased the Hardware business formerly conducted by C. Palmer.

Lewisburg, Tenn.—The Clayton Hardware Company has increased its capital stock from $10,000 to $20,000.

Marysville, Cal.—James O. Gates has recently become a partner by purchase of stock in the Hampton Hardware Co.

Memphis, Tenn.—D. M. Montgomery of New Orleans has been admitted as a member of the Hardware firm of Coffin & Co.

Millburg, Mich.—The Witbeck Hardware Company of Millburg who were burned out the night of Dec. 30 are doing business again, having leased the Wetmore Building, where they have a stock of goods with more on the road and still more purchased.

Newport, Pa.—With the first of April T. W. Bassett will close out his tinware and stoves and quit business in Newport.

Omaha, Neb.—F. M. Thompson of Edgar has bought back the Hardware business from Ong & Edgar, which he sold to them two years ago.

Pendleton, Ore.—Andrew McEwen has recently bought a half interest in Cox's Hardware store, and the firm in the future will be known as Cox & McEwen.

Philadelphia, Pa.—T. James Fernley, a wholesale Hardware merchant, of 505 Commerce Street, has admitted his son, Thomas A. Fernley, into partnership in the business.

Sedalia, Mo.—Mr. L. F. Viebrock, who has been associated with Mr. J. F. Gieschen in the Hardware business at 116 South Osage Street, has disposed of his interests to his partner, Mr. Gieschen, who will continue in the business alone. The store will be known in the future as J. F. Gieschen's Hardware store.

Sioux City, Iowa.—A. W. Ivens, secretary of the Sioux Hardware and Heating Company, has sold his interest in that concern.

Stryker, Ohio.—The implement store of Grey & Kimball is dissolved in partnership. Mr. Kimball will continue the management of the business.

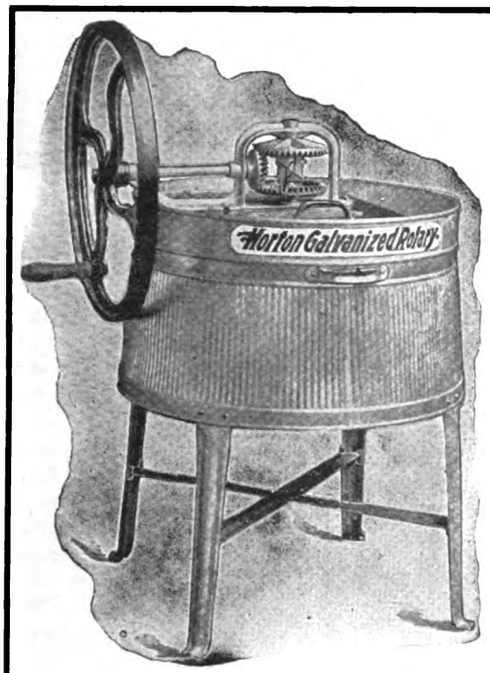
Troy, N. Y.—Hereafter the Hardware store occupied formerly by the firm of Allen & Sheffer will be carried on by Mr. Allen alone, the firm having dissolved by mutual consent.

Unadilla, N. Y.—Howard Bundy has purchased the Hardware business of S. D. Haight and takes possession on February 1st.

Vinton, Iowa.—Three Hardware firms in this city, Parzbok & Fagan, Allen & Hoolihan and McElroy & Zollinger, have consolidated their business and stocks and will incorporate under the name of the Vinton Hardware Company.

Westerville, Ohio.—Wilkin, Landon & Patrick have purchased the implement business of H. H. Lawrence & Company, and will consolidate the same with their extensive implement and Hardware business. Mr. Lawrence will be a salesman for the new firm.

Winona, Mich.—The R. D. Cone Co., wholesale Hardware dealers, have placed a new warehouse near their old one on Front Street, using now the two to carry their surplus stock.



Wooster, O.—The firm of the Wooster Hardware Company has undergone a change. The members of the firm now are J. C. Shultz, Albert Cooley and Welker Christy, L. S. Cooley and I. N. Kinney, retiring, have made the change necessary.

Worcester, N. Y.—The Hardware business of John D. Wilcox has been discontinued.

Fires.

Canton, O.—On Jan. 10, fire gutted the Hardware store of W. A. Kennedy. The stock was valued at $22,000. The damage by smoke and water will probably make the loss total. The insurance is $17,000.

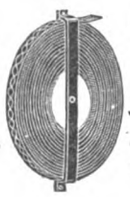
Sargent's Gem Food Chopper

is sold by leading jobbers everywhere. You can get a stock quickly so as to supply the women of your vicinity who need the Gem in their kitchens.



The fact that the Gem is such a useful—yes, indispensable—household utensil is becoming known to thousands of women. We are advertising extensively to make its merits known and in all our advertising we state that the Gem is sold by hardware dealers. That is the story in brief, and it shows that there is

An Opportunity for Every Hardware Dealer

—an opportunity to increase profits by taking hold of this popular article and pushing its sale. It is easy to sell the Gem; housekeepers want it as soon as they learn of it through our advertising. It will help if you make use of some of the attractive advertising matter we furnish for local use—showcards, slips and electrotyped ads; also Cook Books, so that you can present one with each chopper sold.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Incorporations, Etc.

Janesville, N. Y.—The Janesville Manufacturing Company has been incorporated to manufacture bicycles, etc. Incorporators: Albert Spencer, James H. Olcott of Janesville, and Herbert Hotaling of Syracuse, N. Y.

Oakland, Cal.—The C. P. Magagnos Company has been incorporated; capital stock $20,000. The company will engage in the selling of cameras, photographic supplies, apparatus, etc. The directors are George Wadsworth, Irene Wadsworth, Genevieve Magagnos, C. P. Magagnos and Susie Bratten.

Salem, Mass.—Bow Facing Oar Corporation has been incorporated; capital, $100,000; president, Emile Gagnon, Treasurer, Thomas Gagnon, Clerk, Jean R. D. Jacques, all of Salem.

St. Louis, Mo.—The Owners Automobile Co. has been incorporated to manufacture and deal in bicycles and automobiles. It is capitalized at $2,000, all of which has been paid in. The incorporators are Horace A. Davis, William C. Woods and George L. Moselle.

Thompson, Conn.—Elliott Wagon Corporation has been incorporated to manufacture carts, wagons, carriages, unicycles, bicycles, automobiles, cabs, coupes, hacks, sleds, sleighs and other vehicles. The capital stock is $3,000.

Changes.

Chicago, Ill.—The Chicago Sporting Goods Company have rented the fifth floor of the building located on the corner of Congress and Franklin Streets.

Lincoln, Neb.—A large one story brick structure has been erected by the Cushman Motor Company on 21st and North Streets, which was made necessary by the company's increasing business. The capital stock has recently been raised to $300,000 with the idea of establishing one or two branch houses in the east where some of their work can be done more cheaply.

Lynn, Mass.—The property of the Motor Cycle Co. was sold on January 11th to the American Motor Co. at public auction. The price paid was $10,450, and work will be conducted under the direction of that company at once. The American Motor Co. is incorporated under the laws of the State of Maine, and is composed largely of members of the old company. The organization is John Stretton of Stoughton, president; Harry K. Perkins of Bridgewater, treasurer; Dr. Charles O. Swan, of Stoughton, W. C. Dow of Braintree and W. T. Marsh and A. R. Marsh of this city. The new company assumes all liens upon the property, which amount to something like $10,200, the plan is to issue to the creditors of the old company seven per cent. preferred stock in the new company, and the promoters of the new company will hold the common stock. It is understood that Mr. H. E. Swift, who has been carrying on the business as receiver, will be placed in charge permanently.

Plymouth, Mich.—The Daisy Manufacturing Co., has bought from the J. A. Dubuar Manufacturing Co., of Northville, the latter's stock of air guns, machinery and tools. The new owners will take charge immediately.

Miscellaneous.

Birmingham, Ala.—Mr. R. A. Baugh, Birmingham Arms & Cycle Co. said: "This is the biggest year we have ever had. Business has just about doubled, and we are therefore immensely pleased. Our Christmas business was enormous, especially on fireworks and firearms. The hunting season practically cleaned up our stock of shotguns. They carry a most complete stock of all standard sporting and athletic goods, and consequently do a large outside business. They anticipate a large business for 1904 and have made plans accordingly.

Memphis, Tenn.—There are thousands of bicycles being sold this season through the Southern States, where the bicycle craze has struck the negroes and the wheel has almost been abandoned by the whites.

Pittsfield, Mass.—At the annual meeting of the Pittsfield Bicycle Club, on January 5, the following officers were elected: President, George A. Grounds; vice-president, Thomas E. Dunn; clerk, Charles F. Robinson; financial secretary, S. Z. Adams; treasurer, John Ransenhousen; directors, W. J. Tompkins, James J. Pender, W. J. Gorman, Joseph G. Gorman, L. J. Mackin, Edward M. Hall and John A. White.

Springfield, Mass.—Shipments of bicycles are beginning to be made from the Lozierville shops for the coming season's trade and brisk times are expected in the next few weeks. Some of the wheels being sent out are for foreign trade, those for the domestic trade being filled from the later orders. Considerable work is being done on automobile parts at the factory and a large number of hubs for the Hartford factory are being turned out.

Washington, D. C.—The War Department has decided to mount the great 16-inch breech loading rifle, now at Sandy Hook, on a disappearing carriage of the same type as now used in the service.

Fires.

Adrian, Mich.—The bicycle store of C. M. Walker was considerably damaged by fire on January 3rd.

Among the charters which Governor Murphy of New Jersey has declared in default for failure or refusal to pay taxes assessed for the year 1901 are The Bicycle Combination Tool Co., Le Roy Bicycle Co., North Jersey Cycle Racing Association and Pederson Lever Bicycle Co.

El Campo, Texas.—On January 2nd, Adolph Aedling's bicycle repair shop was burned and most of the machinery was lost. No insurance.

The Marsh was the only American motor bicycle exhibited at the English cycle shows. The result reached the American Motor Company recently in the form of an order for 200 machines.

MANUFACTURERS RECORD—Continued.

Changes.

Chicago, Ill.—The Kellogg Harvester Company have increased their capital stock from $25,000 to $50,000.

Corry, Pa.—The Penn Shovel Works of this city, recently damaged by fire will be rebuilt. Work to that end has already commenced.

Detroit, Mich.—The Peninsular Stove Co. was reorganized several months ago and its capital increased. The old company has now filed a formal notice of dissolution.

East Birmingham, Ala.—The Eclipse Rolling Mill & Mfg. Company, will erect a plant to cost $35,000. Aside from making specialties in shapes, etc., they will put out harness buckles, wrought iron and steel washers, wrought goods for foundry use and xap and set screws. They will also make a specialty of galvanizing. The officers of the company are as follows: W. H. Graham, president; E. F. Rowley, vice president; John J. Wirth, secretary-treasurer, and T. J. Rowley, general manager.

Franklin, Pa.—The Grant Tool Company has been reorganized under the name of the Franklin Machine & Tool Company. The new organization has a capital of $100,000, and Maj. Gen. Chas. Miller is president.

Grand Rapids, Mich.—The Automatic Wringer Company has sold its wringer patents and some of its manufactured stock to the Lovell Manufacturing Company of Erie, Pa., and after closing this out the factory will not be operated any more in the manufacture of wringers.

GET A PROFIT.

"The Courage to Get a Profit" is the title of a pamphlet recently issued by a prominent distributing house of Chicago. This is so full of meaty matter for the retailer that it is given in full below:

It often takes more courage to get a profit than to sell cheap.

When a man is fighting for trade against a lot of other bright fellows, unless his nerve is good he is apt to sell cheaper than he ought to in fairness to himself. On no one article has he the courage to get more than a modest profit. Naturally he is disappointed when the "net" for the year is shown.

The easy (and the lazy) way to price goods is to mark everything at a uniform margin. Which is not the way of the good price maker.

You've got to sell some goods cheap on account of competition. You've got to sell others cheap for advertising effect. To offset these one must sell a lot of goods at a really good profit or the net will be nil.

Unfortunately the goods one sells at close prices are usually the biggest sellers.

Suppose your expense of doing business is twelve per cent. on sales. A sound retail business ought to make at least eight per cent. net. That means you must average twenty per cent. on sales.

Every time you sell a dollar's worth of goods at 10 per cent. margin you really lose; you've got to sell another dollar's worth at 30 per cent. to make up. When you sell a dollar's worth at cost, you should sell another dollar's worth at 40 per cent., or two dollars' worth at 30 per cent.

TRADE NOTES.

Oswego, N. Y.—George W. Douglas, a local Hardware dealer, has purchased the stock and fixtures of the gas and plumbing establishment conducted in the Pierce Block in Bridge Street by Harmon A. Wightman for several years past. The stock and fixtures will be transferred to the Douglas store. Mr. Wightman will be employed by Mr. Douglas.

Rockville, Conn.—The Barber Hardware store was sold to Charles E. Harris for something over $9,000. Mr. Harris has been here many years in charge of mechanical arrangements at the American mills.

Sidney, Ohio.—Willis Taylor has sold his Hardware store at Jackson Center, and will open a stove store here.

Sidney, Ohio.—Yinger Bros. have sold their implement store to W. C. Quellhorst, of Kettlerville.

West Liberty, Mo.—William Dillie has purchased the Black Hardware store and in future will conduct the same.

A Long (K)Night In HARDWARE

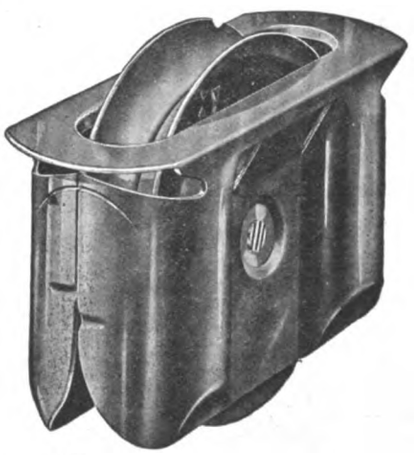
¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*



¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent;* enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

CARY MANUFACTURING CO.

19 and 21 Roosevelt St., New York.

BUILD UP YOUR SAW TRADE.

You can easily do it if you handle **Atkins High Grade Silver Steel Hand Saws.** Their superiority and fine cutting qualities have firmly established an enviable reputation among carpenters and users of hand and small saws. First class mechanics prefer them for fine work above all others.

ATKINS ALWAYS AHEAD!

Atkins High Grade Silver Steel Hand Saws excel in Material, Temper, Workmanship, Design and Finish. Nothing overlooked in manufacture that adds quality to the saw.

E. C. ATKINS & CO., Inc.,

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

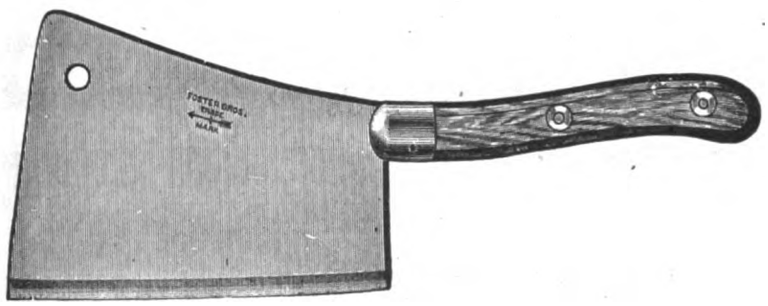
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

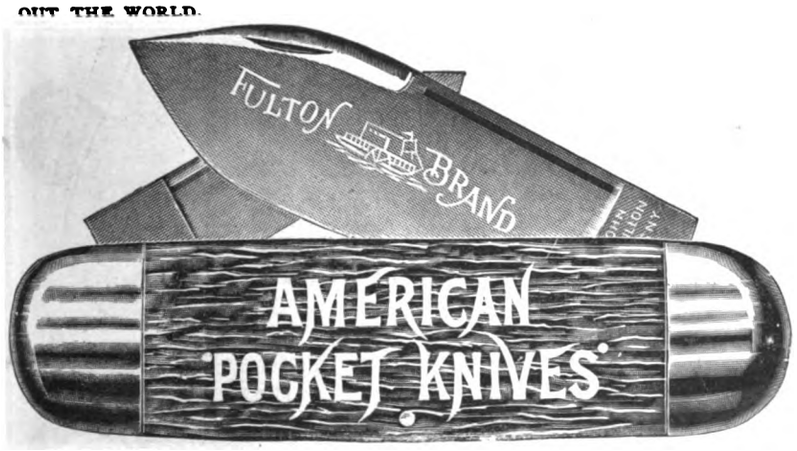


has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.



These Tools are recognized in the Markets, Packing Houses and Abattoirs throughout the United States as the standard of excellence, quality being the first consideration. We carry in stock every style and size of Knives, Cleavers and Steels used in cutting meat; also Knives for kitchen use in Hotels, Restaurants and for domestic purposes.

FRIEDERICH DICK'S MAGNET DIAMOND STEELS.

By careful workmanship and the use of a special steel in their manufacture THEY HAVE BECOME FAMOUS THROUGHOUT THE WORLD.

Finest Quality American Pocket Cutlery in large variety. Knives that are good sellers and will give satisfaction to the user.

ESTABLISHED 1835

JOHN CHATILLON & SONS, New York City.

NOT SATISFIED

Hardware Dealers who have been handling the **"Blackstone Rotary" Washer,** are not satisfied—**they want more.**

They tell us the women like 'em. Many prefer them to other makes because the **Blackstone Rotary** is less tiring and more time saving.

Saves clothes too, and washes them clean—so clean as to satisfy the most scrupulous.

Blackstone Rotary.

Could tell you more about it; supposing we send you our catalogue, it tells a convincing tale.

Our washers have given satisfaction to dealer and consumer for 27 years. They still give satisfaction.

Be sure and get our prices for 1904.

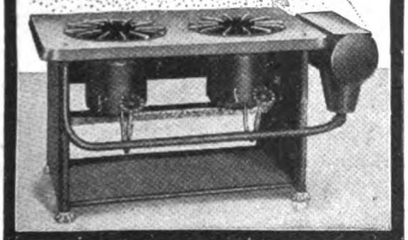
WHY IS THE **O. K.** THE BEST ROTARY WASHING MACHINE?

—BECAUSE—

1.—It is the only Rotary washer that has **Revolving Steel Ball Gearing**, reducing the friction and thus making machine so light running and almost noiseless.

2.—The tub is made of **Louisiana Red Cypress Lumber, cherry finish**; the legs are **solid with tub** (not removable, breakable legs fastened with screws).

3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without rubbing them to pieces.



4.—This washer is made by experienced mechanics, and will outlast any other washer on the market.

5.—The tub has a wringer box fastened with steel brackets.

6.—The lid on the tub closes tight, no escape of steam.

Manufactured by H. F. BRAMMER MFG. CO., DAVENPORT, IOWA.

MF

Note the Coincidence:

The most favored brand of roofing tin, the MF which originated at Margam Forge in South Wales about sixty years ago, is now being produced by the American Tin Plate Co. in its works at Martin's Ferry, Ohio.

At the Martin's Ferry Works the MF old style process has been combined with the "New Method" of finishing Terne Plates. The result of this happy combination has been the U. S. Eagle N. M.

Ask W. C. Cronemeyer, Agent, 1211 Carnegie Building, Pittsburg, Pa., for our new booklet which teems with useful information.

AMERICAN TIN PLATE CO., Battery Park Building, New York.

X-Radium Heater

The X-Radium Heater is an indispensible article in every home. Luxury, comfort, economy all demand it. It's everybody's necessity and everybody can have it. **Retails for only $2.50.**

The X-Radium Heater is really a neat little stove four inches high and seven inches in diameter. Made in two parts, a heating pad filled with X-Radium, (a recent discovery) which has the same affinity for heat which the sponge has for water; a bowl-shaped receiving stand in which the pad is placed. Heats on any stove or range (coal, wood, gas, gasoline or oil.) Costs nothing to operate and lasts a lifetime.

Keeps the Coffee hot; keeps the food hot.
Keeps the flat irons hot; keeps anything hot.
The biggest little thing on earth.

We make the demand. The X-Radium Heater will be generously advertised in the great magazines and weeklies: McClure's, Munsey's, Everybody's, Strand, Review of Reviews, Ladies' World, Housekeeper, Modern Priscilla, Normal Instructor, World's Events, Collier's Weekly, Literary Digest, etc., during February and full page ads will appear in the March issues of Ladies' Home Journal, Munsey's, McClure's, Review of Reviews, Everybody's, Strand, etc.

As we are making a free trial offer, the popular demand will be vigorous and continuous. Won't you give the order for X-Radium Heaters to your jobber today—or send direct to us, and be prepared to meet the certain demand from your customers?

It pays to be FIRST with a good thing.

HARDWARE

The Standard Tool Co., Cleveland and New York, are distributing an excellent calendar for hanging up in the machine shop equally as well as the office of the factory, while at the same time it exploits the fact that the Standard Tool Co. are manufacturers of twist drills, reamers, taps, milling cutters, etc. Three-quarters of the calendars advertising surface is occupied by a number of useful tables that make the calendar acceptable to the superintendents, master mechanics or shop foreman for whose advantage it will be doubly welcome.

♣

Borneman & Sons, Elkhart, Ind., on January 15th were robbed of 200 pocket knives and razors stamped Robeson Cutlery Co., together with 6 sets of carvers. They offer a reward of $25 for the arrest and conviction of the thief. Any one having knowledge of these goods may wire the above firm "charges collect."

♣

The tabulated scores of the open tournaments held in the United States during the trap shooting season of 1903 show that Mr. L. B. Fleming of Pittsburg, Pa., has the highest average of all in the amateur class. This is an honor that is complimentary to every amateur, and particularly gratifying to the Peters Cartridge Company as Mr. Fleming shot the factory loaded shells of their manufacture.

♣

J. B. Hooper, for some fourteen years with the Humason & Beckley Mfg. Co., also with Pauls Bros. and the Cattaraugus Cutlery Co., a total of twenty-one years on Chambers Street, and W. C. Gilbert, who has had experience in retail Hardware, both in Bermuda, and later with the Manhattan Hardware & Bicycle Co., of this city, have formed a co-partnership and are about to open a store at 307 Eighth Avenue, between 25th and 26th Streets. The new firm expects to be ready for business about February 16th.

♣

As trustee under a mortgage given by the Buckley-Hart Mfg. Co., for the benefit of their creditors, the Detroit Trust Company, Detroit, Mich., are offering for sale their entire properties, consisting of lathes of various descriptions, Cleveland Automatic Machines, power machinery, tools, also the patents, patterns and good will; in fact everything pertaining to each of several interesting and profitable lines of Hardware specialties. The Buckley-Hart Mfg. Company were large manufacturers of lawn sprinklers and other hose articles, mail boxes, stove pipe shelves, sanitary supplies, brackets, also billiard table accessories and cue locks. This sale will afford manufacturers an opportunity to add to their line of products something of an attractive character at a price possibly nominal. Action should be taken without delay if interested.

♣

The fourth annual meeting of the Kentucky Retail Hardware and Stove Dealers' Association will be held in Louisville, Ky., on March 1st and 2d. Headquarters at Lieder-Krauz Hall. No official programme has been issued.

♣

The capital stock of the Lansing Wheelbarrow Co., Lansing, Mich., has been increased to $665,000, this increase being for the purpose of extending their operations in Arkansas, where they are lumbering an extensive tract of timber.

♣

It was a Boston newspaper which made its dramatic critic say, "The toast for Irving, like the toast for olives, must be cut elevated." What the critic wrote was:—"The taste for Irving, like the taste for olives, must be cultivated."

Subscribers should be on their guard against a peripatetic person called F. Rosenberger, says our British contemporary, *The Ironmonger*. After carrying on operations in Belgium, he was lately trading in Amsterdam as the "Continental Trading Stores," but now he seems to have returned to the town of Remscheid, in his native Germany. A few months ago Herr Rosenberger wrote to one of our subscribers (and he has probably sent similar communications to many others), offering for sale electric lamps, mechanical toys, and other novelties. Our subscriber ordered two gross 4½-volt pocket flashlights, and on August 31 he sent a cheque for 9*l.* 15*s.* 5*d.*, as payment in advance. He received neither goods nor acknowledgement until September 9, when, in answer to his threat to stop payment of the cheque, a telegram came from Amsterdam: "It's all right; goods three days going." The cheque was cleared, but no goods came, and on September 18 a telegram sent by our subscriber to the "Continental Trading Stores" asking whether the lamps had been despatched, was returned by the post-office "owing to the addressee having left for Alleestrasse, Remscheid, Germany.

Towards the middle of September our subscriber's heart was gladdened by the receipt, from Amsterdam, of two parcels. But (alas for the vanity of anticipations!) they contained "a miscellaneous assortment of damaged lamps with no globes, bulbs, or batteries." Our long-suffering subscriber once more wrote to the "Continental Trading Stores," who replied that they would "take up the claim with the Dutch Railway." But the Dutch Railway moves exceedingly slow, much slower than does Herr Rosenberger, who, masking his retreat from Amsterdam by carrying on a dilatory correspondence, folded his tent like the Arabs and silently stole away to the Alleestrasse in Remscheid. In that haven, appropriately reminiscent of Mr. Sloper, Herr Rosenberg is probably laying plans for a fresh descent upon our shores. He, no doubt, appreciates Mr. Chamberlain's saying that Britain is the dustheap of the world, and he finds it paying work to rake it for stray cheques.

TENTH ANNUAL DINNER ST. JOHN HARDWARE & IRON ASSOCIATION

The tenth annual dinner of the St. John Hardware & Iron Association was held at the Union Club, St. John, N. B., on Jan. 20th. The tables were decorated in red, white and blue and the menu card was handsomely ornamented with illustrations of the leading specialties of the business. The officers of the association are: President, A. M. Rowan; vice-president, John Keeffe; secretary-treasurer, John J. Barry; directors, W. H. Thorne, Thomas McAvity, R. B. Emerson; dinner committee, A. M. Rowan John J. Barry, J. A. McAvity, J. P. McIntyre.

THE WEATHER IN CORNING, N. Y.

Often there has been some doubt cast upon the weather reports when the several thermometers of the ordinary kind failed to agree upon inspections; but D. F. Fero, of Corning, N. Y., has recently been armed and equipped for the meteorological business by adding to his facilities a Helios-Upton Recording Thermometer No. 200, which does its own registering automatically, and whose records are so complete there is no "going behind the returns." The remarkably cold weather with which Corning was struggling in January by the aid of the No. 200 is no longer regarded in the light of "hearsay" evidence, but has become local history, with a record for every hour in the 24; and it is claimed by the oldest inhabitant that the weather chart of Mr. Fero is such a complete and compact arrangement, containing as it does, the record of the remarkable weather of January 4th and 5th, 1904, it will prove most forceful evidence to back up the narrator who ventures to refer to the "fearfully cold January of 1904."

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review.

Complaint is made by jobbers that orders for immediate shipment are not as frequent as they would like, but orders for future delivery that would indicate the successful character of the Spring demands are so far extremely encouraging, and respond to the sanguine convictions so freely entertained about the coming season's business. The natural and regular channels of trade, it is evident, will be kept fully employed, and the dealer has no fear of carrying his ensign at half-mast. The old fashioned winter weather we have been having for some time has had the effect of clearing out quite thoroughly the stocks of skates, ice creepers, sidewalk cleaners, snow shovels, etc , held by the wholesalers and retailers, so that the manufacturers of these prime seasonable goods may look forward to a demand next winter they can safely make preparations for. The present season has certainly been a favorable one for the Hardware trade, as the continued Arctic temperature has made increased conditions of comfort very desirable, so that from door springs to weather strips and a lot more of Hardware prerequisites have supplied "long felt wants" that in previous winters were "given the go-by."

The Iron and Steel markets, which in their fluctuations have acted on the industrial pulse as though feverish conditions were prevailing, will shortly become settled in their divergences and become convalescent as to clinical symptoms. The markets are considered srfely steady, for the acquisition of material and goods will have to be produced for orders already booked in order to deliver on time and avoid congested conditions. Present conditions are not regarded as favorable for speculative delays and it looks to an ordinary observer that "the man who hesitates is lost."

With cotton quoted at prices the highest in thirty years, and wheat already sold at a dollar a bushel, the agriculturist is loaning his hoarded wealth for mercantile progression at fair rates of interest, instead of paying the moneyed institutions excessive advances to move crops that frequently found the profits difficult to estimate, among the undigested results of a tangle of transportation and commission charges.

The Hardware retailers throughout the country at the present time are having their innings, for in nearly all the States blest by the organization of a State Retail Hardware Dealers Association, they are meeting in Conventions and participating in that community of interests that cannot do otherwise than benefit the dealers who are thus wisely adding to their knowledge of how business can be safely conducted under harmonious influences; in which envy, jealousy and selfishness are advised to retire to the rear, as being founded upon incorrect business principles that are no longer in vogue. Our grandfathers, could they "revisit the glimpses of the moon" and commune with their descendants, would surely think the millenneum had arrived; to see in one family circle, as it were, talking over their differences and throwing oil on the troubled waters of general traffic, the manufacturers, jobbers and retailers; all attending officially or unofficially at the various trade conventions, meeting adverse criticism with smiles, and promoting the reforms in business methods suggested by the retailer as a starting point; who, holding the balance of power, enforces his views by admirable addresses, interesting suggestions or encouraging promises for the future in the interest of reform.

INTERESTING EXPORT STATISTICS.

Iron and steel exports during the month of December, for which the Department of Commerce and Labor, through its Bureau of Statistics, has just presented complete figures, show an increase of $1,597,938, compared with December of the preceding year. This increase, while distributed through a wide range of articles, is found especially in steel rails and locomotives. The total value of steel rails exported in December, 1903, was $203,741, against $21,216 in December, 1902; and of locomotives, $504,684, against $181,571 in December, 1902. Pipes and fittings show an increase of over 100 thousand dollars, the total exports for December, 1903, being $572,991, against $470,425 in December of the preceding year. Wire shows an increase of about 150 thousand dollars, the total exports in December, 1903, being $483,052, against $336,982 in December, 1902. Sewing machines show an increase of about 130 thousand dollars, the total for December, 1903, being $542,661, against $410,633 in December, 1902. Typewriters show an increase of about 115 thousand dollars, the total for December, 1903, being $442,078, against $327,476 in December, 1902. Builders' Hardware shows an increase of nearly 100 thousand dollars, the total for December, 1903, being $1,110,017, against $1,024,813 in December a year ago. Metal-working machinery also shows an increase of about 150 thousand dollars, the total for December, 1903, being $418,828, against $268,482 in December, 1902.

Considering the iron and steel exports in the entire year, the total for 1903 is $99,036,697, against $97,892,036, the total increase having thus occurred in the month of December. Comparing the detailed figures for the entire year with those of 1902, exports of pipes and fittings show an increase of about 800 thousand dollars, the total for 1903 being $5,919,340, against $5,107,183 in 1902. Typewriters show an increase of nearly one million dollars, the total for 1903 being $4,537,396, against $3,575,909 in 1902.

Locomotives for the entire year show a decrease of nearly 900 thousand dollars, the total for 1903 being $3,099,521, against $3,966,007 in 1902. Sewing machines in 1903 showed exports aggregating $5,340,474, against $4,606,794 in the preceding year. Exports of Builders' Hardware in 1903 were $12,141,058, against $11,320,765 in 1902. Electrical machi-

Digitized by Google

nery shows a reduction in exports during 1903 of about 830 thousand dollars, the total for 1903 being $5,104,502, against $5,937,643 in 1902; while metal-working machinery shows an increase of about a half million dollars, the total exports for 1903 being $3,316,088, against $2,863,709 in 1902. Steel rail exports show a decrease of nearly a million dollars for the entire year, the total for 1903 being $937,779, against $1,902,396 in 1902.

In imports of iron and steel the figures of December show a marked decrease as compared with December, 1902, the total value of all iron and steel imported, excepting ore, being in December, 1903, $1,739,486, against $4,701,865 in December, 1902. This decrease is largely in pig iron, of which the importations in December, 1903, were $307,989, against $1,940,802 in December, 1902. Ingots, blooms, and bars also show a decrease, the total for December, 1903, being $113,022, against $682,166 in December of the preceding year; while imports of tin plates in December, 1903, were $157,110, against $419,995 in December, 1902. Machinery showed a total importation in December, 1903, of $236,715 against $398,940 in December, 1902, For the entire year the figures of imports show little change as compared with last year, the total of all iron and steel imported in 1903 being $41,253,333, against $41,468,826 in 1902.

Total exports of iron and steel, December:

1903	$9,353,950
1902	7,756,012
Increase	$1,597,938

Total exports of iron and steel for calendar year:

1903	$99,036,697
1902	97,892,036
Increase	$1,144,661

Total imports of iron and steel, December:

1903	$1,739,486
1902	4,701,865
Decrease	2,962,379

Total imports of iron and steel for calendar year:

1903	$41,253,333
1902	41,468,826
Decrease	$215,493

COMMERCE WITH HAWAII AND PORTO RICO.

The value of the merchandise passing out of the ports of continental United States in 1903 was more than a billion and a half of dollars. While the figures issued by the Department of Commerce and Labor through its Bureau of Statistics show "total exports" of $1,484,681,995, they do not include the shipments from the United States to Hawaii or Porto Rico, and if these were added they would bring the grand total to over a billion and a half dollars.

While the omission of the shipments to Porto Rico and Hawaii from the grand total of exports is fully justified by the fact that those islands are now customs districts of the United States, it is proper to include those shipments with the total of exports in considering the growth of the export trade during recent years, since prior to 1900 the imports from and exports to the Hawaiian Islands were included in the statement of foreign commerce of the United States, and that this was also true with reference to the imports from and exports to Porto Rico down to July 1, 1901. Since those dates, however, the commerce with those islands has not been included in the statements of foreign commerce, but stated separately by the Bureau of Statistics in a group of tables showing the commerce between the United States and its noncontiguous territory. Commerce with the Philippine Islands, Guam, Tutuila, etc., which have not yet been made customs districts of the United States, is still retained by the Bureau of Statistics in its totals of foreign commerce, though the details are separately stated in the group of noncontiguous territories above referred to, as are also the detailed figures of trade with Alaska.

Any attempt to compare the export figures of 1903 with those of years prior to the year 1900 for the purpose of determining the growth or percentage of growth would, for the reasons above named, require the inclusion of the figures of the shipments to Porto Rico and Hawaii in 1903. They are, respectively, to Porto Rico, $11,819,895, and to Hawaii, $11,812,142, or a total of $23,632,037. Adding this to the total of exports to foreign countries in that year, given by the Bureau of Statistics as $1,484,681,995, would bring the grand total to $1,508,314,032, the sum necessary to be used for comparative purposes in stating the growth of our export trade as compared with the years prior to 1900.

Turning to the import figures and adopting the same plan of including the merchandise received from Hawaii and Porto Rico, the figures for 1903 exceed one billion dollars for the first time in any calendar year. From Porto Rico the value of merchandise received into the United States in 1903 was $10,152,923, and from Hawaii $29,519,731, and those, added to the imports from foreign countries in that year, bring the total merchandise received into the ports of the United States in 1903 up to $1,035,119,829.

The necessity of including the figures of merchandise received from Hawaii and Porto Rico in attempting to compare the growth of importations is identical with that above outlined with reference to exports, all import figures prior to 1900 having included the merchandise received from Hawaii and Porto Rico.

DEATH OF EDGAR UNDERHILL.

Edgar Underhill, of Underhill, Clinch & Co., 94 Chambers Street, New York, died at his home, 170 West Seventy-sixth Street, Saturday, January 23. Death came as a surprice to his many friends in the Hardware trade, for few knew of his illness. Mr. Underhill was born in Yonkers, N. Y., September 21, 1840, but moved to New York City when a child, and lived there continuously. He was a lineal descendant of Capt. John Underhill, who landed in Boston in 1630, and subsequently commanded the Dutch troops. John Underhill moved to Oyster Bay, Long Island, and settled on a farm, which is still in the Underhill family. Nathaniel, one of the sons of Captain John, settled in Westchester in the Bronx, and Edgar was a descendant of what is known as the Westchester branch. His father was David Hunt Underhill, and his mother Harriet Underhill. Edgar Underhill's family consisted of his wife, son, Frederic E., and daughter, Florence. His attachment to the family and home were marked traits, and in the Hardware Club, of which he was an esteemed member, being one of the early (1893) members, it was a daily scene for father and son to dine together, frequently with friends. Of a natural hopeful and genial disposition, the strictest integrity characterized every transaction of his extensive business. Mr. Underhill began his business life with Paul C. Coffin, a well-known Hardware merchant, and later entered the employ of William F. Hyatt, with whom he was assocated until 1876, when a partnership was formed with Oscar A. Spencer, under the firm name of Spencer & Underhill, which firm was succeeded in 1884 by Underhill, Clinch & Co., composed of Edgar Underhill, Alfred D. Clinch and William W. Glover. Mr. Clinch and Mr. Glover were employees of Spencer & Underhill, Mr. Clinch since 1877 and Mr. Glover since 1876. In 1900 Mr. Underhill's son, Frederic E., entered the firm, and in 1902 Mr. Glover retired. Mr. Underhill was intensely American in all his characteristics, fully imbued with the deepest interest for everything that pertained to the history and welfare of his devoted country. He was blessed with a love of the domesticity of his home, was possessed of generous impulses, giving charity unostentatiously, his left hand never knowing what his right hand dispensed; a Republican in politics and an Episcopalian in religion. He was a member of the Sons of the Revolution, Society of Colonial Wars, Society of War of 1812, Veteran Corps of Artillery, New York Historical Society and Metropolitan Museum of Art. The funeral services were held in the family home, New York, January 26, the interment being in Sleepy Hollow Cemetery, Tarrytown, N. Y.

INTELLECTUAL LIBERTY.

I do not know what inventions are in the brain of the future; I do not know what garments of glory may be woven for the world in the loom of the great ocean of discovery; I do not know what science will do for us. I do know that science did just take a handful of sand and make the telescope, and with it read the starry leaves of heaven; I know that science took the thunderbolts from the hands of Jupiter, and now the electric spark, freighted with thought and love, flashes under the waves of the sea; I know that science stole a tear from the cheek of unpaid labor, converted it into steam, and so created a giant that turns with tireless arms the countless wheels of toil; I know that science broke the chains from the human limbs and gave us instead the forces of nature for our slaves; I know that we have made the attraction of gravitation work for us; we have made the lightnings our messengers; we have taken advantage of fire and flames and wind and sea; these slaves have no backs to be whipped; they have no children to be stolen, no cradles to be violated. I know that science has given us better pictures and better books; I know it has given us better wives and better husbands, and more beautiful children. I know it has enriched a thousand-fold our lives; and for that reason I am in favor of intellectual liberty.—ROBERT G. INGERSOLL.

CONVENTION PROGRAMME FOR MEETING OF IOWA RETAIL HARDWARE DEALERS' ASSOCIATION.

The Iowa Retail Hardware Dealers' Association this year present their most attractive programme with the hope and expectation of bringing every Hardware dealer in the State within the fold.

WEDNESDAY MORNING SESSION, FEBRUARY 10, 10:00 A. M. ..

Meeting of Executive Committee of Hardware Association.

11:00 A. M.

Meeting of Directors of Insurance Association.

WEDNESDAY AFTERNOON SESSION, 2:00 P. M.

Organization.
Enrollment of Members.
Payment of Dues.
President's Address.
Appointment of Committees:—Constitution and By-Laws, Resolutions, Question Box, Legislative, Auditing, Nominating.
Report of Secretary.
Report of Treasurer.
Question Box.

THURSDAY MORNING SESSION, FEBRUARY 11, 9:00 TO 10:30 A. M.

Executive Session, Members Only.
"Talk," by M. L. Corey, Secretary National Retail Hardware Dealers' Association.
Discussion.

10:30 A. M., OPEN SESSION.

Paper—"Credits," Frank R. Currie, Mason City
Discussion.
Paper—"Why Field Fencing Should be Handled by Hardware Dealers," L. A. Gnam, Carroll.
Discussion.
Paper—"Stoves: Shall We Let This Department of our Business Go Into the Hands of the Installment Houses?" Walter C. Baumgartner, Dubuque.
Discussion.
Paper—"Paints: Why This Business Belongs to the Hardware Dealer," G. L. Miles, Grinnell.
Discussion.
Question Box.

THURSDAY, FEBRUARY 11, 2:00 P. M.

Address—"Mutual Insurance," by Hon. A. T. Stebbins, Director of Minnesota Hardware Mutual Insurance Association, and Treasurer of the National Hardware Dealers' Association, Rochester, Minn.
Vice-President L. Lindenberg of Dubuque will make a report of our Insurance Association work to date.
Paper—"How to Make the Field and Garden Seed Department of Your Business Profitable," C. E. Haas, Le Mars.
Discussion.
Paper—"Can Furnaces Be Successfully Handled in a Hardware Store?" J. F. Doty, West Liberty.
Discussion.
Question Box.

A banquet will be tendered in the evening by the Des Moines Hardware and Implement Jobbers and Manufacturers Governor Cummins is expected to be present.

FRIDAY, FEBRUARY 12, 9 A. M.

Paper—"Heating and Plumbing."
Discussion.
Paper—"Hardware and Harness," J. D. James, Storm Lake.
Discussion.
Paper—"Hay Tools in a Hardware Store," F. W. Woodruff, Correctionville.
"Talk," M. L. Corey, Secretary National Association.
Report of Committees.
Election of Officers.
Adjournment.

FRIDAY, FEBRUARY 12, 2:30 P. M.

Meeting of Executive Committee of Hardware Association and Insurance Association at the Kirkwood Hotel for the purpose of cleaning up unfinished business of the convention and planning a vigorous campaign for 1904.

MISSOURI RETAIL STOVE AND HARDWARE DEALERS' ASSOCIATION.

The sixth annual meeting of the Missouri Retail Stove and Hardware Dealers' Association will be held in St. Louis, Mo., February 23d and 24th, 1904, at Athletic Club Hall, Fourth and Washington Avenue. The programme to be carried out, subject to transposition, is as follows:

9.30 A. M., FEB. 23D.

Call to order. Roll call.
Address of Welcome—R. H. Meyer, President St. Louis Retail Hardware Association.
Response—Taylor Frier, President of Association.
Appointment of Committees on Press, Resolutions, etc.
Recess for admission of new members, payment of dues and becoming acquainted.
Short addresses by the representatives of the press and trade interests.
Annual address—President Taylor Frier, Louisiana, Mo.
Annual Report—Secretary Fredk. Neudorff.
Report Executive Committee—W. T. Shoop, Chairman, Richmond, Mo.
Discussion and action on reports.

Lunch.

1.30 P. M., FEB. 23D.

Paper—"Successful Advertising"—O. W. Johnston, Marshall, Mo.
Discussion.
Symposium of Experiences with Stove Troubles, presented in papers, letters and short talks by all members and reliefs suggested by stove manufacturers present.
Discussion.
"Value of Missouri Garnishment Law"—M. A. Wengert, Kansas City, Mo.
Discussion.
Paper—"How Best to Meet Department Store and Catalouge House Competition"—E. A. Demeter, Macon, Mo.
Discussion.
Address—Work Done by National Association—M. L. Corey, Argos, Ind., Secretary National Retail Hardware Association.
"Status of Mutual Fire Insurance as Affecting Our Association"—Fredk. Neudoerff, St. Joseph, Mo.
Adjournment.

8.00 P. M., FEB. 23D.

Banquet and reception to the Association under auspices of St. Louis Retail Hardware Dealers' Association.

9.30 A. M., FEB. 24TH.

Discussion of insurance matter and formation of the company.
General discussion all topics.
Presentation of reports of committees.
Election of officers.
Appointment of standing committees.
Selection of place for next annual meeting.
Adjournment.

RECENT TRADE PUBLICATIONS.

WHITE, VAN GLAHN & Co., 15-17 Chatham Square, and 49 East 42d Street, New York, in November, 1903, issued their catalogue No. 26, included in the contents of which are the J. B. Addis & Sons' carving tools, for which they are sole agents in the United States; J. H. White files and rasps; the genuine French Riffler rasps; India, Washita and Arkansas Oil Stones; carriage clamps and sloyd knives. Beside the above, White, Van Glahn & Co. handle mechanics' tools of all kinds, Builders' Hardware, pocket and table cutlery, supplies for factories, mills contractors and railroads; nails, bolts, screws, rivets, glue, sand paper, etc., etc., in fact, anything and everything in the line of Hardware, Cutlery and Tools. In the above-mentioned catalogue is given a very extensive chart which folds up to the size of booklet, illustrating the sweep of carving tools up to 1 inch, which will be found valuable in making up orders for these goods. They carry in stock tools Nos. 1 to 6 up to 2 inch; Nos. 7 to 8 up to 1½ inch; Nos. 9 to 20 up to 1¼ inch; Nos. 21 to 45 up to 1 inch. For further information, address the above firm.

DEMERITT & PALMER PACKING Co., Waterbury, Vt., have recently issued, among their advertising matter, a small envelope size circular and a large four page folder, devoted entirely to the holdfast clothespin which they manufacture, and which they claim is practically indestructible, is perfectly rigid, and also that clothes put on the line with the Hold-Fast can never blow off. The spring is made of galvanized steel wire, and they guarantee them not to injure the most delicate fabric. The company suggest on their folder that a clothespin to be entirely effective must have the gripping strength necessary to hold the article in place adjusted so as not to become impaired by usage or to cause the pin to split or to injure the goods intended to be held to the line by too great pressure on the rope, also that weather conditions should not make it difficult to remove them from the line. They state that it is their belief that the Holdfast combines all of these qualities to a very great degree, and that one trial will convince the most skeptical that what they say is said in a very conservative manner.

FRANK MOSSBERG Co., Attleboro, Mass., have recently issued their 1904 catalogue of wrenches and bells. Their varied and extensive experience in the designing and construction of special tools and dies for this class of work leads them to claim the title of experts, and unsurpassed facilities for sheet metal stampings and punchings of every variety. A machine shop for the manufacture of light special machinery and tools is a department of their business to which they give particular attention, making a specialty of mechanical development of experimental machinery. In recognition of a growing demand for a special finish on wrenches, they have adopted a special mottled finish which presents a surface with variable shades. They supply their Nos. 1 and 2 Sterling, 10 and 11 Diamond, 15 Alderman and No. 25 Eaglet, with mottled finish at same price as nickel plated.

CALDWELL MFG. Co., Rochester, N. Y., have issued a very attractive catalogue, included in the contents of which are sash balances, window balances, show case balances, Acme aluminum bronze sash ribbon, Empire side sash lock, Acme casement window fasteners, Empire door holder, Eureka door holder, Acme door and car door stops, Caldwell door holder and door spring, Caldwell screen door check, sink cleaners, rule gauge, Gem nutmeg grater, etc., etc., all of which are illustrated and listed and fully described. The company guarantee that when sashes are carefully weighed and their directions followed for putting them in, the balances will carry sash perfectly, and to replace, at their factory, any broken or imperfect ones for ten years free of charge.

THE FORD AUGER BIT Co., Holyoke, Mass., are sending out a neatly arranged catalogue and price list of their patent bits and augers. The Ford auger bit has been a success since its introduction on account of its patented concave twist, which makes it clear itself in any wood. The fact that all double twist bits then in common use had to be withdrawn in order to remove chips was a great drawback, and this advantage of their patented single twist bit was immediately recognized by all progressive carpenters and mechanics. Since that time the Ford people state that they have been constantly striving to improve their goods, and now they claim them fully warranted superior to any other style on the market for all kinds of work. Each bit is forged from the best quality of crucible cast steel under heavy trip hammer blows, which process makes the grain of steel finer and tougher, thus insuring a stronger and better tool than can be made by the ordinary process of twisting. The catalogue contains illustrations, descriptions and list prices of auger bits, ship auger bits, car bits, ship auger car bits, ship augers, ring ship augers, machine bits, ship auger car machine bits, boring machine augers, screw driver bits and auger bits in sets.

WILLIAMS MANUFACTURING Co., Northampton, Mass., makers of Baskets since 1850, have issued their 1904 catalogue of very fine appearance both inside and out. The illustrations, of which the book is full, are excellent, being half-tone plates made from actual photographs of the baskets themselves, enabling one to obtain a very good idea of many of the different styles of baskets they manufacture. The book is well printed on very fine paper. This is their 55th annual catalogue and the company state that they have endeavored to make it clearer, more attractive and in every way better than its predecessors. During the past year they have purchased many new pieces of machinery and have replaced old machines with modern ones, sparing no expense to better their product and to live up to the enviable reputation they have acquired during the past half century or more. Catalogue may be had for the asking.

COOPER & MCKEE, 113-121 Lorimer Street, Brooklyn, N. Y., are the authors of two exceedingly attractive pamphlets very handsomely presented. One is their 1904 illustrated catalogue of Refrigerators and Ice-Chests, including the New Columbia, Champion, Household, New Domestic Pine Refrigerators and Chests, and several others, illustrating and describing each one in detail. One page is devoted to portraying the application of their "Neptune Insulation" with which their glass-lined and New Columbia Refrigerators are fitted, and also of their patent syphon which is made of heavy cast iron screwed to the bottom of the refrigerator and so balanced that it is always in position. The other of the two catalogues is devoted to their Opalite glass-lined refrigerators, containing 10 pages, on each of which are two illustrations of their very high grade productions. Also they have issued a very tastefully arranged booklet, oblong in shape, having a heavy glazed cover somewhat larger than the pages within, descriptive of their White enameled refrigerators, made of seasoned ash lumber; having Roman gold finish brass Hardware, Neptune hair insulation, removable ice chambers, removable waste pipes, sliding shelves, self retaining casters, automatic syphons, swinging base boards and finished with coach varnish. All measurements given in the booklet are extreme outside, and all refrigerators and chests are double boxed. They do not make any single wall ones. The illustrations throughout each of the above-mentioned books are accompanied by list prices. Catalogues forwarded upon request.

Claim for Damages Against Corporation.

QUESTION: During a snow flurry a man was walking down a very slippery sidewalk. He fell, broke his hip and being 70 years of age will probably be a cripple for life. Has he any claim for damages against corporation to whom this sidewalk belonged?

REPLY: The question of liability of municipal corporations for injuries occasioned by falling on slippery streets or sidewalks, is one on which there have been frequent and conflicting decisions by the courts of the several States. It is well settled in most jurisdictions that a city or village does not become liable merely because the walk or the street is slippery. The mere presence of a coat of ice on the sidewalk, particularly during a snow storm, when it is not to be expected that the sidewalks would be cleared, is not in itself sufficient to create any liability against a municipality. In order to hold a city or village liable in such case, it must be shown that the proper official had notice of the dangerous condition of the street, or that the unsafe condition continued long enough to be notorious. A municipality would not ordinarily be liable for example for not removing ice formed on the day the accident occurred or on the night before, or snow which had fallen within forty-eight hours. The ground of liability in all such cases is the failure of the corporation to exercise due care in removing snow and ice, and a reasonable length of time must always be allowed for the purpose of cleaning the walks or highways and rendering them safe. Whether in any particular case the facts are such as to make it presumable that the city or village had notice of the dangerous condition of the walk and had notice of and time to obviate the dangerous condition of the walk, is ordinarily a question depending on the facts of each particular case, in respect of which no general rule can be laid down. In some States, as Ohio, municipal corporations are held liable for injuries occasioned by snow and ice on sidewalks and highways only under very exceptional circumstances; the general rule being that it is not reasonable to impose on these bodys the duty of clearing away ice and snow. It is well settled at common law and in the absence of statute, that no obligation to repair streets or sidewalks rests upon the adjoining lot owners; but the duty, if it exists, rests solely upon the city or village which maintains the streets.

In considering the state of facts you suggest, it would be a question whether it might not be contributary negligence for a man of seventy years to attempt to walk on a sidewalk which he knew to be of a slippery and dangerous character. Much would depend upon the circumstances of each case and it would be for the jury to determine whether he was in the exercise of due care at the time of the accident. If he was not of course he could obtain no recovery for damages against anybody.

Real Estate—Possession Under Oral Contract to Convey.

QUESTION: I sold a three-acre piece of land to a man for a building place. He said to make out the deed and he would pay me for it. He was not married when we traded. After I sold the land to him he built a house and then married, and went to live on the place, and has been living there over two years. He has not paid for the land yet, and does not speak of paying for it now. I wrote out the deed soon after we traded, and have spoken to him about it several times. I pay all the taxes on the land yet. Can he hold it or any part of it, by possession for any length of time by law? Please let me know what to do in the case.

REPLY: We are of the opinion, from the statement contained in your letter, that if you did not deliver the deed to your proposed grantee you can treat him as a tenant at will, and upon due notice to him to deliver up the premises to you, you may bring an action of ejectment. You can also bring an action for rent of the premises for the time that he occupied the same. But if you did deliver the deed to him he obtained a title by reason of such delivery, and you cannot, unless there was fraud connected with the transaction (which, from your statement, does not appear to be the case), set aside the conveyance. If he claims adversely to you, he would obtain a prescriptive right after twenty years' possession. It was your duty to see that you were secured for the amount of the purchase price before you delivered the deed to your grantee. You should have taken a purchase money mortgage on the property. We would advise you to have your grantee and his wife sign a mortgage to you for the amount agreed upon as the purchase price, less any payments which may have been made. If you have received a purchase money mortgage when you delivered the deed, the wife's signature would not be necessary as her dower right would only be subject to this mortgage; but if a mortgage is now made, unless the wife signs the mortgage, you, as mortgagee, would come in only subject to the wife's dower. As to the taxes, it was your folly to pay them. Considering all the circumstances, we think the best plan for you to pursue to obtain both purchase price and interest, and the amount of taxes paid by you, would be to sue your grantee, obtain judgment and levy an execution against the property.

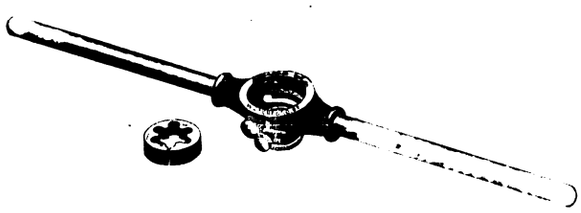
Insurance—Suicide—Limiting Recovery.

In a case recently decided by Judge Phillips in the United States District Court at Kansas City, suit was brought to recover upon a policy of life insurance for $5,000, which contained a clause stipulating that only $500 should be recovered in case of the suicide of the insured. The court held in this case (that of one Whitfield, who killed himself) that although the statutes of Missouri provided that insurance companies may not make suicide a defense in refusing to pay a policy, yet inasmuch as the pleading of the contract voluntarily entered into by the parties went merely to the question of the amount of the recovery and not to defeat it, the plaintiff was only entitled to recover the sum of $500.

False Pretenses—Accident—Statement.

In the case of The Commonwealth vs. Benton, recently decided by the Supreme Judicial Court of Massachusetts, it appeared that a passenger on a railroad train received substantial injuries for which the railroad company admitted its liability. The passenger, in order to defraud the company, made a false statement of fact as to the cause and the extent of his injuries, knowing such statement to be false, and the railroad, in reliance upon the statement, paid him a sum of money in settlement of his claim for damages. The court held that the passenger was guilty of obtaining money under false pretenses, and that in a prosecution for that offense it was not error for the court to refuse to submit to the jury the question what he would have been entitled to for the injuries in fact received by him, such question not being material to the issue. The court ruled that it was no defense to a prosecution for false pretenses that the passenger was in fact substantially injured in the collision, when false statements of fact as distinguished from statements of opinion as to the extent of the injury were made with intent to defraud and a settlement by the railroad company was induced thereby.

FOR SHAME TO CRY BAD TIMES, FOR SHAME!



Aggregate wealth of the country, one hundred thousand million, or one hundred billion; see it in figures: $100,000,000,000. The capita wealth is $1,245.00 for each man, woman and child on the soil. The country's export will go over $1,400,000,000. Total deposits in American savings banks, $3,000,000,000, three thousand million. Bank clearings in 1903 were one hundred and fourteen thousand millions. The wealth of the country is more equally distributed between the people, and more equally distributed as to territory than ever before. There are plenty of places west of the Mississippi full of money, that would not know what Wall Street was unless some one told them. Down with the pessimist. Down with the coward. Down with the discontented, the lazy, the shiftless, thriftless, and wave this flag for the brave, the worker, the industrious, the saving man, the thrifty woman,—pitch in, work hard, and destiny will be on your side.—JOHN A. WALKER, in *Graphite*.

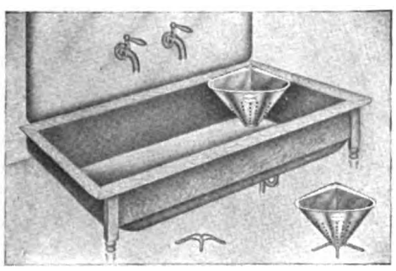
NEW GOODS AND SPECIALTIES.

HOLROYD'S FORK STEM, STOCKS AND DIES.

Holroyd & Co., Waterford, N. Y., are the manufacturers of the useful Stock and Dies which we illustrate in this article, designed for threading thin steel tubing and other bicycle work. It is also especially adapted for threading thin brass tubing. It is made in 23-inch holder, with 2 inch diameter by ⅝-inch thick, round adjustable die threading 1 inch, 24



HOLROYD'S FORK STEM, STOCK AND DIES.

and 1-inch guide. Extra dies are also made for possible service, and also for bicycle work and standard bolts. Write for recently issued catalogue of stocks and dies and other threading tools.

VROOMAN SANITARY SINK STRAINER.

We illustrate herewith, showing its manner of application, a popular kitchen appliance manufactured by F. H. & E. B. Vrooman, 225 Dearborn Street, Chicago, which is made from plain or japanned tin, and is placed upon the market through the Hardware and housefurnishing goods trade. It is a receptacle designed to receive the waste material that was formerly permitted to accumulate in a kitchen sink,

VROOMAN SANITARY SINK STRAINER.

which is now confined to this strainer. Through holes in its front and bottom, water and other liquids flow from it into the sink, there to be drained off in the pipes, and the sink is thus kept free from filth. The contents of the strainer at any and all times can be readily removed and thrown in the refuse barrel for final disposition. An appliance so healthful in its application and results should form an evolution in kitchen economy, and we can readily understand why its sale is a large one.

CLARK & HORROCK'S NEW CASTING RODS.

To meet an increasing demand for shorter rods for Bass fishing, which every succeeding year is becoming more popular, Clark, Horrocks & Company, the fishing tackle manufacturers of Utica, N. Y., have brought out a number of new

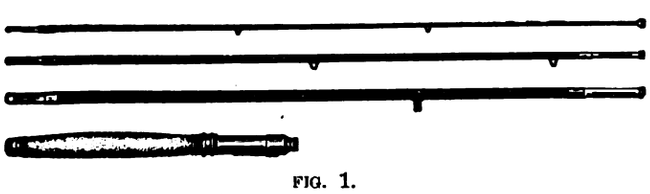


FIG. 1.

patterns which we illustrate in the course of this article. By making these rods with the detachable grasp and three joints, a very compact short rod is had. We illustrate below a few of these patterns. As shown above in Fig. 1, No. 875D has three joints, and a detachable cork grasp. This rod is made from the very best Lancewood with light color finish, is closely wound with silk and has solid nickel mountings with reinforced ferrules. It is claimed to be in every way a first-class rod and is designed to be retailed for $3.50. Fig 2, No. 873D is a new casting rod made from yellow Lancewood with

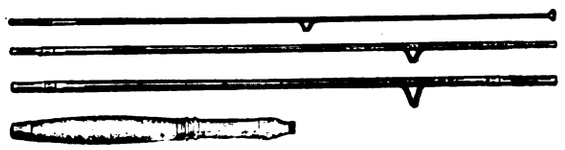

FIG. 2.

detachable cork grasp and mounted with large casting guides, and is intended for a leader at $2.00. No. 871, not illustrated, is the same style rod as above, but made in three joints without detachable grasp and can be retailed as low as $1.25.

FIG. 3.

To meet the demand for a low-priced well made casting rod, Clark, Horrocks & Company, have brought out their new No. 270 as shown above which is made from Calcutta Bamboo, having the large casting guides and runs in length from 4½ to 5½ feet and retails at $.85. The above illustrations are only a few of the extensive line of rods that are manufactured by this concern, who will be pleased to send their catalogue on request.

BATAVIA IMPROVED CLAMPS.

Batavia Clamp Co., Batavia, N. Y., who are the manufacturers of the large line of Colts Quick Adjusting Self-Locking Clamps that have been before the Hardware trade for many years, have recently greatly improved their production of these popular specialties, adding in some cases clamps for special uses which have been demanded by the trade. Mr. Colt, the inventor of these labor saving appliances, is continually adding to the efficiency of these clamps by improvements carefully guarded by patents. The principle used in the construction is the eccentric lever where the pressure is applied instantly, directly and efficiently, thus avoiding the liability of displacing the work occasioned by turning a slow-

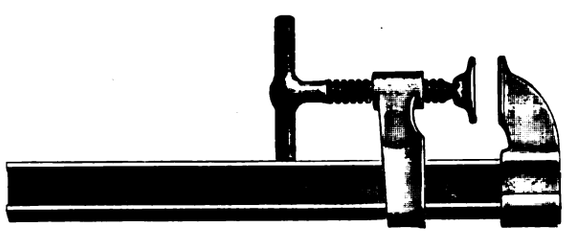

FIG. 1.

ly moving screw. Fig. 1 represents the "U Bar" clamp which is made of the best Bessemer steel plate pressed into U form while cold, which process stiffens the bar. It has a fixed head supporting an eccentric lever, and a movable jaw which has a strong fixed tongue pressing an the back of the U bar, making a broad strong grip. The eccentric lever gives instant action, and the tongue holds the jaw so firmly that continued jarring, it is claimed, will not loosen the clamp, and the U shape greatly increases the strength of the bar. Fig. 2 shows the Batavia Finishing Clamp, which has

Digitized by Google

a flanged steel bar with a fixed jaw and a movable head with bar hand screw operating an adjustable button. The movable head is equipped with a double locking device that has advantages over the fixed head on some kinds of work. It is

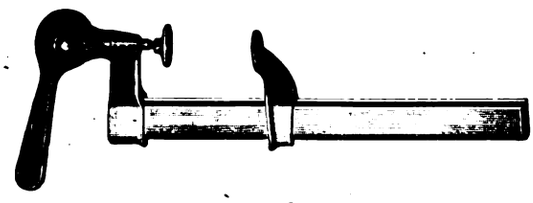

FIG. 2.

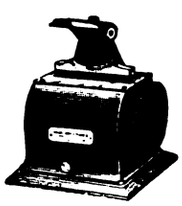
claimed that it will not loosen its grip even under the continuous stroke of the hammer, and having a smooth end there is

FIG. 3.



nothing to prevent the use of the auger or brace bit as it is well adapted to general wood work. No. 3 illustrates the Manufacturers' and Builders' Steel Bar Vise Clamp. This clamp is recommended for use to all manufacturers of wood requiring a strong clamp for wide work. The flanged steel bar has a fixed head supporting a strong crank steel screw operating a vice jaw, and the improved movable jaw. There is no slack to take up as in case of notches or holes which are apt to weaken the bar, the jaw being held firmly by its compound grip. Placing the face of the clamp on the work prevents springing or buckling under extreme pressure. It can be made any length desired.

DEFIANCE DRAFT AND CHECK PROTECTOR.

The Crown Stationery Company, 60 Wabash Avanue, Chicago, Ill., are manufacturing the Improved Defiance Draft and Check Protector of which we give an illustration herewith. It is a novel and ingenious specialty which appeals strongly to every man who owns a bank account. It is a perfect insurance against check raisers as it prints with indelible acid proof ink a line similar to this across every check.

NOT OVER ONE HUNDRED DOLLARS $100

The method of limiting the value of one's signature to the

DEFIANCE DRAFT AND CHECK PROTECTOR.

amount written infallibly prevents the raising of the check in the manner by which it is usually accomplished, making the check at the same time assume a more businesslike appearance. It is a very simple machine to manipulate, only two movements necessary—the setting of the dial and a light blow with the palm of the hand. Protection is not only afforded by printing with indelible ink across the face of the check but also by the embossing of the amount on the back. The machine forces the ink into the body of the paper by breaking the fibre but not destroying the document, making it impossible to remove the ink or make alterations. A bottle of indelible ink is furnished with every machine. It is stated that this method of protecting checks and drafts has been adopted by the U. S. Treasury Department, the Bank of Montreal and its numerous branches throughout Canada, as well as Banks, Merchants and Manufacturers everywhere.

THE X-RADIUM HEATER.

Novelty Mfg. Company, Jackson, Mich., are placing upon the market the novel heater shown in the accompanying cuts. It consists of two parts: the heating pad filled with X-Rad-

FIG. 1.—THE X-RADIUM HEATER.

ium, shown in Fig. 2, and the stamped steel bowl-shaped stand, Fig. 3, having an asbestos mat in the bottom, in which the X-Radium pad is placed after being heated. X-Radium is referred to as a substance possessing a natural affinity for the concentration of heat and as quickly gathering to itself the heat rays in apparently unlimited volume and retaining them for a long time. The pad is placed on a stove or range while

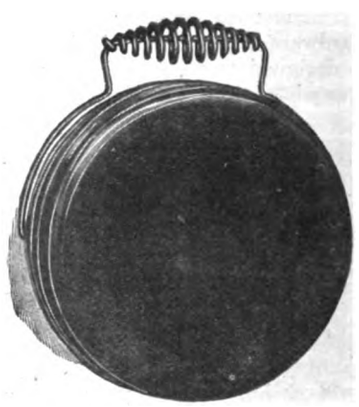


FIG. 2.—HEATING PAD.

the meal is being prepared. It is stated that the amount of heat which the pad will absorb in 20 minutes will be enough to keep coffee, etc., hot for two hours. It is also used for keeping hot vegetables, meats, pancakes, waffles, etc. Both

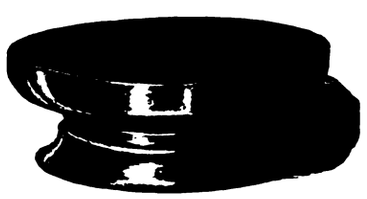

FIG. 3.—BOWL SHAPED STAND.

parts of the heater are finely finished, polished and heavily nickel plated, making a handsome and ornamental addition to a dining room equipment. It is pointed out that wherever a hot water bag is used the heater can take its place and give better results, as it is easy to handle, gives a greater volume of heat, retains it longer and can be heated to give a certain degree of temperature. The heater may also be used to advantage as a foot warmer.

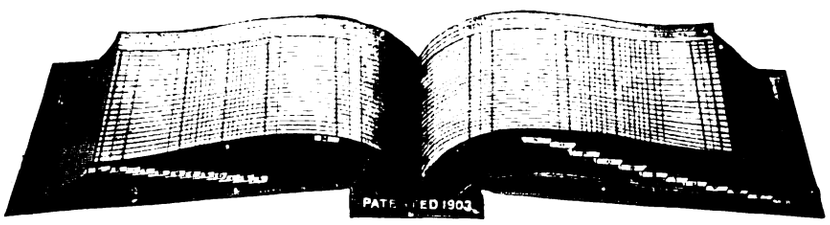
STEVENS NEW LINE OF SINGLE BARREL GUNS.

J. Stevens Arms & Tool Company, Chicopee Falls, Mass., are placing on the market for 1904 through the Hardware and Sporting Goods trade, an entirely new line of Single Barrel Hammer Guns, in addition to their Hammerless Guns, which will be known as the Nos. 105, 115 and 125. We give illustrations in this article of the No. 105 and No. 125. These guns will have drop forged frames, spiral main springs, and extra heavy lug, specially attached; making them more safe, it is claimed than any other single barrel guns, for the use of heavy loads of Nitro powder. They will have also an extra wide extractor and patent snap fore end. The No. 107 will be the same as the No. 105, as illustrated, with the exception that it will be an ejector. The No. 115 will have the same action as the No. 105, but with the addition of an ejector and a checked fore end, and also checked and capped pistol grip. It will have the same general appearance of the No. 125 illustrated herewith. The No. 125 will be made in 20 and 28 gauges only, 26 and 28 inch barrels, with a small frame and shooter stock and is designed for a high grade ladies' and boys' gun, weighing 5¾ pounds, and listing at $12. All the Stevens branded guns for 1904 will have drop forged frames.



NO. 105.

NO. 125.

MOORE'S PATENT LOOSE LEAF LEDGER.

John C. Moore, Rochester, N. Y., among a number of stationery specialties indicating modern methods, are the manufacturers of the Loose Leaf Ledger, the unique features of which are shown in the illustration herewith. It is claimed for this advanced method of keeping accounts that it is superior to anything ever offered for maintaining records of all sorts, kinds and descriptions. The illustration shows one of Moore's Loose Leaf Binders, with the records arranged both alphabetically and according to date at the same time. It will be noted that the marker on the page shown is over the figure twenty (20), and all other records in the book requiring attention on the 20th have the markers in the same relative position, bringing them in a direct line one under the other, enabling you to refer to any one of them without reference to the others, while at the same time the alphabetical arrangement is maintained. This obviates the use of two books, as is necessary with all other methods. Mr. Moore is the publisher of a number of pamphlets treating on the modern methods controlled by systems of his own which he will gladly forward on request; the contents of which may be suggested by the following, among several titles: "Moore's Modern Method," "Moore Movable Markers," "Selling by Mail vs. Selling by Male," "Moore's Methods of Charging and Billing," any or all of which will be found of interest.

MOORE'S PATENT LOOSE LEAF LEDGER.

SOUTHERN SUPPLY AND MACHINERY DEALERS' ASSOCIATION.

We have received from President Blow an invitation to their forthcoming convention of the Southern Supply and Machinery Dealers' Association, in which he gives the following particulars:

The third annual convention of the Southern Supply & Machinery Dealers' Association will be held at Old Point Comfort on April 12th, 13th and 14th—headquarters being at the Hotel Chamberlain. This, we believe, will be one of the largest conventions ever held by our Association. Our membership has increased very materially since our New Orleans convention. There will be a large attendance of our members with their ladies and also representatives from a great many of the Northern and Eastern manufacturers. As President of the Association, I extend to you and to your representatives and ladies an invitation to be present. We will provide suitable accommodations at our convention for the representatives of the press. We have succeeded in obtaining an exceedingly low rate from the Hotel Chamberlain, and there will be reduced railroad rates to Old Point Comfort from all points. We would also appreciate it if you would publish this notice, and in the name of the Association extend an invitation to all supply dealers whether they are members of our Association or not to be present, also to all manufacturers who are in accord with the policy adopted by our Association.

MONTREAL TRADE

(From our Travelling Correspondent).

Business has been unusually brisk among the Montreal jobbers this Winter. This season's trade has differed somewhat from that of former years from the fact that there has been an active demand for classes of hardware, ever since the close of navigation; whereas, in former years with the closing of navigation has come a general decrease in trade from out-of-town merchants.

Alf. Jeannotte of the firm of L. H. Hebert in speaking of trade conditions said that the demand for all kinds of Hardware had been very good. That one of the pleasing features of the trade was the increased sale of higher grade goods. Mr. Jeannotte is one of the best posted Hardware men in Montreal and with the trade, one of the most popular. L. H. Hebert does a large local jobbing trade and a specialty is made of garden tools, and specialties.

Howden, Stark & Co., are also exclusively wholesale dealers and carrying a large stock of general Hardware.

One of the fast growing Montreal wholesalers is the Canada Hardware Co., which concern has built up an extensive business in a comparatively few years.

Lewis Bros. & Co., have expanded their business during the past two years and have recently moved into an adjoining building to give more room for offices as well as for stock.

Out on St. Lawrence Street, Amiot, Lacours & Lariviere, carry on an extensive retail Hardware trade and also do considerable in the jobbing of Hardware. This concern occupy a large double store and make a feature of the window display.

One of the best arranged retail stores in Montreal is that of R. & W. Kerr, which is located in the heart of the best retail district in the city. Sporting goods, including games and athletic goods are made an attractive feature of the business, and one side of the large double store occupied by R. & W. Kerr is devoted exclusively to these goods. Mr. John Kerr said that the business in sporting goods was growing rapidly and that the line was a good one for the Hardware dealer to handle.

Seybold, Son & Co., are located at 478 St. Paul Street, and are now thoroughly settled in their new building. The arrangement of this building could not be improved upon, for a wholesale Hardware business. The offices are in front, on the street floor, with shipping room in the rear. The second floor is devoted to a sample room, and here are displayed in a most convenient and intelligent manner, samples of about everything that the retail Hardware merchant will need to make stock complete. Seybold Son & Company reported business as very satisfactory and the outlook good for spring trade.

D. Madora, situated at 292 St. Paul Street, is one of the old established jobbers of Montreal. A good conservative trade is carried on. Mr. Madora, like most of the Montreal jobbers, shows a very complete line of ice tools, and lumbermen's supplies. The business in snow shovels and children's sleds and skates has been unusually good this Winter.

The Edward Cavanagh Company do a large retail business, especially in Builders' Hardware and contractors' supplies. One of the best sample rooms of cabinet Hardware in Canada, is that of the Edward Cavanagh Company, where are displayed upward of 500 sets of door fittings. In referring to business conditions, Mr. Cavanagh said: "Our business has steadily grown during the past few years, and the outlook for the Hardware trade, in my estimation, was never better than it is at the present time. The country north of Montreal is fast building up and the prosperity of the farmers is being felt in all branches of business." The Edward Cavanagh Company also do considerable wholesale trade and make a special bid for business in paints and oils.

A good retail business is done by O. Cauchon who reported business during 1903 as very satisfactory and said that the outlook for another prosperous year was exceedingly good.

One of Montreal's largest and oldest wholesale Hardware houses is Caverhill, Learmont & Company who carry a most complete line of general Hardware. This firm are also large handlers of iron and steel and heavy Hardware.

HAMMERNAIL.

THIRD ANNUAL CONVENTION PENNSYLVANIA RETAIL HARDWARE DEALERS' ASSOCIATION.

The third annual convention of the Pennsylvania Retail Hardware Dealers' Association will be held at the Park Hotel, Williamsport, Feb. 16 and 17 next. The following programme has been arranged:

TUESDAY MORNING SESSION. 10 A. M.

Address of welcome, Hon. John F. Laedlein.
Response, Pres. George L. Moore.

EXECUTIVE SESSION.

Organization.
Roll call of members.
Enrollment of new members.
Payment of dues.
Reports.
From president.
From secretary.
From treasurer.
From committees.
Adjournment.

TUESDAY AFTERNOON SESSION, 2 P. M.

Enrollment of new members.
Address by W. P. Bogardus, president of National Association.
Addresses by other National officers.
Balloting for next place of meeting.
Question box.
Appointment of committees.
Adjournment.

WEDNESDAY MORNING SESSION, 9 A. M.

Meeting of the officers and directors of the Hardware Dealers' Mutual Fire Association.
Open session, 10 A. M.
Enrollment of new members.
Addresses by Mr. T. James Fernley, secretary-treasurer of the National Jobbers' Association; Mr. Williams, of *The Iron Age;* Edward G. Baltz, of the *Hardware Dealers' Magazine*, and Daniel Stern, of *The American Artisan.*

EXECUTIVE SESSION, WEDNESDAY AFTERNOON, 2 P. M.

Address, Geo. V. Thompson, Mt. Jewett, Pa.
Election of officers.
Question box.
Adjournment.

WEDNESDAY EVENING.

Banquet, 8.30 to 11.

AN EVEN HUNDRED.

Let the "White Lily" Do the Work of Washing.

The old back-breaking system of doing the family washing, that is, by the old wash board method, says the Creston, Ia., *Herald*, is almost a thing of the past and as a consequence American women live longer and die happier. One reason for thinking that Creston women at least have discarded the ancient method is that the Creston Hardware Co. the past year disposed of one hundred washing machines of one brand alone. They sold scores of others, but this one brand, viz., "The White Lily," seems to the practical housewife to be just what the doctors ordered. The Creston Hardware Co. received its first order of "White Lilys" on January 22d, 1903, and sold the hundredth machine this week. This record almost equals this store's stove record. The "White Lily" is a handsomely finished machine, simple in construction, easy action and of quiet running gear, yet it does work in the most expedient and satisfactory manner. The "White Lily" washer is made by the White Lily Washer Company, of Davenport, Iowa, and any one who is in need of a labor-saving machine should call at the store or at their neighbors who doubtless have one, and investigate the "White Lily." Save your hands and back and let the "White Lily" do the work.

The Speaking Eye.

She—They say the eyes are the windows of the soul, I believe.

He—Yes; and when a man goes into a drug store and shuts a window quickly, the clerk knows just about what the poor soul wants.—*Yonkers Statesman.*

OUR BRITISH LETTER.

(By Our Special Correspondent).

London, Jan. 30, 1904.

THE PRESENT POSITION OF TRADE.

The year 1903 has not been altogether a prosperous one to the Hardware dealer, and British ironmongers, in common with manufacturers and merchants, have felt the stress occasioned by disturbed markets and uncertain commercial relations, both in export and import business. At the commencement of the year which has just closed, British manufacturers spoke very hopefully of the rapid development of the new Colonies in South Africa. The disturbed state of the country and the consequent reaction after the reorganization of its government, created a delay in the progress of the development which somewhat disheartened those manufacturers who had taken steps in order to place their goods upon South African markets. The country is, however, more settled now, and as the congested state of the railways and shipping arrangements are more fully completed, there is a demand springing up throughout the Colonies for increased stocks of general Hardware. It is acknowledged on every hand that American manufacturers have been keenly alive to the importance of taking "time by the forelock" and introducing their merchandise to the notice of South African buyers as early as possible after the settlement of the country. Trade generally throughout Great Britain, at the close of the year, was by no means satisfactory, and retail ironmongers experienced a share of the depression, inasmuch as they were influenced by the state of trade in the manufacturing districts, and their returns rose and fell according to the prosperity of the working classes in the manufacturing districts, or by the agricultural industries in which they were located. The prospects for 1904 are more hopeful and despite the rumors of war between foreign countries, which now threaten to disturb commercial relationships and indirectly effect the retail trade in manufacturing districts, there is a general feeling abroad that the retail trade in Hardware industries in Great Britain is likely to be a fairly satisfactory one during the coming spring and summer months.

THE PROPOSED FISCAL CHANGES.

The long boasted "Free Trade" of Great Britain is likely to be seriously menaced during the year 1904. These politicians and financiers in favor of Fiscal Reform have already obtained a strong following throughout the country, and although British ironmongers may not have any personal influence in controlling the exports and imports of Great Britain, their local trade, the balance of which is so easily disturbed, will doubtless be affected for better or for worse according to the way in which the fiscal reforms, which appear to many to be necessary in order to keep up the returns of the trade of this country, are carried out.

SUPERIOR MACHINERY.

There is a marked tendency on the part of British manufacturers to introduce superior automatic machinery into their works fully recognizing that the only way in which quality, combined with quantity, can be produced at marketable rates, is by utilizing the latest inventions and employing the best engineering skill, combined with the use of labor-saving machinery of the highest types. It has long been acknowledged that American manufacturers fully grasp the importance of using the most up-to-date machines and the best appliances by which their productions can be made in large quantities, together with utilizing to the utmost interchangeable parts and mechanisms which can be adapted from time to time to other machines of similar kinds. At the present time many British manufacturers are introducing American machinery into their works and thereby bringing their productions in line, both in lightness, strength, and capacty, with American goods. Notwithstanding the improvement in this direction there appears to be a greater number of American appliances, especially those connected with the Hardware trade, upon British Colonial markets. The different exhibitions of agricultural implements, general Hardware, cycles, etc., held during the year 1903 showed that American makers have a strong footing in this country, and that their goods are fully appreciated by retail ironmongers and their customers; there is, therefore, a hopeful prospect for American manufacturers and merchants, notwithstanding the proposed fiscal tariffs and the keen competition with which they have to compete, not only by British makers, but German and other continental manufacturers.

IRONMONGERS' ASSOCIATIONS.

According to recent reports of American Hardware Association meetings, it is evident that the idea of association is very strong in the United States, and that many "captains of industry" give their time and ability to the promotion of the interests of national Hardware associations. The reports of some of these gatherings which recently appeared in HARDWARE were very interesting reading, and the information they contained could not fail to impress British ironmongers with the grasp of trade requirements possessed by some of the leading American Hardwaremen. The papers read before the recent conference show that some of these Hardware dealers possess considerable literary talent, and are well able to explain and propound to their brother Hardwaremen the chief features of commercial life which they have made their special study, and to point out to those less well informed the true lines upon which American Hardwaremen can alone hope to make their businesses successful. Some of the leaders of the British ironmongers' associations are very hopeful that during the year 1904 there will be a considerable strengthening of association work. The annual conference which will be held in the spring at Nottingham, will doubtless be an important gathering, and it is hoped that a number of British Hardwaremen will come forward and give those prosent the benefit of their experiences, and by setting out a plan by which local Hardware businesses can be improved and developed, raise the standard of ironmongery businesses in country districts and small towns. The work of the I. F. A. (Ironmongers' Federated Association) proceeds steadily, although the year 1903 did not show any marked progress in its work. The general guidance of the association rests with but few members, who form the Executive Committee, and those interested in the work cannot help but feel that there is a lack of initiative on the part of local associations, and that but few of the secretaries and presidents of those associations inaugurate fresh schemes in the development of association work. There is room for improvement and some of the schemes which have recently been set on foot by the I. F. A. appear likely to give an impetus to the greater self-improvement and education of the assistants of to-day, many of whom will doubtless be the ironmongers of the future. The Examination Scheme, whereby ironmongers' assistants are to be examined under the direction of the Central Board of the I.F.A. and to receive certificates in accordance with their general knowledge of the Hardware trade, has been taken up with considerable spirit and the first examination, which is to take place in Manchester during the next few weeks, will be indicative of the tone of British ironmongers' assistants of the present day, and will doubtless be the means of bringing out into special prominence some of those who possess the best knowledge of the business. My next letter will contain an account of the Manchester Examination, together with the names of the successful candidates.

STOCKTAKING.

During the month of January many English ironmongers take the opportunity of the quiet time following Christmas festivities in order to clear up arrears of work, to prepare their quarterly accounts, and generally to "put their house in order" and prepare for the business of the coming year. Those ironmongers who are keenly alive to the necessity of

Digitized by Google

looking into their affairs at least once a year and making out a balance sheet, generally find January the best month in which to take stock, and numbers of ironmongers have been so employed during the last week or two. But few English ironmongers indulge in the luxury of a general clearance sale, a system so generally adopted by drapers and storekeepers,but here and there an enterprising Hardwareman is found who offers special reductions in order to effect a clearance of unseasonable goods and those articles which have become soiled or damaged during the past year. It is well known that many Hardware goods deteriorate in appearance and become antiquated in style and form. The Hardware business is one of change and the improvements in general domestic machinery, the alterations in styles and designs change much more rapidly than they were formerly wont to do. It is therefore obvious that the importance of good stock keeping increases. As progress and development proceed at a more rapid rate, goods become more quickly out of date and unsaleable, and it is generally recognized by English ironmongers that the importance of effecting a clearance of old stock increases.

ALMANACS, CATALOGUES AND TRADE LITERATURE.

There has been a marked improvement in trade literature during the last few years and the catalogues, lists and show cards now issued by British manufacturers are far more attractive, better produced, and more readily understood than those lists which formerly composed the British ironmongers' library. Many American manufacturers have been foremost in the circulation of attractive literature, and many of those catalogues which are now held up as patterns of what trade lists should be, were produced in the States and contain illustrations of domestic specialties, engineers' supplies and other goods made "across the water." Whether the improved style of literature circulated by American manufacturers has had anything to do with the improvement which is apparent in this country or not, it is evident that the catalogues of the present day are far more useful to ironmongers than those of a few years ago. Illustrations are freely used, sizes, quantities, weights and measurements of goods more clearly defined, and, taken as a whole, the trade libraries of British ironmongers are now not only valuable for trade reference, but many of the volumes are interesting and instructive and afford the assistants of to-day ample opportunity of learning the constructive technicalities of the goods they handle.

NORTHWEST'S PROSPERITY.

The most noticeable of all conditions at the present time in the great West is the almost undiminished continuance of the high tide of prosperity. Broadly speaking, there has been no falling off in the volume of business. The farmers have more money than ever before. The employed people are all at work for good wages, railroad earnings throughout the West average higher than a year ago at this time by from 5 to 12 per cent., though many good judges thought last year's volume of traffic up to the highest possible mark.

The amount of money which the people of the West have on hand representing their surplus, their savings, their accumulations through these recent years of unexampled prosperity are simply amazing. In purely agricultural counties the bankers tell me they do not know what to do with the money that is offered them for deposit. In many instances they have been compelled to refuse further deposits because of the difficulty of using the money profitably.

It is surprising to be told that in an average Western county of perhaps 25,000 population, embracing probably 2,500 farms, the aggregate sums on deposit in the local banks reach as high as $2,000,000 or $3,000,000, or an average of approximately $1,000 per farm. As no one individual has very large deposits, it follows that the accumulations are well distributed.

What is true of the agricultural counties is true also of the cities and towns in which there are manufacturing and commercial interests. In fact, money is abundant everywhere and all classes of people have shared in the prosperity. —Walter Wellman, in a Washington special to the *Record-Herald*.

NEW STANDARD FOR WORLD'S FAIR.

The 1904 Universal Exposition is Now Practically Finished—No Doubt About Its Opening on April 30 in a Complete Condition.

All things appear to work to the end of making the 1904 Universal Exposition stand in a class by itself. In magnitude and scope there has never been anything like it. No enterprise of the kind was ever endowed with so great a working capital. The world's storehouses never before contained such treasures to draw from.

The Columbian Exposition at Chicago ten years ago, until the present enterprise was launched and its magnitude was apparent, was supposed to have fixed a standard for all time to come. That theory has been thoroughly exploded by the marvelous accomplishments of the Louisiana Purchase Exposition. The World's Fair at St. Louis covers 1240 acres of ground. All of Chicago's exposition was contained in 633 acres. Not in mere size does that present enterprise surpass all others. The great exhibit palaces differ from any constructed for former expositions. They are all revelations in the architect's art. The big, rectangular buildings of the past have been superceded by a group of wonderfully beautiful and symmetrical structures, assembled in the form of a lady's open fan. Collectively they are many times larger than any other group and for architectural beauty they immeasureably surpass anything the world has ever seen. The architects departed from beaten paths, and sought and found new features which they happily combined with the best examples of the architecture of other days.

When the plans and dimensions of the buildings were first made public the people were amazed at the daring of the exposition management. Even were such mammoth buildings erected, where would the exhibits necessary to fill them come from? Now that the buildings are all finished, and the work of installing the exhibits is under way, the question is answered. Even were the buildings three times as large they could not contain all that has been offered. Inner courts have been roofed over and where exhibitors have asked for thousands of feet of space they have had to content themselves with hundreds of feet.

Such being the case the exhibitors and the exposition management have been enabled to exercise a discrimination that could not have been possible ten years ago. Official figures show that in the decade following the Columbian Exposition the value of the manufactured products has increased 50 per cent. Thus the World's storehouses contain treasures that were never before accessible. In the close discrimination that has been observed only the best and most worthy have been accepted, and each exhibit will represent the best in its class. Life and demonstration have been the key note in the exhibits division and wherever practicable processes are shown, together with the finished product.

The exhibit of the Philippine Islands, which covers 40 acres, and has been created at a cost of about $1,000,000, is an exposition in itself. The foreign nations have never put forth such great exertions to make interesting exhibits. The keen rivalry that has been manifested between the most powerful nations, is reflected in the exhibits from the newer and smaller countries. China is making such preparations as it was never deemed possible that exclusive nation would consider. Fifty-one states and territories and more than that number of foreign countries are working in unison to make the Universal Exposition complete in every detail.

At this writing nearly threee months before the opening, no doubt exists about the fair being finished in every particular. The show palaces are all ready and the exhibitors are installing their exhibits. The roadways are practically all made. The intramural railway, encircling the grounds, is ready for the rolling stock and the application of power. The landscape is so advanced that a few weeks in the early spring may see it perfect, even though all work should cease until that time. The weather at St. Louis has been so mild all fall, and thus far in the winter, that but few days have been so cold that work out of doors was impracticable.

THE PHILADELPHIA BANQUET.

Over 130 members and guests were in attendance at the eighteenth annual banquet of the Hardware Merchants and Manufacturers' Association, of Philadelphia, which was held Tuesday evening, January 26 at the Hotel Bellevue. Inclement weather seemed to have no serious affect in the determination of the association to make this occasion, like the other seventeen, one to be remembered. An informal reception was held in the parlors previous to the dinner and shortly after seven o'clock the guests entered the banquet hall. The room had been tastefully decorated and the tables were strewn with carnations and with souvenirs furnished by the following firms: National Specialty Company, McCaffery File Company, Enterprise Mfg. Company, Mayer & Co., Henry Disston & Sons, Miller Lock Company, I. M. Rose Company, G. H. Barnett Company, J. Barton Smith & Co., Fayette R. Plumb, Incorporated, Corbin Cabinet Lock Co.

Dr. John R. Davies, "The Chaplain" invoked the divine blessing and the banquetters at once proceeded to do justise to the dinner.

Mayor Weaver was late in arriving and because of pressing business could only remain for a few minutes. The success of the administration and his popularity among Philadelphians was evident by the hearty, continued applause which greeted him as he entered the room. Between courses the Mayor spoke briefly of Philadelphia's pride in her manufacturers and merchants and said that it was the intention of the present administration to do nothing which would have the effect of curtailing the advance of their trade.

As the coffee was served each guest received two very good cigars with the word "Russwin" on the band, the gift of the Russell & Erwin Mfg. Co.

During the dinner, as well as later between toasts, the banquetters were entertained by Miss Anna Elizabeth Kelly, contralto; Miss Helen Mae Wilson, reader; Paul Volkman, tenor; Frank Bain Ball, baritone; Master Frank Albertson, soprano; W. Lane Hoffner, accompanist, and Walter E. Cooper, specialist. Music was furnished by an orchestra.

THE TOASTS

As the Havanas were lighted the fairy-like form of Toastmaster Fernley arose in his place and after bringing those within hearing to order with a few faint taps of the gavel, proceeded to explain why he, at all times so modest and retiring, occupied his present exalted position. Retiring president Wm. C. Peters was unavoidably absent owing to ill health and had sent a letter of regret which was read by the toastmaster. President elect Thomas Devlin was introduced and responded briefly, thanking the association for the honor conferred on him and promising to do his best for the association during his term of office. A list of deceased members was read with the guests standing.

Henry B. Lupton of Pittsburg spoke briefly on the subject "Our Manufacturers." He spoke of the "Philadelphia" brand as bearing the stamp of excellence and complimented the Philadelphia manufacturers on the energy they had exhibited in placing their goods in the markets of the world.

Daniel Stern, of the *American Artisan*, responded to the toast, "Hardware from an Editor's Standpoint," after which the toastmaster introduced Mr. J. Shellinberger Bonbright who spoke on the subject:—

IS PHILADELPHIA SLOW?

Mr. Toastmaster and Gentlemen:—

Were we to leave the subject in this interrogative form, doubtless many would be willing to accept the well-nigh universal opinion, following the music hall jest, or oft-repeated statement of the tourist, who, accustomed to spending his Sunday in less orderly places, resents the quiet and order of our city, resulting from our better enforced laws. Others, who would deplore a continental Sunday in their own residence town, are willing to take an occasional dip into its gaieties and wide openness, and being deprived of their expected dissipations here, spread the report abroad that Philadelphia is slow.

No doubt to one so unfortunate as to be compelled to "Sunday" in a hotel the time moves slowly, and the closed playhouses and *cafes* seem an evidence of our being behind the times. Perhaps her people, by their apparent lack of interest in what others think of their city, have fostered this idea, for we must confess to this—that, unlike most towns, we notoriously fail to blow our own horn. But to Philadelphians the city's greatness is so self evident, her substantial and enduring importance so beyond compare, that it seems a waste of time to discuss the subject with the man who questions it. Their attitude is one of amused toleration for one so lacking in judgment, or contempt for one who estimates a city's greatness by the opportunities for entertainment. To such opinion we can offer no argument, but turn to speak of those fundamental elements of civic greatness that are so clearly in evidence to the intelligent seeker.

J. S. BONBRIGHT.

In these days of mushroom growth, both civic and industrial, it is a source of great satisfaction and pride to be able to refer to a

GLORIOUS HISTORY,

and to trace the present development back through the century to the days when our nation was in its formative state.

Philadelphia has always been pre-eminently an American city, containing to-day the smallest percentage of foreign born among all the great cities, and no opportunity has been neglected by her people to respond to the needs of the country as a whole, or to any section of it, as far back as, and before, the days when less than 100 of our merchants subscribed $1,500,000 to help the father of his country feed his starving Continental army, to the quick response of our Permanent Relief Committee to get the first supplies into stricken Galveston. The committee has collected, in a couple of decades, more than $5,000,000 worth of supplies and money for those of this and other lands, in seasons of dire extremity. The mention of a few may not be out of place.

This committee was organized in response to a call from Germany in 1878, for the relief of those suffering from the results of freshets. The citizens of Philadelphia met at the Mayor's office and formed a committee to solicit subscriptions, and to our city's credit, be it said, more was contributed than was subscribed in Berlin. It has been in permanent activity ever since.

Among the calamities which have occurred none is more prominent than the Johnstown disaster. It collected at that time about $800,000. Next in importance was the Russian famine in 1891 and 1892, when Philadelphia contributed more toward the relief of the famine stricken peasants than all the rest of the United States together. Other disasters which come to mind at the present time are the earthquake

Digitized by Google

at Charleston; yellow fever at New Orleans; yellow fever at Memphis, a year or two later; Oil City, Titusville; typhus fever epidemic at Plymouth; Armenian Relief Fund to help the Armenian Christians; relief extended to Porto Rico and other places after the Spanish-American War; floods in California two years ago; flood disaster in Kansas last year; the latest relief was for the typhus fever stricken people in Butler, Pa. Here it had its own hospital, called "The City of Brotherly Love Hospital." It sent 25 trained nurses and a number of physicians.

When necessary, Philadelphia has been as

QUICK TO FIGHT

as to feed, and no community has offered a larger quota to the defense of our liberties. If the visitor fails to note upon our streets the crowds seen in other cities, let him remember that our citizens have homes, not tenements, to live in; that over 4000 acres of pleasure grounds, scattered in 40 parks over our broad domain, afford a restful and rational means of enjoyment, much preferred to the crowded streets.

Perhaps we are slow to adopt some of the modern improvements of other burgs. Apartment and tenement houses fail to appeal to a city that continues to build 8000 or 10,000 dwellings yearly, and contains to-day more houses than our neighbor with three times the population.

The number of homes in Philadelphia containing more than ten persons is but 12¾ per cent. In New York the proportion of families having more than ten persons in a dwelling is 83½ per cent. Only 15 per cent. of the houses in Philadelphia contain more than one family. In New York 88 per cent. are so occupied, and in Chicago 65 per cent. of the houses have two or more families.

The average size of the Philadelphia family is 5.10, which exceeds that of the general average of the entire country over 3 per cent., and is greater than that of any other large city; that of New York being 4.84, of Brooklyn 4.93, of Baltimore 5.01, St. Louis, 4.92, and Chicago, 4.99. This is obviously due to the fact of

HIGHER SANITARY CONDITIONS,

and an orderly mode of life due to the general ownership of homes by occupants.

Industrially we continue to advance, building more locomotives than all the country combined, supplying the navy with half or more of its best ships, making more carpets, making better hats and shoes, Saws, Files, Edge Tools, Household Utensils, etc.; sustaining our reputation for both quality and quantity, and being most careful that our products shall excel all others, until merchants everywhere acknowledge that "Philadelphia made goods are good goods."

Time is lacking for even mention of our pre-eminence in many of the arts and sciences since the days when Franklin had to come to Philadelphia to find the lightning.

Here also is the home of our pride and pet, the Pennsylvania Railroad. "The Standard of the World." Yes, even though she has hurt our pride by refusing to bring some of us down town, that she may better accommodate the multitude of buyers and tourists, for whom she has been compelled, at the cost of millions, to provide several terminals.

So, while we may be called slow, we are surely not slothful, or the world would not come here for her models, as note the fact that this association has been the pattern for others all over the country, and our National Hardware Association, acknowledged at home and abroad as the leading and model trade organization, which owes so much of its success to the formative years when it was managed by Philadelphians, and, indeed, still continues to exist, despite the lack of any disposition to retire or rotate on the part of at least one of its greatest officials.

So here's to the good, slow Quaker City, which, like a great, good natured giant, is steadily pushing forward, careless in the consciousness of his strength, and unmindful of the jests and jibes of little minds, pursuing the even tenor of his way, "with malice toward none, with charity for all."

Mr. Bonbright's address was received with hearty applause. He was followed by Charles Z. Tryon who responded to the toast.

THE BUYER.

Mr. Toastmaster and Gentlemen:—

I wonder if in any scientific institution the learned doctors have ever dissected the remains of one of our modern buyers? I do not mean the department store buyer who buys for 57 departments and really knows only three right down to the ground, nor do I refer to the syndicate buyer who does not have to sell the goods he purchases, but I have in mind that mysterious creature we find in every large jobbing house, who sits, sphinx-like, behind a great desk, with hundreds of pigeon holes stuffed full of quotations; and buried beneath a great pile of catalogues from all over the world.

This human encyclopedia who

KNOWS THE COST,

jobbing and retail price of every article he buys; its true value in actual use and how to use it. I wonder if this post-mortem would not reveal the buyer's brain to be full of Tacks and Saws, Hammers, Guns and Fish Hooks? Many will say

CHARLES Z. TRYON.

at once that his heart would be found missing, and ice water slowly coursing through his veins. But there is no use in guessing about his insides; surely his outside aspect is interesting enough.

I suppose he looks different to every man with whom he comes in contact. To the head of the house he is that highly expensive individual who keeps the bank balance continually on the ebb tide, who always has the warehouses full to bursting in dull season, and no goods on the shelves when things are booming. He is that troublesome person who induces the respected senior to sign contracts on faith, from which agreements it requires six Philadelphia lawyers to extricate the house.

To the traveling force he is the one man who should be fired six days a week, because his competitive buyer in the rival house always—not once or twice, but always—has goods bought on a better basis. I fancy there is not one man on the road who could not buy goods better than this oracle who speaks to him principally through the medium of carbon copy instructions. Then, too, he always insists that the salesmen shall sell stuff and brands that their customers do *not* want. Why don't he buy the X. Y. Z. goods that Brown & Company sell? As viewed by his stenographer, he is the kind and pleasant, sour and disagreeable man who talks to silly drummers all day and dictates his mail at 5.45 P. M.

In the eyes of the office boy he is the godlike person who don't look up when a card is presented, who calls him into his office a dozen times a day and then says, "Well! what do you want?" To this little chap he is a personality to be feared and admired. Judged by the drummers who sell or do not sell him, he is at once a gentleman and a scholar, a boor and an ignoramus, an able man or a presumptuous upstart, just as the case may be. And to his good wife he is the hard worked, underpaid, worn out person who leaves home before daylight and returns in the evening too late to go to the theatre; the highly prosperous man who cannot afford to get her a muff, while Mr. Jones, who buys for a much

Digitized by Google

smaller house, presented *his* wife with a whole set of furs for Christmas.

Whatever he is *not*, the buyer certainly *is* the heavy man in this theatrical troupe. The traveling man may impersonate the advance agent, the senior of the firm may represent the manager, the cashier the box office man, and the sundry clerks may chime in well as the chorus and understudies, but certainly, in this show, the buyer is the "Leading Lady."

Act? Why Booth or Jefferson never undertook such a task as one day's work of the modern buyer. Think of sitting all day long scheming and scheming, with interruptions every ten minutes from the line of drummers waiting for an audience; looking pleasant at this one you hate, because he has the goods you want, and scowling at the fellow you like because his house won't allow something. The buyer must be sad when he's merry, merry when he's sad, violent when he's meek, gentle when he wants to smash things; pleading poverty when he's trying to get dating, and swelling up with the conscious pride of a millionaire when he is striking for a larger cash discount. If he could see these fellows all at once—but no, each one may have something of value to tell him, and so he must see them all, and one at a time.

And when these drummers are gone has the buyer a moment's rest? Oh no, for then there is the same game to be played by correspondence, the bluffing of factories, the bulldozing of railroads and the jacking up of salesmen. Tragedy and comedy, comedy and tragedy, all in the same hour and every hour.

Of course, the firm are very kind to the buyer; they give him lots of assistance—stenographers, index systems, order blanks and a hundred devices for saving time and for keeping records, but the most of his information must be kept in his poor, aching head, for half the time his clerks are away and his elaborate card systems are always suffering from nervous prostration.

At last the busy week is ended and out of this chaos and confusion the buyer emerges on the bright Sabbath morning, for once himself. He settles himself comfortably in the corner of his pew and, as he congratulates himself that the lot of Sausage Stuffers he has just bought is the cheapest bargain on earth, he is abruptly shocked by the awful words of the clergyman, proclaiming that "Salvation is the cheapest thing in the world; we are giving it away right here for the asking"; let us all sing heartily that beautiful hymn, "Work for the Night is Coming."

And thus the buyer appears to live and work, but if we really knew his inner life what a different being we should find. I very well remember in my early youth calling upon a house which I had been selling, and was informed that Mr. J. was now buying my goods instead of Mr. S. Entering Mr. J.'s office, I said, "Good morning, I have been fortunate enough to sell your predecessor quite a number of goods in the past and I do hope that I shall be able to interest you."

He darted one glance at me and then yelled: "Predecessor! I have been the buyer of this house for 20 years; that man you have been selling was my assistant, whom I fired last week, and the goods you sold him last year are still on my shelves. Do you want to take them back?"

Fortunately I had followed one of the first rules of the

AMATEUR SALESMAN,

and I had remained standing with my hand upon the door knob, so that I was able to beat an orderly retreat without leaving any of my baggage on the field. Subsequently, however, I succeeded in selling this man and learned to know him as a friend; a man of genial and happy disposition—he was simply a good actor. My close adherence on that first day to a little list of rules had saved me. This little code was as follows, and may be of value to some budding salesman here present:

1. Leave the door open or stand with your hand on the knob until the buyer speaks.

2. If after coughing once, mentioning his name twice and your own three times, he does not look up, he's busy, call again.

3. If he stretches out his legs, thrusts both hands into his trousers pockets and looks up at you, showing the whites of his eyes, look out for a claim.

4. If he greets you cheerily, asks you to sit down, and leans confidentially across his desk to converse with you, he has already bought and is working you for price.

5. If you notice him clutching a paper weight, depart at once—sooner, if possible.

6. But if he quickly glances at you with a hurried hello and again buries his face in his papers, draw your chair up confidentially—he has an order for you.

Holmes has said: "The human race is divided into two classes; those who go ahead and do something and those who sit and inquire." Now, the poet had evidently not met a modern buyer, for he must at once be a man of action and at the same time be a regular cross questioning attorney.

So, view him as we may, the buyer must be, all in all, a normal man—a truly testy and ungenerous nature is an ill-

T. JAMES FERNLEY.

assorted companion of the calm judgment required to buy right. The requirements are great; the buyer is the secretary of state to every house, and he must be well skilled in the art of diplomacy, which is but a grand word for tact. The selling end of the business may do its part, but it is a fact that goods bought right are already half sold. Stock must be on hand, too, when wanted, and not in excess of demands, or conflict arises at once with those in the office who figure interest and insurance. To properly adjust these conditions the faithful buyer must possess an insight into the future almost prophetic. He must know every wave in trade conditions, note every change of taste in styles with the practiced eye of a consumer, and know intuitively what will sell and how many. Nor devoid of all sense of the artistic may he be, for surely the package and the label are well within the province of the buyer, and every one knows what a trusty, though silent, salesman the package is.

It certainly is a wise policy that many houses have adopted, of permitting or insisting upon each buyer taking one short, annual trip. The buyer sits in his office, surrounded by books and papers, facts and figures, and fights at long range the battle of selling goods. One trip a year will largely brush the dust from his glasses and fit him better for his work than any other one thing that he can do. With what force do his arguments play upon a balky factory if he can say, "I saw it with my own eyes."

Business men should give their buyers the broadest education possible, for do they not hold in the hollow of their hands the welfare of the concern they represent? Not only in a commercial sense, but in a broader, moral sense the buyer is a prime factor, for the attitude of the buyer largely determines the impression which the house makes upon the commercial world; if he be unjust or tricky, so seems the house; be he frank, just and truthful, the house will bear this reputation.

And so I believe that the twentieth century buyer has a

Digitized by Google

personality of his own: that he *has* a heart and many genial qualities which, as we have seen, he dare not always show to the world; and with these thoughts in mind my toast tonight would be, "To the Jobbers' Buyer." God bless him! he needs the support and the good will of every man in the house.

The toastmaster then introduced Rev. John R. Davies, D. D., who addressed the gathering.

Dr. Davies commented on the serious vein of last year's address, and the propriety of again making a speech of that nature. He told a number of interesting stories, and referred to the wonderful era through which we were passing. There were so many vast discoveries and the bringing together of such gigantic forces. We were on the threshold of the most wonderful era the world had ever seen. Large doors of opportunity were opening on every side. God, he said, had prepared these opportunities for us, and it was for us to grasp and benefit by them. Life is ever in need of more comforts, luxuries and necessities, thus giving opportunity for manufacturers to extend their wares. We are all part of a great system, and we must remember that God is in this work and our business is with God. We are parts of a divine system directing and shaping things, not always in our views, but in the views of One greater than we are.

The toastmaster then introduced (an entirely unnecessary proceeding) Charles W. Asbury of the Enterprise Mfg. Co., who responded to the toast:—

THE COMING GENERATION.

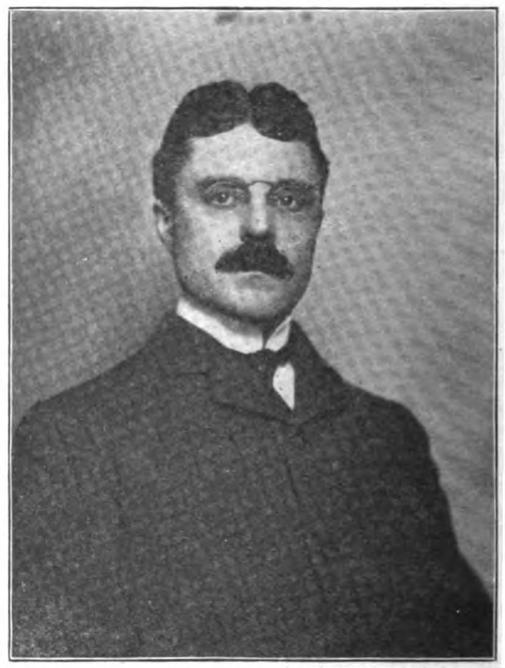
Mr. Toastmaster and Gentlemen:—

The inferred question which has been assigned me is not a new one; it has been discussed during all ages, and probably will be discussed in the ages to come. If a direct answer be asked, I should reply: Yes, the chances of success to a young man are as brilliant to-day as ever, and especially is this so in our own country.

To achieve success the young man must be born of the

DETERMINATION

to climb the ladder at whatever cost, and to assume the incidental responsibilities, meet the inevitable difficulties, leap the obstacles which will no doubt be in his path. There are, unfortunately, but a small percentage of the young men of to-day who have sufficent self-control and indomitable energy to reach the goal. It is far easier to drift with the tide and enjoy the pleasures of life than to get a grip on one's self and prepare for a campaign of hill climbing; but if he has a sincere desire to leave the world better than he found it, it is necessary for every young man to regard his occupation as a jealous mistress. This applies with equal force to the professions as well as to the commercial and industrial affairs. Life is but an education, by which I do not mean book learning, but rather, a knowledge of men, a knowledge of affairs, and particularly a knowledge of one's own business or calling. Persistence belongs in the cornerstone of the boy's structure. Get-rich-quick schemes are always looked upon with suspicion; therefore, when young we must look forward to a long period of close application before we see the results of our efforts. It is this prospect that discourages the larger number of young men entering the world's affairs. Unless they can look forward to this period with determination to succeed we see many of both extremes at the goal.



It has been asked, What is the reason for success or failure? It cannot be opportunity, because we see examples of notable successes among those to whom opportunity has been a stranger. In commerce and industry it cannot be book learning, because the large majority of the captains started life with very little education. It cannot be good clothes or good manners, as we see many of both extremes at the goal.

My diagnosis would be that it is inherent in the boy. If I were asked to advise upon the requisites, I should say he must enter his chosen path with zeal, pursue it with zest and energy, taking delight in the beginnings of success and using the experience thus gained in larger fields. This delight should not be primarily or mainly for the money returns so much as for the very glory of it. I would say keep the body and mind in the best possible condition for battle, and especially the mind, as success can only be attained through training. Be loyal and patriotic, be fair in all of your dealings, and generous in your thoughts, cultivate only those acquaintances with whom contact is profitable in knowledge. Accustom your mind to close application, directing it always in the chosen channel, at the end of which keep in view the desired goal. If the boy has an

HONEST CONVICTION

and determination to make his mark, there is no power on earth which will stop him.

If I were asked to name the best field for the accomplishment of these objects, I would say, broadly, the United States. If experience be taken as a guide, we have but to note recent history. Gentlemen, you all know, but do you thoroughly realize, the rapidity with which this country is growing. I am not going to burden you with statistics, but in my own line, manufacturing, it will be sufficient to say, that the figures taken from the United States census show

C. W. ASBURY.

that the value of manufactured goods in the past 50 years has almost geometrically doubled with the passing of each decade. In 1850 this value was shown to $1,000,000,000, while in 1900 the value was $13,000,000,000. Our commercial position before the world has developed in almost the same ratio. The value of manufactured goods exported in 1840 was $11,000,000, while in 1902 it was $403,000,000, and in this connection it may be interesting to note that the increase in the value of our exports during the past 12 years was nearly double the total increase during the preceding 90 years. With such figures before us, can we ask for a better field in which to labor?

Is it not fair to assume that the momentum of this development will carry us on and on, provided only we have a sufficient number of progressive, aggressive and determined young men to whom we can look for assistance. I do not for one moment desire to discount the value of the older heads in directing affairs, but look if you will among the captains in the professions, in industry and commerce—do you not find many a gray-haired man surrounded by bright, capable, thinking young men who, themselves, are managing certain departments of the business? In such a field as I have named, and in such a time as the present, can it be questioned that a young man can achieve success if he has the necessary attributes. Success can be purchased, but the cost is high—eternal vigilance is the price.

Short addresses followed by R. L. Austin, A. Eugene Bolles, Edward Ingalls and George A. Graham, after which the gathering broke up with the singing of "Auld Lang Syne."

OFFICERS FOR 1904.

At a meeting of the association, held on the 19th inst., the following officers were elected:

PRESIDENT, Thos. Devlin.

VICE-PRESIDENT, John R. Griffith.

SECRETARY-TREASURER, T. James Fernley.

DIRECTORS—Wm. W. Supplee, Samuel Disston, James H. Ritter, Wm. C. Peters, Ellicott Fisher, E. S. Jackson.

Digitized by Google

NORTH DAKOTA RETAIL HARDWARE ASSOCIATION.

Under conditions the most propitious for convention purposes the Seventh Annual Convention of the North Dakota Retail Hardware Dealers' Association was commenced at Grand Forks on January 27th. The convention was held in the United States Court room, convening at 2 p. m. The attendance of delegates was satisfactory in number. Vice-President Emery presided and presented the acting Mayor, R. H. Carothers, who delivered an address of welcome to the delegates assembled. Vice-President Emery replied to the same in a very enjoyable manner referring in a happy and appreciative degree to President Joy whose absence he deeply regretted and who had until recently been the proprietor of a Hardware store in Hamilton. His absence would be felt as he had been a strenuous advocate of the advantages of organization which assisted in the development of the present association. After a few words of acknowledgement

H. F. EMERY, PRESIDENT.

H. N. JOY, EX-PRESIDENT.

of the kind welcome extended by Mr. Carothers, Mr. Emery continued as follows:

The year 1903 was an eventful one in many ways. Like the preceding year, the dealer had to contend against an upward market, especially in such articles as are composed wholly or partly of wood. It is a deplorable fact that the average retail merchant

DOES NOT ADVANCE HIS PRICES

with the market. Only when stocks are exhausted and he has to replenish does his price go up, and very often then not in proportion to the advance, thinking that perhaps the next order will be at the old price, or it may be the merchant across the way has a large stock at the old price.

The year of 1904 opens with different conditions confronting it than has probably been witnessed before. On every side it is seen that conservatism is the motto. Now I would not convey to you the idea that by being conservative we need to take a pessimistic view of the future. On the contrary, at this particular time we should take an optimistic view. The best informed men of this country have contended that a great many manufactured goods are higher than the raw material and labor would warrant, and the belief that such goods are to seek their legitimate channel is one of the reasons that has brought about these conditions. That the country at large, and especially the West, is in a prosperous condition is a settled fact.

"WE ARE THE PEOPLE."

Two old factors shaping the ups and downs of the country have been put to sleep and buried far below frost line—namely, that Wall Street and Presidential elections do not control us to the great extent they did in former years. The years 1902 and 1903 have demonstrated that we have outgrown Wall Street. Slowly but surely are the Western States shaping the destiny of our politics. The old cry of the school boy," We are the people," has become a living fact. It has been placed on our Western banners and unfurled to this nation, proclaiming from the West to the East and North to South. We are the producing people and must be respected. That large order for 1,000,000 barrels of flour to be shipped to China is worthy of our notice and congratulation. When our Western No. 1 hard takes the place of rats, rice and chop sticks, it will add another page to our history.

The great combinations, trusts, pools and gigantic corporations are as but small clouds covering the sun, for the saying of Abraham Lincoln that " All the people cannot be fooled all the time," is as true as when uttered over 40 years ago.

Gentlemen, take it all in all, it is well we have assembled here, that we may exchange thoughts and enlarge our views for the battle of the year. Everything considered, the Hardware merchant has a great opportunity to show an increase on the right side of the ledger at the close of this, the best of all years, 1904.

Mr. Emery called particular attention to the Question Box. He urged that it be used early and often, and that questions be deposited on every subject on which any member sought light.

He named G. W. Wolbert, Bismarck, and J. H. McCollom, Hope, as Committee on Transportation.

UNIFORM RETAIL PRICES AND FIXED TERMS OF SALE BY RETAILERS

was the subject handled in the first paper, presented to the convention by H. J. Hellekson, Fairmount, and it developed an interesting discussion.

Vice-President Emery. H. F. Strehlow, J. A. Cole, W. H. Pinkerton, H. T. Helgesen, William McIntosh and O. A. Gallup took part in the discussion, and many plans for fixing the profits on goods were advanced, and the wide diversity of opinion showed conclusively that conditions varied in the different localities represented in the discussion. No plan was advanced that was thought feasible enough to result in any action being taken by the association.

THURSDAY MORNING SESSION.

Great interest was manifested by the delegates in this session, a larger number being in attendance than at any of the conventions.

Digitized by Google

SHOULD THE HARDWARE JOBBER HANDLE STOVES?

George L. Nye, proprietor of the Minnesota Stove Company, Shakopee, Minn., addressed the convention on the subject "Should the Hardware Jobber handle Stoves," which was an interesting one, arguing as he did that retailers would be better cared for by dealing directly with the manufacturer than with the jobber, who was compelled to fall back on the manufacturer any way.

H. D. Final of the Marshall-Wells Hardware Company, Duluth, Minn., happened to be the only jobber present handling stoves, and he was called on. Mr. Final held that the jobber had a legitimate right to handle stoves, and that, owing to high freight rates from remote manufacturing centers, the retailer was able to buy stoves in large or small quantities of the jobber at more satisfactory terms than of a manufacturer. Another feature that he brought out was the fact that the jobber could supply stoves when desired in the quantities needed, doing away with carload shipments from factories.

H. T. Helgesen of Milton acknowledged the force of the argument favorable to buying of jobbers in order that large stocks and bad seasons could be better avoided. He thought, however, that all manufacturers should have Northwestern depots, and claimed that as the retailer was required to pin his faith to a certain brand of stove, the manufacturer probably would give better satisfaction than the jobber.

W. H. Pinkerton, of Lakota, presented an address on

EFFICIENT SALESMEN.

from which we give the following selections:

Our efficient salesman will make the most of any opportunity, in or out of the store, in making himself friends. He can, by his cordial words and actions, cement the ties of friendship with customers and draw new ones by the same means. Some clerks are so short sighted as to think that they have done their work when they have shown the goods that the customer asks to see, and then when the closing hour comes and they can lock the door, the interest of their employer is not thought of till the store is entered again. Just here some clerks who read this will say, "Do you want us to solicit sales after hours," and I would answer, "Very seldom, unless approached on the subject." But in a thousand ways between the opening of a year's business and its close, one can remember his employer's interests in some slight way that will be of benefit to him, and what is a benefit to one is also a benefit to the other in the end. A salesman who is uniformly friendly and courteous unconsciously draws his friends and associates toward the business house with which he is employed. The world is full of employers who are overworked and are constantly looking for the efficient young person on whom they can shift responsibility. The candidate for one of these positions can and must show his fitness for the promotion while he holds the more humble one. Some assume to say, "When my employer pays me more I will work harder and be more efficient." This is beginning at the wrong end. He must first make himself valuable, then promotion will come. It may be in the service of the same man or another. An efficient salesman will be careful to

KEEP SEASONABLE GOODS WELL DISPLAYED.

This often causes extra work, but if the spare moments are improved this can be done without interfering with his duties in waiting on the trade. The clerk who finds much time to sit on or lean against the counter in business hours will soon have all of his time at his disposal. With proper discretion we can present the merits of new goods that are placed in stock, with which the trade is not familiar. This must be done carefully, presenting only such goods as we are sure will interest the party, and taking his time only when we are quite sure that he has it to spare. There is trouble at times in larger stores where several clerks are employed, by a desire on their part to joke a man and have much sport during times when trade is quiet and they have no customer to occupy them for a short period. On such occasions they may be inclined to gather in one part of the store and indulge in noisy fun. This interferes with the work of the office force, and if there is one customer in another part of the store attempting to purchase goods, the sale will be much interfered with by a burst of boisterous laughter from these idle clerks. Our stores and employees should create a business impression on those who come to inspect our wares. I do not want to be understood that salesmen must put on a long face, as we sometimes express it, but any sport and fun should be of a quiet nature, which will not interfere with the work of the establishment. Cheap jokes and undignified conduct do not tend to build up any mercantile business. Our friends usually visit us in our homes or at other social gatherings. At our stores they expect to be met in a business way only, as a usual thing.

Efficient salesmen, in taking orders to be delivered, will be very careful to get all the details that are necessary to the intelligent filling of the order. They will also note if it is a rush order and see to it that any promise made is diligently carried out. Valuable salesmen will not extend credit except as authorized to do so. Much tact is required in handling

APPLICATIONS FOR CREDIT

so that they can be referred to the credit man without making the customer feel that his case is held up unnecessarily. It is usually best, if the clerk can spend the time, to go with the applicant to the credit man and explain the case in a few words, simply stating the man's needs, in so far as he understands them. He should not assume to make any recommendations, however, but withdraw, leaving the customer to the tender mercies of the credit department.

The efficient salesman must give careful attention to any complaint, whether it be trivial or of more importance, remembering that the customer thinks it of some importance or he would not report it. These should usually be reported to the manager, except in cases where the clerk is certain that he is able to fully adjust the matter. The least said about competitors the better. As a rule, let them do their own advertising.

* * * * * * * * *

G. W. Wolbert of Bismark read a paper on the subject of

OUR TROUBLES.

from which we extract the following:

I take it for granted that we have troubles, or we would not have these annual gatherings. It matters not whether our troubles are small or great, we all have them, and the dealer who is new in the business has probably more than he anticipated. Most troubles in this world are imaginary, few are real. There is a saying, "Never trouble trouble till trouble troubles you."

* * * * * * * * *

Complaints have been made to the association about

GOODS BEING SOLD DIRECT TO CONSUMERS,

and when the matter reaches the offender's attention he says it was an error and will not occur again, or else denies the sale entirely. And the same error has been known to occur again between the same parties. Personally, I have found only one way to stop such errors and that is this; stop all buying from such houses. It will take nerve to turn down an old friend and an old house, but do it for your own good. It will give you backbone for the next fight, and also aid your neighbor.

Right here I want to say that the traveling salesman is one of your best friends. Give him your time as soon as possible, and get all the information you can out of him; in short, pump him dry and then prime him with a nice order. In doing this, "The quality of mercy is not strained, it blesses him that gives and him that receives." 'Tis all he gets in this world that really seems to make life a dream, and often an order from you will make him dream.

* * * * * * * * *

I wish to remind you that the worst competitors many merchants have are themselves. They want to sell the same brand of goods a trifle cheaper than the other store sells them. They think thereby to win trade. Or they will buy the cheaper quality of similar goods, and see how low they can sell them. Where is the gain? Possibly in time you may kill off your competitor, but have you also thought of two things which may occur; either that he may get busy after you and ruin you financially, or if you succeed in your aim, a new man may come along, take his business and drive you out?

* * * * * * * * *

The big secret of making money in selling goods is this:

Digitized by Google

TURN OVER YOUR CAPITAL FAST.

In doing this you may occasionally pay a slight advance in prices, but at the end of the year you have made more profit, as your capital has produced returns every 60 or 90 days. Many dealers have too large stock for the tributary trade. That is the secret of the jobber and his success on small margins. He turns his money over from four to eight times each year, and if only 5 per cent. margin each time, he has from 20 per cent. to 40 per cent. annual profit. You do the same. Try it.

* * * * * * * * * *

HAVE FIRST-CLASS CLERKS AND ARTISANS,

as they are your best advertisers. Don't forget also that the laborer is worthy of his hire, if he is worth having at all.

Committees.

Vice-President Emery announced the following committees:

NOMINATIONS: H. T. Helgesen, Milton; W. R. McIntosh, Bottineau; R. L. Scott, Jamestown.

PRESS: John Nuss, Grand Forks; S. D. Bostwick, Bathgate; U. S. Conn, Fargo.

RESOLUTIONS: W. H. Pinkerton, Lakota; O. A. Gallup, Edgeley; H. J. Hellekson, Fairmount.

W. H. PINKERTON, OF EXECUTIVE COMMITTEE.

THURSDAY AFTERNOON SESSION.

On reconvening after recess, in the afternoon, Vice-President Emery introduced R. A. Grim of the Michigan Stove Company, who read a paper on

INVISIBLE ASSETS

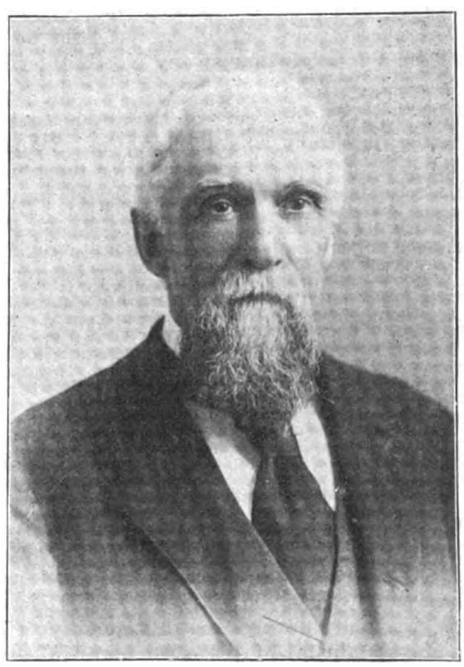
from which we make a few selections:

What we are gathered together here for is mutual benefit to find by exchange of ideas a higher level upon which to conduct business, to gain some knowledge from the more successful, and to help those whose affairs are not in as satisfactory a condition as would be desired. The commercial agencies tell us that over nine-tenths of the men who enter mercantile life are not successful. What we desire to combat is this

FRIGHTFUL FINANCIAL MORTALITY.

We see two men start into business in apparently equal conditions. In a short time conditions change; one either remains in the background or fails, the other forges to the front. I do not think there is a better source of information as to why this thing exists than the salesman who calls on those men in a regular way. He has in his mind's eye the individuality of each man he calls on, and as this man or that falls below the average he can foretell almost to a certainty the outcome. In other words, we were born with certain traits of character, certain visible assets, that fit us to be a success or a failure in mercantile life.

I think, from a financial standpoint,



INDUSTRY IS THE STRONGEST ASSET

a business man can have. Dun or Bradstreet do not take it into consideration, but give me the industrious man with a small capital in preference to the ease loving one with larger means. The industrious man will make the most of the means at hand, and, if he is possessed with the ideas of order, will present his goods to the trade in such a way as to gain business.

* * * * * * * * *

DIPLOMACY.

Another asset not down in the agency books is diplomacy. No matter how careful or how industrious he may be, if a business man is not diplomatic he cannot gain or keep friends. Every man should have his convictions and a right to his opinion, but to win friends do not thrust your opinions or convictions upon your trade. Many a man has driven away a customer by his outspoken and insistent harping on some subject that was repugnant to a part of the community in which he lived. Everybody's money looks alike when it is in the till, no matter what his religion, nationality

R. A. KIRK.

or politics may be. It may take a good deal of self control not to call some Smart Alec down, at the same time he may be contemplating a purchase of considerable magnitude that would carry a handsome profit. By being diplomatic, I do not mean that we should agree with every one, and be an Ephraim Smith, but it is always better to maintain a dignified silence upon a question that may lead to a heated argument and make an enemy.

STABILITY OF CHARACTER.

Away above and beyond all else that may go to make up the component parts of a successful business man is stability of character. This is an asset that underlies the whole fabric of our business system. When the hard times come, and the crops fail and fortune hides her face, it is the man who is known to be honest with himself and his fellow men that will fare the best. This is an asset that it takes years to acquire; it cannot be assumed, it is never a veneer to a base nature, but like the growth of a sturdy oak can only come by years of right living. It is a trait of character that generally writes itself in the countenance; the one pearl of great price that fires cannot burn or floods destroy. The possessors of the virtue of honesty are the salt of the earth.

R. A. Kirk, of Farwell, Ozmun, Kirk & Company, St. Paul, ex-president of the National Hardware Association read a paper on Jobbers' and Retailers, showing how the interests

Digitized by Google

of both the retail and the wholesale merchants might be advanced.

JOBBERS AND RETAILERS.

Mr. Kirk spoke in part as follows, his address being listened to with interest and appreciation.

* * * * * * * * *

I assume that we will stand together on this platform:

THAT, IN THE DISTRIBUTION OF MERCHANDISE,

the best way that has as yet been devised is that the manufacturer shall sell to the wholesale dealer, he in turn to the retail dealer, and that the latter shall go to the consumer. If the manufacturer ignores this order of things and goes past the jobber to the retail dealer, or if the latter is ignored by the wholesale dealer who goes direct to the consumer, there will be trouble in either case. I urge therefore that one way for promoting mutual interests is that the wholesale house follow a strict policy of not selling to consumers. It has taken several years to work up to this line in some parts of the Northwest. The country is new, great grain and live stock ranches were established whose requirements were large, so-called stocks of merchandise in hands of the adjacent dealers were small and incomplete, and it required time to work out the problem. The solution has been complete, and I believe that for several years past there has been no ground for complaint on this score against any Northwestern wholesale house.

Now, I hold that the first part of the action that I have given is just as important, and that if the manufacturer would not go past the jobber to the retailer the mutual interests of the two parties principally concerned would, as a rule, be promoted. I do not say that there may not be a single isolated case in which the retail merchant might benefit himself by dealing direct with the manufacturer. I do claim, however, that such cases are rare, and that as a rule the retail dealer does not gain by such a policy. This is true even in staple goods, most of which are sold through the wholesale houses, and at prices as low as the factory will or really can afford to furnish them.

* * * * * * * * * *

ANOTHER WAY IN WHICH WE CAN MUTUALLY BENEFIT

each other is by more frequently putting ourselves into the other fellow's place. If we consider things rightly, we are closely connected with and vitally interested in each other. As you men in the retail trade prosper the wholesale man expects to prosper. When you suffer we suffer along with you. Let us accustom ourselves more frequently to look at things from the standpoint of the other man in the case. When questions of policy come up in the wholesale house let one of the first things to consider be, How will this affect the interests of the retail dealer? Or when anything harmful in the conduct of business by the retailer comes to the attention of the jobber, let it be his aim to try to assist all he can in the correction of the evil. Then, when anything occurs in their relations to which the retail dealer objects and feels like resenting the treatment which he has received from the jobber, let him take a look at it from the other side.

* * * * * * * * * *

Another way to secure mutual benefit is through our respective associations. I hold that, to the extent that this association of yours works for and secures your best interests. Growing out of this relation, we find that the wholesale and retail associations can and do work profitably together in combating some of the evils that jointly affect their members.

TAKE THE CATALOGUE AND MAIL ORDER HOUSE EVIL,

which I have no doubt you regard as the most pernicious one that disturbs the trade. In meeting this destructive competition the retail merchant must expect, first of all, to use his own resources to fight it. He may also expect to have all the assistance that the jobber can give him. There is also a very important part of the work in this field which can be done most effectively, and, indeed, must be done, by associations and the wholesale. The officers and executive committees of these associations realize the value of this work, and they have already accomplished some results.

PARCELS POST.

Closely related with this work in the catalogue house, I wish to refer to the work of a league that has been organized in the East called the "Postal Progress League," which has just now made itself the champion of the Parcels Post bill, which it has lately introduced in Congress. This bill is made up largely of the same features as a bill that was before a previous Congress and that failed. This bill is now backed by stronger and general interests of the country.

No argument can be offered in behalf of this monstrosity such as we all recognize in the cheap transmission of newspapers and magazines. All our people are willing that this shall be done, even at some loss, but to apply this to merchandise is a proposition that I cannot believe the American people, and especially the general public, will consent to.

* * * * * * * * * *

CONGESTION OF THE MAILS.

would simply be stupendous. A merchant or consumer at Portland, Oregon, for instance, in want of goods, could order, say from New York, many goods in packages of 11 pounds and less, and instead of shipping by express or freight he would use the mail. Suppose he wanted a shipment of silks weighing 100 pounds or less, he could divide the goods into, say, nine packages and pay $2,25 for what would cost him, at present express rates, exactly six times this amount, while by freight the cost would be considerably larger than this charge by mail. The government would lose several dollars in the transaction.

If this bill were to become a law we can now have no conception of the disturbances and loss the country would sustain from it. I urge you, individually and also as an association, to use your influence with your Members of Congress and your United States Senators to have them understand your determined opposition to the passage of any such bill.

* * * * * * * *

Horace Hill of Janney, Semple, Hill & Company, Minneapolis, and Mr. Young, of Hackett, Walther, Gates Hardware Company, St. Paul, heartily indorsed the position taken by Mr. Kirk in his paper, and assured the members of the association that they were heartily in favor of association work.

THE MERCHANT AND THE LOCAL EDITOR.

W. E. Davies, editor of the Minneapolis *Hardware Trade* read a paper entitled "The Merchant and the Local Editor," from which we take the following:

* * * * * * * *

Wherever the local merchants and the editor faithfully cooperate there you will find a good trading point. The merchant should patronize a newspaper for purely business reasons. His personal relations with the editor, no matter whether pleasant or disagreeable, should not be taken into consideration.

The merchant should demand that the editor publish a good paper, and circulate it as much as possible in all of the territory in which the town has a fighting chance for trade. The local merchant experiences three kinds of competition:

1. Competition among merchants of the same town.
2. Competition between towns for the trade of a certain district.
3. Competition for the big center.

The view of some merchants is so narrow and restricted that the only competitor they can see is the fellow down the street. A town with such merchants is poorly armed to fight its trade battles. Usually where the merchants do not agree the town badly disagrees.

* * * * * * * *

The experience of merchants during the past ten years has shown that the fight to hold the trade at home

GROWS HARDER EACH YEAR.

It is not always a question of price, nor yet that oft repeated argument of a "larger variety to select from." New competition always necessitates more effort. The simple fact

Digitized by Google

that avenues have been opened whereby outside concerns can reach the local trade surrounding each town more easily than ever before, and outside concerns are taking advantage of it, makes the fight of the country merchant and the small town that much harder. Rural free delivery is here with objection and protest from the country merchant. Already the big retail interests in the big centers are following up this advantage with a demand for a parcels post. There was no good reason for opposing rural free delivery. There is a good reason for opposing parcels post. In fighting the parcels post the retailer is fighting the battle of the small town everywhere in defense of its trade prestige and its importance as a place on the map. This is ground on which the local merchant and the local editor co-operate for mutual benefit and the good of the community. There should be more of this co-operation on this very question than there is.

* * * * * * *

EDITOR AND MERCHANT SHOULD WORK TOGETHER.

It would seem unnecessary to tell merchants they should work together for the good of the town. All of them believe in it as a principle, but when it comes to putting the thing into practice, their hatred of the fellow down the street often handicaps the work, and in the end actually damages the general trade interests of the town. Co-operation among the merchants of a town is the first essential. If they can agree on nothing else they ought to agree that more trade for the town is what they want, and they can afford to lay aside their prejudices for a time and all pull together as a business proposition.

TOO MANY NEWSPAPERS.

The curse of many towns is too many newspapers. When you have one good newspaper, stick to it and discourage efforts to start another. You may be hot at the editor and actually rubbing your hands in anticipation of seeing him defeated in the next election, but forget that for a while and think of business. What does it matter if you and the editor disagreed in the last school election, if by working with that same editor, patronizing his paper, and helping him work for the general interests of the town, you are increasing your profits by a few hundred dollars? Differences of opinion in every community are constantly flashing up and fading away, but opportunities for making money once gone never return. You are a business man; make the most of your opportunities. If two newspapers is a poor business proposition for you and your town, put your foot down on it and endeavor to persuade the other merchants—as a business proposition, remember—that one paper is enough. Put two papers in a one-paper town, and one of them will be a poor medium for your ad. The circulation of one good paper can be pushed successfully. You get more for your money. Every merchant who patronizes two papers in a town where there should be but one is actually losing a part of his advertising appropriation.

FRIDAY MORNING SESSION.

At this session Vice-President Emery presented the annual address of President H. N. Joy, which he read, as follows, in part:

PRESIDENT JOY'S ANNUAL ADDRESS.

For your information and action I desire to bring before you a brief report of the doings of the association since we last met in annual session. The year just closed has been the most peaceful and harmonious of any since our organization, seven years ago. Whether this indicates a lack of zeal upon the part of the officers to push matters brought to their attention by the members, inaction of the members in filing complaints, or less cause for them, I am not prepared to say. I am, however, of the opinion that the latter is the case.

Some few complaints continue to be made of manufacturers and jobbers selling to dealers who are not entitled to purchase Hardware and kindred lines at wholesale prices from those who depend principally upon distributing their product or merchandise through regular Hardware dealers, but complaints of this character are growing less yearly, and I think are now chiefly confined to the smaller manufacturers and jobbers. Our own State association invariably handles this class of grievances itself much more effectively than can be done through the National Association, and is entitled to all credit for anything accomplished along this line.

THE ABUSES CAUSED BY MANUFACTURERS AND JOBBERS

doing business in our territory, selling their wares to contractors at wholesale prices, still exist to a much greater extent than would naturally be expected, considering the professions of the guilty parties to the contrary; and from the experience of the past I am satisfied that it will continue unless our members bear down heavily in every instance where sales of this character are made. I would suggest that each member make it his special business to watch for violations of this kind, promptly report same to the secretary, with sufficient data and proofs to make the case stick; and if customers of the guilty house, write a personal letter to them, vigorously protesting against such methods. Never make a complaint unless you are sure of your ground, and then stand by it to the last ditch, promptly furnishing the officers with all the information they desire to effectively prosecute the matter to a final conclusion.

CATALOGUE HOUSES.

While we only are able to remedy abuses caused by manufacturers and jobbers, as heretofore enumerated, through our State Association, it is equally true that the National Association alone can help us combat the ills we suffer, on account of the ever present catalogue supply house. The business of the former is usually confined to two or three States, and they cannot afford to run up against the wishes of State Associations, but the whole earth is the field of the latter, and to accomplish anything worth while the attack must be national in its character. The most optimistic of our co-workers has scarcely held, even in his fairest dreams, that the day would soon come when the catalogue house would cease to exist, and certainly nothing has transpired during the past year to my knowledge that would lead one to arrive at such a conclusion. The shipments of goods into our own territory during the past year have not, we think, decreased in volume, but we do think that the character of these shipments has undergone a change. A marked falling off in the volume of a well-known and standard brand of goods, displaced by inferior and unknown and unreliable brands, has characterized the shipments from these houses. Manufacturers of standard brands are, through the efforts of the National associations of both jobbers and retailers, doing much to correct past evils, and are assisting retail Hardwaremen to market their product in a manner satisfactory to all. These National associations are only just fairly started along this line, and will continue their good work until nearly all, if not all, standard brands of Hardware are sold over the retailers' counters at equally low prices as quoted by supply houses.

The latest production of the master minds of these concerns,

THE PARCELS POST BILL,

whereby they enlist the assistance of the National Government, and permit it to carry their goods at a loss, is still in the balance. Our National Association is leaving no stone unturned nor allowing any opportunity to slip to defeat this measure; but "never let up" must be the slogan of all merchants, wholesale and retail, and should have the co-operation of every citizen, or their efforts to thrust this burden upon the people will succeed. Papers during the past year have been placed in the hands of every member of this association, which, if used as intended, will assist very materially in defeating this pernicious proposition. If you have not done what you can to assist in this matter, go home and do it at once.

* * * * * * *

TRADE PAPERS.

The various trade papers' attitude toward us is in no respect changed. From week to week these friends serve up in a palatable form articles commendatory of our work, untiringly urging loyalty upon the part of the membership, and endeavoring by forcible logic to induce indifferent dealers to no longer ignore the claims of the association upon them and not expect the faithful few to always carry their burden. These efforts are pregnant with good results and are appreciated by us.

* * * * * * *

SECRETARY BARNES' REPORT.

This was followed by the secretary's report, which in part was as follows:

Digitized by Google

Our records show 151 good, live members, and the promise from quite a number that they will join at this meeting; so, by comparing our present membership with the available dealers in the State to draw our membership from, I believe we have much to congratulate ourselves on in this showing.

* * * * * * *

INTERCHANGE OF IDEAS.

In the conduct of my work this year I have received a great deal of benefit from exchanging with other State Hardware secretaries printed matter that has been sent out from their different offices. This interchange was agreed to at a meeting of these secretaries in Chicago during the national meeting last March, and I trust it may be continued in the future.

REFERENCE BOOK AND PROGRAMME.

As in former years, we have issued for this meeting a programme, and included matter in it that entitles it to be termed a "Reference Book." The preparation of this book has necessitated quite a good deal of correspondence, as practically all matter contained in it has been secured through that channel. It has been the desire of your officers this year to issue a programme that would be of value to the retail Hardware trade. This issue, as you will notice, contains a selection of many of the latest standard lists of articles carried in your Hardware stock, and also other matter that it has seemed would be of value to you in your business.

To make it possible to issue such a book, we are indebted to those who have advertising space in it, and I believe we should pass resolutions setting forth our appreciation of their help.

* * * * * * *

OUR OFFICERS.

Personally, I wish to express my appreciation of the officers and members of the association, who have always been ready and willing to assist me in the discharge of my duties, thus making my work far pleasanter while endeavoring to serve you.

The annual report of Treasurer W. H. Pinkerton showed the association to be in good financial condition, and the report of the Auditing Committee was to the effect that the books were found in perfect condition.

U. S. Conn, of Fargo, read a graphic paper on the

TRIALS AND TRIBULATIONS OF THE HARDWAREMAN,

which was reminiscent of the experience of most of the delegates present. He was followed by E. T. Davies, of Church's Ferry, who read a thoughtful paper on

KEEPING STORE IN A COUNTRY TOWN AND A FEW SUGGESTIONS ON ADVERTISING.

THE NEW OFFICERS.

Before the election of the new officers, Fargo was selected as the location for the 1905 convention, to be held during the month of January on dates to be selected later. The report of the Committee on Nominations was adopted without discussion. The following officers were elected for the ensuing year:

PRESIDENT, H. F. Emery, Fargo.
FIRST VICE-PRESIDENT, G. W. Wolbert, Bismarck.
SECOND VICE-PRESIDENT, A. C. McNiven, Langdon.
THIRD VICE-PRESIDENT, J. B. Buck, Rugby.
EXECUTIVE COMMITTEE, W. H. Pinkerton, Lakota.

At a meeting of the Executive Committee, which is now composed of H. F. Strehlow, Casselton; E. E. Elliott, Sanborn, and W. H. Pinkerton, Lakota, C. N. Barnes, who has been secretary of the association since its organization, seven years ago, and to whose efforts much of the success of the organization is due, was re-elected secretary. H. T. Helgesen, Milton, was elected treasurer, to succeed W. H. Pinkerton, who was elected to a place on the Executive Board.

Messrs. Emery, Strehlow and Barnes were chosen as delegates to the annual convention of the National Association in March at Indianapolis.

RESOLUTIONS.

The report of the Committee on Resolutions was read in full and adopted without change.

CLOSING SESSION.

The Question Box was the feature of the closing session, which was entirely devoted to it. It attracted more than the usual amount of attention. Questions on almost every variety of subjects of interest to the retail Hardware merchants were asked, and some time was taken in answering the queries, leading merchants of the State being called upon to give opinions on many of the points thus brought up.

GEM SILENT SALESMAN.

The Gem Cutlery Co., 34 Reade Street, New York, are the manufacturers of the Gem Safety Razors, advertised elsewhere in our columns. They have just ended the most successful year in their career as distributors of Gem Safety shaving appliances, and they attribute a good portion of their

increased sales to the fact that so many dealers handling their attractive productions, during the past year, added to their facilities by purchasing their "Silent Salesman," an illustration of which is given herewith, which enables the dealer to display an attractive line in so pleasantly fetching a manner as to induce a large distribution. They offer to furnish this "Silent Salesman" without extra charge to dealers handling the "Gem Safety Razors," if they will order a small assortment as enumerated herewith. They are

12 INCHES HIGH, 12 INCHES WIDE.

willing to do this because the sales are largely increased by so prominent a display of the entire assortment. The quantity of stock necessary to obtain this concession is as follows:

6 razors	$6.00
2 cases No. 1	3.00
2 cases No. 2	4.50
1 case No. 3	2.96
1 case No. 4	3.67
1 stropping machine and strop	1.22
	$21.35

SOMETHING NOTABLY APPROPRIATE.

A St. Valentine's greeting to all who love to snuggle close to Nature's Heart, consisting of a beautiful creation in water color, with a handsome 1904 bicycle girl for its center, her rosy bloom of happy health, blending with the sunshine of an opening Spring. If you want one free, just drop postal to Pope Mfg. Company, Hartford, Conn., or Chicago, Ill.

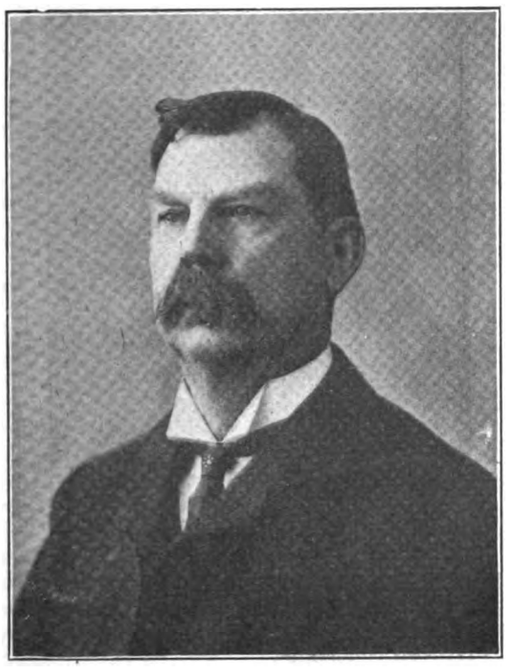
EIGHTH ANNUAL CONVENTION OF

WISCONSIN RETAIL HARDWARE DEALERS ASSOCIATION.



WEDNESDAY AFTERNOON SESSION.

The eighth annual convention of the Wisconsin Retail Hardware Dealers' Association, held in Milwaukee on February 3d, 4th and 5th, was conceded to be the most successful in the history of the Association. The large Convention Hall of the Republican House held in attendance over 200 interested delegates who were deeply interested in all the proceedings. The meeting was called to order at 2.30 P. M. by the president, Leon Findiesen, of Green Bay.

The roll call being dispensed with, an address of welcome was delivered by Alvin Kletzsch, president of the Citizens' League, who spoke in part as follows:

A SINCERE GREETING EXTENDED.

Through the courtesy of your esteemed secretary, I have the pleasure of appearing before you to-day and on behalf of the Citizens' Business League in particular, and the business

H. L. McNAMARA, PRESIDENT.

men of Milwaukee in general, I extend to you sincere greeting and a hearty welcome in our midst.

THE COMMERCIAL BAROMETER.

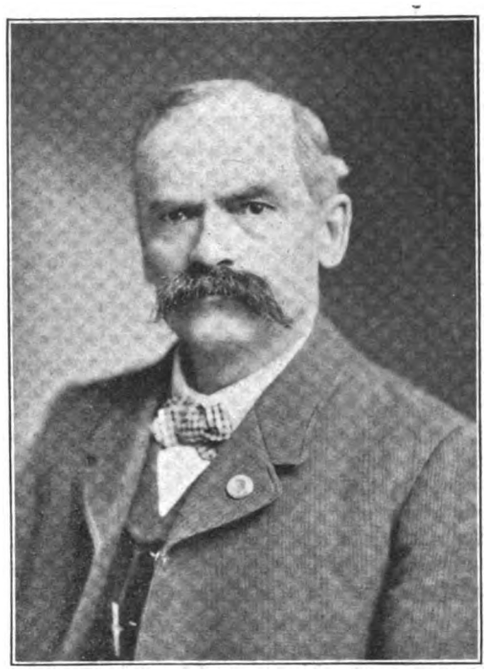
It expresses the magnitude of our appreciation but slightly when we state that we are delighted to extend to you the hospitality of our city, and that we feel highly honored to have you with us annually. We feel proud of you and the grand industry which you represent—the industry which means so much to the welfare of the entire country. Everything commercially seems to depend upon iron, and it is now conceded as being the commercial barometer of the condition of trade in general.

A BID FOR CONVENTION IN 1905.

Gentlemen, we take this opportunity to congratulate you and your officers upon your proud showing and success in the past, and we sincerely hope that your association will continue its splendid record and grow in strength and power and that the benefits that you will receive from this meeting will be many and manifold.

In departing, after accomplishing your purposes, may it be only with the pleasantest feeling for Milwaukee and a longing and desire to again assemble at the bright spot on the Eastern border of your State, which will always shine as a beacon light to attract you to its marts and trades.

Gentlemen, on behalf of the Citizens' Business League, we thank you for this opportunity, and hope the sentiment in your association may be such as to favor us again with another visit in 1905, and to that end we extend to you a cordial invitation.



President Findiesen, in responding to this address, said: "In looking over the program I see that Mr. Kletzsch is president of the Citizens' League, and I take this opportunity to thank him in the name of the great State of Wisconsin for his kind remarks and his cordial welcome."

President Findiesen then delivered the following:

ADDRESS OF PRESIDENT FINDIESEN.

MEET FOR EIGHTH TIME.

It gives me great pleasure to greet you at this Association. We are meeting here for the eighth time to carry out the principles for which this organization stands, and I am pleased to see so many familiar faces, as well as some new ones that never met with us before. I trust that each and every one of you may become so interested and derive such benefits from this meeting that he may feel that it was well

LEON FINDIESEN, EX-PRESIDENT.

he attended, and will look with pleasure to attend these meetings in the future.

Our association is in a most flourishing condition. We have at present a membership of 300 and a nice, round sum in our treasury. That our finances are in such excellent condition, we are indebted to our worthy secretary, for it is largely through his able management in securing advertisers for our program that our treasury is enriched from year to year.

The National Association, with which we are affiliated, is doing very excellent work through its efficient secretary, and any one that reads the National Bulletin can see that it is already felt a power for good. I think we took a step in the right direction when we joined.

A YEAR OF UNUSUAL INDUSTRIAL PROSPERITY.

The year just closed has shown unusual prosperity in all industrial lines, and I trust that you may have met with abundant success in your business, and that, after taking your inventory, you found the balance on the right side of your ledger. While the business barometer for the year just begun does not indicate anything unusual, no valid reasons can be given so far why it should not be good, or even better, than the one just closed.

FORMATION OF AN INSURANCE COMPANY.

At last year's meeeting you appointed a committee of three, consisting of your president, ex-president and secretary, to ascertain the steps necessary to form a mutual retail Hardware insurance company. That committee met, and instructed your secretary to engage an attorney well versed in insur-

Digitized by Google

ance matters to assist him. With his accustomed energy, your secretary proceeded at once to Madison, and succeeded in having the legislature, then in session, pass an act under which we could organize. It will be necessary for you at this meeting to appoint a board of directors, such as can and will serve; but as we expect a paper on this subject in which everything will be discussed fully, I will refrain from making any further comment.

INCREASING MEMBERSHIP.

Another matter that deserves your careful attention, is how to increase your membership. There are about 1,000 retail Hardware dealers in this State, and of these about 300 belong to our State Association. I hope you can devise some plan by which this desirable object can be attained.

SUGGESTS RESURRECTION OF THE OLD PLAN.

Some five years ago we succeeded in interesting the travelingmen in our cause, and I understand that through their efforts our membership was increased very materially. Then why not adopt this plan for 1904? The boys on the road are our friends, and our secretary could furnish them with a list of our membership, together with a circular setting forth the benefits, not overlooking the insurance feature, that would be derived by joining our association. I have no doubt that if this plan were followed with energy, we should increase our membership fifty per cent. in one year. But every laborer is worthy of his hire, and I would suggest that a commission be paid for every member thus secured.

FIGHTING THE PARCELS POST.

Secretary Corey of the National Retail Hardware Association makes a strong appeal to every member of this association in the last number of the National Hardware Bulletin, requesting you to write your Congressman and to enter your protest against the passage of the measure now before Congress, known as the "Parcels Post Bill;" will you do it? This is a catalogue house measure, pure and simple, and it is the duty of every member of this and kindred associations to do everything in his power to defeat this infamous bill. I express the hope, therefore, that you will not let this appeal go unheeded, but will write your Congressman to work and vote against the measure.

There are undoubtedly a number of questions that ought to receive our attention at this meeting and that may have escaped my notice; in that case I hope that each and every one of you will be free to mention anything that may be of benefit to the members of this association.

MEETINGS IMPROVE IN VALUE.

It has been my pleasure to attend three meetings of this association previous to this one, and I am free to say without fear of contradiction that the last one was always more interesting and more beneficial than its predecessor, and I venture the hope that this one will be no exception to the rule.

A TOLERANT SPIRIT SHOULD PREVAIL.

In conclusion I will say that one thing that I always found at every meeeting I attended and which pleased me as much as anything, and that is the kindly and tolerant spirit that prevailed in all of our discussions and transactions, and I venture the hope that the same conditions will prevail at this meeting. May the benefits derived from this, our eighth association meeting, be commensurate with the time and money expended, and may it assist us in solving the problems that may confront us in 1904, is my sincere wish.

Andrew Noll, of Chilton, ex-member of the association and the originator of the idea of having a retail Hardware dealers' association in the Badger State, then addressed the convention.

On motion of John Hessel, of Antigo, seconded by C. A. Peck, of Berlin, Mr. Noll was made an honorary member of the association.

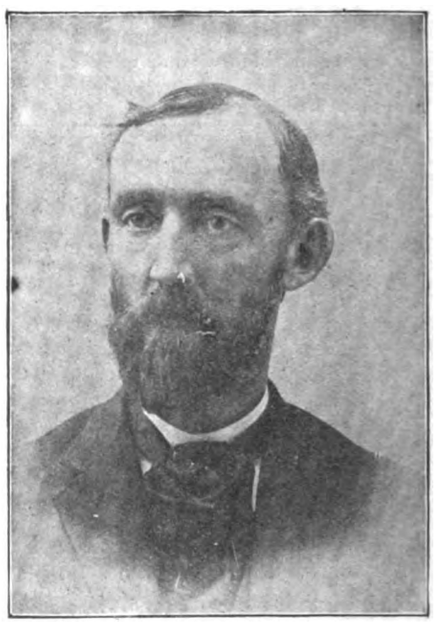
Secretary Peck then announced that the Jobbers' and Manufacturers' Association of Milwaukee extended an invitation to the visiting Hardwaremen to see "Sporting Life" at the Academy of Music on Wednesday night, and "When Reuben Comes to Town" on Thursday evening, the entire Parquette of both theatres having been reserved for the Hardwaremen. The invitation was accepted by the association.

Letters of regret were read from the Montgomery Hardware Co., Wausau; Roach Bros., Fennimore, and J. Barlow, of Ripon.

Secretary Peck then read his annual report, in which he said:

SECRETARY'S REPORT.

My work has not been materially different the past year than that of preceding years. At the last meeting 193 members renewed and 36 new firms joined the assiciation. Since that time 7 more have come into the fold, but there are yet 700 for us to work on.



* * * * * * * *

PROSPECTS.

The prospects of the association were never brighter than to-day, and with our affiliation with over 4,000 other retailers through the National Association, we are certainly exerting a powerful influence for good to every dealer in the State.

INSURANCE.

With our insurance company doing business I trust that at least 300 of the 700 still outside, may be brought in and our influence correspondingly increased. One at least, and

C. A. PECK, SECRETARY.

probably more of our members suffered from fire during the year. E. C. Alsmeyer, of Cottage Grove, being burned out January 19, suffering a $7,000 loss, with $3,000 insurance stopped 3 railroad companies.

RETAIL PRICES.

July 23, I asked 700 dealers, in response to a request of the National secretary, to give me the prices at which they were selling certain goods. These replies showed that the claim of certain manufacturers, that retailers of Wisconsin were selling their product as low as certain catalogue houses, was entirely without foundation and I was pleased to see that so many merely replied: "We don't sell the goods, but let the catalogue houses have all of that trade."

Then following his report as secretary, in which Mr. Peck announced a balance on hand of $1,435.69, Secretary Peck then announced the following committees which had been appointed by the executive committee during their morning session:

Reception Committee—Simon Fink, Milwaukee; F. C. Burr, Milwaukee; A. Heins, Tigerton; Wm. Noll, Chilton; James Wilkie, Fond du Lac.

Transportation Committee—E. H. Ramm, New London.

A. Schupinski, Milwaukee, was appointed sergeant-at-arms.

Committee on Resolutions—A. H. Sheldon, Janesville; H. C. Scofield, Sturgeon Bay; R. C. Murdoch, Beloit.

Auditing Committee—J. Kornelly, Milwaukee; H. L. McNamara, Janesville.

Press Committee—R. C. Murdoch, Beloit; John Hessel, Antigo.

W. T. Stebbins, Rorchester, Minn., treasurer of the National Association of Retail Hardware Dealers, and one of the officials of the Minessota Hardware Dealers' Mutual Fire Insurance Co., then addressed the Association at length on the great advantages of the Mutual Fire Insurance Co. move-

Digitized by Google

ment, on which subject he presented an exhaustive array of figures, and an interesting statement of fact, which were added to by the reading of a letter from Secretary Matthews, of the Insurance Co., showing the cash on hand January 30th to be $35,759.71 with no losses reported. A discussion and questions followed which were participated in by C. A. Peck, Berlin; O. A. La Budd, Elkhart Lake; E. C. Williams, Waupaca; Otto Schlafer, of Appleton; S. K. Burget, Taylor, and D. G. James, of Richland Centre.

C. A. Peck, Berlin, then made his report as delegate to the National Retail Hardware Dealers' Association convention held in Chicago. 1903. He said: "It is a great encouragement to any one interested in the retail Hardware movement to meet delegates from nineteen States and see such generous whole-souled enthusiasm. We held five sessions, all loaded with good. The State secretaries held a meeting and agreed to exchange printed matter. The National Association is one of the main cogs in the wheel. This Wisconsin Association is 300 strong, while the National Association is 4,000 strong. The National Association has accomplished a great deal, much of which I am not at liberty to talk about. Their secretary, M. L. Corey, of Argos, Ind., is one of the most efficient men I ever met I wish to narrate a little incident in regard to our own State work. I recently called on a new concern and asked them to join; one partner immediately said that he would, and I had my receipt book out when the other partner came along and said: 'I guess we will wait a while, as I do not see that you have accomplished much in the seven years you have been in existence.'"

The Question Box was then taken up and the contents thoroughly discussed by the delegates, among whom were C. E. Dewey, Kenosha; Leon Findiesen, O. A. Le Budde, Ray Miller, of Alma Centre; C. A. Peck, Otto Schlafer and L. E. Nash, of Centralia.

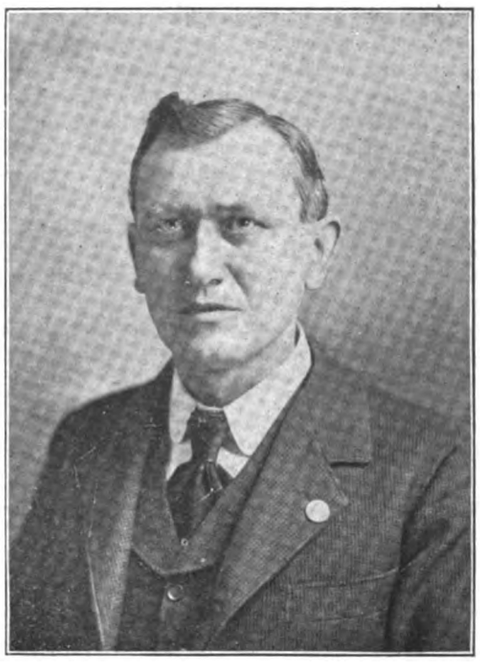
L. E. Nash, Centralia, then read a paper on

RELATION OF JOBBER TO RETAILER,

from which we extract the following:

So important a subject as the one assigned to me, with my limited experience, should have been given to some jobber, whose everyday dealings with thousands of retail dealers should enable him to speak with something like authority upon the relations that do and should exist between the jobber and retail dealer, but my interest in our Retail Hardware Dealers' Association prevents me from refusing the honor thus thrust upon me. I believe the interests of the jobbers and retail dealers are so closely linked together in the process of transferring goods from the hands of the manufacturer to those of the consumer, as to be almost identical.

RETAILER HAS THE HARDER JOB.



The retail dealer must succeed and make money if the jobber is to get good orders and get his pay for them. An up-to-date, enterprising retail Hardware merchant who can buy everything in his line at right prices and at the same time look after sales, credits and collections, has no small job on his hands. I think it is a much harder vocation than that of the manufacturer or the jobber.

A jobbing house has a force of experienced men for each department, with a buyer for as many lines of goods as he is capable of properly caring for, who is supposed to know the quality, reputation and price of nearly everything in this branch of trade. He can act as a primer for both the retail dealer and the manufacturer. Any complaint coming to the house from the retail dealer is referred to the sales department and the character of the difficulty is soon sifted and the jobber is then in position to bring the complaint to the manufacturer.

DAY OF LARGE PROFITS IS PAST.

The time for selling goods at a profit of 30 or 40 per cent. is past. The success of both jobber and retail dealer lies in the volume of business done. When the jobber sends you a cut and description of an article, study it well, learn all the truth about it, put it in print and go at it with as much enthusiasm as if it was the first article you ever undertook to sell. An essential point in selling goods is to learn all there is to know about the goods before attempting to describe it to the customer. Your being "loaded" makes your talk with the customer of some effect. You should also know something about similar articles kept by competitors and should develop reasons why your goods should command the buyer's preference. If you have salesmen you should outline methods for them to effectively present your goods to customers.

I am full of the idea that retail dealers and jobbers would both be greatly benefited by coming into closer touch with each other. This association has now had at least one retail dealer's ideas on the subject, and in closing I want to suggest, that next year we hear from the jobbers along these lines. They probably have given much more thought to the subject than the retail dealer and might be able to make suggestions as to ways and means of getting together for profit and the advancement of all the interests in our line of merchandise that would be wholly new to us. I would suggest that several jobbers be invited by this association to meet

O. P. SCHLAFER,
PRESIDENT OF WISCONSIN R. H. D. INSURANCE CO.

with us next year and give us the benefit of their ideas on the subject.

H. L. McNamara, Janesville, on behalf of the auditing committee, said that the funds of the treasurer had been examined and found correct. The report was approved and the committee was discharged.

The convention adjourned at 4.40 P. M.

THURSDAY MORNING SESSION.

The meeting was called to order at 10.10 A. M. W. B. Costello, of Chicago, was called on and made a brief speech, thanking the association for the honor. F. K. Cunningham, Berlin, then read an excellent paper on

THE RETAIL HARDWARE STORE,

which we shall reserve to publish in full in a future issue.

O. P. Schlafer, Appleton, Wis., then addressed the association on the subject of insurance. He said: I regard these meetings as a part of the year's business course and have not missed a meeting since the beginning. I do not know that I can say very much on the subject of insurance, but I can give my personal experience. Thirteen years agoI put up a solid brick building, the basement had 28-inch walls, the first story had 16-inch brick walls and the second story had 12-inch brick walls; the building was electric lighted throughout and there were no windows in the side walls, only in the end. For ten years I paid $10 per thousand on the building and $10 per thousand on the stock. Four years ago an insurance examiner called in and criticized the electric wiring, so I had the building rewired at an expense of over $100. My next policy called for $12 a thousand on both building and stock. In 1903, an additional call was made to these prices, my building being rated at $12; my stock at $14.60. To reduce this insurance I had the gasoline which I had previously kept in a warehouse in the rear, placed in a building built of brick especially for this purpose. This building had a heavy

Digitized by Google

floor, 2-inch double door, and sheet iron inside and out, and I felt that it was amply sufficient to secure my reduction of the $2.50 per thousand which I had to pay gor a gasoline permit. The insurance man said that in order to secure this reduction I would have to have fire shutters on the second story of the warehouse, next to this gasoline building. I simply said that he could either take off for the gasoline permit or cut out my insurance altogether, and the outcome of the matter was that we were insured without the gasoline permit. This shows that the insurance companies are not so rigid as they pretend to be. The total expense of the Minnesota Association in losses is only 38 per cent. of their total income. A Hardware risk, is I believe better than a dry goods risk, or a grocery risk, as the goods are less inflammable. Statistics of old line companies show that the premiums paid to the companies 35 per cent. is charged up to losses. Where does the 65 per cent. go? Some goes to agents, some to officers and some to adjusters. If we can do as well as Minnesota has done, I see no reason why we should not organize an insurance company of our own. We use fire extinguishers in our store and we never had a dollar's worth of loss until six weeks ago, and this was a trifling one. By ordinary precautions you can largely eliminate fire risks. I think we can do nothing to prolong the life and increase the interest in our association as starting an insurance department.

The next thing on the program was the election of officers, Messrs. Kroncke, Jacobs and Cunningham being appointed tellers. The following officers were elected for the ensuing year:

President—H. L. McNamara, Janesville.

Vice-President—Ralph Burtis, Oshkosh.

Secretary-Treasurer—C. A. Peck, Berlin.

E. H. Ramm, New London, was elected a member of the Executive Committee to succeed himself, and W. H. Busse, of Milwaukee, was elected a member of the Executive Committee to succeed J. Kornelly, Milwaukee.

R. C. Murdock, Beloit, made a suggestion that all interested in the insurance feature should induce the Hardwaremen not present to take this insurance.

The convention adjourned at 12.20 A. M.

THURSDAY AFTERNOON SESSION.

The Thursday afternoon session was called to order at 2.15 P. M. Charles L. Burch entertained the convention with a dialect recitation. H. M. Gay then showed his Hardware museum to the extent of a door bolt 250 years old and also an English level.

Chairman A. H. Sheldon, Janesville, of the Resolutions Committee, then presented the usual resolutions of thanks to the press and others, which were adopted unanimously.

John Wilke, of Fond du Lac, then read an interesting paper on

GOOD WILL AMONG HARDWAREMEN.

He was followed by A. T. Stebbins, Rochester, who delivered an address as follows, which was listened to with close attention and met every mark of distinguished favor. He said:

The object of these associations is to help ourselves. I came here for a heart to heart talk. I represent the National Association, being an officer of that body. The National Association is made up of representatives of the different State Associations. If the State Associations prosper then the National Association prospers. You must go away from here with the impression that you are a part of this organization. To present matters of retail interest to the jobber and to the manufacturer is an easy matter and can be done better from a national than from an individual standpoint. This is illustrated by the meeting we had last May with the jobbers. We had an excellent meeting, being in session with them for three days, and the right hand of fellowship was extended to the retail trade. The matter of manufacturers who sell their goods to catalogue houses was brought up. We had seen jobbers go past retailers in order to sell to consumers, and we are just beginning to wake up in the matter. We laid this question before the jobbers and they met us in a friendly spirit. It was generally recognized that a legitimate channel of trade was from the manufacturer to the jobber, the jobber to the retailer, from the retailer to the consumer. And each and all present promised to help remedy these evils. We put the question to them like this, a catalogue house buyer approaches a buyer whose annual output is a million dollars worth of goods and says to him, suppose we buy a million dollars worth of goods what is your price? and the manufacturer gives him a low price, and the consequence is we see the goods listed in mail order catalogues at a price we cannot meet. What shall we do? Is not the best thing we can do to handle other goods? Suppose we tell this to the traveling salesman and he in turn tells it to the jobber; then when the manufacturer goes to the jobber, the jobber tells him I do not want your goods as the retailers do not want them. A few cases like this ought surely to convince any manufacturer that it is to his interest to use legitimate channels of trade. We found one manufacturer who said that he saw no reason that the retail trade could not handle his goods at a profit at the rate at which they were quoted; the retailers could meet catalogue house competition and still make 7½, 10 or 12½ per cent. this manufacturer said. We can. This led to a discussion as to what retail profits should be, and it was agreed that they should be 20 per cent., because there are very few places, and those are exceptionally well located, where a retailer can make a living in the Hardware business and take less than 20 per cent. of the gross profits. It was generally felt at this meeting that the interest of the retailer and the jobber were identical.

I have tried to start a local association. We formed a merchants' association in our town. This was brought about in the first place by some merchants handling trading stamps while others did not, and in our case, trading stamps proved a blessing in disguise. Every merchant in Rochester, fifty-seven in all, are members of our merchants' association. We have a list of people who do not pay their debts. If an account is not paid, we write the delinquent a letter stating that if the account is not paid by a certain date, his name will be reported to every merchant in town. This system of collection beats any lawyer. By means of a booklet we talk to out-of-town customers and show them why we can sell cheap. Farmers are organizing everywhere. The interest of the farmer is the interest of the merchant. Jim Hill said recently that the interest of the men located along his line was his interest. When we learned that the farmers in our vicinity were about to organize, we wrote them that we would furnish them with a hall for their meetings and our secretary would help them in correspondence, etc. We will have a meeting of the farmers next month.

I wish to emphasize our duty to the traveling men. I have been too hard on traveling men. They are our allies. They bring us prices, information, etc., and do us a world of good. We should do what we can for them and send them away with better feelings. I wish to say a word on the subject of loyalty. While we are not organized for boycotting, each and every member should report every violation of the resolutions, for if they do, it will go before 5,000 Hardware dealers. We should have 15,000 members. When we can get anything we want. You have seen a pamphlet here containing the speeches of Mr. Corey and Mr. Bogardus before the National Hardware Association at Atlantic City, in November last. This was the greatest step that we have taken. The president and the secretary of the retailers were recognized by being allowed to present their case. They talked to the manufacturers and to the jobbers. Their speeches were ordered printed and a copy was ordered sent to every member of Congress. These speeches are certainly masterly handling of questions of vital importance. The parcels post is communism. It is only a stepping-stone, Mr. Cowell says, from this; the United States will own the railroads, etc. We are making history and making it fast. Capital was organized; then labor. We are at the tail end, but by asking for what we can get, we can accomplish much.

President McNamara, Janesville, said: I thank you in behalf of the association for your remarks. We can all go home and remember parts of Mr. Stebbins' speech for the rest of the year.

Mr. McPherson, Oshkosh, read an excellent paper on

RETAIL MERCHANT AS AN EDUCATOR,

founded on his personal experience, and was listened to attentively. Additional contents of the Question Box renewed that interesting subject.

THE CULTIVATION OF INVENTIVE GENIUS.

Thomas Coldwell, of the Coldwell Lawn Mower Company, Newburgh, N. Y., is strongly interested in having the Board of Education of Newburgh, N. Y., take up the subject of "The Cultivation of Inventive Genius," by offering prizes to stimulate inventive genius among the pupils of the Newburgh schools.

By invitation of the Committee of the Board, having the subject in charge, Mr. Coldwell was invited to address the students of the Newburgh Academy, which he did on January 7th. He delivered an exceedingly practical address on the occasion, which was listened to with interest and close attention. We make a few extracts from the same herewith:

* * * * * * * *

I have been asked by your committee who have the matter in charge, to talk to you a little while this afternoon on a subject which, so far as I know, is entirely new in public school education. I know of no better name for it than that which has already been largely used in the public press, which is "the cultivation of inventive genius." Can it be cultivated? The question has been asked me a number of times since this subject has been introduced to the public through the press if boys and girls can be taught to invent. I claim that they can, and that inventive genius can be taught, encouraged and cultivated just the same as the genius for any other study. Webster defines the word invent to mean to discover commonly by study or inquiry; to find out, to devise, to contrive or produce contrivance of that which did not before exist. I am aware that it is the general impression that inventive geniuses are born with this special gift and the inventions they produce are simply the natural product of their braine, which comes spontaneously without any particular effort or study on their part. This is a mistaken idea, for inventors as a rule have been the greatest students and the hardest workers in the line which they have chosen for a display of their ability. In fact in order to be a successful inventor he must be thoroughly acquainted with the state of the art to which his proposed invention pertains.

THE SCOPE OF INVENTION.

Many people have the idea that inventive genius is only applicable to mechanics. This also is a very wrong idea, for I believe that inventive genius can be successfully applied to any profession or duty in life. For instance, I met one of the professors in the Hartford Public Schools, who said he had adopted the plan which your Newburgh Board of Education has adopted, of giving prizes to his pupils for the best inventive genius shown in the presentation of their several lessons and problems about which you understand better than I do. He said the plan worked well as it taught the pupils to think, which is simply another word for invent.

Your teachers and your superintendents and Board of Education are continually displaying their inventive genius in devising new plans and improvements in the line of education that will help them the more successfully to carry out this great educational work and better prepare you for the great responsibilities of life for which all education is intended. I am of the opinion that the great progress that has been made in the line of public education during the past fifty years gives conclusive evidence that inventive genius in public education, in its devising new lines and new methods, for carryng on the work, shows as great progress as any other line of invention.

* * * * * * * *

HOW TO INVENT.

The Board of Education of the City of Newburgh in order to encourage and cultivate inventive genius has concluded to introduce it as a new line of study in the public school and to give special encouragement to its development, have offered a number of prizes ranging from $10 down to be distributed amongst the pupils who take up this line of education according to the merit of their invention or suggestion. It is my particular purpose today to explain this matter more fully in order that you may begin the work intelligently and to make it more clear. I have divided it under two heads. One is inventions, the other suggestions. While they are practically the same, I think it simplifies the matter very much to class them in this way. First a suggestion would refer to any new or useful improvement. It might be of such a nature that it could not be made into a definite working form, like a sewing machine or a clock, or other inventions that pertain to mechanics, yet it may be some new and useful plan for doing something better or quicker, which can be fully explained in writing. For instance, some boy might suggest doing certain work in the manual training school that would be new and useful, and he could fully write out and explain his ideas that would thus be in the form of a suggestion to those who had the matter in charge so that they could put it into practical use, and yet you would readily see it is something that could not be made up into a machine or demonstrated by a mechanical drawing. It would simply be suggesting such an improvement. There are hundreds of ways about school and educational matters where new and useful improvements could be suggested, many of which might be overlooked by your teachers and other officials of the school.

* * * * * * * * *

VALUE AND IMPORTANCE OF INVENTIONS.

Some one has said that the man who causes two spears of grass or two leaves of corn to grow where one previously grew, is a public benefactor, and deserves the approval of his fellowman. You have probably never stopped to think of the fact that one man can only perform the physical labor of one man, and yet you will readily see that if he can devise some means or invent some plan or machine by which he can do double the amount of labor in the same time, that in so doing he has doubled his value to himself and the world. If you measure his ability and capacity by money value, if he has been previously earning $1 a day, he is now worth $2 a day. You will also readily understand at the same ratio if he can invent something that will enable him to do the work of one hundred men, he will be worth $100 per day.

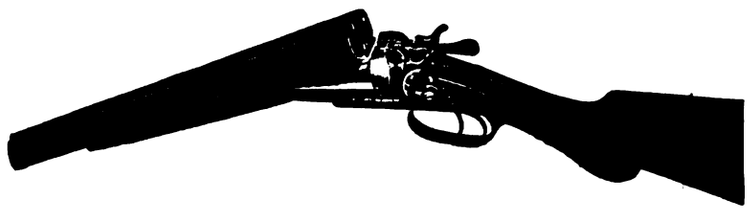
* * * * * * * *

I know the question is often asked if such an invention would not throw eleven women out of employment who previously made their living by the needle. It would seem so at first thought, but the fact is that dress makers are always busy and sewing machine operators are always in demand, and women in this branch of industry are receiving more than double the pay they received before sewing machines were invented. This gives conclusive evidence that the laborers have been really benefited by the invention.

* * * * * * * *

These inventive geniuses have made it possible to cross the ocean in less than six days by replacing the old sailing packets with their tedious long trips of weeks and sometimes months, by the fast and splendid lines of steamships which cross the ocean with about as much ease and regularity as the ferry crosses the river.

They have made it possible for us to go to San Francisco in four or five days by replacing the old canal boats and stage coaches, with finely equipped vestibuled trains with every comfort and convenience for the journey. They have given us the telegraph and telephone, which enable us to sit in our homes and talk to our friends in New York or Chicago or dictate a message to a friend in London or Paris or any other part of the civilized world.



Their inventions have enabled us to open up new territory and develop our vast resources in one-tenth of the time we could have done it formerly, and much more efficiently.

* * * * * * * *

Don't think for a moment that the field of invention has been worked over. The field is getting longer and broader

Remington

Double, Hammer Guns retailing at a moderate price, are preferred because of their wearing and shooting qualities,

THEY HAVE THE REPUTATION OF

"STANDING THE RACKET."

This reputation and the advertising behind them make them easy to sell,--and they stay sold.

Remington advertising material sent to dealers on request.

The REMINGTON ARMS CO.,

313-15 BROADWAY New York.

86-88 FIRST ST. San Francisco, Cal.

every year. I believe it will continue to do so. I believe there are greater inventions and discoveries hidden away in the future than has ever been revealed in the past. Inventions are like gold hidden in the earth and it is only waiting for the prospector to dig it out from its depths and bring it to the surface that it may add wealth and honor to the fortunate prospector and give greater prosperity to the world in general. Some boys are probably attending school to-day who will have their names written on the monument of fame with those of Watt, Stevenson and Morse and Edison and Marconi as the great inventors of the age in which they live.

I fully believe that any boy here who will start out with a full determination to invent something in any particular line, and if he will devote his mind and study to it, he will eventually succeed. At least he will succeed to the same extent and in proportion that he would in any other study to which he devoted his energies. You may not all be an Edison or a Watt, a Stevenson or a Howe, but you surely will invent something and you will certainly make yourself worth more to yourself and the world than you otherwise would be.

HARDWARE PATENTS.

The following list of Patents, Trade Marks and Designs of interest to the Hardware trade are furnished by Davis & Davis, Solicitor of American and Foreign Patents, Washington, D. C., and St. Paul Building, New York City.

PATENTS EXPIRED JAN. 18, 1903.

356,115. Door Check, E. Frothingham, Boston, Mass.

356,143. Sash Fastener, F. D. Livingstone, Springfield, Mass.

356,166. Combined Siding Bracket Gage and Compass, J. M. Shanklin and J. E. McBeil, Sandoval, Ill.

356,214. Bit Stock, H. Smiley, Boston, Mass.

356,241. Gas Pliers, W. P. Dahl, Minneapolis, Minn.

356,253. Shears, W. E. Lant, Lancaster, Pa.

PATENTS ISSUED JAN. 19, 1904.

749,751. Safety Razor Frame, A. W. Scheuber, Hoboken, N. J.

749,910. Self-Closing Faucet, E. L. Walter, Scranton, Pa.

749,940. Mop Holder, C. Morgan, Freeport, Ill.

750,054. Fishing Reel, R. L. Hunter, Minneapolis, Minn.

750,163. Jar-Sealing Wrench, L. D. Burlingham, Warren, Ohio.

750,182. Reversible Screw Driver, Z. T. Furbish, Philadelphia, Pa.

750,183. Ratchet Tool, Z. T. Furbish, Philadelphia, Pa.

750,189. Hand Plane, E. Haydock, Manchester, England.

PATENTS EXPIRED JAN. 25, 1904.

356,442. Tubular Lantern, C. Bergener, Rochester, N.Y.

356,483. Trunk Caster, J. Loos, Freeport, Ill.

356,492. Pinchers, V. Morrill, Jersey City, N. J.

356,540. Hand Vise, S. Joel, New York, N. Y.

356,566. Combined Oil Can, Wrench and Tool for Bicycles, D. C. Wilgus, Los Angeles, Cal.

356,620. Tack Driver, F. Chase, Boston, Mass.

PATENTS ISSUED JAN. 26, 1904.

750,287. Lifting Jack, L. C. Kimberly, Circleville, Ohio.

750,344. Multiple Baking Pan, A. E. Bronson, Cleveland, Ohio.

750,354. Mop Wringer, C. S. Fowler and F. C. Wetzler, Toledo, Ohio.

750,397. Stropping Machine, A. W. Scheuber, Hoboken, N. J.

750,420. Sash Fastener, J. Anderson, Seattle, Wash.

Not long ago a telegraph operator found the words "orate fratres" in a special dispatch about the "praying brothers." It is not definitely known whether the telegraphist or the compositor attempted to translate the words but it is certain they appeared in a paper as, "Oh, rats, father!"

REVIEW OF THE MARKETS.

WIRE NAILS. The crowded condition of the mill order books begins to inspire a feeling of doubt about specified deliveries being made on time. The business has been exceedingly active and the prospect is good for a short supply that might instigate an advance in price. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carload lots	$1.90
Retailers, carload lots	1.95
Retailers, less than carload lots	2.05

New York. There is an increasing demand in the local market, mostly for small lots from store, although orders for future delivery from larger purchasers have been more frequent. Quotations are as follows:

Single carloads	$2.05
Small lots from store	2.15

CUT NAILS. At the meeting of the Cut Nail Association, held on February 4, the quotations established for January were reaffirmed for February. The demand is reported as being an active one, based principally on deliveries to apply on orders previously booked by the jobbing interest. The mills have been quite prompt on deliveries. On either Steel or Wire Nails, with no discrimination as to localty, quotations are as follows:

Carload lots	$1.70 base
Less than carload lots	1.75

f.o.b. Pittsburgh, plus freight in Tube Rate Book to point of destination; terms, 60 days, less 2 per cent. off in 10 days.

New York. The local demand is a limited one and for immediate requirements. Quotations are as follows:

Carloads on dock	$1.84½
Less than carloads on dock	1.92½
Small lots from store	2.00

BARB WIRE. The trade has been rushing in orders on this line, until it becomes a question whether prompt shipments on specified dates will not become doubtful. Some of the mills already report being behind orders considerably. Quotations are as follows, f.o.b. Pittsburgh, 60 days, or 2 per cent. discount for cash in 10 days:

	Painted.	Galv.
Jobbers, carload lots	$2.20	$2.50
Retailers, carload lots	2.25	2.55
Retailers, less than carload lots	2.35	2.65

SMOOTH FENCE WIRE. There is a large business being done by the mills on this leading staple. The dealers are evidently preparing for an anticipated business of good volume. Quotations are as follows, f.o.b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

Jobbers, carloads	$1.85
Retailers, carloads	1.90
Less than carloads	2.00

The above prices are for base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the usual advances.

NUTS. At a meeting held January 19, the manufacturers of Nuts reaffirmed the prices adopted two or three months ago as follows:

	Off List.
Hot Pressed Square Nuts, blank or tapped	$6.00
Hot Pressed Hexagon Nuts, blank or tapped	6.50
Cold Punched Plain Blank Square Nuts	5.10
Cold Punched Plain Blank Hexagon Nuts	5.60
C. T. and R. Blank Square Nuts	5.30
C. T. and R. Blank Hexagon Nuts	6.00
Cold Punched Plain Tapped Square Nuts	5.10
Cold Punched Plain Tapped Hexagon Nuts	5.60
C. T. and R. Tapped Square Nuts	5.30
C. T. and R. Tapped Hexagon Nuts	6.00

The manufacturers uniformly reported an improved feeling among the trade, and all regarded the outlook for business as exceedingly good.

HATCHETS AND ADZES. The manufacturers of Hatchets and Adzes have recently formed a combination which includes the leading makers of these goods. After a full agreement, the following list has been decided upon as a standard list in future. The regular list on general grades will be found that which has formerly prevailed; but full polished grades have now a uniform list, instead of the varying lists and discounts which were frequently used. The discount on first-quality goods to the trade generally is 40 per cent., the list being as follows:

PRICE-LIST OF HATCHETS.

No.	Bronzed. Per dozen.	Full polished. Per dozen.
Shingling.		
0	$7.50	$10.00
1	8.00	10.50
2	8.50	11.00
3	9.00	11.50
4	9.50	12.00
Half.		
1	8.50	11.00
2	9.00	11.50
3	9.50	12.00
4	10.00	12.50
Claw.		
1	9.00	11.50
2	9.50	12.00
3	10.00	12.50
4	10.50	13.00
Lathing.		
0	7.50	10.00
1	8.00	10.50
2	8.50	11.00
3	9.00	11.50
Barreling.		
0	7.50	10.00
1	8.00	10.50
2	8.50	11.00
3	9.00	11.50
Broad Hatchets.		
1	10.50	13.50
2	11.50	14.50
3	13.00	17.00
4	14.50	18.50
5	16.50	20.50
6	18.00	22.00
7	19.50	24.50
8	22.00	27.00
New England Pattern Broad Hatchets.		
0	10.50	13.50
1	11.50	14.50
2	13.00	17.00
3	14.50	18.50
4	15.50	20.50
5	19.50	23.00
6	22.00	26.00
7	23.50	27.00
8	25.00	28.50

Adzes are to be sold at the following net prices:

Net Prices for Adzes.

	Per dozen.
Carpenter, Half or Full Head, 3-4½ cut.	$10.50
R. R., Half or Full Head, 5-6	11.10
R. R., Soft Head, 5-6	10.85
Ship Carpenter, Plain	13.20
Ship Carpenter, Lipped	16.00

CARRIAGE BOLTS, MACHINE BOLTS, ETC. A meeting of the manufacturers of Carriage Bolts, Machine Bolts, Coach Screws, etc., was held January 20, and the revised prices given below were established. The following discounts were

Digitized by Google

adopted as representing the prices recommended for the trade in general, the usual extras to large buyers being agreed upon. Terms, 60 days, or 2 per cent. discount for cash in 10 days from date of invoice:

Common Carriage Bolts, ⅜x6 and smaller and shorter	75 and 10
Common Carriage Bolts, longer and larger than ⅜x6	75 and 5
Machine Bolts, ⅜x4 and smaller and shorter	75 and 15
Machine Bolts, longer and larger than ⅜x4	75 and 10
Machine Bolts with C. T. and R. nuts	70 and 10
Bolt Ends	75 and 10
G. P. Coach Screws	80
Cone Point Lag Screws	80 and 5
Skein Screws	80

AXES. The leading axe manufacturers have for a long time been desirous of forming a combination among themselves that would succeed in making axes a more remunerative article to produce, and the prices at which the combination would agree upon should be controlled and limited by this organization. This arrangement has at last been perfected and circulars giving more complete information as to details will soon be in the hands of the trade. While the principal object has been to get a more remunerative price for the goods, various changes in the methods of marketing the same, it is understood, will be adopted, that will create differentials as to prices and terms for each branch of the trade. The year has been divided into seasons, the first commencing with February and March, and the last ending with the three months that close the year. Prices will be made for each season to apply only to that season; goods bought must be delivered during the season selected; thus making it possible to advance prices for the succeeding season and maintain them. Instead of selling a wide assortment of weights at a single established price for the group, which has been the custom for many years, each different assortment will have its own advance on the base price established. The warrantee on axes has been abolished and thus a great cause for discussion is wiped out. It is given out that the base price to retailers on single bitted axes of first quality will be $6.50 per dozen, the base price on double bit to be $8.50, but definite announcement of the whole scheme will soon be promulgated for the information of the trade.

CORDAGE. Trade is extremely moderate, and prices are fairly well maintained. Second grade Manila ½ to 1 cent per pound lower. The usual rebate of ¼-cent per pound being given to carload buyers:

Pure Manila, 7-16 inch and larger	11½@12
⅜ inch	12 @12½
½ inch and 5-16	12½@13
Pure Sisal, 7-16 inch and larger	9¼@ 9½
No. 2 Sisal, 7-16 inch and larger	8¼@ 8½
⅜ inch	8¾@ 9
½ inch and 5-16 inch	9¼@ 9½
Lath Yarn, Medium and Coarse	8½@ 8¾
Jute Rope, No. 1	6½
No. 2	6

LINSEED OIL. Under date of January 27, the following advanced quotations are announced on "City" Raw Oil by the Dean Linseed Oil Co.:

In lots of less than 5 barrels...43 cents per gallon.
In lots of 5 barrels or more.....42 cents per gallon.

The "American" brand for respective quantities, 1 cent per gallon less.

The five barrel price applies only to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil .....65 cents per gallon.

THE PHILADELPHIA TRADE.

The unusual severity of the Winter is having some effect on trade, and yet we cannot but feel that in the long run the effect will be beneficial. Of course, outdoor work is temporarily suspended, but the demand for Winter goods in the Hardware line has been very heavy, and it has been almost impossible to keep on a stock of Snow Shovels, Ice Creepers, Sidewalk Cleaners and such goods. We understand that the retail trade have also cleaned out their stocks of Skates, etc., and it seems reasonable to look for an active demand for Spring goods as soon as Winter leaves. The markets are in a mixed condition, but the prices of most goods are remaining steady, while a few show some signs of weakness, and these are probably balanced by some changes decided on other lines. Cotton goods are, of course, out of sight, and Braided Sash Cord, Working Gloves, and Chalk Lines, and Cotton Rope are all advancing rapidly, considering the cotton market, and the same tendency is strongly manifested in Horse Blankets which have already advanced over last year's figures, with possibilities of much higher figures before Fall. On the whole, the market seems to justify buying freely for present needs, and the trade generally seems to share this opinion, as shown by the well assorted orders received. The sale of Wire Nails and Wire during the last few weeks have been very heavy, despite the advance made a few days ago, and there seems to be a feeling that still higher prices may be announced shortly. BIDDLE HARDWARE CO.

THE CLEVELAND TRADE.

Trade seems to be in a waiting condition; orders for immediate shipment are not good, but orders for future shipment seem to hold up well, showing that anticipations are good. The agricultural population has not been seriously effected as yet by the strain in Wall Street, but its serious effect on commercial centers, and the great depression in the iron and steel trade, are gradually having its effect. There have been very few declines in finished Hardware, and where lower prices are offered, the indications are that it comes from an anxiety to sell, rather than a lower cost. The usual decline on stocks of goods has been far less than usual in a depression; the same influence that prevented extreme prices, has prevented extreme declines, which has saved many from bankruptcy. It is difficult to estimate the probabilities of the future, but it is reasonably supposed that politics, floods and fires will not prevent the majority of people from attending to their own business, and this will keep the country safe. If our great combinations must go through the process of receiverships and reorganizations the great railroad interests have, they will nevertheless end in benefit to the community. Readjustment may be a blessing in disguise, as too much prosperity tends to make us forget that economy is an essential to national progress. The backbone and heart of the country are sound, and the agricultural population was never in better condition.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE COLUMBUS TRADE.

Our long drawn-out Winter took a fresh grip the past few days and so did everybody else. It is cold enough to freeze door knobs off. I noticed an iron dog the other day and his hair was all frozen off. He couldn't even wiggle his tail. Now on top of all this trouble, the ground hog got out to see his shadow on the 2d. One thing is certain, if he did not crawl back into his hole quick and plug it up, he won't ever come out again, as he would freeze to death. With all these drawbacks, trade is very good for this time of the year. Orders for prompt and future shipments are liberal. The latest combination is the Hatchet Combine. Manufacturers put themselves in the hands of Mr. Parks and, of course, it did not take very long to Hatch-it. We think, however, that there are several other "Hens on" that will soon turn out large, healthy broods, and some of the combination eggs will never leave the nest. We will gladly welcome Robin Red Breast or any other messenger of Spring, as Winter is getting tiresome. THE SMITH BROS.' HARDWARE CO.,
J. H. SMITH.

THE DAVENPORT TRADE.

Two advances in quick succession made by the American Steel & Wire Co. have stimulated the demand for their products, and doubtless will effect other lines of goods favorably. It is too early in the season to forecast trade conditions, but there is no known reason why there will not be the usual amount of Hardware distributed the coming season from Davenport.

THE SAN FRANCISCO TRADE.

The first month of this year is mentioned by the trade without a dissenting voice as having been an exceptional January for good business. But California is not all alike. In its eight hundred miles of lengthwise expanse a diversity of conditions is the rule. For instance, while this section of the State and Northern California are not suffering for rain, but would welcome a good downpour, the southern portion is in deep distress because of the lack of moisture, and on Sunday, the last day of the month, all the churches in Los Angeles, both Catholic and Protestant, dispensed with the usual sermonizing services, devoting the time to prayer for rain.

Nearly every member of the San Francisco Retail Hardware Association made enough last evening, February 1st, to pay his year's poll tax. Nearly every member was in attendance at the association's monthly meeting, and by virtue of the novelty by-law adopted last month received $2 apiece for attendance. The membership is loyally all right, pay their dues promptly, but have been so derelict in attendance at meetings that the few faithful ones in this particular who sincerely wished that all members should attend all the meetings and know what was going on, concluded to see what effect there might be in the $2 by-law.

The trade feature of interest in Middle and Northern California within the last fortnight was the sixth annual meeting of the Pacific Retail Hardware Association held in Sacramento January 20 and 21. This convention was attended by 65 of its membership, an unusually large turnout, and many visitors, representative of the San Francisco retail trade and jobbing houses, were there, and the liveliest sort of discussion was had, but it is not for the world to know, so the trade papers' correspondents were instructed.

But it is allowable to report that the Parcels Post Delivery question drew out almost unanimous opposition, being looked upon as inimical to the trade houses, and most in interest of mail order houses. However, it was referred to a committee of seven, with power to pass upon the proposed law and express the views of the association.

The question of trading and peddling wagons was debated at length and the Executive Committee instructed to petition the next Legislature to lay a heavy license tax on such business.

The convention fixed upon Stockton as next year's meeting. Marysville had been decided upon, but the Stockton Hardwaremen desire to come into the association and it was thought best to switch from Marysville to Stockton to surely nail the Stocktonian candidates.

President White and Secretary Boyd, of Marysville, and all their associate officers of the Pacific Association, were re-elected for the ensuing year. And then the happy time ended as the roosters were crowing on the morning of January 22, the more melodious music and banquet of the first order being supplied for the closing occasion by the Hardwaremen of Sacramento, accompanied by the Mayor of the city.

Relations between retailer and jobber was the feature topic of discussion at the late spirited meeting of the fifth annual convention of the prosperous Washington State Retail Hardware Association held at Whatcom, and because of the fact that a considerable number of the membership are so far away from Whatcom, the association's adopted place of meeting, a motion carried to form branch associations at Seattle, Olympia, Spokane, North Yakima and Walla Walla, each to have a vice-president. Following are officers elected for ensuing year: President, H. D. Cowles, Whatcom; vice-president, Walter M. Olive, Mission; secretary, A. C. Blake, Munro; treasurer, J. M. Cochran, Snohomish; executive committee, the foregoing officers and F. A. Ernst, of Seattle.

Travelers for the trade just returned from the State of Washington report J. B. Hill's Hardware store at Ephrata purchased by C. Lewis, the Pullman Hardware Company at Pullman incorporated, the Wm. Meyer Hardware store at Goldendale sold to H. N. Frazer, the Wm. Johnson & Sons' Hardware store at Freewater sold to C. A. Wright, the Hale-Gill Hardware Company at Garfield incorporated, that G. A. McCrea of Chewelah has quit paying rent, having removed his fine stock of Hardware into his new brick building, that the Seattle Hardware Company has increased its capital stock of $1,000,000, fully paid up, and is negotiating the erection of a seven-story brick and iron building to cover an area of 120x233 feet, with a railroad connecting track entering the building, and that their business henceforth will be strictly wholesale Hardware, also that the Schwabacher Hardware Company, Schwabacher Brothers & Co., and Schwabacher Dock Company, all of Seattle, presented each of their employees with a royal holiday turkey, the total weight of the birds aggregating a little more than the heft of two tons of pig iron. INDUSTRIAL PRESS ASSOCIATION.

THE NEBRASKA RETAIL HARDWARE DEALERS' ASSN.

We present below the official programme of the third annual convention of the Nebraska Retail Hardware Dealers' Association to be held in Omaha February 9th and 10th.

PROGRAMME.

FIRST DAY, TUESDAY, FEB. 9—10 A. M.

Meetings will be held in Commercial Club rooms, Board of Trade Building, 16th and Farnam Streets.

The morning will be devoted to registration, payment of dues, initiation of new members, and such preliminary work as will be necessary for the afternoon and succeeding business sessions.

FIRST DAY, TUESDAY, FEB. 9—2 P. M.

Meeting called to order by the President, C. A. Peterson, Oakland.
Invocation, Rev. T. V. Moore.
Address of Welcome, Mayor Moores.
Response, Nathan Roberts.
President's Address, C. A. Peterson, Oakland.
Roll Call by the Secretary.
Appointing Committees on:
Entertainment;
Press report;

"Insurance," by H. J. Hall, Secretary, Lincoln.

FIRST DAY, TUESDAY, FEB. 9—EVENING SESSION.

Association in hands of Entertainment Committee.
Meeting place, Commercial Club Rooms, 7.30 p. m.
Omaha by Electric Light.

SECOND DAY, WEDNESDAY, FEB. 10—9.30 A. M.

Secretary-Treasurer's Report, H. J. Hall, Lincoln.
Address, "Parcel Post Bill and Practical Results of Retail Association Work in the United States," M. L. Corey, National Secretary, Argus, Ind.
What We Know About Local Organization, J. F. Goehner, Seward.
Paper on "Hardware Profits," H. Henke, Jr., Grand Island.
Paper, "Our Competitors and Our Profits," Max Uhlig, Holdrege.
Report of Committee and Opening of Question Box.

SECOND DAY, WEDNESDAY, FEB. 10—2 P. M.

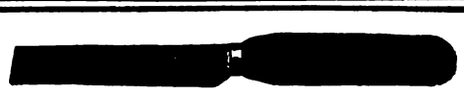
Report of Committees.
Paper, "Necessary Factors for Success in Retail Business," C. H. Rudge, Lincoln.
Paper, "Advertising," J. C. Cornell, Ord.
Paper, "Building Up Our Organization," M. A. Hargleroade, Holstein.
Miscellaneous Business.
Election of Officers.
Adjournment.

THE PETERS CARTRIDGE COMPANY'S ANNUAL REUNION

The annual reunion of the salesmen and demonstrators of the Peters Cartridge Company, which was held in Cincinnati January 11th to 15th, was the largest gathering of ammunition salesmen and expert shooters ever assembled. The meeting was, of course, held primarily, for the discussion of business matters, it having been found by experience that this week of personal contact is of immense advantage both to the men on the road and those in the head office in handling the business of the ensuing year. In addition to this, however, the company had arranged a programme interspersed with pleasant and entertaining features designed to make the week highly enjoyable as well as profitable.

The annual banquet was given at the Business Men's Club on Thursday evening, January 15. This was a most elaborate affair, covers being laid for seventy persons. The tables were handsomely decorated and suitable music was rendered during the several courses. The menu was quite novel, embodying in a prominent way the letter "P," the trade-mark of the company, and was all that the most exacting taste could desire.

O. E. Peters was Toast Master and delivered the opening address. He thanked all those connected with the company for their zealous efforts in its behalf and assured them of the company's appreciation. He expressed his regret that Tom Norton, a former employee of the company and a most popular one, was not present, having been forced through illness to resign. Mr. Peters stated that he was informed Mr. Norton was improving in health and would soon be able to work, and in view of this he had decided to again place him on the salary list of the company; just as long as one of his employees was able to talk and sell Peters ammunition he proposed to let him do so and to pay him for it. This tribute to fidelity brought ringing cheers from the salesmen and was characteristic of the company's liberality and appreciation of faithful service.

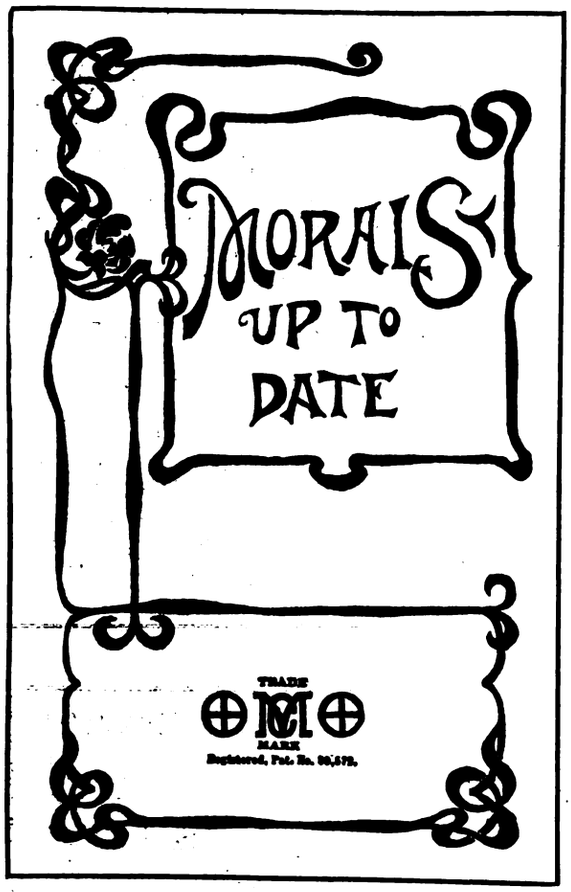


G. M. Peters, the next speaker, also expressed gratification at the work accomplished in 1903. He admonished the man that eternal vigilance is the price of victory and that success could only be accomplished by persistent effort and constant vigilance. Mr. Peters called attention to several of the salesmen who had fallen victims to Cupid's darts since the last annual meeting, lauding the influence of a good woman as holding a man firmly to duty and honor.

Judge J. A. Runyan, who has represented the Peters Cartridge Company in its legal matters ever since it was organized, spoke of the early days of the institution and its marvelous rise from small beginnings to its high position in the manufacturing world.

J. H. McKibben, T. H. Keller, J. S. French, George G. King, Milt. Lindsley, B. B. Tuttle, W. E. Keplinger, F. C. Tuttle and others followed with words of felicitation.

Friday, January 15th, was spent at the grounds of the Cincinnati Gun Club where a number of team races and exhibition shooting were indulged in. Prior to starting to the grounds the salesmen sprung a little surprise on F. C. Tuttle, the treasurer of the company. He was invited down to "Harmony Hall" (a room especially provided for the assembling of the salesmen) and was there presented with a handsome gold watch by the salesmen of the company as a mark of their great appreciation of his treatment during the year. L. R. Myers made the presentation speech on behalf of the men and Mr. Tuttle was taken completely by surprise, but responded feelingly, thanking the donors for the evidence of their good will and friendship. He stated that his success depended largely on their efforts and that their faithful co-operation had not been unobserved or unappreciated by him.



The exhibition shooting of Captain Bartlett, Captain Hardy, LeRoy Leach, Frank Carter and Wallace Miller was interesting throughout and many exceedingly difficult shooting feats were performed with rifle, revolver and shotgun. Captain Bartlett, who acquired both fame and experience as an Indian scout, did remarkable shooting. His wonderful work with the rifle, as well as his convincing words, explained the success he has had in the great West in popularizing Peters' Cartridges. Captain Hardy, to use a baseball term, is nothing short of a "phenom." He is equally skillful with rifle and revolver and attributes the success of his many remarkable shooting accomplishments to the use of Peters' Semi-Smokeless Cartridges. On Friday, with the close of the day "Au Revoir" was said and the various representatives turned their faces toward their several territories. All were filled with renewed enthusiasm and confidence and a determination to make 1904 the greatest in the history of the Peters Cartridge Company. The programme for the week and all arrangements were in charge of L. R. Myers.

CHARLES MORRILL'S NEW CATALOGUE.

CHARLES MORRILL, 277 Broadway, New York, has issued a new, high grade catalogue, the cover of which has a very artistic appearance. The contents are of extremely well balanced interest to those interested in Sawsets and Punches, being illustrated throughout. Regarding their Sawsets they claim that the advantages to be gained by their use, over the old methods, namely, with a hammer, a hammer set or a punch and steel block, are that—if the saw is soft it will not fibrate, if hard it will not granulate, either being fatal to the keen cut of the saw, as after undergoing the hammering

process the grain of the steel is so distorted that it will not hold an edge. They also claim that a saw set by one of the Morrill's Sawsets will hold an edge longer and require less sharpening than if set by any other method. Besides Sawsets, Chas. Morrill manufacture the "Hercules Punch," regarding which they have issued a four page folder of envelope size. This punch is operated by utilizing a cam and lever driving a plunger. By this simple method all the power put into the handles is used, and friction avoided. A pressure of 100 pounds on the handles is increased to 2,000 punching force. The depth of the throat is one inch. From the center of the die to the front of the throat measures ½-inch. The frame is made of semi-steel, the punch and die of best tool steel. Will punch a ¼-inch hole through No. 18 gauge sheet iron or its equal. Catalogues will be forwarded to dealers upon request.

THE AMERICAN STEEL & WIRE Co., Chicago, in November, 1903, issued a very well arranged "List of Products" which includes steel plates and sheets, Juniata horse shoes, wire—round, telegraph, telephone, market, spring and special market wire—also special and miscellaneous wires of which an extended list is given; card, music, and barbed wire; cold, drawn and turned shafting; standard wire nails, miscellaneous wire nails and brads, spikes, pole steps, woven wire fencing, gates, stretchers and fence tools, poultry netting, rail bonds, spiral and miscellaneous springs; wire ropes and strands, galvanized wire clothes lines, T. S. wire hoops, wire shook ties, chemicals and colors, wire rods, etc., etc. On each of the many goods mentioned in the book a complete description is given as to style, finish, quality, size, etc., making it a valuable publication that will be forwarded upon request.

Additions to the Family

To increase is to prosper. To stand still is to deteriorate and eventually die. This applies to our family which originated and was founded on substantial basis—first came "Roller Bearings" next the "Steel Handle Ferrule" followed by "National's Way" of packing in card board cartons. Each patent has added to the well known efficiency and practicability of.....

National Roller Bearing Sweepers

1904 brings two new offsprings to the "National Family—the Anti-Tip and Brush Release End Band devices—both patented. Their birth has been well fostered—they will stand the test of time—live, thrive and proclaim their superiority over any other yet devised. They are "National." How could they do anything else?

The motion previously passed in regard to circulating petitions against the parcels post was amended on motion of R. C. Murdoch, of Beloit, to read that each member should send a personal letter to his Congressman on this matter, and was carried.

President McNamara asked the incorporators of the insurance department to meet after adjournment.

The convention adjourned at 4.30 P. M.

AN INSURANCE COMPANY FORMED.

The Wisconsin Retail Hardware Dealers' Mutual Fire Insurance Association held their meeting on Wednesday morning, Feb. 3d, and elected O. P. Schlafer president; C. A. Peck, of Berlin, secretary; H. L. McNamara, of Janesville, treasurer.

PACIFIC RETAIL HARDWARE DEALERS' ASSOCIATION.

The sixth annual meeting of the Pacific Retail Hardware Dealers' Association of Northern California was held in the Masonic Temple, Sacramento, Jan. 20. Representative Hardware merchants were present from the prominent cities and towns of Northern California. John C. White, of Marysville, who has been the President of the Association for six years, presided over the meeting. He delivered a short address in which he reviewed the work done by the association. He said the association had been formed for the purpose of general advantage of the retail dealers and that much good had been accomplished by standing and working together.

The officers of the association are: John C. White, Marysville, President; A. L. Nichols, Chico, Vice-President; Chas. Hampton, Marysville, Secretary; William Earll, Chico, Treasurer; J. Grover, Colusa, Sergeant-at-Arms.

An extended report was made by the Executive Committee, in which it was recommended that efforts be made to suppress the itinerant pedlers of stoves, machinery, wagons and buggies. Such action, it was claimed, would protect the farmers from wily, irresponsible persons. The report says the wholesalers are desirous of co-operating with the retail dealers and not interfering with their trade.

The following delegates were in attendance: John C. White, Marysville; R. B. Cranston, Woodland; M. S. Meehan, Placerville; J. M. Hadley, Nevada City; A. L. Nichol, Chico; George C. Garret, Red Bluff; George C. Comstock, Williams; E. A. Brimm, Williams; William Earll, Chico; S. V. Eakle, Knights Landing; G. A. Guttman, Orland; R. Billiou, St. John; Chris. Sieber, Woodland; James C. Gray, Fred Gray, Oroville; John Simpson, Tehama; E. G. Carter, Cottonwood; G. W. Tibbets, Colusa; M. Goldman, Germantown; C. L. Bills, Oroville; Joseph Johnson, Auburn; A. D. Cutts, Marysville; R. J. Klemmer, Willows; J. A. McFeeley, L. L. Hubbell, Chico; J. A. Murray, Woodland; C. J. McBride, Lincoln; C. C. Hampton, Jr., Marysville; A. G. Grady, Grass Valley; W. M. Doty, Biggs; L. O. Johnson, Arbuckle; George R. Heure, Klamath Falls; Edward Miller, Sacramento; George A. Legg, Nevada City; John Hanny, Lincoln; G. A. Johnson, Redding; A. C. Stagner, Wheatland; Max M. Brown, San Francisco; Roy Hall, Fresno; R. M. Beebe, Gridley; R. O. Kimbrough, Sacramento; J. H. Sures, St. Helena; Ward Henderson, Lodi; James L. English, J. Linahan, Suisun; Henry Gracy, and C. H. Philpott, San Francisco.

Several of the delegates were accompanied to Sacramento by their wives and daughters, and they were shown the various points of interest about the city during the day. There was a reception in honor of the women in the parlors of the Golden Eagle Hotel, under the auspices of the Tuesday, Saturday and Kingsley Art Clubs, and the Ladies' Museum Association. There was given a theatre party in the evening, when the visitors were entertained at the Acme Theatre, beginning with the 9.30 o'clock performance.

TRADE NOTES.

Galion, Ohio.—The P. C. Thomas Hardware Company has re-elected its old officers as follows: P. M. Daily, president; C. A. Koppe, secretary and P. C. Thomas, treasurer and general manager.

Syracuse, N. Y.—The Drennan Hardware Company at its annual meeting elected the following officers: President, Thomas Drennan; vice-president, Jas. Gray Geagan; secretary and treasurer, Fred E. Milne. The officers comprise the Board of Directors.

Syracuse, N. Y.—Nicholas E. Devereaux, William S. Doolittle, William T. Baker, Thomas F. Baker, Thomas R. Proctor, Joseph Kernan and Francis Kernan were elected directors of the Syracuse Stove Works at the annual meeting of the stockholders.

Hamburg, Pa.—On the 1st of the month, S. A. Loose, proprietor of the Hamburg Plow Works, gave his son, Robert, an interest in the business and the firm will hereafter be styled S. A. Loose & Son.

Our Catalogue is "Our Drummer."

It lists the largest line of general merchandise in the world, and is of special interest to hardware dealers. Its prices cannot be duplicated by any other house. It is free to any hardware merchant. Ask for catalogue CC461. : : : : :

THE CLARK-HORROCKS COMPANY.

The Clark-Horrocks Company of Utica, was incorporated February 3, to manufacture and sell fishing rods and fishing tackle, and to deal in sporting goods generally. The capital stock is placed at $100,000, consisting of shares of $100 each, and the directors for the first year are George A. Clark, H. James Horrocks, James H. Horrocks and Edward D. Ibbotson, of Utica.

NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The annual meeting of the New England Hardware Dealers' Association will be held at the United States Hotel, Boston, on Wednesday, Feb. 10, 1904, promptly at 5.45 o'clock p. m. Dinner will be served at 6.00 o'clock p. m. The business meeting will take place immediately after the dinner. Election of officers will be the important business. There will be a discussion on the outlook for the future of the Association. Some of the members will be prepared to suggest radical changes in the organization. Entertainment Committee: D. F. Barber, Boston, Mass.; E. J. Neal, Lowell, Mass.; A. H. Decatur, Boston, Mass. Nominating Committee: W. D. Parlin, Natick, Mass.; S. D. Balkam, Jamaica Plain, Mass.; George J. Mulball, Boston, Mass.

THE MINNESOTA RETAIL HARDWARE DEALERS' ASSOCIATION.

The Minnesota Retail Hardware Dealers' Association, the largest State organization of the kind in the United States, will hold its eighth annual convention in St. Paul, Feb. 24, 25 and 26. The sessions will be held in Elks' Hall and the convention headquarters will be at the Windsor Hotel. More than 500 members are expected to attend, besides a large number of manufacturers, traveling salesmen and representatives of leading trade journals. The Commercial Club will entertain the guests on the evening of Feb. 25.

Many papers will be read by experienced Hardwaremen on the best methods of advertising, of conducting a store, buying, selling and other phases of the Hardware business. Among those that will make addresses are M. L. Cory of Argos, Ind., secretary of the national association; Former Senator A. T. Stebbings of Rochester, national treasurer, and Charles F. Ladner of St. Cloud, member of the national executive committee. The president of the national association has been invited, but has sent word that he will be unable to attend.

The so-called parcels post bill, which has been pending in Congress for several years, is one of the subjects that will be discussed. This bill provides for carrying through the United States mails packages as heavy as forty pounds at a low cost. Several members of the State Organization are opposed to it on the ground that it will benefit large mail order houses to the detriment of country stores.

WILL INCREASE MEMBERSHIP.

The membership of the association is 525, and an effort will be made to raise this number to 550, which would entitle the organization to one more delegate in the national association, consisting of delegates from eighteen State organizations. The national organization will hold an annual convention soon after the State convention.

The officers of the Minnesota Association are: President, W. H. Tomlinson, Le Sieur; Vice-President, H. S. Cleveland, Minneapolis; Secretary, M. S. Mathews, Minneapolis. Officers will be elected at the meeting in February.

Simultaneously with the State convention the Minnesota Mutual Fire Insurance Association will hold an annual meeting. This association adopts risks at present only on Hardware stock, but under a law passed by the last legislature it is allowed to insure also the household goods of Hardware dealers. The association charges the same rates as stock insurance companies, and at the end of the year gives a rebate to the members of the association according to the surplus. This year a rebate of 30 per cent. has been given. The rebate last year was 25 per cent. The association has written business in the Dakotas, Wisconsin, Illinois, Ohio, Indiana, Pennsylvania and Nebraska. C. F. Ladner of St. Cloud is president, J. F. McGuire of St. Paul vice-president and M. S. Mathews of Minneapolis secretary.

TRADES LEAGUE HAS NEW SET OF OFFICERS.

A new era opened for the Trades League, Philadelphia, when Wm. W. Supplee, of the Supplee Hardware Co., was elected president, succeeding W. W. Foulkrod. This is the outcome of a long campaign conducted by the rotation in office wing of the organization, which succeeded in placing on the board twelve new members. Mr. Supplee's election was unanimous. The full board of officers chosen is as follows: President, William W. Supplee; First Vice-President, Mahlon N. Kline; Second Vice-President, Coleman Sellers, Jr.; Secretary, N. B. Kelly; Treasurer, Richard L. Austin. Twenty-eight members of the board attended the meeting.

MACHINES TO TAKE THE PLACE OF SCULPTORS.

Americans have taken much interest in reports from abroad regarding the latest development in labor-saving machinery, and an account of the new sculpturing machine which appears in the *American Inventor* is worth reading. There have been previous mentions of this invention, but heretofore no authoritative information has been given on the subject in this country. The writer says: "The general trend of labor-saving inventions to-day seems to be in the direction of improvements of the decorative arts, as well as practical arts. It is true that wall paper is still designed by hand, but it is duplicated by machinery. The artist in dry-point does only the initial work by hand and sees the finished production come off the printing press. The lithographer's product is half mechanical, and now from London come accounts of a sculpturing machine, which, if not itself an artist, is at least a more perfect copyist than any human laborer could possibly be.

"Near London is in operation a complicated looking, square-set machine, the result of the inventive genius of an Italian sculptor called Bontempi. Sir A. Conan Doyle, the famous novelist and historian, together with W. G. Jones, brought the machine to England and have undertaken to exploit it to English art circles. To fully understand the machine and the benefits which are claimed to result from its use, it is necessary to understand how a statute in marble is at present made from clay. A London journal in commenting upon this feature says that at present when a sculptor has completed his clay model of the statute, which is eventually to be seen in marble, he hands it over to a man known as a 'pointer,' who by the aid of an instrument of that name drills hundreds of tiny holes of various depths in the block of marble which is to be carved into an exact resemblance of the clay model. As many as 15,000 of these small holes have been bored for carving one bust.

"When all the holes have been drilled there comes the man with the chisel and it is his laborious task to chip away the marble, guided by the depths of the holes. When he has finished the sculptor puts in a few touches and the bust or statuse is completed. But it is a business which takes, on the average, six weeks to do. The machine at Battersea will finish the work in half a day.

"The machine can work thus quickly, because where the human workman delivers one stroke with his chisel the machine can deliver a hundred. Moreover, working upon the principle of the pantograph it is absolutely accurate and has no fear of making a mistake.

"A long metal pointer delicately balanced and capable of movement in any direction, can be brought into contact with the face of the model. Every movement of this pointer causes an exactly similar movement in two steel drills which play upon the surfaces of the marble blocks. It is obvious, therefore, that inasmuch as no movement of the model is without an exactly similar movement in the blocks and no movement of the pointer can be made without a similar one being made by the drills, it is only necessary to run the pointer delicately over the face of the model to cut out a similar face from the marble blocks. As the pointer cannot go below the surface of the model, the drills are in no danger of making a mistake and taking out too much from the surface of the marble.

"In the same way a statue could be made direct from the living face, although a slight modification of the model support would have to be made. In practice the machine is stopped several times during the operation of duplication in order to introduce finer and finer drills, until at the end of the operation, which takes for an ordinary life-size bust from six to eight hours, the surface is as smooth and delicate as if carefuly and laboriously chiseled by the hand of the artist.

"The machine is operated by hydraulic power, but, of course, electricity or steam could easily be substituted. Mr. Jones, one of the gentlemen who is engaged in exploiting the device, says the machine as it is at present stands is worth $2,500, but that less than 50 cents per day is required to run it. It is also pointed out that a chiseler who could do similar work to that of the machine by hand would get from $20 to $60 per week and would take a month for a job. It is obvious, therefore, if the machine will do the work to the satisfaction of artists, wherein the profit of its operation will lie."

CRYSTAL REGISTERED TRADE MARK. CORUNDUM

TO METAL POLISHERS.

We can now fill promptly all orders for grain corundum (emery is an iron ore containing corundum.) Our new mill has a greater capacity than any other abrasive plant in the world.

PRESENT DAY JOBBING.

In the following article on "Present Day Jobbing" which was written by James H. Ritter, of the Biddle Hardware Company, Philadelphia, careful consideration has been given the engrossing subject, giving evidence of a close study of the surrounding conditions which influence the necessity of this important branch of a constantly expanding industry. It was written for *The Annals of the American Academy,* Philadelphia, in a recent number of which it appears.

The purpose of this paper is a discussion of the jobbing business of the United States and some of its associated problems. Necessarily so many lines of trade are included, comprising foodstuffs, utensils, apparel and mechanical supplies, covering so vast a field that it becomes impossible to fully present or even to do justice to the subject. But the methods and position of this class of distributors of manufactured products are on the whole the same and it therefore matters little that the subject is treated from the standpoint of a single one of these, a Hardware jobber.

As commonly practiced, the process of distribution is threefold, comprising the activities of the manufacturer, jobber, and retailer. The manufacturer makes the goods from raw material and sells them in large quantities to the jobber, who in turn distributes in smaller lots, and oftentimes on easier

JAMES H. RITTER.

terms, to the retailer. There are exceptions to this, but as a rule the manufacturer does not reach the retailer, much less the consumer, directly, and cannot do so to advantage. The jobber is an intermediary who assembles various lines of goods, carries a large and assorted stock, and by means of traveling salesmen and other agencies, sells these goods to the retailer in small assorted lots, while the retailer supplies the consumer.

The jobber stands in a very important position to the manufacturer, in that he purchases goods in large quantities. For many things, the demand is seasonal and must be supplied in quantities at one time. Economical manufacture demands a regular, even output, and most manufacturers lack both the capital and the facilities for storing their output against a heavy and brief demand coming at long intervals. The jobbers unite in taking this output off the manufacturer's hands, storing and paying for it, so that the manufacturer is provided with current funds instead of being forced to borrow large sums against the ultimate sale of an accumulating stock. In but very few lines is it practical for the manufacturer to reach the retailer or the consumer direct. The jobber keeps a varied stock, which is constantly growing more and more diversified and complex, and justifies his existence by selling these goods in assorted lots on a small margin of profit to the retailer, on terms which are favorable to the small dealer, and oftentimes carries him through dull seasons, and aids in the development of his business.

The jobber distributes these great stocks of goods by means of extensive stores and warehouses, a large corps of traveling salesmen, and an office force well equipped with buyers, bookkeepers and correspondents.

The jobber, as he is known to-day, is a modern product, having existed only since the introduction of the factory system. When goods were almost entirely made by hand, the artisan was usually his own retailer, and not only did the manufacturing but sold his wares directly to the consumer. A large proportion of all the articles made two hundred years ago were made to order only. Of course there were exceptions, as in the case of imported goods. The old caravan routes crossing Asia and Europe are a proof of this fact, but the total sales made in this way were trifling compared with the dimensions of trade to-day. The local artisan knew his customer, but with the advent of the manufacturer, production became so great that manufacturers soon lost sight of the consumer. They now made the goods in quantities and sought some one to distribute them. This distributor was found in the jobber.

Fifty years ago the jobbing business in this country was controlled by four Eastern cities, New York, Philadelphia, Boston and Baltimore. Here a few large jobbers won national prominence as "merchant princes," although the aggregate of their business was probably small compared with the jobbers of to-day; but during the last thirty or forty years, large jobbing houses have grown up not only in cities like Chicago, San Francisco, St. Paul and St. Louis, but also in many smaller towns, until we now find it to be a frequent ambition of retailers to class themselves as jobbers, and handle the wholesale business in their own neighborhood. This ramification of the jobbing business is having its effect on the larger jobbers. New York, Philadelphia, Chicago and St. Louis no longer have a monopoly of the jobbing business, although these large cities are not easily deprived of the advantages to which they are naturally entitled by their size.

There can be little doubt that an ambition to do a larger business is oftentimes the prime motive in the development of a retailer into a jobber, and the retailer engaged in this struggle is too apt to rely upon his retail business for his profit, and to consider his jobbing business as simply so much gain. This is a mistaken view. It often causes much harder work with little or no result, and the small dealer making this venture is very apt to become financially embarrassed in an attempt to carry his smaller customers, while the necessity for buying in large lots, in order to rank as a jobber, and to obtain lower prices from the manufacturers, constantly induces him to over-buy.

The main reliance of the jobber in placing his goods upon the shelves of the retailer is upon traveling salesmen, who take samples of the wares with them and go all over the land, into the smallest hamlet, describing the goods, their origin, their peculiar qualities for sale and for use, and aiding the shopkeeper in estimating the quantity which he will be able to use during that season. The retail trade of this country owes a vast debt to the traveling salesman, for the knowledge given regarding the goods which they handle, the explanation of business customs and training received in business methods and ideas. The traveling salesman is the local representative of the jobber, and if the jobber prides himself, as many do, upon business-like habits, and practical and correct methods, salesmen cannot fail to impart some of these ideas to the dealer. The retailer is constantly growing more intelligent, partly because of his pertinent inquiries from traveling salesmen about the credit and the amount of fire insurance he carries. Such questions bring home to the retailer the necessity of adopting correct business habits.

It may be asked: "Is not the jobber a costly distributing agency?" and it must be conceded that this service is not obtained without expense, but the jobber works on a close margin and the net returns to him are meagre compared with those of the manufacturer and retailer, who both enjoy far greater percentage of profits, while the annual increase in wealth and growth of manufacturers far exceeds that of jobbers. Owing to the severity of competition jobbers are compelled to cut their expenses down to the lowest possible figure, and it is hard to see how goods could reach the retailers in any other way. Under the jobbing system the manufacturer is relieved of the responsibility and immense and often prohibitive cost of introducing and distributing his goods in small amounts. In this age of specialization the jobber is a specialist in marketing goods and makes it his lifelong study to do this economically and to the best advantage.

Digitized by Google

Is the relation of jobber to manufacturer and retailer to continue? In order to consider his position more intelligently let us look more closely into the jobber's functions.

1. As a rule, a manufacturer makes a single line of goods and by reason of his concentration, is able to manufacture cheaply and to the best advantage, but the cost of selling these single lines to the retailer would be so great as to make such a course prohibitive. Some interesting analyses have been made showing the number of various manufactures included in a single bill purchased from a jobber. One frequently sees such charges amounting perhaps to 200 pounds in weight and $25 in value and yet representing fifteen or twenty manufacturers, clearly showing the enormous cost which would be incurred if the fifteen or twenty manufacturers attempted to sell their go ds directly to the retailer while the freight and express charges on small quantities would alone make such direct dealing impossible.

2. While one or two manufacturers have attempted to make a general line comprising most of the articles needed in one jobbing line, there is no manufacturer to-day who can make a sufficiently varied output to supply all a jobber's needs and, as we know, the tendency of modern manufacturing is more and more towards the manufacture of a single line of goods—in some cases of a single quality.

3. Frequently, manufacturers do not have sufficient capital to enable them to dispose of their goods in small lots to the retailer. They must have funds, and, by selling in large lots to the jobber, who usually takes the goods in advance of the season and discounts his purchases, they are able to do business on a smaller amount of capital.

4. The business qualities which go to make up the manufacturer and the jobber are oftentimes very different. There are frequent cases where manufacturers are capable makers of goods but not successful in marketing them.

5. The jobber insures the manufacturer a more certain market. We have known large manufacturers, who have had on their books only fifteen or twenty customers, all of whom were large jobbers, while these same jobbers, probably had in many cases three or four thousand retail accounts on their individual ledgers. The manufacturer, therefore, practically

Digitized by Google

knows where he can dispose of his output, and is enabled to do business with greater certainty. In view of all these conditions, it may well be claimed that the jobber is a most useful and economical factor in distribution. It is not fair to part from this subject without mentioning a development of the last few years, which necessitates veiwing jobbing from another standpoint. This is the growth of the so-called catalogue houses. These may be divided into two classes:

a. Catalogue jobbers who, like the jobber, sell to the retailer only.

b. Catalogue retailers who ignore the retailer, and sell directly to the consumer.

Both use the same general methods in trying to buy directly from manufacturers and in sending out large net price catalogues in which they endeavor to outbid all others in making low and attractive prices. This business has had a remarkable expansion, particularly in the West, but side by side has gone the development and increase of the jobbing business. This raises the question of the efficiency of the catalogue as compared with the traveling salesman. There is no doubt that the usual preference of the retailer would be to buy goods from the traveling salesman. Catalogue or no catalogue; moreover, the salesman on the spot will get the order if he meets the price. The jobber has a great advantage through his salesmen over a firm selling by catalogue. He is kept more constantly apprised of local conditions, and so in much closer association with his customers.

Jobbers have always shown themselves ready to adapt new methods and customs. Only lately automobiles have been called in their service. Traveling salesmen may now be found going through the country in automobiles, independent of railroads, time tables, and annoying waits at railway stations. It is safe to say the jobbers will not allow themselves to be set aside, and including in their class many of the keenest minds in business, they will not be slow to adopt promptly such methods as may be needed to maintain their position. Traveling salesmen were unknown some forty years ago. If the retailer prefers to buy by mail from catalogues, jobbers will no doubt be as ready to dispense with traveling salesmen as they were to take them on forty years ago.

While the catalogue retailer is not specifically included in our discussion his effect on trade relations warrants a few words. The catalogue retailer is an even later evolution than the catalogue jobber. Several large houses now aim to ignore the local retailer entirely, and sell directly to the consumer. The methods of these houses may fairly be regarded as questionable. The local retailer is naturally more or less prominently identified with local interests, and the merchants of any country town are the pushing and progressive men of the place. They pay local taxes, thereby helping to support the town and county in which they live. They carry their customers, particularly in farming communities and in the South, for long periods. In times of crop failure, or even in good years betweeen crops, the local retailer is oftentimes the main dependence of the farmer, who, without the credit given him by the retailer, would be unable to get the necessaries of life. The retailer falls back upon the jobber for similar support in credit, but the benefits conferred by the local retailer in this way are hardly sufficiently appreciated. Too often, the temptation of an apparently low price will cause a consumer living in the country or some small town to send his cash to a catalogue retailer in some large city, while the same day he may go to his local retailer and ask three to six months' credit on something that he is buying from him. One such house, for example, issues a catalogue saying in large type to the consumer: "This gives you the prices your dealer pays for the goods he buys and will prevent him from overcharging you on any goods you buy from him." This is simply a dog-in-the-manger business, entirely ignoring the principle of "live and let live." The moral propriety of such a policy is certainly doubtful.

Apart, however, from the ethics of the case, there are many disadvantages of dealing altogether by mail, as the average consumer wishes to see and handle goods before he buys them. This feeling is so strong that it seems to insure the permanency of the local dealer, and yet if he is to remain, the consumer must realize that he owes a duty to his retailer, and that it is not fair or right to send his money to a catalogue house at a distance, while he compels his local retailer to wait for his money until he sells his cherries in the Spring or his corn in the Fall. If the local dealer is to remain, how can his wants be supplied except by the jobber?

Jobbing ethics, on the whole, are most creditable. All first-class jobbers to-day act on the principle that they are in business to stay. Many can boast a history of from fifty to one hundred years, and no jobber can expect a continued existence unless he practices honorable methods, thereby winning and retaining the respect and confidence of the trade. The inducements the jobber has to offer to-day are those of location, size and variety of stock, prompt shipment, courteous attention, fair treatment and low prices, and much attention is paid by all progressive houses to the improvement of these advantages."

As for the traveling salesman himself, it may be said there has been a decided development in his character and habits. The old-style traveler, who was always associated with late hours and whose disposition was to treat his customers to liquor, is largely passing away. A certain mayor of Philadelphia in an attempt to abolish music gardens gained notoriety by his remark: "Beer and music won't mix." The general concensus of opinion in the jobbing trade is that liquor and business will not mix, and the successful salesman of to-day must not only be a man of reliable judgment, bright and enterprising, but he must also have clean habits and a good character.

Recent years have shown in some lines of business the tendency of jobbers to come together in jobbing association, and this is in line with the general trend of industrial affairs These jobbing associations, as a rule, do not partake of the nature of a trust, and are a meanace neither to the retailer nor to the consumer. An evil factor in competition has been personal feeling, and jobbers, frequently, in the same city have oftentimes sacrificed profits simply because, not coming in contact with fellow-jobbers, they have taken for granted that their competitors were not worthy of acquaintance, and simply fit subjects for commercial war. Jobbing associations have done much to remove this personal feeling. The mere fact that the members meet occasionally, and perhaps once or twice a year sit down together to dinner, goes far toward breaking up this feeling of personal animosity which is far too costly to be carried into modern business. It is rarely that such associations attempt to regulate prices, but by free interchange of information, they prevent the spread of unfounded reports, and working together are able to take up such matters as freight charges, postal and express rates; and trade abuses, while some associations have deliberately pursued a policy of educating their own weaker members into proper business habits.

These associations also stand in important relation to the manufacturers, and have frequently been able to induce them to adopt better methods in the disposal of their goods. The associations have taken the view that jobbers are the natural outlet for the manufacturer, who should regard the jobber as his selling agent, and not his enemy, and that their interests are joint and often identical. Manufacturers have in many cases readily responded to this liberal idea, and an element of harmony has thus been brought into their relations. In all such matters, jobbing associations have been highly useful, while in these days of mammoth corporations and trusts, they have often been able to command a hearing where the individual jobber would have been ignored.

Such, then, is a brief account of the jobber as he appears to-day. He is the outgrowth of modern business conditions, and well equipped to distribute cheaply and to the best advantage, the vast volumne of goods daily out-poured by manufacturers who find it impracticable to market their goods directly. There seems to be no other channel through which the retailers can be so economically and advantageously supplied with a sufficient assortment of goods in all their variety of sizes and styles. No other agency offers to carry the retailer financially through dull seasons and times of stress, and without the jobber, manufacturers would often find it impossible to obtain proper representation to the retailers. The jobber has won his position by hard, intelligent work and economical service, and is apparently an indispensable agent in the distribution of goods.

BISSELL'S "Cyco" Bearing Carpet Sweepers

ARE not the cheapest on the market, but the best, For EVERY reason that enters into the purchase and sale of a commodity, the Bissell stands with out a peer in its class.

The commanding position the Bissell occupies cannot be fully understood until you look into its history. Twenty-eight years of concentrated effort on this one product, and a vast expenditure of money, has evolved the Bissell Sweeper of to-day, that recognizes no competition, being absolutely distinct in its mechanism, its sweeping qualities, its saleability, and the policy under which it is sold.

Bissell sweepers are sold at uniform prices both wholesale and retail throughout the country, thus insuring to the dealer and jobber a good margin of profit.

Spring Catalogue now ready.

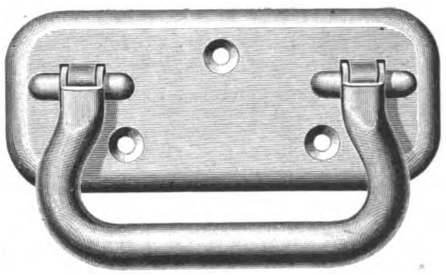
THE BICYCLE STEP LADDER.



Especially adapted for Hardware Stores.

The newest, neatest, simplest, easiest operated and safest store ladder made. Highest Award World's Fair. Write us. THE BICYCLE STEP LADDER CO., 65 Randolph St., Chicago, Ill.

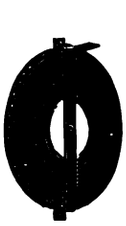
These Steel Chest Handles are New

but people like them and they are profitable goods for dealers.

We make three sizes in all the desirable finishes, and also have them ornamented and with different styles of plate. They are very strong. Send for a sample and prices.

They sell well—our Ornamental Letters and Figures.

The figures are used for house numbers; also for room doors in hotels, schools, office and public buildings, and for other purposes.



We make different sizes and styles; they are of bronze metal, furnished highly polished or nickel plated, or antique copper finish—other finishes to order.

We have ornamental letters, too.

You should carry a stock of these goods.

Gloversville, N. Y.—The Harris Reel Company has been incorporated. Incorporators are: W. J. Harris, C. L. Jordan and A. F. Jordan of Gloversville. The capital stock is $50,000. Fishing reels will be manufactured.

New York, N. Y.—Alexander Fisher has been incorporated (motors); capital $10,000. Directors W. A. Johnson, Alexander Fisher and D. D. Stevens, of New York City.

Changes.

Boston, Mass.—The Boston Cycle and Sundry Company, has obtained control of the Crouch motor bicycle and will market the output.

Duluth, Minn.—The Hercules Powder Company are erecting a business block, which, when finished, they will occupy a portion of as their headquarters.

Duncannon, Pa.—John Martin and Charles G. Moses are building a gunstock factory which they will operate when complete.

Emeryville, Cal.—P. Smith has removed his business to a new building, which he had erected for it. His store and showroom occupy the front of the ground floor, and the rear portion of the same floor has been fitted up as a first class repair shop.

Marysville, Ohio.—The Admiral Bicycle Lamp Company has changed its name to the Sandard Stamping Company.

Mifflenburg, Pa.—C. C. Rote has removed to larger quarters in Chestnut Street, and in addition to his gun and bicycle repair work is carrying a stock of sporting goods and loads shells.

Redditch, Eng.—The firm of William Bartlett & Sons, R. Harrison, Bartlett & Company and J. Smallman & Company, all of Redditch, have recently been absorbed by Henry & Sons, Ltd., manufacturers of fishing tackle, hooks, needles, etc.

Salt Lake City, Utah.—Christie & Anakin, dealers in sporting goods, have sold their business to Meredith & Guthrie and this firm will continue the business at 333 South Main Street.

Sunderland, Eng.—A new company, under the firm name of William Mills, Ltd., has been formed by the consolidation of The Standard Golf Company, and W. Mills & Company, with a capital of £30,000.

Utica, N. Y.—Clark, Horrocks & Company, 34-36 Whitesboro Street, have, during December, enlarged their fishing tackle manufacturing plant. A one-story and basement building 24x64 feet in size has been erected, with foundations and walls heavy enough to support two additional stories if at any time they wish to enlarge.

Wichita, Kan.—Shallenberger Bros. purchased at auction on Dec. 21st, the stock of sporting goods and bicycles formerly carried by H. H. Hess & Company.

Miscellaneous.

A. E. Lard, the American inventor of a highly successful single-trigger gun, has just patented in England a system of detachable lock-plates for side-lock guns.

Albany, N. Y.—The election of officers of the North End Wheelmen, on January 11, resulted as follows: President, P. H. McDonald; vice president, William J. Burke; recording secretary, Joseph A. Cunningham; financial secretary, Philip Marhoefer; treasurer, Joseph P. Hogan; board of directors, William V. Cooke, Edward Dillon, William Skinkle, John W. Viggers and Edward Van Cott.

Athens, Greece.—It is said here that the Grecian budget for 1904 will include a credit for the purchase of 120,000 magazine rifles and several batteries of artillery.

Batavia, N. Y.—Trustees were elected as follows at the recent annual meeting of stockholders of the Baker Gun & Forging Company: E. W. Atwater, the Hon. George Bowen, W. Harris Day, A. G. Hough, the Hon. R. A. Maxwell, W. T. Mylcrane and F. M. Farwell. The board is the same as last year, with the exception that Mr. Farwell succeeds H. T. Miller.

Chicago, Ill.—Officers for 1904 have been elected by the Lincoln Cycling Club as follows: President, J. T. Booz; vice president, G. W. Cooper; secretary, D. B. Feist; treasurer, J. E. Hartwell; librarian, C. A. Curry. Directors—Charles W. Gregory, Charles F. McKinley, John M. Miller, E. A. Price, Jr., F. D. Wallace and John Wilkinson, Jr.

Columbus, Ohio.—The stockholders of the Columbus Sporting Goods Company, at their annual meeting elected the following directors for 1904: J. A. Jones, Dr. A. C. Wolfe, J. C. Sherwood, J. W. Carter, J. W. Reed, John H. Mackie and Dr. C. D. Watkins, the latter of Etna, O. The following officers were elected: President and manager, John H. Mackie; vice president, Dr. A. C. Wolfe; secretary and treasurer, J. W. Reed. A satisfactory dividend was declared on the stock.

Middletown, Ohio.—The officers of the Miami Cycle & Manufacturing Company were elected with P. A. Gorg as president; W. L. Dechant, vice-president; Harry Walburg, secretary-treasurer. Albert Hare was selected as superintendent of the factory for another year.

New York, N. Y.—The tenth annual election of officers of the Century Wheelmen held at the clubhouse, Nos. 444-446 Amsterdam Avenue, on January 19, resulted in the choice of the following: President, E. Willis Warfield; vice-president, William H. Hale; financial secretary, Waite H. Gorton; recording secretary, William E. Parker; corresponding secretary, Robert R. Kallman; treasurer, Willis E. Frost; captain, William H. Mackay (the captain chooses his assisting officers, first and second lieutenants, color bearer, bugler and surgeon); board of directors, William H. Klinker (to serve two years); Joseph P. Walsh (two years), Walter Eveleth (one year), Thos. F. Shanahan (one year), Lester W. Palmer (two years), William H. Nolan (one year), Albert Schwebke (two years), Ivah A. Jones (one year).

Nuremberg, Bavaria.—Nearly 10 per cent. of the population of Nuremberg, one of the imperial free cities in Bavaria, are owners of bicycles. The population is 260,000, and the owners of bicycles number 25,100.

Reading Pa.—The Penn Wheelmen held their annual election of officers on January 14, with the following result: President, Bohilke Luerssen; vice-president, Miller M. Deen; treasurer, Ray Helms; financial secretary, Ed. A. Edelman; recording secretary, John B. Bowers; captain, R. C. Potteiger; first lieutenant, Ed. Mark; second lieutenant, Ed. Scull, Jr., bugler, Stanley Bellemere; color bearer, J. H. Snyder; board of directors, William G. Rees, A. J. Geiger, Webb Fox, Frank Ermentrout, O. Wolf.

WHERE COLORS COME FROM.

Bistre is the soot of wood ashes.

Indian yellow comes from the camel.

Ivory chips produce the ivory black and bone black.

Various lakes are derived from roots, barks and gums.

Turkey red is made from the madder plant, which grows in Hindostan.

Mastic is made from the gum of the mastic tree, which grows in the Grecian archipelago.

Blue black comes from the charcoal of the vine stalk. Lampblack is soot from certain resinous substances.

Chinese white is zinc, scarlet is iodine of mercury and native vermilion is from the quicksilver ore called cinnabar.

The cuttlefish gives the sepia. It is the inky fluid which the fish discharges in order to render the water opaque when attacked.

Little real ultramarine is found in the market. It is obtained from the precious lapislazuli, and commands a fabulous price.

India ink is made from burned camphor. The Chinese are the only manufacturers of this ink, and they will not reveal the secret of its manufacture.

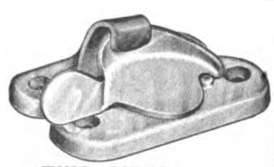
The cochineal insects furnish a great many of the fine colors. Among them are the gorgeous carmine, the crimson, scarlet carmine and purple lakes.

The exquisite Prussian blue is made by fusing horses' hoofs and other refuse animal matter with impure potassium carbonate. This color was discovered accidentally.

The yellow sap of a tree of Siam produces gamboge; the natives catch the sap in cocoanut shells. Raw sienna is the natural earth from the neighborhood of Sienna, Italy. Raw umber is also an earth found near Umbria and burned.

"BLUE BOOK" CREDITS OF THE HARDWARE IRON & METAL TRADES.

We have just issued the most complete and reliable book of credit ratings for this special branch of trade that has ever been published, containing about 400,000 rated names of wholesalers, retailers and manufacturers, covering the trade thoroughly. The ratings are conservative and very reliable. The ***paying record*** is based upon ***ledger experience*** of credit men everywhere.



You buy credit information. Isn't it the part of a good buyer to post himself thoroughly on the merits of a book of ratings, gotten up especially for his trade by men with ample capital and who are thoroughly trained in this class of work and who make a ***specialty*** of it?

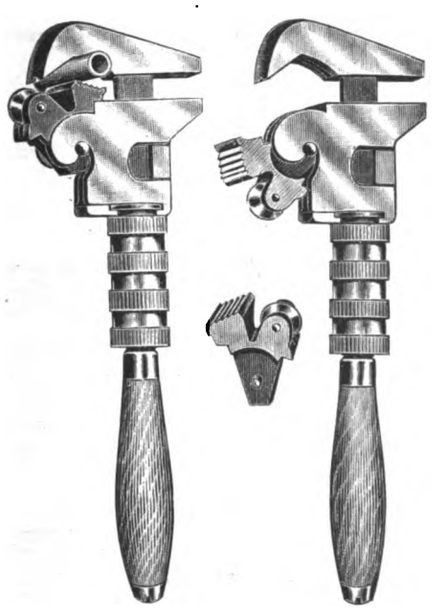
A Timely Tip



"LOOK BEFORE YOU LEAP"

and before buying any sort of COMBINATION WRENCH we want you to compare carefully what we claim for our

... COMBINATION ...

PIPE AND MONKEY WRENCH AND PIPE CUTTER

It's ONE tool which does the work of three separate tools.

The **TIPPING** feature in the Pipe Grip insures a **positive** and **instant** Grip, and holds Pipe firmly without crushing. Will not slip or lock on pipe; releases instantly on backward movement without wedging.

By throwing the Gripping Jaw back, the pipe can be placed or re-placed in V of Wrench without running nut or sleeve back more than one turn.

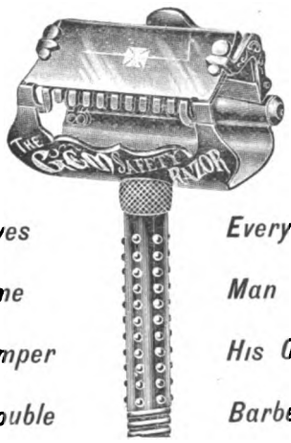
The **PIPE CUTTER WHEEL** is eccentric, thus insuring a free and rapid cutter, and enables the operator to force up on the nut, or sleeve, when low part of Wheel is in contact with the pipe.

This high class tool meets the approval of the most exacting mechanics. Parts interchangeable. Not liable to derangement. Not extrvagant in price.

SEND FOR CIRCULAR.

Bonney Vise & Tool Works, (Inc.)

3015 Chestnut St., Philadelphia, Pa.



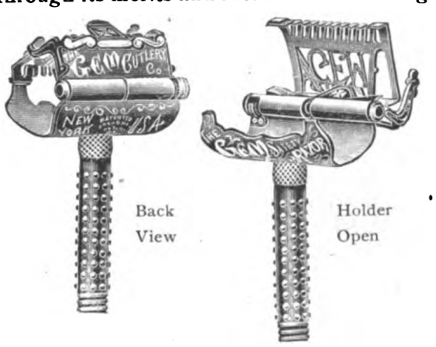
The "Gem" Pulls

Business, "**Without Pulling**" a single hair or whisker while shaving.

It represents perfection in Safety Razors. It lives up to the spirit and letter of our every advertisement seven days in a week.

THE 1904 "GEM"

Saves *Every*



Time *Man*

Temper *His Own*

Trouble *Barber*

"A GOOD RISK"

when it comes to selling it, because it has reached the highest point of popularity through its merits and extensive advertising

They All Look Alike

There is, APPARENTLY, little difference in Safety Razors as you look at them from the distance—but they dont shave alike.

There's a whole lot of difference when put to a thorough test.

The "GEM" looks all right, shaves all right—sells all right.

A sample order will convince you beyond the shadow of a doubt.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

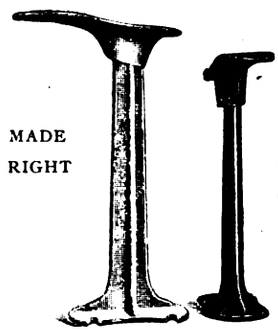
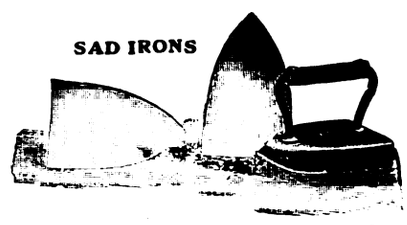
Joseph Dixon Crucible Co., Jersey City



BLACKLOCK FOUNDRY · SOUTH PITTSBURG, TENN. ·

The Trade Mark that stands for reliable goods, good finish and prompt shipments.

REVERSIBLE



Shoe Lasts and Stands.

Made of Cast Iron.

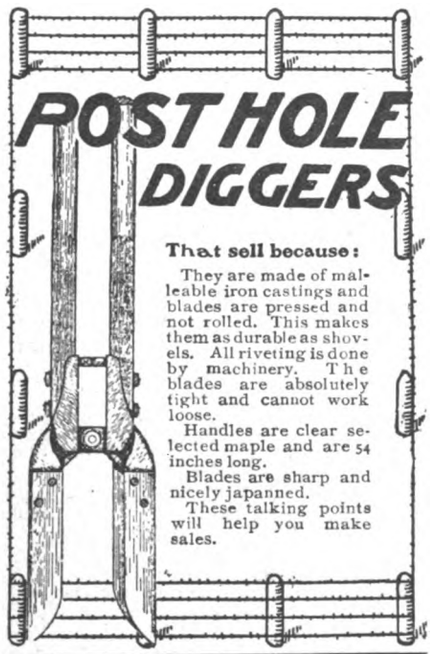
MADE RIGHT TO SELL RIGHT

SAD IRONS

In this line we are leaders.

Our goods stand the hardest usage.

Our assortment is large.



We have the largest and best equipped factory in the south for the manufacture of Sad Irons, Country and Stove Hollow Ware. Ground and Unground. Sugar Kettles, English Pots, Cast Iron Shoe Lasts and Stands, Kitchen and Corner Sinks, Grates, &c.

Shall we send you our catalogue?

BLACKLOCK FOUNDRY

South Pittsburg, Tenn.

POST HOLE DIGGERS

That sell because:

They are made of malleable iron castings and blades are pressed and not rolled. This makes them as durable as shovels. All riveting is done by machinery. The blades are absolutely tight and cannot work loose.

Handles are clear selected maple and are 54 inches long.

Blades are sharp and nicely japanned.

These talking points will help you make sales.

We make tacks and nails, too.
Send for circular.

A Long (K)Night In HARDWARE

¶ For years retail hardware men have been groping in the dark, looking for some efficient way to increase their business—some of them have found it!

Warren's Patent Sectional Glass Front Shelving

is designed and manufactured by a Hardware Man for Hardware Men.

¶ You can keep a line of samples of your entire stock on exhibition at all times.

¶ It preserves each article in the same attractive newness that it comes from the factory, prevents *dust, rust, finger-marks and dirt.*

¶ It enables you to sell goods to a *German*, a *Scandinavian* or *any* other foreigner who, even though he cannot speak English can *point* to what he wants.

¶ It improves the appearance of your store *100 per cent*; enables your salesmen to spend their time *selling* goods instead of *hunting* for them, and will *pay for itself in one year.*

¶ Send dimensions of your store and let us supply you—FREE—with a color plate made to scale, showing how *your* store will look when equipped with The Best Shelving in the world for your purpose.

¶ Remember the shelving is made on the unit plan—if you want to experiment—don't wish a complete outfit now—you can buy one—two—three stacks or sections—the rest will follow as your satisfaction increases.

J. D. WARREN MANUFACTURING CO.
900 Masonic Temple, Chicago

A Mechanic's Opinion

J. T. McKEG, Hardware Dealer of Montaur Falls, N. Y., writes: "When can I have the second cash register I ordered some time ago. I need it. I am a mechanic and have taken this machine apart and find it perfectly made and of the best material. It should last twenty years."

We are sure YOU will be equally as well pleased as many others who have purchased The "Century."

Please let us hear from YOU. Every machine sent on 7 days' trial and guaranteed for 5 years.

SPECIAL OFFER.—We have a plan for advertising and introducing our machine to new trade which we are extending to responsible merchants for a short time, which will put you in possession of this high-grade, up-to-date, 20th Century Cash Register for VERY little money and on VERY easy terms. Please write for full particulars.

Ann Arbor Gasoline Lighting System

Nothing will draw trade on a dark night like a well-lighted store.

Nothing will light your store so well and at such little cost as the **"Ann Arbor Gasoline Lighting System."**

Until you have actually seen this splendid light, you can have no idea what a clear, beautiful illumination it gives. Its cost is about one-tenth as much as electricity or gas. Endorsed by up-to-date merchants everywhere.

INTRODUCTORY OFFER.

We have a special proposition to make the first man who writes from every community that will enable him to save money.

Write to-day for descriptions and prices. We have some choice territory left for the right kind of agents.

BUTTER IN A MINUTE

THE ONE MINUTE CHURN

(Protected by 57 Patents.)

Produces the finest quality of granular butter in a minute. It is the ONLY PERFECT MILK AND CREAM AERATOR CHURN on the market, churning sour and sweet cream in less time than any other churn. Made of the best material. Construction is perfect in every detail. All parts interchangeable and carried in stock. Runs easily Seven sizes, one quart to 13 gallons. For farm and family use. Special offer to Hardware dealers for 1904. Mention HARDWARE.

Cable Address: "MINUTENESS" New York.

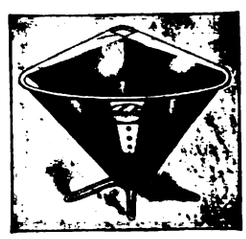
The One Minute Churn Co., Inc.

Manufacturers and Exporters.
I. M. MURPHY, President

9 Old Slip, NEW YORK, U. S. A.

Vrooman's PATENT SANITARY Sink Strainer

"THE FAVORITE ONE"



A KITCHEN NECESSITY

Keeps sinks clean and is easily cleaned.

Prevents stoppage of sink pipe and saves frequent plumbing.

Can be used in any sink with stand.

It is unequalled as an economic, cleanly and sanitary device.

VROOMAN'S STRAINER

A PROFITABLE SELLER

If you are after the best strainer made, ask your jobber for the Vrooman Strainer.

Write for descriptive booklet.

There are many *Reasons Why*

HIGH GRADE DOOR.

Phillips Screen Doors and Window Screens

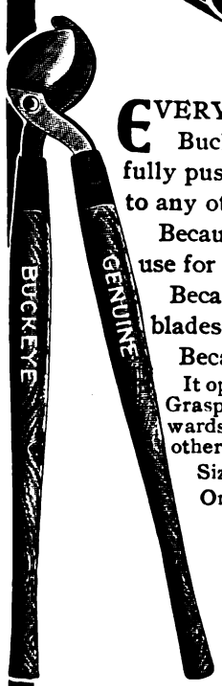
are especially desirable for next season.

FIRST: The Patterns are up to date. The result of good taste and long experience.

SECOND: The Goods are Reliable. The result of a natural desire to make "good stuff," and incidentally to hang onto our trade and get a little more.

THIRD: Our DESIRE to make good screens is backed up by the ability to make 'em—Capital, Plant, Heavy Stocks of Good Materials, 22 years experience.

FOURTH: The present very low prices do not interfere with the quality of our product. We have a year's stock of best materials, and our warehouses are full of finished goods. We are paying the highest wages we have ever paid.



FIFTH: We have made unusual preparations for next season's business and expect to give all our customers prompt service.

We call especial attention to our "High Grade" Screen Doors. The quality and finish of these goods have not yet been duplicated by manufacturers of Stock Screens. These doors are made in our "Order Dept."

The A. J. Phillips Co.
FENTON, MICH.

MANUFACTURERS OF
THE "FLYER," BONANZA, PERFECTION AND EXPRESS WINDOW SCREENS.

GENUINE BUCKEYE PRUNER

EVERY dealer should handle the Genuine Buckeye Pruner, because he can carefully push it to his best trade, in preference to any other pruner made.

Because it has stood the test of actual use for over 30 years.

Because it is the strongest made---the blades being hand-forged.

Because no other made cuts so easily.

It operates just opposite from other pruners. Grasp the limb with the hook, and cut towards you. It's quicker and easier than the other way.

Size 25—inch.

One dozen in a case.

Write for prices on a Sample Order.

NOVELTY MFG. CO.
JACKSON, MICH., U. S. A.

Peck's Policy

Is to furnish good Edge Tools at lowest prices; never to do less than we promise, but more if possible; and to make friends of our patrons.

Why lose a single customer by selling a poor tool when you can gain one and keep him by selling Peck's? How about your Tool Trade for 1904? Write us. Maybe we can help you.

Peck Edge Tool Co.

HANG 'EM !

Hang 'em on the Up-To-Date Hanger--

Trousers and skirts, and save the money usually spent for pressing them.

The **"Up-to-Date"** Hanger is an up-to-date necessity to smart dressers.

Made of spring steel, finished in bright lustre black enamel.

Special offer to Hardware Dealers.

Write us at once, mentioning "HARDWARE."

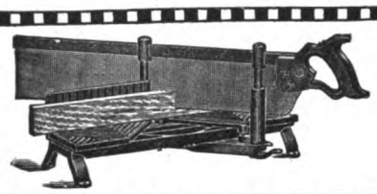
Caldwell Mfg. Co.
Rochester, N. Y., U. S. A.

WHITE

"There is no better way to judge the future except by the past."
—DANIEL WEBSTER.

What better standard could be set for the purchase of Edge Tools?

White's Edge Tools



welcome such a test from Hardware men everywhere. For nearly three-quarters of a century our Edge Tools have never failed to give satisfaction—

They are favorites with those who sell and those who buy them.

A Certainty

We are the largest manufacturers of Edge Tools. Our variety is endless. Our facilities are unequalled. Are we on your list for 1904? If not, write us.

CRONK & CARRIER SPECIALTIES

OUR CATALOGUE TELLS ALL ABOUT OUR COMPLETE LINE.

SHALL WE SEND YOU A COPY WITH PRICES FOR 1904?

CRONK & CARRIER MFG. CO., ELMIRA, N. Y.

THERE'S MONEY IN RAIN

and rough weather if you carry

Blizzard Storm Fronts

The front that closes up a buggy in half a minute. Cleverest, easiest adjusted, quickest selling Millions read our ads in the popular weeklies, magazines, agricultural papers, etc. People write us all the time asking where they can get these fronts. We'll send inquiries from your locality to you if you handle "Blizzards."

Blizzard Days Now!

If you haven't the **Blizzard Storm Front** in stock you send trade to your competitor who has.

Write us to-day about our liberal proposition to dealers.

Not a drop can touch you when your buggy is closed up by the

Blizzard Storm Front

(Patented in United States and Canada.)

Fits Any Buggy

Adjusted in 30 seconds without getting out or removing gloves, sides open and close as quickly and easily as a door, large line pocket, guaranteed satisfactory. The large window, 12 x 20 inches, is a pliable transparent material that won't break. Rubber Cloth, $3.00; Heavy Rubber Cloth, $3.50.

Ask your dealer and be sure that trade-mark "Blizzard" is stamped on inside under window.

Sold by Vehicle, Harness and Hardware dealers. If yours hasn't it, write us. *Illustrated booklet free*

X-Radium Heater

A little marvel of comfort and economy wanted in every home.

THE X-RADIUM HEATER is, in reality, a neat little stove, four inches high and seven inches in diameter. Gives heat without consuming fuel. Made in two parts: first, a heating pad of stamped steel filled with X-Radium (a chemical substance recently discovered possessing the same affinity for heat that a sponge has for water); second, a stamped steel bowl-shaped stand with asbestos mat in the bottom, into which the pad is placed after being heated. Finely finished, polished and heavily nickel-plated.

No extra cost in heating the **X-Radium** Heater. Set the pad on the stove or range (coal, wood, gas, gasoline or oil) and in twenty minutes it will be hot and keep hot for two hours.

Keeps the coffee, soup, vegetables, meat and pastry hot, keeps the flat-irons hot, keeps anything hot. Takes the place of the hot water bag and is the greatest foot warmer on earth. Will last a lifetime. It is everybody's necessity and everybody can have it. **Price only $2.50** (east of the Missouri river).

OUR FREE TRIAL OFFER— Order the **X-Radium Heater** through your local dealer. We will send it to him, transportation prepaid, and instruct him to allow you to try it for ten days. If satisfactory pay him $2.50. If you are not satisfied, return it to the dealer. You have no risk in the matter. This trial offer shows our confidence in the merits of the **X-Radium Heater.** So please have no hesitation in taking advantage of it.

NOVELTY MANUFACTURING COMPANY, Department
JACKSON MICHIGAN, U. S. A.

TO-DEALERS: This advertisement (in beautiful half-tone effect) will appear, full page size, in the *Ladies' Home Journal*, *Ladies' World* and *Munsey's*, *McClure's*, *Everybody's*, *Review of Reviews* and *Strand* Magazines in March.

The X-Radium Heater is a big success. Your customers are going to want it. Let us have your order to-day—to-morrow never comes. Delay misses opportunity.

WHY IS THE

O. K. THE BEST ROTARY WASHING MACHINE?

—BECAUSE—

1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
2.—The tub is made of Louisiana Red Cypress Lumber, cherry finish; the legs are solid with tub (not removable, breakable legs fastened with screws).
3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot suds, and cleaning them without rubbing them to pieces.
4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
5.—The tub has a wringer box fastened with steel brackets.
6.—The lid on the tub closes tight, no escape of steam.

TRADE NOTES

Reading ,Pa.—The Wilkinson Shear Works has moved to its new building, Laurel and Mifflin Streets. The firm acquired the business of a cutlery firm and is now manufacturing an additional line of goods.

Richmond, Ind.—The plant of the Richmond Plow Company has been sold to the Brown-Manley Agricultural Co., of Malta, Ohio.

Savannah, Mo.—S. W. Crowley, W. B. Cobb and George D. Crowley have disposed of their stock in the Savannah Implement Company and E. Linge of Emporia, Kansas, becomes a stockholder. After the sale was completed, a meeting was held by the new company and new officers were elected. The officers are A. H. Cobb, president and manager; J. L. Scudder, vice president and E. Linge, secretary and treasurer. The stock of the company is held, by these men.

Toledo, O.—The Norton Paint and Hardware Company, at a recent meeting of its stockholders, decided to go out of business, convert its stock and accounts into cash, pay its liabilities and divide the balance among its stockholders.

POST HOLE DIGGERS

That sell because:

They are made of malleable iron castings and blades are pressed and not rolled. This makes them as durable as shovels. All riveting is done by machinery. The blades are absolutely tight and cannot work loose.

Handles are clear selected maple and are 54 inches long.

Blades are sharp and nicely japanned.

These talking points will help you make sales.

We make tacks and nails, too.

A $2 Advertising Course

Learn to Earn $20 to $100 Weekly.

I am making a remarkable offer to business men who want to improve their own advertising, and to those who want to learn a congenial and very profitable profession, but are not convinced of their ability to succeed at it, or who are not sure which course to take.

Send me $2 and I will give you four weeks' trial instruction. That will show you just how good my course is, and how valuable it may be to you.

If you decide to continue, and I believe you will, the $2 will be credited to your account.

I **wouldn't** make this offer unless I honestly meant to help you.

I **couldn't** make it unless I really did do for my students the things I promise.

I am a specialist in advertising.

For seventeen years I have been building business for some of the largest advertisers in the world. Regal Shoes, Heinz Pickles, Studebaker Wagons, Jenkinson Stogies, R & G Corsets, and a host of others have been numbered among my clients.

My course is practical not only because it is based on my wide experience, but also because it is backed up by an actual advertising business.

Look up the rating of the Bates Advertising Company, and then send $2. Anyway send stamp for my handsome 66-page prospectus.

CHARLES AUSTIN BATES,

28 Spruce St., N. Y. City.

HARDWARE

Bechtold & Wood, 54 Stone Street, New York, after serving in the capacity of buyer and manager in export concerns in this city for the past ten years, have established a general export agency and are prepared to introduce and extend in the foreign markets contractors' and builders' supplies, household and Hardware specialties. During the time of their experience in this line they have given requirements of the different markets characteristics and customs of the people their careful consideration, and feel qualified to judge how they act the most profitably for those they represent.

The Mather Thousand Mile Axle Oil, an advertisement of which appears on another page of this paper, has been on the market for a number of years and has always proven a good seller. It is put up in an attractive can so that it can be easily displayed on the shelves or in the window of the dealer and the goods are of such quality as to retain the business. The reputation of this Oil is that it is always uniform and of good wearing body.

Among the speeding contests participated in by the fastest automobiles in the country, we are pleased to notice that the "Stevens-Duryea," manufactured by the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., has on the Ormond Daytona course in Florida, with a 14 H.P. Machine, successfully broken previous records by making the mile in 57½. The designer of the skeleton record breaker, J. Frank Duryea, watched its performance, and now has a desire to construct a flyer of greater power.

Hopkins & Allen Arms Co., Norwich, Conn., are distributing to retail dealers who are handling their production, hanging signs, made of heavy bristol board, 12½x6½ inches, very handsomely printed. The programme is that one sign shall be sent each month, taking up in order their several lines of Single and Double Barrel Shotguns, Rifles and Revolvers. Each card contains a cut of Gun, Rifle or Revolver, and is appropriately and distinctly lettered, making an attractive window sign. They will be pleased to send these signs on application.

We are informed that the Elliott Fisher Company, New York, manufacturers of Billing Machines and Book Typewriters, desire to consolidate their manufacturing under one plant within convenient distance of New York and are looking for a better location. They will need about 50,000 square feet of floor space.

J. STEVENS ARMS & TOOL CO.'S GOOD WORK.

A novel and unique manner of advertisement has reached us in the form of a pamphlet from the J. Stevens Arms & Tool Co., Chicopee Falls, Mass., being a report of the Stevens competition in the *St. Nicholas* magazine. It is a treatise on "Young People's Right to Bear Arms," defended by themselves by the way of letters from the prize-winners and extracts from many others. The J. Stevens Arms & Tool Co., recognizing that there is a prejudice against the use of firearms by young people, decided to call upon the boys and girls themselves to justify their right to bear arms. Consequently they printed in *St. Nicholas* for June, July and August, 1903, an "open letter" to the boys and girls of the St. Nicholas League and other readers of *St. Nicholas*, offering 25 "Stevens No. 17 Favorite Rifles" for the best 25 statements of reasons why young people, both boys and girls, should learn to handle the rifle, and also of the conditions under which the use of a rifle should be granted to a boy or girl. The pamphlet above referred to is the report of this Stevens competition, and is worth sending for and deserves careful perusal by both the young people and their parents.

The American Sheet and Tin Plate Company, which was recently formed by a consolidation of the American Tin Plate Company and the American Sheet Steel Company, has removed its extensive offices from New York to the Frick Building, Pittsburgh. The difficulties and confusion which are of necessity caused by the moving of such large force of employees and carloads of office appliances have been overcome and business is again conducted in the same systematic, accurate and courteous manner which has been characteristic of both the now combined companies.

AMERICAN HARDWARE MANUFACTURERS' ASSOCIATION.

From a circular letter issued by F. D. Mitchell, secretary-treasurer of the American Hardware Manufacturers' Association, Bourse Building, Philadelphia, under date of February 8th, the following extracts refer to the semi-annual convention, which will be held in Atlanta, Ga., May 24-27:

Advices received from the Piedmont (our headquarters) indicate an unusually large number of reservations by our members at this early date, and they now decline to make any reservations subject to cancellation later, stating: "The demand is so large for rooms that we will need all we have for the people who will come." We understand that Friday, May 27, will be largely devoted to attending a barbecue, given by the Atlanta people, and for which the Southern Railroad will donate train service—some 80 miles' ride—which will afford an exceptional opportunity for our members to meet their customers.

It is probable that our programme will be substantially as follows:

Tuesday, May 24, meeting of Executive Committee.

Wednesday morning, opening session, president's address, etc.

Wednesday afternoon, jobbers and manufacturers meet for mutual discussion.

Wednesday evening, entertainment.

Thursday morning, executive session.

Thursday afternoon, no special programme.

Thursday evening, banquet.

Friday, excursion and barbecue.

Special efforts will be made by the respective reception committees, and through our "numbered button, with printed key," carefully edited, looking to make this an exceptional convention, socially and commercially.

TENTH ANNUAL SPORTSMEN'S SHOW.

The Tenth Annual Sportsmen's Show opened at Madison Square Garden, New York, on February 19th, and will continue until Saturday, March 5th, inclusive. In a number of scenic effects it may be said to surpass any former efforts. A combination of mountains and valleys, with a stream and old fashioned water mill, exhibits of live game birds, a model fish hatchery in operation, together with a fine collection embracing pheasants, jungle fowl, peacocks, Persian lamb and sheep, Angora goats, geese, wild duck, wild game, water fowl and small game animals are original methods which add to the usual interest. Such interesting features as fly casting, canoe races, tilting contests, log rolling and kindred sports were provided in connection with the large lake on which demonstrations of the launches and motors were made. More fully occupied space than in previous exhibitions has been taken by exhibitors, a predominant feature being the display of boats of various kinds. There is also rifle and revolver shooting by an expert, and exhibitions of breaking and pitching camp and typical saddling and off-saddling of Western bronchos used in transporting camp supplies and equipment from point to point by Western guides in competition with each other, in a thoroughly native and realistic manner.

HARDWARE

VOL. XXVIII. FEBRUARY 25, 1904. NO. 10

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade.

HARDWARE is published on the 10th and 25th of each month. The subscription is $1.00 a year, payable in advance.

Subscriptions may commence with any issue.

Remittances should always be made by New York Draft, Post-office or Express Money Order.

Register your letters when you remit by cash.

Foreign Subscriptions.—For each copy to be mailed outside the United States the Canadas, and Mexico, the price is $2.50 a year, postage prepaid.

Change of Date.—It takes two weeks to change the date, after your subscription is received.

Change of Address.—Always give both your old and new address when you ask us to change your address.

The Name of your Post office and of the State you live in should always follow your own name when writing to this office. We cannot find your name on our books unless this is done.

Letters should be addressed

HARDWARE PUBLISHING CO.,

809 Broadway New York.

HENRY HOPKINS, - - Editor.
A. E. BOLLES, - - - Manager.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

Editorial Trade Review

The prevalence of Hardware conventions that are being held in a number of the most progressive States, engrossing as they do the attention of all the prominent retailers in each State, has had its effect upon mail orders and those orders usually obtained by the missionary of commerce, who is apt to be on the warpath for business at this season of the year. But the dealer who is faithful in his attendance on his State convention proceedings does not waste his time when he spends it hobnobbing with the leading buyers in the retail ranks, listening to excellent papers prepared by the thinkers in the business, in which is skillfully detailed the methods by which success and good fortune has been achieved; for the many benefits springing from organized effort are made plain to the intelligent listener.

These annual gatherings are as refrshing oases in the wide wilderness of commercial activity, where the participant rests and refreshes himself, both mentally and physically, while he forms new friendships, or cements old ones, that give new inspiration to the worker and make him more capable of combatting the errors of the past and fortifying him for a future of less friction and greater promise of profit.

The changes noted in the current market prices are not of sufficient importance to affect the general trend of trade. There are as many conjectures in regard to the future of trade and traffic as there are of settled convictions. The natural tendency, consequently, will be toward a conservative handling of the situation, which will prevent any radical changes in current quotations that might demoralize to its detriment any branch of the industry.

This is regarded by some as a favorable period to institute reforms in the methods of doing business which have impeded a proper understanding of some questions in the past. As to the new method of selling Axes by weight, which from a manufacturer's standpoint seems reasonable and feasible, it will doubtless be difficult for the retailer—who, after all, is the prospective disposer of the product—to understand the advantages underlying the proposed change. While there never seemed to be any justification for selling a six-pound Axe at the same price as one weighing a third less, it has been done from time immemorial, and the lack of close discrimination as to size and weight affects other lines of production besides axes. The weight of axes required by the consumer is governed by the wants of a locality, and no doubt the change in price will cause a modification of requisitions that may make the retailer's wants somewhat uncertain as to weights until he has sounded his customers' willingness to pay the advance demanded.

The early orders that have already been given for the usual Spring requirements are to a large extent tentative in character, and coupled with expectations of further requisitions as the season progresses. So many seasonable goods are needed for Spring sales, which includes Steel Goods, Poultry Netting, Wire Cloth, Cream Freezers, Refrigerators, Lawn Mowers, Scythes, Snaths, etc., all of which need time for production, that the necessity for early orders is inevitable if the jobber expects to fill all the orders that are taken by his representatives. This necessitates close watching of stock and prompt deliveries on or before the time specified in orders booked, which bids fair to be a difficult matter this year as it was a year ago.

The recent advance of 10 per cent. on orders for Builders' Hardware, which took effect on February 15, coupled, it is true, with certain protective conditions governing sales already under process of fulfillment, was handled in an exceedingly diplomatic manner that involved but little hardship to the jobber. The rearrangement of prices, which was agreed upon January 1, is made less irksome, when announcement is made that the additional advance now announced may—and undoubtedly will be—taken advantage of in ample time to be accounted as so much unexpected profit. May it prove no incentive to cut prices when they are thought to be well settled.

ANALYSIS OF THE YEAR'S COMMERCE.

More than one-half of the exports from the United States in 1903 went to British territory, and practically one-third of the imports into the United States came from British territory. Our total exports to British territory in the calendar year 1903 were 768 million dollars, or 52 per cent. of our total exports, and our total imports from British territory 308 millions, or 31 per cent. of the total, speaking in round terms. These facts are shown by an analysis of the year's commerce made by the Department of Commerce and Labor through its Bureau of Statistics. By British territory is meant the United Kingdom and its colonies, dependencies, and protectorates.

The territory included under this designation of the United Kingdom and its colonies, dependencies, and protectorates contains over 11 million square miles, or more than one-fifth of the land surface of the globe, and has a population of 400 millions, or one-fourth of the population of the world. The largest exportation to British territory, of course, was to the United Kingdom—543 million dollars—and this was the largest exportation to any single country. Next in order of magnitude of exports to British territory was Canada, 131 millions; British Australasia, 32 millions; British Africa, 28 millions; British West Indies, 10 millions; Hongkong, nearly 10 millions; India, nearly 5 millons; and the remainder scattered through the smaller British dependencies.

Of the 308 million dollars' worth of imports into the United States from British territory, 177 millions, speaking in round terms, came from the United Kingdom, 53 millions from Canada, 48 millions from India, 12 millions from British West Indies, 7 millions from Australasia, one million dollars' worth from British Africa, and the remainder from numerous British dependencies of less importance.

Thus, of the foreign commerce of the United States aggregating nearly 2½ billion dollars in the calendar year 1903, more than one billion dollars represented commerce with British territory.

Next in order of magnitude of commercial transactions with given countries is Germany, to which our exports in 1903 were 225 millions and from which our imports were 122 millions. With German territory, outside of Germany, our commerce is small. To German Oceania our exports in 1903 were 145 thousand dollars, and to German Africa, 19 thousand, while our imports from German territory, outside of the mother country, were even less.

Our commerce with Germany has grown much more rapidly in the last decade than that with the United Kingdom.

Digitized by Google

In 1893 our exports to Germany were only 88 million dollars, in 1903 they were 225 millions, an increase of over 150 per cent., while in the case of the United Kingdom our exports to that country in 1893 were 415 millions, and in 1903, 543 millions, an increase of only 30 per cent. Imports into the United States from Germany increased during the decade from 89 millions in 1893 to 122 millions in 1903, or 37 per cent., while from the United Kingdom the imports increased from 150 millions in 1893 to 176 millions in 1903, or 17 per cent.

Canada stands third in the order of magnitude of exports from the United States, though that country has been included in the general discussion of our commerce with British territory. Our total exports to Canada in 1893 were 57 million dollars, and in 1903, 131 millions, an increase of about 130 per cent.; while our imports from Canada grew from 34 millions in 1893 to 53 millions in 1903; an increase of 56 per cent.

France is fourth in the magnitude of its commerce with the United States, our exports to that country in 1903 being 88 million dollars, against 57 millions in 1893, while our imports from France were 80 millions in 1903, against 64 millions in 1893.

Netherlands is next in the list, our exports to that country in 1903 being 73 million dollars, against 43 millions in 1893, and our imports from Netherlands, 21 millions in 1903, against 12 millions in 1893.

Considering the commerce of the United States by grand divisions, that with Europe is of course first in order of magnitude, both as to imports and exports. Our exports to Europe grew from 680 millions in 1893 to 1,087 millions in 1903, while our imports from Europe increased meantime from 392 millions to 528 millions.

To North America other than the United States our exports increased from 125 millions in 1893 to 227 millions in 1903, and our imports from the same countries increased from 171 millions to 182 millions during the same time. To South America our exports grew from 34 millions in 1893 to 46 millions in 1903, our imports from that continent meantime increasing from 103 millions to 113 millions. To Asia our exports grew from 20 millions in 1893 to 55 millions in 1903, while our imports from that grand division grew from 75 millions to 139 millions in the same time. To Africa our exports increased from 5 million dollars in 1893 to 31 millions in 1903, and our imports from Africa increased from 7 millions to 11 millions.

In the commerce with Oceania the figures are, on their face, misleading, because they do not now include the figures with Hawaii as they did a decade ago. The figures on their face show exports to Oceania as 11 millions in 1893 and 37 millions in 1903; but if our shipments to Hawaii in 1903 were included in the statements of foreign commerce the total would be about 50 millions. Our imports from Oceania in 1893 were 28 millions, and in 1903 are stated at but 22 millions, but with Hawaii added would be about 52 million dollars.

SOUTHERN NEW YORK AND PENNSYLVANIA TRADE NOTES.

(From our Travelling Correspondent).

The unusually large fall of snow and the very severe weather all through the month of January has very materially interfered with all building. The trade from the country districts has also been somewhat smaller than usual, and collections have been exceedingly slow, owing to the fact that it has been almost impossible for people living in the rural districts to get to town.

On the other hand, business has been exceedingly brisk in ice tools, snow shovels, children's sleds and skates. In speaking of this trade, one Binghamton jobber said: "It has been almost impossible to get our orders filled for some Winter goods. We bought heavily of snow shovels and skates and are now about out of all these goods, and have lost many sales because the manufacturers were unable to fill our duplicate orders promptly. The demand from the country trade has been very large for all these goods."

One of Binghamton's progressive Hardware firms is Callahan & Douglass, who have a very well arranged and large Hardware store. This concern make a strong bid for the sporting goods trade and carry a very complete line, including fishing tackle, gun and gun goods, bicycles and supplies.

Another up-to-date Binghamton store is that of Babcock, Hinds & Underwood, who carry on an extensive local jobbing Hardware business. This is one of the oldest Hardware establishments in the city and reported a good Winter business.

Barker, Rose & Clinton Co., of Elmira, occupy a double store and carry a large stock of general Hardware. In addition to their extensive retail business this firm do considerable wholesale trade throughout Southern New York.

Another Hardware firm of Elmira doing considerable jobbing business is Griswold, Maloney & Co.

G. A. Gridly & Son, of Elmira, carry an exceptionally fine line of fancy Hardware, going extensively into fine goods. This firm are also wholsale, but are making a strong effort to secure the best retail trade.

F. M. Baker & Son are the leading Hardware dealers of Owego, and although this firm's business is largely retail, no small amount of Hardware is sold by them, having a trade from the country for many miles around.

The T. T. Miller Hardware Co., of Easton, Pa., have enlarged their business considerably during the past few years and now do an exclusively wholesale trade.

There is a much better feeling in the Hardware trade of the Keystone State than a year ago. This is especially true in the coal regions, where there has been an active business for the past ten months.

There is an air of prosperity and business about the store of Chas. Morgans Sons, in Wilkes-Barre. The fixtures and general arrangement of this store is exceedingly good and stock is so well displayed that many sales are made. Much attention is given to window display and very pleasing effects are secured.

Frank Baab, of Wilkes-Barre, is another progressive Hardware merchant and carries an extensive line of Cabinet and Builders' Hardware.

One of the largest Hardware houses in the central part of the State is Phelps, Straw & Co., of Wilkes-Barre, who have built up a large business not only in Hardware, but in mining tools and supplies

All the Wilkes-Barre Hardware houses reported a good Christmas trade and said that the outlook was good for Spring business.

A. J. Hawley, of Scranton, Pa., in addition to a well-assorted Hardware stock, carries an exceptionally good line of stoves and heaters. This is found a good and profitable adjunct to the regular Hardware business.

In Reading, Pa., is to be found one of the finest and best appointed Hardware stores in the State. This is the store of Bright & Co., who also operate branch stores in other cities and do a large local jobbing trade.

One of Reading's oldest established Hardware houses is Obold & Co., who carry on both a retail and wholesale business. This firm are large dealers in guns and sporting goods generally. About the store of Obold & Co. there is an activity that speaks well of the firm's prosperity.

There seems to be no reason why general business in the coal regions should not continue good. All labor has steady employment and at good wages, and when Spring opens there will be undoubtedly considerable new building done.

HAMMERNAIL.

F. G. DAVISON.

It is with regret that we announce the sudden demise of F. G. Davison, of the Davison Mfg. Co., Brooklyn, on February 12th. Mr. Davison was ill only a few moments, the cause of his death being heart trouble. The manufacturing business will be continued as before under the same firm name under the management of F. S. Davison, whose persistent work has built up the business so rapidly during recent years.

"START IT RIGHT."

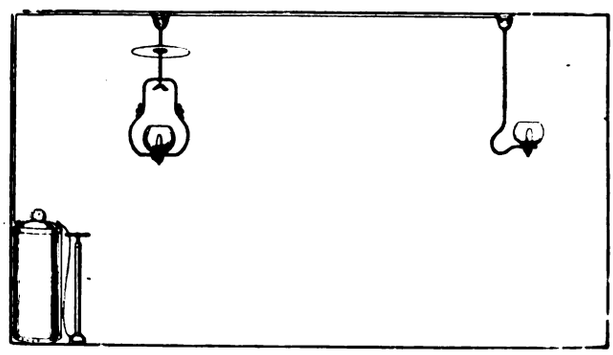
Butler Bros., Chicago and New York, are the authors of considerable advertising that is of an original and effective character which they are distributing to the Hardwaremen whose patronage they are strenuously seeking to get and keep. Under the name of "Reproductions of Retail Advertising," they are showing some attractive specimens of newspaper, magazine and similar advertising quite suitable for the use of Hardware stores, department supply and other general distributors, that will be found attractive matter; no matter how large or how small a space the dealer contemplates using. They also publish a booklet of 24 pages entitled "Start it right," which is characteristically illustrated and full of suggestions, sound and sensible, as to the conducting of a business and store which are worth perusing.

SOUTHERN SUPPLY AND MACHINERY DEALERS' ASSOCIATION.

The third annual convention of the Southern Supply and Machinery Dealers' Association will be held at Old Point Comfort on April 12, 13 and 14, the Hotel Chamberlain having been selected as headquarters.

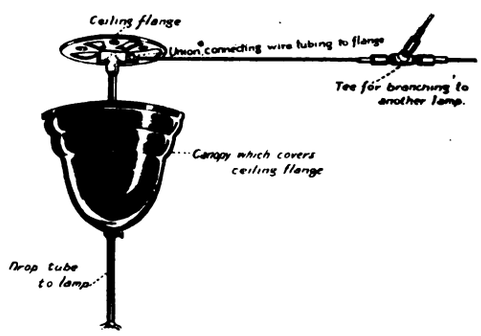
The officers of this association have succeeded in obtaining an exceedingly low rate from the Hotel Chamberlain, and there will be reduced railroad rates to Old Point Comfort from all points. All supply dealers, whether they are members of the association or not, also all manufacturers who are in accord with the policy adopted by this association, are extended a very cordial invitation to be present.

INTEND EXHIBITING AT ALL CONVENTIONS.



The Stowell Mfg. & Fdry. Co., South Milwaukee, Wis., who do an extensive business as manufacturers of Hardware, door hangers and rail, hot air registers and ventilators, hay tools, shoe lasts and stands, tackle blocks, wire workers' and plumbers' goods, intend giving the trade an admirable opportunity to know their goods more intimately. This company has already made an exhibit at the North Dakota Retail Hardware Dealers' convention at Grand Forks, at the Wisconsin Retail Hardware Dealers' Association at Milwaukee, the Iowa Retail Hardware Dealers' Association at Des Moines and the Indiana Retail Hardware Dealer's convention at Indianapolis. They invite dealers to call on them at the conventions at St. Paul, February 24th, 25th, 26th; East St. Louis, February 23d, 24th; St. Louis, February 23d, 24th, and Cleveland, February 24th, 25th, 26th.

THE PEERLESS ICE CREAM FREEZER.



Dana & Co., Cincinnati, Ohio, are the manufacturers of the Peerless Ice Cream Freezer, advertised in our columns, which for the coming season have been greatly strengthened and improved so that they are of even a higher standard of excellence than ever. A good inspection of every part of each machine is made, the tubs, iron parts, and working parts in general are the production of workmen who have been long in the employ of the company, and are guaranteed as nearly perfect as human ingenuity can contrive. This year considerable attention is given to their 25 and 40 quart power freezers, which have been in consequence made more of a feature than usual. These freezers are claimed to be the only power freezers built on the principle of the French pot, which principle is claimed to make the finest ice-cream, and to be in use by all the best confectioners who have been made acquainted with the merits of the Peerless Freezer.

A MODERN SYSTEM FOR LIGHTING THE STORE.

Something of the difficulties of lighting a store properly are known to every merchant, and a light that is perfectly satisfactory and at the same time economical is quite a rare feature. The city store has, in most cases, both gas and electricity at command. The electric arc is often favored because, under its rays, colors do not change much from the appearance they present in daylight. The light it gives is, however, quite unsteady and the peculiar, jumping and sputtering that often accompanies the electric light, is very annoying. Gas, when burned with a mantle, is very satisfactory, but very expensive, and the monthly reports of the man who reads the meter seem to grow larger with every succeeding month. A system of lighting that has proven very popular with merchants in every part of the country, is the gasoline lighting system, whereby a brilliant arc light is maintained at very little cost, the only fuel being hydro-carbon gas, generated from gasoline. It is perfectly safe, eminently satisfactory from every point of view as a light, and costs only about one-tenth as much to maintain as the gas or electric arc light. We show herewith a sketch that illustrates

the way in which one of the best of these lighting systems operates. It represents the Ann Arbor Lighting System, made by The Superior Mfg. Co., of Ann Arbor, Mich., with two of their different styles of arc lights in position. The gasoline is forced under pressure from the feed tank, through a fine wire tubing. On reaching the burner, the gasoline is transformed into hydro-carbon gas, which burns with a fine, clear brilliancy that for steadiness and whiteness cannot be equalled by any other fuel. A mantle is used to diffuse the flame. The arc lights are estimated to give 1200 candle power, and when compared with other lights rated of equal power, would

seem even stronger. A feature of the lighting system made by The Superior Manufacturing Company is the neat appearance of the lamps and fixtures when in position. The flexible wire tubing through which the gasoline is fed to the burner is really no more noticeable than an electric light wire, and a perfect joint is made by a flange leading down to the lamp, and covered up by a very neat oxidized brass canopy. In fact, the entire lamp is finished in the same handsome manner, which not only adds greatly to its appearance, but insures its durability. This lighting system is especially recommended to the progressive merchant in the small city, who is proud of his store, and wants to keep up the appearance of his place, at a small cost.

THE A. H. WOLFF GAS RADIATOR CO., 116-118 Wooster Street, New York City, have issued their 1903-1904 catalogue embracing their gas heating and cooking apparatus. Their Nos. 10, 20 and 30 Wolff Radiators represent a new departure in gas radiators which, they claim, surpass all competition by improvements of great merit. These radiators are made with double tubes, the burners of which burn with a white flame, which the company claim is more healthful than the atmospheric flame. In their No. 100 20th Century gas range they have departed from the old style stove and have produced a range on the cabinet order or design, thereby adding to its attractiveness and also making a compact stove, taking comparatively small space and doing the regular amount of work. It has a 16-inch double oven, double lined, and a separate broiler, so that baking and broiling can be done at the same time. Catalogue will be mailed upon receipt of request.

THE "STAR" SAFETY RAZOR.

During the past year Kampfe Brothers have received a number of complaints from persons, who have purchased Star Safety Razors, claiming the blades would not hold an edge. Upon investigation they found these blades to be the product of other manufacturers and sold to the trade at a low price to take the place of the Genuine Star Safety Razor Blade, and represented to be "just as good" in quality. Whereas,

STAMPS ON GENUINE BLADE.

it would be impossible to shave with their frame alone, it is by combining the two, the "Star Safety Razor" is produced, providing only that their frame and blade is used, otherwise an inferior infringing aggregation is produced and sold under their name. To state it mildly, this is certainly unfair competition. Kampfe Brothers, in justice to themselves, request the trade to abstain from selling their frames in connection with blades of other makes, as this is clearly an infringement on their various patents. Years of study and labor have been given to produce the Star Safety Razor Blade, and the manufacturers on honor state positively that for quality and workmanship they are far superior to any on the markets of the world. Experienced cutlers, and over five million users, they claim, will bear them out in this statement. They also call attention to the fact that qualified

AWARDS OF MERIT.

judges have granted them the highest awards for superior quality wherever exhibited. It was only after their blades were brought to a high degree of perfection that the Safety Razor became such a pronounced success. The improved frame and perfected blade has created the excellent reputation which the Star Safety Razor enjoys, and in a measure has paved the way for others, alleged or claimed to be "just as good" as the genuine "Star." All genuine Star Safety Razor Blades have the three stars and the name "Kampfe Brothers" stamped on the face of the blades. Also the name "Kampfe Brothers, N. Y., Warranted," on the back of the blade, as illustrated in above cut. They hope the trade in general will not consider them inconsiderate or arbitrary if they insist that their patents must not be infringed by selling Safety Razor Blades of other makers in connection with the Star Safety Razor Frame.

WOOD-CARVING BY MACHINERY.

Carving by machinery is no longer an experiment. It is a successful accomplishment. And with its general recognition as a money-saving institution a new factor in furniture building has been ushered in. Beautifully ornamented pieces of furniture, which twenty years ago were luxuries, the enjoyment of which was only within reach of the richest, now adorns the homes of even the working men. It is not intended here to convey the impression that the carving machine has alone worked such changes. On the contrary, it has been one of the latest of a number of elements that have each exerted a strong influence upon conditions in furniture-making. The universal employment of labor-saving machinery, the systematising of the work in all its branches, the development of skilled mechanics, and the lessons managers of factories have learned by experience, have each been a strong factor in bringing the cost of furniture to a minimum. The era of guesswork is past, and to-day the manager of a factory can generally tell to within a few pence of how much a piece of furniture is going to cost to manufacture, simply by looking at the design. Or, if he will ask the designer for a certain piece of furniture to cost a stated amount, that individual can invariably come within a very short margin of this figure. Allowing, then, a reasonable percentage of profit in the selling price of the goods, there is no reason why a company should ever lose money, provided, however, goods sell at all.

The first serious obstacle to the success of wood-carving machines was the lack of skilled operators. The machines used to-day came to us practically perfected, but the operator was not found in any such stage of development. In fact, he had to be made, or, it might be said, he had to be discovered and then developed, a process which required years to reach good results. There was no one to teach the operator. The inventors of machines were themselves deficient in the use of their product. They saw the possibility that lay in their invention, but had not had sufficient time to become skilled in its use. To the man to-day who undertakes to learn the trade under the instruction of a skilled operator, it is an easy matter when compared with the task that lay before the unfortunate who took up the work when it was in its infancy.

A second difficulty has been the deep-rooted prejudice against this type of machine on the part of the hand-carvers. In selecting a wood-carving machine it must be borne in mind that there are several excellent makes of machines, each having some claim to superiority, but none of them having all claim to this quality. One machine may be adapted to a certain class of work and give excellent satisfaction, while on another class of work it may be a failure. The result may be just the opposite if placed on another make of machine. It is therefore important that the purchaser of a machine should select the one best suited to his work. A careful study of the work of other manufacturers will soon show him what class of work he wishes to adopt for his style of goods, and he can rest assured that the man who has used carving machines extensively has soon learned to select the one best adapted to his line of goods.

The machine has been a money-saver in the last few years, and the factory which, six years ago, had one in operation now employs a half dozen or more. There is a widespread feeling in favor of the use of wood-working machinery, and all firms of importance now freely recognize the advantage of keeping their plant fully up to date in order to minimize the cost of production.

HARDWARE TRADE NOTES. BUFFALO AND VICINITY.

BATAVIA, N.Y.—The firm of Worthington & Bradish Hardware dealers, has been dissolved. The business will be continued by John Holley Bradish, who has purchased the interest of his former partner.

MEDINA, N. Y.—Joseph N. Brace has purchased an interest in the Hardware and implement store of W. W. Martin, and the firm name will hereafter be known as Martin & Brace.

NORWALK, OHIO.—The Norwalk Hardware Company has been organized, with Henry C. Breckenridge as manager and have purchased the Hardware business of F. A. Powers & Co.

BROCKPORT, N. Y.—The Charles Decker Co., dealers in Hardware and stoves, have incorporated with an authorized capital of $18,000.

W. H. Harris, Lockport, N. Y., has perfected and patented an improved furnace for house heating and will at once erect and equip a factory 150x100 feet in size for their manufacture, giving employment to about 100 men.

The Buffalo Garage Company has been incorporated at Buffalo, N. Y., with a capitalization of $30,000, and will manufacture, sell, rent and store automobiles and other motor vehicles. The directors are Geo. H. Smith, Benj. F. Milsom and Byron D. Shultz.

The Auto-Car Equipment Company has been incorporated at Buffalo, N. Y., capitalized at $50,000, to manufacture and sell motors and other equipment for automobiles and launches. Directors: John B. Corcoran, George W. Atterbury and Elmer Olmsted, all of Buffalo.

The Vaux Company has been incorporated at Buffalo, N. Y., to deal in heating and ventilating apparatus. The directors are: Fred. G. Vaux, Albert J. D. Leplante, William H. Beam and Jackson A. McBurney.

CONNECTICUT STATE ASSOCIATION OF RETAIL HARDWARE DEALERS.

Charles L. Way, Hartford, secretary of the Connecticut State Association of Retail Hardware Dealers, has issued the following circular, which he has mailed to every Hardware dealer in the State. As will be noticed, the annual meeting is announced for Wednesday, March 2, at New Haven, with headquarters at Heublein's:

The first annual meeting of the Connecticut State Association of Retail Hardware Dealers will be held on Wednesday, March 2, at New Haven.

The headquarters will be at Heublein's, on Church Street, opposite the New Haven Green, and the morning session will be called to order at 10.30.

At 1 o'clock a lunch will be served, at 75 cents per plate, and the afternoon session will be held immediately afterward.

It is hoped that there will be a large attendance at this, our first annual gathering, and the members are urged to exert themselves to enroll new members and bring them along. These gatherings are important to the interests of the retail Hardware trade, and are of as much importance to attend as the receiving of a large order for goods at a good profit. The Hardware merchants should know each other personally, and how better can they do this than by these annual gatherings? Come one! Come all! and bring all your enthusiasm with you.

Mr. Corey or Mr. Bogardus, of the National Association, will be with us and give us the benefit of their large experience. Do not fail to be present to hear what they have to say.

In order that the committee having the arrangements in charge may know what to expect, it is essential that the members notify the secretary, on the inclosed postal card, how many of each firm will be present. Please have these in the hands of the secretary by February 26.

In order that the members may be prepared with matter for discussion, it would be a good plan for each one to look into the matter of the Parcels Post bill, the matter of Hardware Dealers' Mutual Fire Insurance, and also any complaints or suggestions which would properly come before our association.

Let us have a large and enthusiastic meeting.

SPANISH CATALOGUES IN BRAZIL.

United States Consul Walter Schumann, of Mainz, Germany, under a recent date, sends the following translation of a letter from a gentleman residing at Sao Paulo, Brazil, to a German trade journal, which will be of interest also to American exporters to that country:

A Brazilian who is thoroughly acquainted with his own language—the Portuguese—will be able to understand a catalogue in the Spanish language without much trouble, both languages being closely related. Nevertheless, Spanish catalogues are not looked upon more favorably in Brazil than catalogues in the English, French, or German languages. If, however, a Spanish catalogue comes from Spain or other country in which Spanish is the language of the country, it is, of course, as welcome to the Brazilian merchant as a French catalogue from France, an English catalogue from England or the United States, or a German catalogue from Germany, for the knowledge of these languages is by no means a rarity among Brazilian merchants. Should an American, an English, or a German merchant send to Brazil catalogues intended expressly for that country but printed in the Spanish language, he can almost be certain that such catalogues are thrown into the waste-paper basket without even being looked at, and that with the compassionate mien of the Brazilian who pities the foreigner who thus seeks to do business with Brazil and does not even know that the language of Brazil is Portuguese; or else the Brazilian merchant may even feel insulted at being addressed in any language other than his own. It is therefore advisable that foreigners wishing to do business with Brazil make use of their own language, if they are not acquainted with the Portuguese language, rather than avail themselves of the Spanish language.

Time works wonders. So would men if they put in twenty-four hours a day as Time does.

A NEW DAY BOOK DEVICE.

The Century Cash Register Co. make the following announcement, which is self-explanatory:

Our new day book device, just invented and added to our latest improved model, 1904 Century, positively prevents clerks and employers from neglecting and forgetting to charge the goods sold on time. Every merchant knows that hundreds of dollars' worth of goods get out and are lost every year in this way. Our system effectually prevents this loss

CENTURY CASH REGISTER.

and the machine will pay for itself several times over in the first year. If it is worth something to you to know that every dollar's worth of goods going out of your store on credit is properly entered in your day book, then accept our special offer, try our system for one week, then if you can honestly say to yourself you would do without it for many times the cost, send it back at our expense. You will be under no obligations to buy and will not be bothered by an agent. The Century will tell its own story. Others say it is better than machines sold from $200 o $300. We know there is not a poor piece of material in it.

TRAP SHOOTING RULES.

The Union Metallic Cartridge Company, 313-317 Broadway, New York, have recently issued, intended for gratuitous distribution, a small compact booklet of 76 pages, entitled "Trap Shooting Rules and Records." The first 39 pages has reference to trap shooting rules, both as to targets and live birds, followed with chapters by leading experts on Division of Moneys, How to Organize a Gun Club, How to Manage a Tournament, Recommended Loads, A Dozen Don'ts, Equivalents of Powders, Some 1903 U. M. C. Victories and U. M. C. Expert Loads. At the end are blanks for scores and also pages ruled for addresses.

AMERICANS AND ENGLISH IN SOUTHERN BRAZIL.

Export, a German publication, organ of the Central Commercial and Geographical Union, in a recent issue says:

The Americans and the English are both endeavoring to exploit Brazil and all of South America commercially and industrially. The United States is seeking fields for her products, and already there is a demand for her agricultural machinery and other manufactures. A direct steamship service has been inaugurated between the United States and the Rio Grande do Sul, with monthly sailings. American promoters have already secured by purchase a concession for building a road in Santa Catharina, while the concession for the Torres-Porto Alegre line is still under discussion by the Government. The Americans carry on their negotiations through agents in order to secure as many favors as possible before they disclose their plans. The English, also, are investing capitel in Brazil; an example of this is the Brazilian Cold Storage and Development Company, which does a business in exporting meat.

ARMSTRONG'S HINGED VISES.

The Armstrong Manufacturing Company, Bridgeport, Conn., (New York office, 139 Center Street), are the manufacturers of the Armstrong's Hinged Vises, made of the best malleable iron and having steel jaws. They will take a pipe from one-eighth to four and a half inches. A complete catalogue recently issued tells all the particulars of them and of numerous other water, gas and steam fitters' tools.

RECENT TRADE PUBLICATIONS.

THE STOWELL MANUFACTURING & FOUNDRY CO., South Milwaukee, Wis., have just issued their No. 3 catalogue which is one of very artistic appearance, descriptive and illustrative of their haying tools. They also manufacture Hardware, door hangers and rail, hot air registers, malleables, wire workers' goods, etc. The book contains exhaustive information regarding haying tools giving graphic illustrations and also gives directions for making wood track for carriers. The manufacturers state they made a test of one of their steel track hay carriers by attaching a short piece of rail to two hanger hooks about two and a half feet apart. The hanger hooks were fastened to rafter brackets giving the same construction as used in a barn with the exception that they did not attach the stop or trip, which with its two special hanger hooks will add fifty per cent. to its strength at the point which receives the most strain. The carrier and rail were subjected to a strain of 3,000 pounds and while the rail sprung slightly at 2,600 pounds, it sprung back after the test and both carrier and rail were in as perfect condition as before the test. The catalogue will be found valuable to those interested in this class of goods.

COATES CLIPPER MANUFACTURING CO., Worcester, Mass., have recently sent out to the trade their catalogue embracing their line of Clippers which they have been manufacturing for over a quarter of a century, making them an exclusive specialty. Their departments for grinding, hardening and polishing are in charge of competent men who have made these specialties their life work. The many novel features embodied in their design for ease and convenience of manipulation and great strength throughout. the fine cutting qualities and beautiful finish, the manufacturers claim, make them the acme of perfection. The above-mentioned catalogue contains a considerable amount of new matter not found in their former edition, in the shape of new goods and of additions to the descriptive matter. The catalogue can be had for the asking.

NORTH BROTHERS MFG. CO., Philadelphia, Pa., are sending to the trade an envelope size catalogue of 32 pages having reference to their ice-cream freezers. The booklet is well printed on excellent paper, and has a very artistic cover. The line of freezers contained therein, the company claim, comprises the largest variety made in any factory, and meets every demand from high quality to low price. The practical features which distinguish their freezers are the automatic twin scrapers which insure automatic, positive and continuous scraping of frozen cream from side of can; cedar pails with electric welded wire hoops which are guaranteed not to fall off or break; and drawn steel-bottom cans which will not leak, break or fall out of body of can, nor liable to injury. For the convenience of their trade North Brothers are prepared to furnish machine freezers, ice-breakers, packing tubs and cans for ice-cream makers, and ice chippers and shavers for home use, and the same are all illustrated in their catalogue. To dealers handling their freezers the company will be glad to furnish circulars if they will advise them which of their freezers they sell, also electrotypes for advertising, free of charge. Send for their catalogue.

C. J. KIMBALL CO., Bennington, N. H., have recently placed in the hands of their patrons their 1904 catalogue of cutlery, and this catalogue cancels all previous lists. Included in the contents are butcher, shoe, kitchen and drawing knives, screw drivers, etc. The book contains 22 pages and is very neatly illustrated and arranged. C. J. Kimball manufacture the Wilbur Webster brand of shoe knives, the same as formerly made by Wilbur Webster, of East Jaffrey, N. H. In the manufacture of these goods they use the same grade of steel, and the same process of manufacture as was used by Mr. Webster. They guarantee the quality.

THE CRONK & CARRIER MFG. CO., and THE CARRIER CUTLERY CO., Elmira, N. Y., are the authors of a very neatly arranged catalogue of attractive appearance. It is their 1904 catalogue and includes in its contents their line of hangers, garden and lawn rakes, pliers, clamps, shears, grind stone fixtures, Little Giant tack pullers, nail cutters, pocket knives, razors, scissors, etc., etc., each article finely illustrated and accompanied by list prices. One page of the book is devoted to a complete table of weights valuable to a prospective buyer as the weight of each size of the numerous articles specified is given. In their knives and razors they use Wardlow's very best quality English steel, and they claim they are equal to the best goods on the market, either English or American, as they are ground and tempered by expert mechanics.

EMIL GROSSMAN, 298 Broadway, New York City, have issued an extremely attractive catalogue for the season of 1904 covering their automobile accessories, illustrating and describing goods either manufactured, imported or controlled by them. The specialties catalogued they carry in stock in large quantities and varieties, and fully guarantee all of them, and the company state they will cheerfully exchange them if they should prove defective. Embodied in the above-mentioned catalogue are Continental lamps, generators and lamp sundries; horns for bicycles, motorcycles and automobiles; masks of all descriptions; spark plugs; tire valves; Shaw and B.B. adjustable jacks; Continental tires and Continental sundries.

THE R. BLISS MANUFACTURING CO., Pawtucket, R. I., established in 1832, are now issuing their catalogue No. 26 of 28 pages relative to wood Hardware and specialties; wood turnings of every description; mill supplies, and carpenters', machinists' and jewellers' tool chests. It is profusely illustrated, giving sizes and lists on each article. Their line of youths' and gentlemen's tool chests, they state, is practically new. The tools for each chest have been selected with great care as to kind and quality; some of the small and less important tools in the old lines, of which this line is a revision, have been discarded for larger and better ones. The boxes are made of selected chestnut, heavy and strong, with dovetailed corners, heavy black walnut mouldings, polished and finished with best grade of varnish, with bronze handles, and fitted with good locks and keys. For copy of catalogue address the above-mentioned firm.

JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., have recently mailed to the trade a very attractive private mailing card exploiting their silica-graphite paint which is mixed ready for use. They claim for it that it was the first graphite paint made, and that it has excellent spreading capacity and durability, and also that it is the best preservative for steel and iron consruction.

C. W. DUNLAP MANUFACTURING CO., 108 Chambers Street, New York City, are sending out their 1904 catalogue No. 2 exploiting their kitchen Hardware, garden and mechanics' tools, containing 64 pages. All articles bearing their name stamp are guaranteed goods. They are made of the best material, and great care is exercised in the hardening, tempering and finishing. Should a defective article pass their inspection and the defect be developed by the user, the company state they will cheerfully replace the article if returned to them, without cost to the customer. Included in the contents are mincing knives, kitchen knives, cleavers, tack hammers, awls, ice chisels, slaw cutters, screw drivers, nail sets, gimlets, garden tools, etc., etc. A complete index is given so that reference to any desired article is made easy.

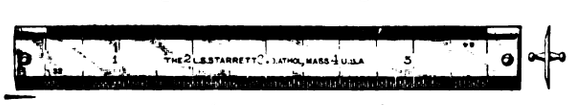
NEW GOODS AND SPECIALTIES.

THE ALAVA LOOP "GAS SAVER" MANTLES.

F. A. Smith Mfg. Co., Rochester, N. Y., are placing upon the market through the Hardware and house furnishing goods trade, the Alava Loop "Gas Saver" Mantle, of which we present an illustration. This improved mantle is claimed to possess points of excellence that are new to this line of supplies. The loop as shown in the cut herewith is not of asbestos cord as generally used by mantle makers, but is made of "Alava," claimed as the same material from which



THE ALAVA LOOP MANTLE.

the ordinary gas tip is constructed. The manufacturers state that it is absolutely fire-proof and is sold under a guarantee never to break or burn off at the loop. The thread solution and process of making this mantle are described on page 2 of the catalogue published by the manufacturers, the only difference claimed being the Alava Loop Mantle is single weave. It is made in two grades, and our readers handling corresponding or similar goods should write and obtain the "trial order offer" made only to dealers, by which 100 "Alava" Loop mantles, express paid, will be delivered to a dealer on 30 days' trial.

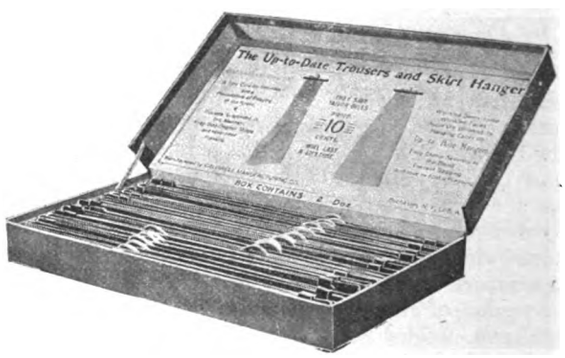
STARRETT'S DRAUGHTSMEN'S SCALES.

This scale has tilting studs, so placed that each of its four corners, with different graduations, will come in contact with the paper by its own gravity when resting on said studs, with the back edge raised at an angle of about 30°. The

STARRETT'S DRAUGHTSMEN'S SCALES.

scales are graduated on each of their four corners in parts of inches as follows:

No. 405 10th, 40ths, 50ths, 100ths.
No. 405 10ths, 40ths, 50ths, 100ths.



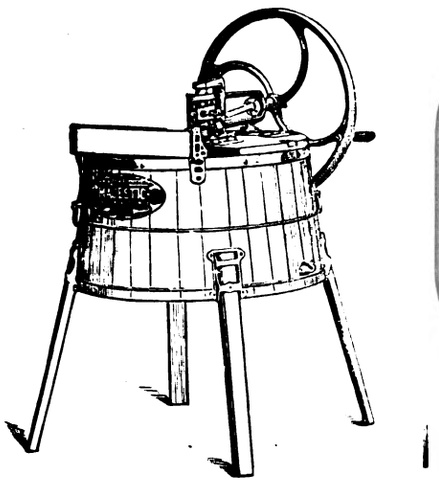
THE UP-TO-DATE TROUSERS AND SKIRT HANGER.

The Caldwell Manufacturing Co., Rochester, N. Y., are the manufacturers of the "Up-to-date" trousers and skirt hangers which are advertised elsewhere in our columns, and which have been on the market long enough to have achieved a popular success for an article of such undoubted utility. They have become a positive necessity in dwellings of modern con-

MODE OF APPLICATION.

struction, more than doubling the facilities of the closet room usually obtainable. Placed on the inside of the closet doors they occupy space not otherwise disposed of, leaving the rest of the closet for other garments not so readily provided for as those for which these convenient accessories are contemplated. When the door is opened they are right at the hand that wants them. We also illustrate the attractive display

THE UP-TO-DATE DISPLAY BOX.

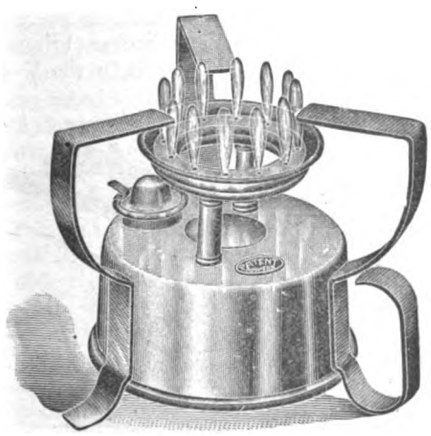


box furnished by the manufacturers which properly displayed in the store, makes the sale of this convenient article an easy matter. Our readers would find these a desirable addition to their stock of "all the year round" novelties. Catalogues and circulars regarding these and other specialties will be forwarded upon request.

THE "MAJESTIC" BALL BEARING WASHING MACHINE.

The Richmond Cedar Works, Richmond, Va., are the manufacturers of the Majestic Rotary Washing Machine, Ball Bearing, of which we give an illustration herewith, and which, it is stated, has achieved successful sales wherever it has been introduced. It is made from selected Virginia White Cedar, well seasoned. The tub is made extra large, the inside and bottom being fully corrugated. It is finished with a top galvanized flat hoop, and the middle and bottom hoops are electric welded wire hoops, that are sunk in grooves making it impossible for the tub to shrink or leak, as it is claimed the hoops cannot loosen or drop off. It is also claim-

Digitized by Google

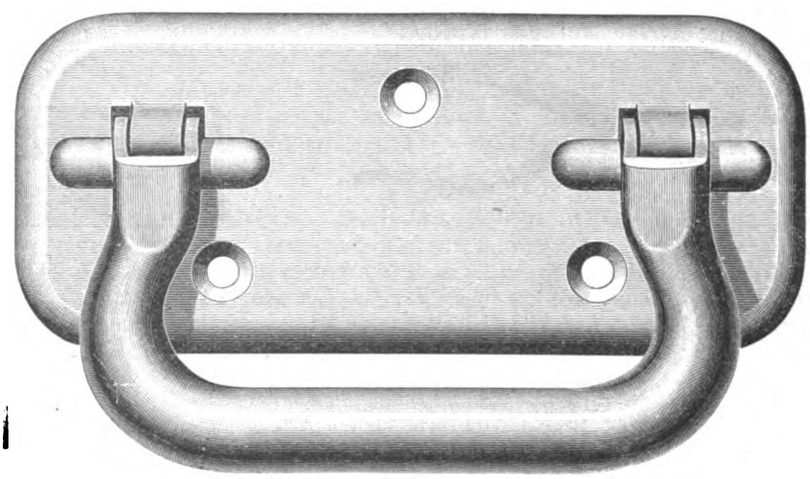


ed that as there is nothing on the inside to catch the clothes, the most delicate fabrics may be washed without injury. All castings are coated with aluminum, giving the machine a very handsome appearance. The ball bearings and the well balanced fly wheel provide additional points attesting selling merits which will be appreciated by the dealer. The Richmond Cedar Works are the manufacturers of a number of salable specialties in wood in addition to Washing Machines. It behooves the up-to-date dealer to ask for a catalogue which will be sent upon request.

MAJESTIC BALL BEARING WASHING MACHINE.

GLOGAU'S ALCHOHOL GAS STOVE.

Glogau & Co., 21 Quincy Street, Chicago, Ill., are the makers of the Glogau Alchohol-Gas Stove which has built up for itself a popular demand that attests its utility. It is manufactured from spun brass and is nickel plated making a very attractive specialty for ready sales for use in the sick room,

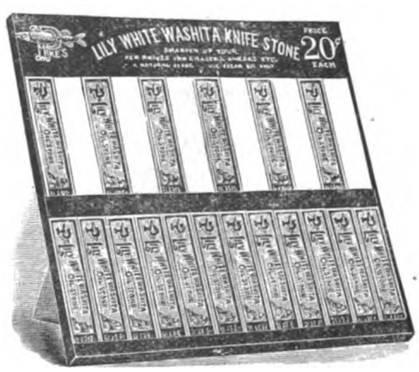


GLOGAU'S ALCHOHOL GAS STOVE.

nursery, chafing dish purposes, incubators and various other employments that will suggest themselves. Among its many advantages may be mentioned that it manufactures its own gas by vaporizing the alcohol used; it is portable, weighing about eight ounces; its wick is invisible and it is claimed never requires renewal; it will burn as steadily as a gas stove and is odorless; it is strongly made and will hold a vessel weighing 100 pounds, if essential. Circulars forwarded upon request.

WROUGHT STEEL CHEST HANDLES.

Sargent & Co., New Haven and New York, among the new goods shown in the recent supplementary pages to their catalogue, show a full line of the new and improved wrought steel chest handle of which we give an illustration herewith to show the style. It is manufactured from a heavy gauge of sheet steel, the entire handle being stamped with the drop perfectly rounded, forming a handsome addition to this line of goods. It is made in three lengths of handle, 3½, 4 and 4¾ inches long, and is made in the following finishes: japanned,



SARGENT'S WROUGHT STEEL CHEST HANDLE.

antique copper, bronze plated, dead black sand finish, and antique copper sand finish. They are marketed half dozen pairs in a box, and with the exception of the japanned, are packed with screws to match.

PIKE'S LILY WHITE POCKET STONE.

The accompanying cut illustrates a new line recently put upon the market by the Pike Manufacturing Co., Pike, N. H., consisting of two dozen pocket knife stones, made from their celebrated Lily White Washita grit, and put up in attractive display boxes for counter display. The stone is 3½ inches long, ¾-inch wide, and 5-16-inch thick, a convenient size and shape for carrying in the pocket, and of suitable size for

PIKE'S LILY WHITE POCKET STONE.

sharpening pen knives, ink erasers, scissors and all small tools. It is neatly labeled with a *facsimile* of the label which appears on the regular Lily White Washita oil stone, already familiar to Hardware dealers and mechanics in all parts of the world. The display box is strong, neatly printed and arranged with an easel by means of which it can be stood upon a counter or in a show window.

IRVINGTON FORGED STEEL TOOLS.

The Irvington Manufacturing Co., Irvington, N. J., for whom J. H. Graham & Co., 113 Chambers Street, New York,

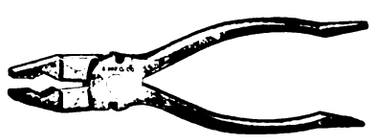


FIG. 1.

are the sole selling agents, are placing upon the market through the Hardware and supply trade a desirable line of warranted Forged Steel Tools embracing a number of special

Digitized by Google

designs not usually found in the ordinary tool catalogue. We present a few cuts herewith that will partially convey the importance of their line. Fig. 1 shows their Gas Pipe Side Cutting and Button Plier No. 64, which is made in one length, 7 inches long, and in three styles of finish, Black, Full

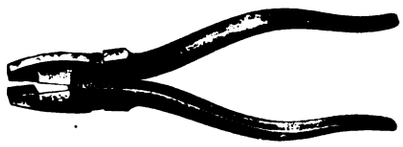

FIG. 2.

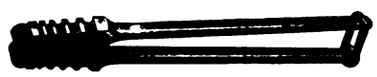
Polished and Nickel Plated. Fig. 2 is a representation of their Round Joint Side Cutting Plier No. 4, made in four sizes, 5, 6, 7 and 8 inches, and in the three finishes specified



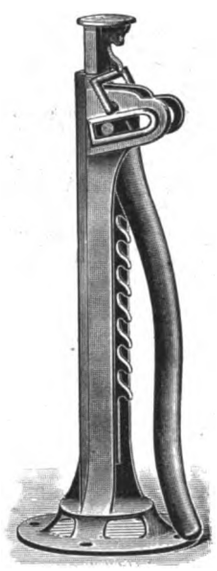


FIG. 3.

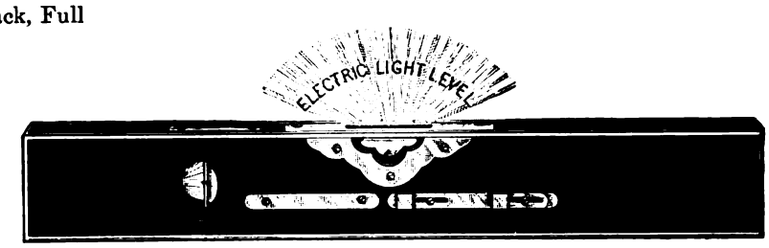
above. Fig. 3 represents their Combination Wire and Sleeve Clamp for lineman's use, No. 9, weighing 17 ozs. each; with polished head, black handle, and furnished with five holes for wire of 6, 8, 10, 12 and 14 gauge, and with 8, 10, 12 and 14 sleeve. The company claim that their Splicing Clamps and Combination Wire and Sleeve Clamps, of which they make a large assortment, are of the highest grade; being made of the best tool steel, properly tempered and with large clearance for insulated wire. They have an excellent catalogue which should be sent for by our readers.

COLT'S WAGON AND AUTOMOBILE JACK.

The Batavia Clamp Co., Batavia, N. Y., are placing upon the market Colt's Wagon and Automobile Jack, of which we present an illustration. This jack is strongly made of malleable iron, the hollow body is 1⅜ inches square with a six-



COLT'S WAGON JACK.

inch base and with a toothed bar 1¼x1 inch, and a lever on a movable fulcrum as will be noticed in the cut; as the bar is raised by lever it is caught by a bail ratchet. The jack, weighing but six pounds, is 15 inches in height when closed, and will extend to 27 inches; its claimed capacity is the raising of 1500 pounds. Further particulars furnished in catalogue sent upon application.

STRATTON BROTHERS' ELECTRIC LEVEL NO. 101.

R. O. Stetson, Greenfield, Mass., who has succeeded by purchase to the entire level business formerly controlled by Stratton Bros., is well qualified to manufacture the high grade production with which his predecessors have been identified, having been nine years in their employ. Among the levels that have revolutionized old ideas regarding this serviceable line of goods is the Electric Level No. 101, which we illustrate herewith. These levels are made in the same manner as the

STRATTON ELECTRIC LEVEL.

No. 1 B., so well known to the trade, with the addition of an electric lamp under the level vial and another over the plumb, so that when using a level in a dark corner the user doesn't have to light a match to obtain his information, he just "presses the button" and the light is produced just where it is wanted. The battery is in the base of the level; no parts project beyond the frame. It is made in three lengths, 26, 28 and 30 inches. Send for catalogue showing complete line.

THE EUREKA POTATO PLANTER.

The Eureka Mower Company, Utica, N. Y., are the manufacturers of the Eureka Potato Planter, an illustration of which accompanies this. The following description will give an idea of its great utility. The machine is mounted on two wheels of large diameter as will be seen by the cut, which occupy a position at each side and carry the planter steady. The potato hopper has a traveling bottom, and a self-acting governor operating in connection therewith, allowing only the required amount of potatoes to be carried from it into the picker box. There are two sets of picker arms, one on each side of the box mounted upon the same shaft, being so arranged that they enter the picker box alternately; first one enters and engages a tuber and forces the seed over to the other side of the box in the track of the other picker, then vice versa. This method agitates the potatoes and does not allow them to bridge over. Each picker brings over and outside the box the seed and drops it in the V of the shoe

THE EUREKA POTATO PLANTER.

which has opened the furrow. The depth of covering is regulated by a handy lever. The discs revolving each side of the furrow in the rear of the machine cover the fertilizer and potatoes. The machine is thrown in and out of gear by a little hand check upon the left hand handle. The handle check on the other side is for controlling the governor which operates the traveling bottom. A wire is attached to the handle check and a ⅜ inch round rod. This rod runs through the picker box (has a flat piece of steel fastened to it in the picker box) is bent downward; the wire should be attached down about half way. All the mechanism is operated by two large drive wheels through sprocket chain attachment. Its mechanism is extremely simple. All changes are quickly and easily made.

OUR BRITISH LETTER.

(*By our Special Correspondent*).

LONDON, February 15, 1904.

THE FIRST I. F. A. EXAMINATIONS.

In my last letter I referred to the first examinations held under the auspices of the Ironmongers' Federated Association. The examinations, which took place in Manchester on January 21st, was an event of considerable interest. It was a novel feature in the annals of British Hardwaremen, and although but 21 candidates presented themselves before the three examiners, they were the advance guard of the future army of certificated ironmongers of future days. The candidates were welcomed by R. H. Smith, the popular secretary of the I. F. A. The examination scheme was propounded and the rewards open to competition held up before the ambitious gaze of those pioneers of the technical education contest. All successful candidates are to receive a certificate of merit and the winner of the most marks in the compulsory subjects is to receive a gold watch and chain of the value of twenty guineas, presented by the proprietor of the *Ironmongers' Chronicle*. Three hours of stiff work brought the examination of compulsory subjects to a close. A *viva voce* examination held in the afternoon included questions and practical tests in reference to actual goods displayed. The candidate's knowledge of the Hardware they are in the habit of handling was thoroughly sifted; their aptitude in serving shown and satisfactory assurance in general trade information obtained. The compulsory questions dealt with sixteen different sections of familiar features in Hardware retailing. Handwriting was regarded as necessary questions relating to calculations and mathematical problems met with in everyday commercial life were asked. Metal gauges, arears, measurements and usual sizes and weights of regular goods were inquired into. Candidates were asked to describe the technical construction of locks, latches, hinges and lamps. Tools were criticised and a familiarity with the uses of cabinet and wood worker's tools and machines was deemed necessary. Household and kitchen ironmongery was reviewed and candidates were asked to give descriptions and make up orders in all these departments. The optional questions were far-reaching and satisfactory answers meant additional honors and endorsements upon the certificates gained. In short, the entire examinations exhibited the skill of the organizers as well as the careful questions prepared by W. Cowell, Clifford Raworth and R. M. Iddon, the examiners. American Hardwaremen, although more advanced in association schemes and enterprises whereby the quality of their employees can be enhanced, cannot fail to be interested in this, the first real effort of British Hardwaremen to uplift the assistants and apprentices whose status has hitherto been too low and among whom there has been no dividing line. In the years to come we look forward to certificated assistants and those who have not attained that position.

EARLY SPRING TRADE.

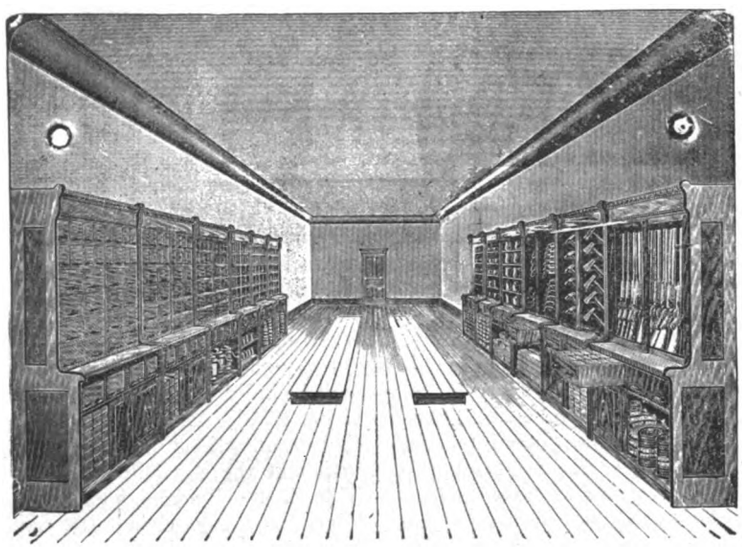
Already British ironmongers are looking forward to early Spring trade and here and there progressive tradesmen's establishments are assuming an altered appearance. It is the "early bird that catches the worm," and so those Hardwaremen who are first in the field secure the first pickings of the business in early Spring goods. In agricultural districts wire netting, fencing, plows, cultivators and tools are given prominence. There are few localities where horticultural tools, garden spades and light goods needed in gardening operations are not required. Lawn mowers are now being bought and stocks made up. American lawn mowers have long been popular in this country and still sell side by side with those of British make.

LARGE SHIPMENTS OF AMERICAN MACHINERY TO SOUTH AFRICA.

The tales of large shipments of implements and machinery from the United States of America to South African ports are recognized as realities which British manufacturers must reckon with. The quick intuitive business acumen of Americans caused them to grasp the importance of being first in the field and there is no doubt that such prompt measures account for the results obtained. Despite the constant cry of "stagnation of trade" orders are being booked for large consignments of implements and machinery as well as building material. South Africa must develop, and although Great Britain naturally expects a large share of the new trade, the progressive Yankee cannot be kept out. Although the progress of settlement and the spread of town life must be comparatively slow the need of agriculturists is immediate. As soon as land is occupied cultivating implements and machinery are required. English makers are sending many shipments to the Cape for distribution. but the results of recent visits to several large London shipping firms reveals the fact that a very large portion of the indents include specified implements and machinery of American make.

BETTER CRAFTSMEN WANTED.

I have referred in previous letters to the present tendency to encourage craftsmen in the study of their arts and to induce British workmen to take greater interest in their work. The movement has been taken up with spirit in several directions. The Courby Tin Plate Workers Company recently awarded diplomas to five apprentices for their faithful services and the satisfactory manner in which their apprenticeship had been conducted. The Guild required practical evidence of good workmanship. One of the successful aspirants for the diploma produced a milk saucepan, the rounding of the outer vessel being beautifully executed. A bottle jack screen was much admired, and a chafing dish with circular copper box made to contain an iron heater, received the keen appreciation of the inspectors. The Plumbers Company regularly give great attention to competency and take care that all the applicants for certificates shall be fully competent to handle plumbers' tools. The Furniture Trades Exhibitions, Ltd., announce their intention to hold examinations in workmanship at the forthcoming exhibition at the Agricultural Hall, Islington, next month. Although the Ironmongers' Federated Association has not yet instituted any scheme of certifying the competency of workmen in connection with their examinations in practical and technical Hardware proficiency, doubtless it is a feature bound to come in the near future. Until quite recently ironmongers were content to employ workmen who possessed but little technical knowledge. Many of these were clever workers and understood results better than cause and effect. They worked by "rule of thumb" and knew nothing of the application of science to their efforts; they were like operatives of a century ago before the introduction of machinery. Manual labor with the aid of primitive tools performed wonders, but it could not keep pace with the introduction of tools of modern types. American tools—light and handy—labor-saving and automatic machinery and the knowledge gained in modern technical schools have marked the speed of onward progress and forced associations, societies and ironmongers who employ labor and even the general public to draw the line between ignorant and intelligent workmanship and have forced to the front the reward of good craftmanship.



SUNDAY TRADING.

The question of Sunday trading has been under the consideration of traders and shop keepers in Manchester lately. A Sunday census revealed the fact that no less than 7,000 shops were open in that city alone on Sundays. The same thing applies to other great cities in this country and Lord Webury and others are determined to put a stop to it. The Acts of Parliament applying to this question are mostly very ancient and an effort is being made to draft a new bill by which older regulations can be made applicable to modern conditions. Few ironmongers indulge in this questionable means of getting a livelihood, but some small traders who are quite ready to divert business to themselves and when shops are opened, ostensibly for other purposes, are available for the purchase of many Hardware sundries which ought to have been bought in the usual way from ironmongers, who are thus robbed of their lawful spoil through their practice of the letter and spirit of the laws of Christian England.

WARREN'S "CHICAGO PATTERN" STORE SHELVING.

Among the new applications of the Warren patent Hardware Shelving, the newest and destined to be the most generally used is the "Chicago Pattern," of which we present an illustration showing how desirable and fit is this latest development of shelf art. The illustration of the Warren "Chicago Pattern" shelving consists of sections for either 25 feet on *each* side of the store, or 50 feet on one side. It comprises their latest designs in shelving, combining base and cabinet, made in units so as to allow of perfect arrangement and adjustment according to wall space or the demands of stock. The sections correspond in size, being 85½ inches high, 51 inches wide, and 15⅜ inches deep in the upper portion and 20 inches at the base, thus permitting the shelving to be arranged or added to at any time with the assurance that the additional cabinets will fit perfectly. The outfit is complete in every respect and contains all the different styles made in our Chicago Pattern Series, the workmanship being equal to any shelving produced by the J. D. Warren Manufacturing Company.

WARREN'S "CHICAGO PATTERN" STORE SHELVING.

This Series has been made to meet a popular demand for a practical, every-day, up-to-date style of shelving for Hardware stores, the price being less than could possibly be made by any planing mill or home carpenter for shelving of similar form. Each section has the choicest white oak exterior, with soft wood (usually poplar), interior covered with high-grade varnishes and made with the same care as our higher priced shelving. All the drawers are made with raised bottoms and of wood throughout, experience having shown that metal drawers "buckle, bulge and scrape," thus making their operation difficult, while contact with these surfaces cause injury to the sharp points of tools, such as bits, augers, chisels, etc.

If the entire equipment is not desired, illustrations of the individual cabinets will be sent on request. The cabinets are finished complete ready for service the moment they are placed in position. This outfit is made at a price within the reach of every merchant and provides a place for all classes of goods. It adds to the beauty of a store and its appearance will draw additional trade. Experience has shown that the Warren cabinets pay for themselves the first year.

THE HUGE CRAIGMONT CORUNDUM MILL.

Ontario Now Becomes Chief Source of Abrasive Supply.

G. A. Overstrom, a prominent Swedish mining engineer, says the Toronto *Globe*, is at the King Edward, having come to Toronto from Craigmont, Renfrew County, where he has been supervising the erection of the large mill that the Canada Corundum Company has erected at that place.

Mr. Overstrom states that this mill, which is virtually completed, and which is now in operation, is larger than any ore concentrating mill in British Columbia, or, indeed, in Canada. Its initial capacity will be 300 tons per day. He states that in ordinary concentrating mills a 70 per cent. concentration is sufficient, but with corundum it must be got about 98 per cent. pure, and this necessitates a mill almost twice the size of what would otherwise be necessary.

The mill has been built on the unit system, and its capacity can readily be increased to four or six hundred tons, with very small expenditure. The capacity of the crushers already installed is much over this amount. The ore is blasted out in large masses, and to save breaking this down with hammers, a giant crusher has been installed which has a daily capacity of from 800 to 1,000 tons, or more than an average trainload. From this crusher the corundum-bearing rock is automatically fed to three other crushers that reduce it to about an inch in diameter. From these crushers it travels to six sets of crushing rolls that reduce it until it is fine enough to concentrate. These rolls were especially designed by Mr. Overstrom and G. F. Bartlett, the superintendent of the Canada Corundum Company, and are the most striking feature of the mill.

Mr. Overstrom says they are the heaviest and most powerful ever built in America, and they have several new features for which patents have been applied for. Their weight exceeds that of the crushing rolls of the great Anaconda mill of Montana by several tons. These rolls, like most of the other machinery, are already in position, and some idea of their power can be gained when one is told that a stick of hardwood that was let go through them came out almost like a sheet of paper. From the rolls the ore goes to sets of revolving screens and is fed on to three rows of concentrating tables. There are twenty-eight of these, and they have a capacity of from 10 to 15 tons each. They separate the corundum from the rock by means of the difference in specific gravity. Any corundum that is not pure corundum is carried into bins, where it is allowed to drain. The concentrating process is a wet one, and thousands of gallons of water will be constantly pumped all through the mill.

After having drained, the corundum is carried by a conveyor to a separate building, known as the grader building. Here it is dried, carefully sized and put into 100 pound duck bags, ready for shipment. The daily output of the mill will be worth from $2,000 to $3,000.

A tramway runs from the mill to the company's wharf on the York River, and during navigation the boats make daily trips to Barry's Bay on the Canada Atlantic Railway.

The mill is built upon the hillside. The ore from the quarries goes in at the top and gradually works its way down by gravity until it comes out as a finished product at the lower end.

Mr. Overstrom says that the Craig Mine is not, properly speaking, a mine at all, but an open quarry, or, rather, a series of quarries. The last blast he witnessed blew down probably between 3,000 and 4,000 tons. He says it is somewhat remarkable that there should be such a large amount of ore exposed to view, but that he has seen a deposit of magnetic iron ore in the north of Finland that probably equalled it in size. The company has a deposit farther up the York River that is also very large, but the other deposits Mr. Overstrom has seen are comparatively small. There are several small deposits on the Madawaska River below the Palmer Rapids, on which the company now has a couple of gangs of men doing some development work. Some of the crystals of corundum in the deposit farther up the York River are deep blue and almost transparent enough to be called sapphires. At the Craig Mine some of the crystals are of red color, but they are quite opaque, and he thinks there is little or no chance of any being found that will be clear enough to make rubies. The corundum in the small deposits below the Palmer resembles Craig Mine corundum and no rubies are likely to be found there either.

Four years ago, what is the village of Craigmont was bush. It now has a population of about 400 people, and is lit up by electric lights. In years to come ore could be cheaply brought by an aerial tramway from the smaller deposits below the Palmer Rapids and from the York River deposits.

Mr. Overstrom thinks that Ontario will soon have as commanding a position in the production of abrasives as she has in the production of nickel.

NEBRASKA RETAIL HARDWARE DEALERS ASSOCIATION.

The second annual convention of the Nebraska Retail Hardware Dealers' Association was held at Omaha, Neb., on Tuesday and Wednesday, February 9th and 10th.

TUESDAY AFTERNOON SESSION.

The convention was called to order by President C. A. Peterson at 2 P. M., who with a few preliminary remarks introduced the Mayor, Frank E. Moores who delivered a brief address of welcome which was responded to by C. K. Lawson of Hastings in a few well chosen remarks.

President Peterson then read his annual address as follows:

ANNUAL ADDRESS OF THE PRESIDENT.

It is with extreme pleasure and satisfaction that I am permitted by good fortune to extend to all my greeting and congratulations on this third annual meeting and upon the conditions that have made it possible.

The seeming interest displayed by our members as evinced by the attendance is conclusive evidence that these annual gatherings are eagerly looked forward to with the consciousness of self betterment and business helpfulness, and where we can congregate together and enjoy the hospitality and social intercourse of brother retail Hardwaremen, and to exchange business ideas and go home feeling within

J. C. CORNELL, PRESIDENT.

us that we have been benefited, resting assured that the next year will be full of good things and increased prosperity.

The value of business friendship and business intercourse cannot be estimated. The better we know each other, the more we are acquainted with each other's business methods, the more will these be conducive to a more harmonious understanding and business friendship. I am sure that all who attended last year's meeting at Lincoln came away feeling greatly enriched by the many things of business importance there heard spoken by our successful brethren and fellow Hardwaremen and departing with a heart full of tender mercies for our immediate competitors.

The purpose of commercial organization is not solely a mercenary one or one to maintain better prices or increase the volume of business, but has its social and moral part—a part which will bring into being and stimulate our better natures—a part which reminds us that we must be friends and sociable in all our business relations though we be competitors—a part which will remove all distrust of our fellow Hardwaremen and dissipate the last vestige of unfair methods to get trade and prestige.

Some are inclined to think that war is a necessity between competitors. I refuse to believe this, but believe as it was once said, "War is hell," and that the warriors are the only losers. Though business wars seem inevitable betimes, it can be averted by a conscientious regard for the right and a feeling of brotherhood towards our fellow men.

By all reports the ensuing year is to be a prosperous one for the Hardware trade and let us all make hay while the sun shines and take care that in the end the ends will meet. Let us uphold our glorious state; let us spread her worth and let us push our association to the betterment of all concerned.

Our secretary should be commended upon his work, which has surely been a burden upon him, as his own business at home demands his attention. I surely feel greatly indebted to Mr. Hall for his work during the past year, while I have been your president, and sincerely hope that the association may always be blessed by such a secretary.

With many wishes for the welfare of this association and hoping that all may do all in their power to foster the interests of this association, I bid the association godspeed and the retail trade an unprecedentedly prosperous year.

President Peterson, at the conclusion of his address, announced the appointment of the following committees.

Entertainment Committee—Nathan Roberts, Omaha; C. F. Schram, Omaha, Nebraska; Morris Hussie, Omaha.

Press Report—Milton Rogers, Omaha; L. E. Peterson, Wayne; L. F. Holloway, Fremont, Nebraska.

Finance—Max Uhlig, Holdrege, Neb.; V. L. Fried, Oakland; L. Pettingill, Omaha.

Resolution—C. H. Rudge, Lincoln; A. E. Lind, Newman Grove; J. C. Cornell, Ord.

Question Box—Nathan Roberts, Omaha; Ed. Kenzel, Wisner.

Reading of the roll call was postponed until the Wednesday morning session. The president suggested that the meeting be opened for a short time for a short discussion, when the importance of the Commercial Traveller as a factor in trade and traffic was ably handled by H. Vieth of Lincoln; F. D Kees, of Beatrice; Charles Smith, of the Charles Smith Company, Chicago, and W. M. Glass of the Lee-Glass-Andreesen Hardware Company, Omaha. The president then appointed Albert Dagner, of Norfolk, as sergeant-at-arms, and C. J. Jacks, of Tekamah as his assistant. The convention convening in executive session, listened to the reading of the minutes of the previous convention, after which a paper on "Insurance" by H. J. Hall, of Lincoln, was read and fully discussed. The meeting adjourned at 5:30.

C. W. MORTON, EX-PRESIDENT.

TUESDAY EVENING

was devoted to participation in an excellent banquet provided to all the visiting dealers, by the members of the association and the jobbers of Omaha The occasion was made a most congenial and sociable affair in which nearly 200 participated and thoroughly enjoyed the opportunity. W. S. Wright of Wright & Wilhelmy Company, ably acted as toastmaster, and after welcoming the guests to the city, introduced as the first guest speaker, H. M. Bushnell, who responded to the toast of "Our Fair State." The next toast

THE TRAVELLING MAN

was responded to by Henry Vieth, who was followed by F. D. Kees, of Beatrice, on

ANY OLD SUBJECT

who in the course of his remarks said:

Mr. Toastmaster and Gentlemen: When I received Mr. Roberts' letter asking me to say a few words to-night and asking me to choose my own subject, I felt very much like an Irishman who was helping to dig the subway in New York City. He was returning from his work with a friend one evening and they stopped before a jeweller's window. This was brightly lighted and filled with a dazzling display of diamonds and other precious stones.

"Ain't thot foine?" said one. "How would you loike to have yer pick?"

"B'gorra, Mike," said the other, "Oi'd rather hov me shovel."

So I did not pick out any particular subject, but will give you a No. 6 scoop full of thoughts which have come to me during this meeting.

* * * * * * * * * *

This association would pay if we did nothing more than meet old friends and form new friendships.

It is a good thing for men in the same line to get together and discuss ways of conducting business, and to organize for their common good. A Hardwareman is very much like a Hardware stock. Every stock contains some old goods which take up shelf room, and are val-

Digitized by Google

uable only for the experience they represent. I wonder how many of you are without a few dozen of "Attwell burglar-proof sash locks and ventilators."

There is also a danger that a man's ideas and business methods may become shelf worn, but he will not realize it unless he finds out what the other fellow thinks and how he does business. Our yearly meeting is the great opportunity for this interchange of thought, and the dealer who stays away makes a great mistake. I am very glad that I came.

Euclid Martin responded to the toast

REMINISCENCES BY A HARDWARE MAN

as follows:

Gentlemen: The toast assigned me by your committee of

REMINISCENCES OF A HARDWARE MAN

might be termed a misnomer, and a more appropriate toast might be the "Wandering thoughts of an ex-Hardwareman." I presume that Judge Wright in having me assigned for this toast expected that I would confine my remarks to Hardware reminiscences, but I shall first give you some information with reference to our genial toastmaster that has heretofore been known by but few people, if any. Everybody in Omaha recognizes this gentleman by the cognomen "judge," and every one admits that the title fits the man and that the man becomes the title, but as to just why he is entitled to wear this handle to his name has never been made public. Most people in this community, and I presume the same is true of you gentlemen, think that Mr. Wright has always been in the Hardware business, but this is not a fact. It is true that Judge Wright has been connected with the Hardware business of Council Bluffs and Omaha for the last forty or fifty years, but previous to this he was a minister in Maine, and a judge in Montana, and it was while filling the duties of the former position that he acquired the benign countenance which he wears so gracefully, and it was while presiding over a mock court in the State of Montana, somewhere near Helena or Butte, that he gained notoriety from a judicial standpoint by always being able to tell the difference between gold and copper. But as to the reminiscences of a Hardware man.

N. ROBERTS, OF EXECUTIVE COMMITTEE.

FRANK HACKER, OF EXECUTIVE COMMITTEE.

A little over thirty-six years ago I left my father's farm in central Illinois and acquired a working interest in the Hardware store of Burt & Bell, at Minonk, Ill., a village at that time of less than 500 inhabitants. My partners were both middle-aged men, and one of them, having other interests, did not give any attention to the Hardware store. The remaining partner was a heavy, corpulent man, who was entirely willing that I should at once assume all of the responsibility connected with the business. I was permitted to sweep out the store in the morning about 6 o'clock.

PHYSICAL CULTURE EXERCISE.

Immediately after breakfast I was allowed to proceed to the polishing of stoves, which, by the way, at that time was a more difficult process than that which maintains to-day, and next to golf I consider it one of the greatest physical exercises known, and is second only to golf perhaps in the fact that it is not so clean. After the physical exercises were ended I waited on customers during the day and kept the books at night; thus a responsibility was thrown upon me that was very beneficial, although the life was rather strenuous.

* * * * * * * * * *

HIS FIRST HOUSE TO APPRECIATE.

The first of whom I bought goods was Miller Bros. & Keep of 55 State Street Chicago Ill., where they remained in business until the great fire of '71, after which they resumed at 19 Lake Street. The head of this concern was A. R. Miller, a large, fine-looking man with gray hair, appearing to me at that time to be past middle life and fulfilling my ideas of a first-class business man. This firm remained in Chicago until something like twenty-two years ago, when they closed their business there, and the next I heard of A. R. Miller he came to Omaha and arranged to go into the wholesale Hardware business, rented a building located immediately east of the Millard Hotel. Coming on a little later to make final arrangements, Mr. Miller was accompanied by his invalid wife, who, while here, was taken sick and a doctor was called (and, by the way, he must have been a poor one), who advised Mrs. Miller that she would not be able to have health in this climate. This to Mr. Miller was a command to leave Omaha, which he did at once, and soon thereafter opened a wholesale Hardware store at Minneapolis, where he was in business some years. His venture there was not altogether successful, and I next heard of him when calling upon the firm of Wells & Nellegar, Chicago, as being on the road selling some specialties, and for the past five years one familiar with Omaha would no doubt have seen a large, fine-looking old man with splendid face about 80 years of age canvassing the wholesale merchants with sample case in hand, going from one store to another, and this is A. R. Miller, thirty-six years ago one of the most successful merchants in the city of Chicago.

THE GRANDEST ROMAN OF THEM ALL.

Chicago has produced many successful Hardwaremen, some of them have passed to the beyond, others have grown rich and are living in comfort, but the grandest Roman of them all is A. R. Miller. The first travelling man that came to see me for the firm of Miller Bros. & Keep was a small, thin, dudish-looking fellow, who came into the store one morning just as I had finished my golf exercise in blacking stoves, wearing an immaculate pair of gloves and a silk hat, a rather exasperating picture for a stove polisher to look upon, but I soon discovered that Mr. Nellegar was a good Hardwareman and a good fellow, and I continued to buy goods from him for a number of years. He left the road, went into business for himself and is now the junior member of the firm of Wells & Nellegar, the second largest Hardware store in Chicago, a city that at one time boasted of many great concerns, among them Hibbard & Spencer, Wm. Blair & Company, Seeberger & Breaky, Markley & Alling Company, Miller Bros. & Keep and others.

* * * * * * * * * *

HARDWARE BUSINESS 35 YEARS AGO.

Business thirty-five or thirty-six years ago in a Hardware store was conducted about as I presume it is to-day. I distinctly remember the kinds and prices of many goods sold at that time. I remember that the carpenter would have no hammer but the Maydole, no saw but the Disston, and that the blacksmith would buy no horseshoe but the Burden, but I doubt if implement men have made as much progress as Hardwaremen in the conduct of their business.

* * * * * * * * * *

He was followed by Frank H. Dunlop, who responded to the toast, "People That I Have Smiled With," and told several humorous stories.

The next toast, "The Present and Future for the Hardwareman," was responded to by Morris Hussie, who told some anecdotes and made a neat address.

H. J. Hall created considerable merriment by going through a pantomime in responding to the toast, "The Ladies."

F. W. Judson responded to the toast, "The Metropolis of Our State."

L. G. Susemihl told some humorous stories and sung a song from "Robin Hood."

Lloyd Scruggs entertained the audience with some juggling. At 11:15 the audience, after singing "America," adjourned.

WEDNESDAY MORNING SESSION.

The meeting was called to order by the president at 10 A. M. An opportunity was given for registration and payment of dues. The meeting resolved itself into an executive session, and the first in order was the presentation and acceptance of the following report of H. J. Hall of Lincoln:

SECRETARY'S REPORT.

As secretary of the association, I believe it is incumbent upon me to embody in this report not only such matter as we have traversed

Digitized by Google

during the past year, but also to emphasize such items as have come under my observation in the execution of the duties of secretary, which seem to me most beneficial to the interests of this organization.

Other and similar trade associations are making rapid strides along their work of mutual promotion. The lumbermen have members in almost every town in the State; the implement men are also equally as well represented; they have added such features as insurance, local organization in various counties and towns and employ a secretary who devotes his entire time to the work. I feel that the Hardwaremen will be true to the reputation which they hold as progressive business men and adopt features which will advance the interests of jobber, retailer and consumer. There is only one way by which we can hope to accomplish results and that is by considering these subjects at our annual meetings and taking definite steps toward permanent development of these various lines.

I shall not review the subjects of which you are all familiar, the parcels post bill, insurance matters and other questions being discussed and disposed of at their proper time on the program, but will briefly give you a few facts concerning association work and will then take up the plan which I have outlined for future action.

URGES NEW MEMBERSHIP.

During the past year I have sent out several letters to all the dealers in the State urging them to join. A few responded, but the Hardware dealers are not flocking to the association as they should. We must prove to the Hardware dealer in every town in the State his needs of the association more than the association's need of him if we wish to get them interested. Our membership will include every dealer if the committee appointed to consider this plan presents same and receives your approval. A few of the first members have dropped out, while many new ones have been added. This we expected, and the total result shows an increase which is encouraging.

The program, which was the first of the kind we have issued, entailed a great deal of work. Net receipts will be about $100 after all expenses of program are paid. If we had decided to issue a program of this character earlier, the results would have been considerably larger. The letters received from prospective advertisers asking for space if we intended issuing the program caused us to undertake the work at a late date.

The correspondence in the office during the past year has been heavy, and the largest item of expense is for postage.

PERSONAL LETTERS EFFECTIVE.

I have requested members to write personal letters to many non-members, and this has been productive of results; it is, however, asking much from members without apparent returns for their efforts. We propose to have every effort from now on show some result.

Many of the members have sent in complaints, sometimes against the jobber, and also against the manufacturer; in all cases these matters have been given prompt attention, and in most cases adjusted in a matter entirely satisfactory to the complainant. I may find it necessary to call on some of the members who are present and ask them to give their statement of the benefits of the association in matters of this kind.

* * * * * * * * * *

I wish to thank the members for the support and co-operation they have given me during the past year as secretary and to express my gratitude for the honors conferred upon me. In turning over the office to my successor I shall be glad to see him take up the work, and with the united assistance of each officer and member, bring about results which will place the Nebraska Association at the head of our State organizations. The Nebraska Association must grow, and every dealer in the State seek to become a member, and that harmony, sociability and friendliness will exist among the united retail Hardware dealers is my earnest desire.

In conclusion I respectfully ask the members at this meeting to appoint a committee who will take up the subject as I have briefly outlined it and make a report before this convention adjourns.

The matter of employing a secretary and the detailed work can be left in the hands of a committee. In this connection I would suggest that the secretary of the insurance committee be the secretary of the association, and that the same treasurer of the insurance company can act as treasurer of this association. This committee can also confer with the committee on insurance, and their report submitted for consideration.

By this plan of organization you can see how the dealers in the State can be interested in the State association; also how the subject of insurance can be brought to their personal attention and the two, local and State, organizations can go hand in hand, which will certainly result in the hoped-for organization of the State.

It means more work for all, with corresponding results, and less work for the few.

M. L. Corey, Secretary of the National Retail Hardware Dealers' Association then delivered the following

ADDRESS

from which we give a few excerpts.

* * * * * * * * * *

I want to say a word in regard to your banquet last night. It was one of the most agreeable functions that I ever attended. Everything was arranged in the most praiseworthy manner. I wanted to say something, as I was on the program, but I was afraid if I talked last night I would not be able to say anything to you to-day. When you were calling last night, I was in sympathy, especially with those in the back part of the room. When Brother Veith was talking, I thought his story was one of the best things I ever heard; it reminded me of a little story which I am going to tell.

REFUSED TO COME BACK.

I was on a train one day over in Iowa, and we did not seem to be getting anywhere; we had been poking along all day, and a Dutchman got on the train, and he did not have any ticket. The conductor came along and says to him, the fare is 35 cents. He says, no, it is 25 cents. The conductor says, we charge you 10 cents extra when you do not get your ticket; he wouldn't pay it, so they put the fellow off; after he had been put off the train he run ahead, and started to walk up the track, and the engineer blew the whistle. The fellow turned around and says, "Whistle all you want to, I won't come back."

HARMONY AND PROGRESS ALL ALONG THE LINE.

I want to say to you gentlemen as one of the officers of the National Retail Hardware Association, that we have met harmony and progress all along the line. This year will show more new members than any in our history.

* * * * * * * * * * *

THE PARCELS POST BILL.

You ought to write to your congressman to oppose that bill because it is strictly class legislation, because it will save the catalogue houses more money in a day than it will save all the Hardware dealers in this whole country in a year. You might say it was a broad assertion, but I am told it will save the catalogue houses in Chicago half a million dollars in a single year in sending out their catalogues.

EX-VICE-PRESIDENT W. T. COLEMAN.

All the farmers on earth in this country would not receive that much benefit, so it is not in their interests, and yet the parcels post people tell us that the catalogue houses are all against this bill. It does not look reasonable: at any rate we do not believe it, and it is not the first time we caught them in a lie. We want you to write to all of your congressmen and straighten him out so that he will oppose it; they say to the senators and congressmen if you oppose this bill you will never go back to congress. This is the argument they are using in their speeches, literature and letters that are being distributed to the farmers; they are trying to get the farmer against you.

This is the great danger. The government should not come in competition with its people; it should not go and force the express companies out of existence, because it might just as well go in and force the Hardware dealers out of business; in entering in competition it will help one class at the expense of another. It is something you want to think about. There is another proposition before congress that we feel like encouraging, and that is good roads. We would like to help the farmer to get it. I feel different from some people. I cannot see why your interests and the farmers are identical. You help the town in which you live, and you are helping him. If he makes money on his products I would never say anything to them, but whenever you keep still, they would naturally say that those statements are true, you cannot tell a man all the time that you can sell a man goods lower than he can buy them. The fellow is going to believe it. That is the position the retail Hardware dealers are in to-day. They are afraid to talk with the farmer. What is the best thing to do? I think we should be more pronounced in our views. They are trying to array the farmer against the merchant all over the country, like the catalogue houses are doing it. The agricultural papers are doing it.

The chair appointed the following nominating committee for the selection of officers for the ensuing year:

L. Pettingill, Omaha; F. D. Kees, Beatrice; F. A. Dean, Holdrege; C. H. Rudge, Lincoln; C. K. Lawson, Hastings.

The president then appointed the following committee to consider the secretary's report:

Digitized by Google

E. Hoppe, Lincoln; M. A. Harglerode, Holstein; Nathan Roberts, Omaha.

At this point discussion was in order, and then followed the report of the recommendations of the nominating committee of the new officers, who were unanimously elected, the secretary being authorized to cast the ballot as follows.

President—J. C. Cornell, Ord.
First Vice-President—F. D. Kees, Beatrice.
Second Vice-President—Max Uhlig, Holdrege.
Third Vice-President—A. Degner, Norfolk.
Secretary-Treasurer—H. J. Hall, Lincoln.

Mr. J. C. Cornell, the newly elected president, responded to calls for an address as follows:

Gentlemen of the Association: I thank you very heartily for the compliments which you have paid me in electing me an officer of one of the best Hardware dealers' association in the United States, and it is certainly an honor to me, and I assure you I am proud of the same, and with the assistance of the brother officers and with the same assistance from the members, we shall try to become not only one of the best but the best retail Hardware dealers' association in the United States. Gentlemen, I thank you.

THURSDAY AFTERNOON SESSION.

J. F. Goehorn of Seward delivered a paper on

WHAT WE KNOW ABOUT LOCAL ORGANIZATION

which was presented in a manner which gave evidence of much thought having been given to the subject and was well received. Max Uhlig of Holdrege followed with an address on

OUR COMPETITORS AND OUR PROFITS

from which we extract the following:

* * * * * * * * * *

Competition is the life of commerce, the germ which works the leaven of success, a factor of complexities now as ever before.

We meet competition with a glad hand because it inspires effort, stimulates energy and keeps one from getting into a rut. Then we face circumstances just as they are and go one better, with an eye on the "jack-pot."

We scowl at competition when it antagonizes and engenders bad feeling.

It seems even dangerous when the local dealer must meet the competition of organized capital combinations and trusts.

LIKE A GAME OF CHECKERS.

We recognize our competitor as one who is selling the same line of goods. We are rivals and opponents, both striving for the same common object, which I will liken to a game of checkers. The game is no game unless one wins out, and as we play game after game, the interest broadens and develops. We find it is of no use to get angry and become passionate. One fellow can't always win unless he is a master hand.

Much of the pleasure derived from business is found in the profits, the result of employed capital, also in the effort to increase and build up trade. Both of these factors can be counted as practical results, but we have other profits which are not practical but which are great factors also—namely, influence and superior standing.

* * * * * * * * * *

COMPETITION LESSENS PROFITS.

Where there is a good deal of competition and the gross profits on sales are at the lowest, it generally requires that four times as much be sold yearly as the stock of goods kept amounts to, to make the business profitable.

Suppose the gross profits to be fifteen per cent; four times this will be sixty per cent., which if stock is $10,000, will give you a total profit of $6,000.

If the stock can be turned over this often at this profit, and the aggregate of profit is enough to cover expenses and leave a net result sufficient to satisfy the dealer, then the problem is solved.

The oftener the stock is turned over, the cheaper the dealer can sell his goods. If he can sell five or six times the amount of his stock in a year and makes relatively as much profit on his sales as when he only sold three times his stuff, his net profits will be largely increased.

COSTS MONEY TO DO BUSINESS.

The marked cost on the goods should not only be the prime cost of invoice, but should include freight as well as the per cent. it takes to do business, or else there is a loss of profit.

Should a contingency arise in competition when one opponent might sell one or more articles at less than actual cost, it would be advisable to displace them from your stock until he either finds out his mistake or goes out of business. It would be utter folly to follow his lead. Such competitors generally enjoy but a brief business career.

* * * * * * * * * *

I go after profits as Grover Cleveland goes fishing. I cast my net down in deep water and I make sure there is no leak to let the small fry slip through. I never worry over fish I don't catch; I simply recast my net with redoubled effort.

Conditions are constantly changing and competition feeds more and more on the margin of profits. Then I look up new lines of trade, introduce new lines of goods, rearrange attractive window displays and expand to meet the individual condition.

The meeting was then addressed on legislative matters by Secretary Cunningham of the Nebraska Grocers' Retail Mutual Fire Insurance Company. The Insurance Committee reported, and action was held as executive matter.

The Committee on Resolutions then reported, among a number of others, the following:

Whereas, The State of Nebraska has the reputation of being the most hospitable State in the Union, and whereas in the retail Hardware and jobbing business in the city of Omaha live the best entertainers that ever crossed the Missouri River; be it

Resolved, That we, the Retail Hardware Dealers' Association of the State of Nebraska, extend our Omaha Brethren our sincere thanks for the elaborate entertainment they have so generously shown us and extend to them our best wishes for much happiness and success.

Whereas, we realize the beneficial results of the conference held last May in Philadelphia between the officers of the National Retail Hardware Dealers' Association and the officials of the National Hardware Association, also the thorough understanding of our position as opposed to the parcels post bill, as demonstrated by our President Bogardus and Secretary Corey at the sessions of the American Hardware Manufacturers Association, and the National Hardware Association at Atlantic City last November, therefore, be it

Resolved, That we endorse the action of the officers of our National Association in both of these conferences and believing as we do these conferences tend to a better understanding between manufacturer, jobber and retailer, and closer relations commend our national officials to confer with manufacturers and jobbers as frequently as practicable.

C. H. Rudge of Lincoln read a paper on

NECESSARY FACTORS FOR SUCCESS IN RETAIL BUSINESS

speaking in part as follows:

Mr. President and Members of Nebraska Retail Hardware Association: It is with much reluctance and only after a good deal of persuasion of our secretary that I have consented to give you my limited knowledge of a few of the necessary factors to make a retail Hardware business successful.

* * * * * * * * * *

DISCRIMINATION NEEDED.

One of the first things to consider is in buying the right kind of goods and buying a class of goods that you can build up a reputation on. If you wish to be successful, you should have the reputation of having the best goods in your line in your city. And much care should be taken to secure a line that you can tie to and stay with, and not be buying promiscuously from every jobber or factory that comes along. Take, for example, your stove line. I know of some merchants in this State that carry from three to five lines of stoves. I believe this is a mistake, for I do not think any dealer can handle any more than one line of stoves and do justice to himself, leave alone doing justice to the company he buys from.

CONFESSES HE IS A ONE LINE MAN.

I have been in business in this State for nearly eighteen years and practically have handled one line of stoves, one line of refrigerators, one line of furnaces, one line of table cutlery, and with the exception of some four years, one line of Builders' Hardware. I might mention many other lines that we have sold exclusively. I believe that if you show a customer a stove made by one foundry and show your customer all the good points and merits of the stove, and say you think it is the best stove made, and then show them another stove made by another foundry.

* * * * * * * * * *

ALWAYS BE GOOD TO THE TRAVELING MAN.

And just a few words as to the way you should treat the commercial man. I believe they should have as much attention as your customer, and when you make dates with them, be punctual and keep them, always remembering their time is as valuable as yours. If you gain the confidence and good will of the traveling man, I believe you will come as near buying your goods at the right price as in any other way. Now after these goods are bought, you must find the trade to dispose of them to, and how are you going to do it?

* * * * * * * * * *

A NEAT AND WELL KEPT STORE ESSENTIAL.

Next to your windows a neat and well-kept store and stock will secure for you more business than any other thing you can do. I can call to mind many Hardware stores that I have been in that had the appearance of second-hand stores. You will see rusty shovels and steel goods standing out in front which many think are advertisements to draw trade, and in many cases hide your display window. Now, if this display was made in your show window and not on the sidewalk, how much better it would look. And nothing looks more careless than to see boxes on your shelves with ends or sides broken and in many cases without covers.

Well do I remember one of my first experiences in a Hardware store. I was shown how to repair broken boxes and was told never to put cotton wrapping twine around a box that went on the shelves, but to always use 18B twine.

With a little care and labor a stock of Hardware can be made as attractive as any other kind of merchandise. Do not be afraid to use a little paint every year or two, and wear out a few feather dusters every month. You have many points to gain by doing this. One is, ladies buy a large amount of Hardware, and they like to trade where the stock is kept neat and clean. Insurance men will give you a better rate on your fire risk, which is something we are all looking for.

* * * * * * * * * *

ALWAYS BE DIPLOMATIC.

We also find it hard to draw the line on guaranteed goods and what to do with customers when they return an article that has proven defective or that they have had an accident with. They invariably

Digitized by Google

bring it back and I know in many cases they are not justified in making any demand upon you for exchanging it. It has been somewhat of a problem for me to decide what to do. On small articles, such as tools and cutlery, we do not hesitate to replace, thinking it much better to be imposed upon than to make our customer feel hard toward us. I think many goods are returned that should not have been, from lack of business experience your customer has had, and not from any desire to gain any advantage over you. And you can't afford to make a customer feel angry toward you, no matter how small a customer, they may be, for the few cents it would cost you to replace it. While you may think you do not care for their trade, and I know of many people who come to our store whom I wish would never cross our threshold, and if it were not for their influence and talk with their friends, I should be frank and say to them we do not care for their business. But you must put up with it and treat them a little nicer than others.

* * * * * * * * * *

WATCH THE EXPENSE ACCOUNT.

Another very prominent factor is the expense account. I would like to know how many Hardware merchants here know what it costs them to do business. I know that some dealers figure very close and are able to tell you to the fraction of a cent what the cost of doing business is. And the dealer who does not know what it costs and happens to have sharp competition will sooner or later be up against a proposition that is liable to give him many sleepless nights. A question is often asked, "What items should be figured in as expense?" The first item I figure in is the one usually left out by many dealers. That is interest on the amount of capital invested. You should also add to your expense account a salary for your own time and that should be just what your time would be worth to some one else. Other items, such as advertising, rent, help, taxes, insurance, etc., I think every one figures in. And I know it often surprises the very best of us when we find it costs us from 20 to 30 per cent. on our sales to do business.

AMOUNT OF STOCK.

Another very prominent factor is how large a stock is a retail dealer justified in carrying, independent of what capital he has? I would say that location and freight rates figure somewhat on the amount, but in the eastern part of this State, when the jobber can be reached and goods received in five to six days, the maximum amount of stock should be one-third of your annual sales. A larger percentage can be made on the capital invested if you can carry one-fourth, one-fifth or one-sixth of your annual sales; or, in other words, you should turn your stock over not less than three times and as many as six if possible.

He was followed by J. C. Cornell, of Ord, who read the following paper on

ADVERTISING.

About the first question that a country merchant asks is, Does it pay to advertise? We would answer that question by asking another, Does your business pay? If not, try advertising. If it has been satisfactory, advertise and make it better. The larger the business properly handled and advertised, the greater the profit at the end of the year. There is in these present times of evolution in business methods an opportunity for the country merchant to not only follow the footsteps of his city brothers, but furnish some additional ideas of advertising that is not only a benefit to himself and his business, but a benefit to the town in which he is located. There is a merchant in Nebraska who questions the benefit of advertising. We advise him to take a day off and read "Fortunes and Freaks in Advertising," by Paul Latzke. He tells an interesting story of the N. K. Fairbanks Company that illustrates the benefit of advertising and the profit it brought.

A RESULT OF EXPERIENCE.

For years advertising agents besieged this concern to advertise their goods in magazines and other periodicals. The company was persevering, but fruitless, until the Philadelphia Advertising Agents succeeded in securing a contract, and they suggested that certain counties where the Fairbanks people had a large trade be set aside for experiment. In these counties the Fairbanks Company was selling a certain brand of soap through a salesman; it was proposed that the same soap be put up under another brand. This brand to be advertised through the papers through this particular section at the same time their salesmen continued their efforts with the old brand. At the end of six months it was found that the new brand was outselling the old, and when the balance sheet was drawn the net profits on the advertised soap, after all expenses for printers' ink had been paid, exceeded the profits on the goods sold through the salesmen by $8,000.

PERSISTENT ADVERTISING NECESSARY.

The experience was conclusive and to-day Fairbanks & Company are the greatest advertisers in America, spending hundreds of thousands of dollars each year for publicity. This is only one case in thousands that we might call to your attention that has enjoyed the same results: there are no cut and dried values for making advertising successful; each merchant has to work out in a measure his own salvation; there is, however, one way to make it pay; and that is by persistence and common sense for which there are no substitutes for advertising or anything else for that matter. Do not forget the fact that your printer and his paper have to live as well as yourself, and that you can get value received for every dollar you spend with him for advertising. If you will select a certain place in his paper and insert a well-written advertisement on seasonable goods, changing each week, we are satisfied that the result will be very flattering to you.

SEASONABLE ADVERTISING DESIRABLE.

Do not leave a Christmas advertisement running until next June and expect to get good results, but give this part of your business as much attention as is necessary to make it a success. Such articles of Hardware as are sold only in certain seasons of the year should be pushed at the proper time. Do not neglect your show window. A neat, clean show window is one of the mediums we have to advertise seasonable goods at a very little expense, and as the greater bulk of Hardware stocks are in season twelve months of the year, it does not require an expert window dresser to make the attractive window that will appeal to the intended purchasers.

We do not think much of the dodger or handbill; the cheap dodger, like a beggar, is most always stopped at the front door, while the newspaper, like a friend of the family, gets right into the best room of the house and is always welcome; to give you some idea of the amount of money expended by the different concerns for advertising, we quote the following: "A certain firm of soap makers give a monthly publication $240,000 for one page; a New York dry goods house $180,000 for the privilege of putting their advertisement on the backs of street car transfer slips. Two hundred thousand was the price paid for the privileges on the elevated railway in New York City. If it will pay these concerns to spend fortunes each year advertising, it is conclusive evidence that the small merchant can lose nothing in following the example. Personally we believe in advertising, not only with local newspapers, but with original schemes. Get on the right track and the rest is easy. Map out a plan of advertising on the right lines and it will take an uncommon amount of blundering to make a failure.

The Question Box was then opened, and the questions contained therein were read and freely discussed by the members present:

The press committee reported as follows:

Resolved, That the Nebraska Retail Hardware Dealers Association in executive session extend a vote of thanks to the press for their uniform courtesy extended to the association in reporting and publishing, not only our business session, but the widespread publicity given and the assistance rendered in the upbuilding of the association.

The President appointed H. A. Peterson of Oakland and Nathan Roberts of Omaha a committee to escort the new president to the chair.

President C. A. Cornell, of Ord, appointed the following executive committee: Nathan Roberts, of Omaha; H. Henke, of Grand Island; Frank Hacker, of Friend.

The subject of the location of the next annual meeting place was taken up and discussed. Invitations were extended by the members from Lincoln, Fremont and Omaha.

After considerable discussion Omaha was selected as the next annual meeting place.

The meeting adjourned at 5:30 P. M.

THE NEW ENGLAND HARDWARE DEALERS' ASSOCIATION.

The annual meeting and banquet of the New England Hardware Dealers' Association was held in the United States Hotel, Boston, February 10th. Early in the evening a meeting of the Executive Committee took place with Vice-President Hunter in the chair and S. D. Balkam acting as secretary *pro tem*, the regular officers both being absent on account of illness. A communication was read from Secretary James A. Farless, stating that he was in very poor health and feared that he might not be able to meet with them again. Mr. Farless recently celebrated his 77th birthday and for many years has been identified with the Hardware trade. During the executive meeting a resolution was passed reducing the dues to $6 per annum and recommending that no more than two meetings be held during the coming year.

Shortly after six o'clock the members of the association, with their guests, assembled in the dining room. After dinner was served a number of addresses were listened to, Vice-President Hunter acting as toast-master. Charles E. Adams, of Lowell, and W. D. Parlin, who were the association's representatives to the State Board of Trade, presented their annual report, and on the motion of Mr. Adams the association adopted a resolution recommending a treaty of arbitration between Great Britain and the United States and that a copy of this resolution be forwarded to the Senators from Massachusetts. The annual report of H. M. Sanders, treasurer, was read and placed on file. The report of Secretary Farless was also presented, and a resolution of sympathy was adopted, and a copy was ordered forwarded to him. The matter of making changes in the organization was discussed by a number of the members, and Mr. Barber moved that the chairman appoint a committee of three to report at the next meeting in regard to the number of meetings to be held during the coming year. Mr. Barber also moved that the by-laws of the association be changed or amended at the next meeting. Addresses were also made by R. C. Goodell, of the Goodell Company, Amtrim, New Hampshire, and A. Eugene Bolles, manager of HARDWARE, New York, after which the meeting adjourned.

IOWA RETAIL HARDWARE DEALERS' ASSOCIATION.

The sixth annual convention of the Iowa Retail Hardware Dealers' Association was held at Des Moines during Wednesday, Thursday and Friday, February 10th to 12th in the Commercial Exchange Hall.

WEDNESDAY AFTERNOON SESSION.

The convention was called to order by President S. R. Miles at 2.45 P. M., who, after a few remarks pertaining to a misunderstanding regarding railroad rates, delivered the annual address, of which we give the following selections:

PRESIDENT'S ANNUAL ADDRESS.

BY S. R. MILES, MASON CITY, IOWA.

I will not attempt a discussion of the events of the year that has passed since our last convention. Neither will I undertake to discuss trade conditions for the coming year, but will leave that in the more competent hands of our friends, the trade journals. I will confine myself briefly to a *resume* of association work of the past year, and, with your kind indulgence, will make a few suggestions along the line of future work.

THE NATIONAL ASSOCIATION AND ITS WORK.

As a delegate, together with Secretary Vincent, I attended the meeting of the national convention at Chicago, in March. There were in attendance of this meeting representatives of 17 State Hardware associations, and a more earnest and progressive delegation of Hardwaremen would be hard to find—men that were willing to give of their valuable time in an effort to improve not only their own business condition, but that of the thousands of their fellow dealers doing business in their several home States, whether members of their State associations or not. If every Hardware dealer in Iowa could have attended that meeting, instead of there being less than 300 members of the Iowa association, there would be 1500 at least. It would not be policy for me to give you at this time more than a brief outline of the work of this national gathering. National Secretary M. L. Corey, of Argo, Ind.; A. T. Stebbins, of Rochester, Minn., national treasurer; and L. Lindenberg, of Dubuque, member of the national executive committee, will be with us at this meeting and executive session will tell us of the work of the national association.

IS RECOGNIZED AS AN IMPORTANT FACTOR.

After listening to these gentlemen you will understand as never before the good work the association is doing and how it is being recognized as an important factor in trade circles. It is one of the duties of the State associations composing the national to make it possible to increase this power and prominence. I regret to say that Iowa, with her magnificent possibilities along association lines, does not occupy the place in this work to make us proud of her position.

ONLY AWAITS THE MAGIC TOUCH.

We have in round numbers 1,700 Hardware dealers in Iowa. Think for a moment, gentlemen, of the undeveloped power within our ranks that only awaits the magic touch that will bring us to a full realization of our strength. We are sometimes asked what is the association doing? I confess that to give a satisfactory answer to a dealer that has never attended an association meeting is sometimes a puzzle; but given anywhere near the membership to which our work entitles us and this question would never be asked.

REMEDY AT HAND.

If any dealer present is not satisfied with existing business conditions let me tell him there is a remedy and that remedy's name is "organization." This is an age of organization—the jobbers, the manufacturers, the catalogue houses and in many localities even our customers are organized. Can we successfully combat single-handed this array of organization? A great deal has been accomplished along association lines and yet I am sure it is only in its earliest infancy and that the next two or three years will witness a great increase in membership and general interest in association work.

BETTER BUYING METHODS URGED.

One of the best things resulting from a friendly relationship between dealers, particularly in the same town, is co-operative buying. Much complaint against catalogue house competition could be eliminated by better buying methods. It is worth a trial. I do not believe manufacturers as a whole are considering either jobbers' or retailers' interests to the extent they are entitled. Surely not when they place a catalogue house on an equal price basis with the jobber. Happily there are few manufacturers doing this, the great majority being alive to their own interests. With every dealer in Iowa a member of our association, we could, to say the least, command the wholesale respect of every manufacturer in the country.

SHOULD SHOW COLORS.

I would suggest that each member of this association show his colors by having printed on his letter heads an announcement of the fact that he is a member of the Iowa Retail Hardware Dealers' Association and don't be afraid to use these same letter heads in writing your customers. In these days of trades unions, farmers' co-operative societies, etc., a man who does not belong to some kind of an association is looked on as a back number.

One of the greatest dangers threatening the retail interests of the country to-day is the parcels post movement, fathered by the catalogue and mail order houses. This subject, so ably presented by National President Bogardus and Secretary Corey before the National Hardware Jobbers and Manufacturers' Associations at Atlantic City in November and attended with such good results, will be handled without gloves by Secretary Corey during this meeting. I trust that some action may be taken that will result in placing the Iowa association in the forefront of this movement. Resolutions and petitions to your Congressmen are not necessarily wasted efforts, but I believe a letter from you, whether you have ever met the gentleman or not, will be much more effective. It will impress on his mind the fact that you are honest and sincere, and an honest effort on any subject is sure to get results.

* * * * * * * * * *

Our first work was to secure the services of a competent man for secretary. We had a number of applications, and finally secured the services of A. R. Sale, of Mason City, who has proven the right man for the place. Our next work was to prepare articles of incorporation and by-laws. While there are a number of State mutuals organized under the same chapter of the insurance laws as our own, yet on attempting to use their articles of incorporation and by-laws as a guide we found very little in them just suited to our needs, for the reason that with one exception all of the State mutuals are accepting all classes of mercantile risks, while we confine ourselves to the risks of members of Hardware associations. About the time we were ready to submit our articles and by-laws to the State authorities we learned that the State mutuals had up at that time with the State Auditor and Attorney-General a very important question relative to the collection of assessments.

The outcome, after a two months' discussion of this question, was the granting to State mutual companies authority to collect one full advance assessment covering a period of not more than one year, and the Iowa Hardware Dealers' Mutual Insurance Association were the first company to take advantage of this decision. In fact they are the only assessment mutual company who have so far adopted it; but I can assure you that the success or failure of this plan is being watched with a great deal of interest by the other mutual companies of the State. I predict the plan will prove so successful that it must be finally adopted by all successful mutual companies. It is so manifestly a business proposition that it cannot help, when fully understood, to commend itself to every business man, and to a company just commencing business it means even more than it will after the child has grown stronger. It means the cost of collecting one assessment instead of three or four. It means the saving of losses that occur at every assessment. It means that each policy holder pays for his insurance on the same basis, and that those who pay promptly are not carrying insurance for members that may see fit to drop out when an assessment is made, having had their insurance carried from three to six months without cost. It means, what will appeal to every business man, cash on hand with which to pay all losses and expenses promptly.

* * * * * * * * * *

ASSOCIATION SECRETARY.

I have repeatedly stated at our annual meetings that I did not believe the Iowa Retail Hardware Dealers' Association would attain its highest degree of efficiency until we were able to employ a secretary whose time will belong to the association and who can devote his entire energies to the work of building up the association, and on this subject I have not changed my mind. We have had ever since our organization secretaries who have been competent, willing and anxious to in every way serve and promote the best interests of the association, but they have all had business of their own and could not reasonably be expected to give all their time to association work. I am sure their own business has been neglected many times in giving this work their attention. Gentlemen, is it right? Is it justice? Is it necessary to continue our work on this plan? I think not, and believe some action should be taken before the adjournment of this convention that will provide for the employment of a secretary.

And now, gentlemen, let me in closing appeal to you to be loyal to the association, and never permit yourselves to ask, "What is the association doing?" but be able to tell your brother Hardware dealer who may not be a member what our association is doing. Your business is assailed from every side. You cannot combat alone and single handed thoroughly organized effort, backed up by brains and unlimited capital, to capture the business that belongs to you; and the sooner you recognize this fact and give some of your time and energies to the upbuilding of an association that can and will help you, just that much sooner will you get your business in a more satisfactory and profitable condition.

The following committees were then announced:

Reception Committee—Chas. Swaine, Council Bluffs; C. E. Haas, Le Mars; W. B. Ritter, Hedrick; A. C. Vieth, Oakland; H. S Rayburn, Newton.

Hotel Committee—H. S. Vincent, Ft. Dodge; J. E. Sharpe, Moravia.

Constitution and By-Laws—L. Lindenburg, Dubuque; V. E. Hamilton, Oskaloosa; C. F. Schmidt, Marshalltown.

Committee on Resolutions—L. H. Kurtz, Des Moines; Jacob Seither, Keokuk; D. H. Huston, Jefferson.

Legislative Committee—Joseph Mattes, Odebolt; E. P. Messer, Sheldon; W. B. Kingsbury, Osage.

Digitized by Google

Auditing Committee—Myer Carl, What Cheer; C. F. Keating, Mt. Ayr; L. A. Gnam, Carroll.

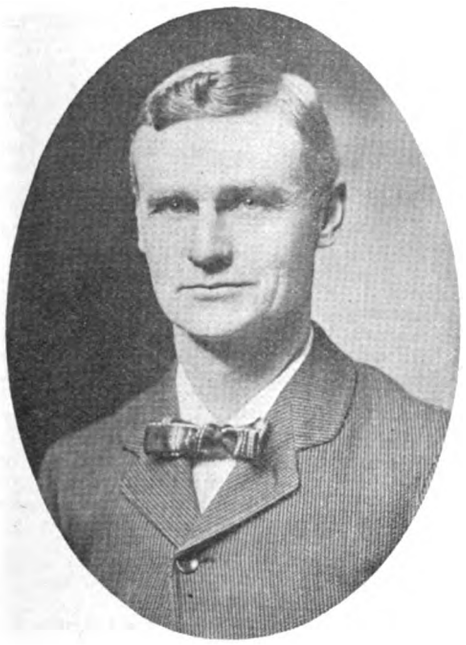
Nominating Committee—J. F. Doty, West Liberty; C. S. Barger, Albia; W. H. Millard, Cherokee.

Sergeant-at-Arms—C. W. Brelsford, Council Bluffs.

L. A. Gnam, of Carroll, then read a paper on

WOVEN WIRE FENCING

having reference to its history and wide distribution and the necessity for sustaining selling prices so that a profit will result. The address was listened to attentively.



The convention was then addressed by R. U. Conger, of the Sheldon School of Scientific Salesmanship, who presented quite a scholarly essay, exemplifying the principles underlying the lectures connected with his Scientific School—interspersed with a number of humorous sallies as special illustrations.

The Question Box was then opened and contents explained by the chairman of the committee, William Orcutt, of Sioux City, and a general discussion followed the several questions, which was participated in by L. Lindenberg, of Dubuque; F. R. Currie, of Mason City; D. H. Huston, of Jefferson; C. E. Haas, of Le Mars, and others. The session adjourned at 5.20 P. M.

THURSDAY MORNING SESSION.

President Miles called the convention to order at 10 o'clock and announced that he would appoint as sergeant-at-arms, C. E. Haas, of Le Mars. The convention was then addressed by M. L. Corey, of Argos, Ind., secretary of National Retail Hardware Dealers' Association, in whose address was outlined sufficiently the arduous duties which as National Secretary he finds on every hand, detailing a number of instances in which his presence influenced good work well done.

At the conclusion of Mr. Corey's address, Frank R. Currie, of Mason

PRESIDENT S. R. MILES.

City, read a paper on

CREDITS

from which we extract the following:

* * * * * * * * * * *

OUR COMMON INTEREST.

At the beginning allow me to say that this is one common interest that permeates every kind of merchandising in the State of Iowa in the greatest degree. Every style of merchandising counts this its greatest burden and greatest contention. Further than this, Hardwaremen of Iowa, it is perhaps the one item of our business that ninety-five out of every 100 men can not abolish, for reasons which are not asked for here. I expect there are 95 per cent. of the men here who could cut out the stove business and yet make the Hardware business pay; 95 per cent. could discontinue the furnace business and yet make a living; 75 per cent. could close up a tin shop altogether and make just as much money—and so we could go on through the lines that make up our business: but can you eliminate that nightmare, "credits?" I don't believe in the State of Iowa one-fourth of the Hardware dealers could cut out the credit business and live, do you?

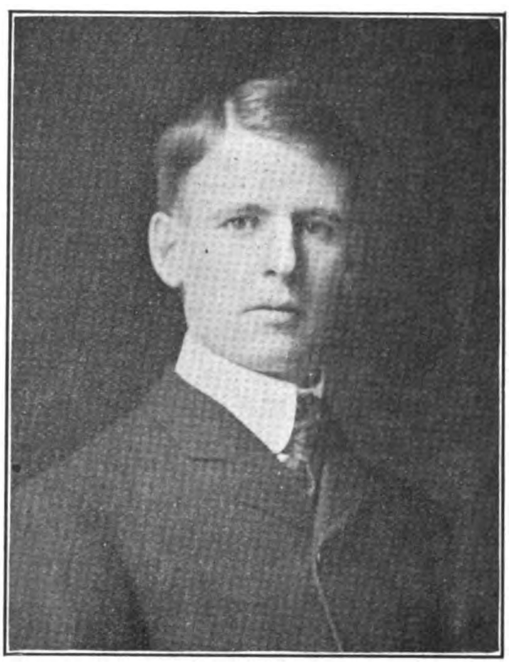
Inasmuch as this subject is a universal part of the Hardware dealers' stock in trade, the successes and failures of its rank and file must to a greater or less degree be traced to its successful or unsuccessful management. I can hardly believe that a poor collector ever made a success in the Hardware business—that is, a success worth speaking about—but I have had pointed to me successful merchants, and invariably it was conceded, "He was a good collector," or "Wise on credits."

* * * * * * * * * * *

FRIENDS.

As business grows and clerks increase in numbers, dangers more hazardous creep into the Hardware business; for every man that is a vendor of merchandise for you has friends. Now that is good, for it means business; but in parenthesis we must add also credits; and my experience is that few clerks or partners who have nothing to do with the last end of the credit business have commendable discretion at the front end. There should be rules laid down for clerks and partners as to who and how much they may credit; also if they be allowed to open accounts.

INCOMPLETE CHARGES.



In passing I might say that improper and incomplete charges cause misunderstandings and losses in accounts, also losses in patronage, which are altogether without excuse. A charge should be entered plainly and complete, always stating, by a system of abbreviations when possible, who ordered or got the article. This is only a small item, but classifies as "starting right."

ACCOUNTS WELL OPENED ARE HALF CLOSED.

Let us change an adage at this point: "Accounts well opened are half closed." I think this well taken. It is poor policy to hand over items of any amount promiscuously, saying nothing about a settlement date. This applies especially to items of size and to persons who have comparatively little knowledge or system in their business. Don't urge the man of lax business methods to buy on credit, and never unless you make him understand that at a certain time you want the money.

LEASE DOES NOT END ALL TROUBLE.

In this connection I might add that a lease or contract does not end nor eliminate all the trouble. If you will step into the rear door of the installment house and watch them unload their wagons as they bring back articles of every description, you will be convinced that a man's signature does not always collect the account, but you will find in many cases that your trouble has just begun. However,

H. S. VINCENT, SECRETARY.

leases and contracts are good, and are one of the aids in the conducting of successful and safe credits.

MASSES SHOULD BE EDUCATED.

Besides the education of your clerks and partners there is the education of the masses, and if every merchant would put his shoulder to the wheel on this problem collections would be easier for all of us. It is a mistake to carry the impression to your trade that you have lots of money, and they need not be in a hurry to settle their accounts. This is all right for a few of your rich men, but the sooner you quit this practice the easier it will be for the big majority of us who need the money to look after our collections. A regular system of statements should be put in force and scrupulously followed. This will soon educate your trade to know that they are expected to pay your account.

* * * * * * * * * * *

There are lots more fascinating books than our ledger, but sound business sense tells us that not only our bread and butter is there, but considerable pie and cake.

I hope now that those of riper years and tried judgment can add practical experience to this hour which will give us all inspiration and good suggestions for the conduct of our business. While this edge of the business I take to be the least attractive of any, it must have attention.

Mr. Currie's address was followed by the reading of a paper on

STOVES—SHALL WE LET THIS DEPARTMENT OF OUR BUSINESS GO TO THE INSTALLMENT HOUSES?

The reading of this paper started a wide discussion as to the experience in selling stoves which was joined in by W. C. Boumgartner, of Dubuque; Frank L. Currie, of Mason City; C. H. Thomas, of Kent; M. W. Keating, of Afton; D. H. Huston and President S. R. Miles.

This session of the convention adjourned at 12.30 P. M.

Digitized by Google

THURSDAY AFTERNOON SESSION.

The convention met at the sound of the gavel at 3 P. M.

W. H. Levy, State organizer for the Iowa Retail Grocers' Association and the Iowa Retail Hardware Dealers' Association, then addressed the convention on the subject of the peddlers license law befor the Iowa Legislature.

After a few remarks on the subject, action on the peddlers license law was referred to the incoming executive committee.

A. T. Stebbins, of Rochester, Minn., then addressed the convention on insurance matters, in the course of which he said:

A. T. STEBBINS' REMARKS.

* * * * * * * * * *

Mutual fire insurance is a necessity. It is of comparatively recent origin, the first company having been formed in 1752 with Benjamin Franklin as one of the incorporators. The original rate was $1.17 and $300,000 of insurance was written the first year. There are three kinds of insurance: Lloyds, stock and mutual. Lloyds is for the underwriters, stock is for mutual benefit, and the third kind is mutual. Mutual companies doing a general business are subjected to greater losses than if they confine themselves to a single line. Another element is that all members are members of the company. Every member of our association is practically an agent. The account of the old line companies for expenses is 41 per cent. I give you the result of insurance in Minnesota.

PERCENTAGE OF LOSSES TO PREMIUMS.

In 1900 our gross premiums were $8,391.91 and our gross losses were $1,294.14, or only 15 per cent. of the premiums. In 1901 our premiums were $12,573.61 and our losses were $2,344.98, or 18 per cent. of the premiums. In 1902 our premiums were $19,708.03, and our losses were $67,752,22, or 39 per cent. of the premiums. This was our most disastrous year, as a number of heavy fires in December made a heavy increase in the percentage of losses to premiums. In 1903 our gross premiums were $3,381.50, and our gross losses were $5,155.87, or 17 per cent. of the premiums. Taking a total of the four years up to December 31, 1903, and our gross premiums were $71,054.05, while our gross losses were $16,547.21, or 23 per cent.

DECREASE IN PERCENTAGE OF OPERATING EXPENSES.

Another feature to which I will call your attention is the fact that our percentage of operating expenses has been continually decreasing. For 1900 our gross expense was $2,196.61, or 26 per cent. of the premiums; loss and expense together were 41 per cent. of the premiums. In 1901 our gross expense was $1,769.27, or 15 per cent. of the premiums; loss and expense together were 33 per cent. In 1902 our gross expense was $2,436.40, or 12 per cent. of the premiums; loss and expense together were 51 per cent. In 1903 our gross expense was $3,012.72, or 10 per cent. of the premiums, while loss and expense together were 27 per cent. Our total expense in four years was $9,415.00, or 14 per cent. of the premiums, and our loss and expense together amounted to 36 per cent. of the premiums. The financial condition of the company on December 31, 1903, was as follows: Cash on hand and due from policy holders, $35,948.58; reinsurance reserve, $13,008.07; net surplus, $22,940.51; insurance in force, $1,308,808; the return premium for 1904 was 30 per cent.

L. Lindenberg then read a report of A. R. Sale, of Mason City, secretary of the Insurance Association, the following facts being embodied in the report:

INSURANCE REPORT.

OPENING OF OFFICE.

In submitting a report of the secretary's office at this, your first annual meeting, it may not be out of place to recount some of the steps taken prior to the writing of our first policy.

The office was opened on the seventh day of April, 1903, when we began the work of preparing the articles of incorporation and by-laws. The articles were prepared under the supervision of our attorneys, as we were unable to obtain any that seemed to be a sufficint guide in the other mutuals. This office furnished the outline and plan of what we wanted, and the attorneys gave them the proper legal form and polish. The by-laws were the product of the president's efforts in connection with a little compilation and selection on part of the secretary's office. As these two documents lie before you, on the printed page they seem simple and inoffensive enough.

DOCUMENTS ARE FILED.

But it took many weeks of writing and re-writing, many conferences with attorneys and State officers, volumes of correspondence, two personal calls at the auditor's office before we were finally allowed to file them for record in the county and State offices. On the first visit of your officers to the auditor's office, May 19th, it was supposed that we would be ready to canvass for the applications by June 1st, and the executive committee met on June 2d to make a final canvass of the matter. But on June 15th we were again in session with the officials at Des Moines, who refused to approve the papers filed by a member of the board of directors on June 4th. We again submitted a revised copy on June 23d and received permission to record the papers and begin soliciting for the necessary $100,000 of applications, which we must have before we could begin business.

LIST OF APPLICATIONS FILED.

We mailed out our first general letter to the dealers of the State under the date of June 29th. August 15th we were enabled to file a list of applicants for one hundred thousand dollars' worth of insurance. On August 20th we received full authority from the State department of insurance to write our first policies.

Many of our applicants, of course, wanted their insurance to take effect on dates prior to this. This business we had to place with reinsuring companies. This, of course, cuts down some of our profits for the first year. Then quite a large block of this insurance was for dates beyond the present time and has as yet yielded no return. We have sent out to every dealer in the State other general letters under the dates of October 1st and November 30th. Again on December 22d we mailed to every dealer a letter for the retail association containing some of our literature and a notice of our annual meeting. We have conducted a large general correspondence with members of the Retail Dealers' Association and the inquiries and questions arising from the general letters and analysis of our mailing account showing the mailing of 7,000 pieces of 1-cent matter and 2,700 pieces of 2-cent matter. We have spent nothing as yet for general advertising, and have employed no solicitors.

The principle obstacles that we have found in building up the business have been the timidity that many have about placing their business in the hands of a mutual company; objections to paying the fee to the general association for membership; fear of offending customers who are agents for the old line companies; indifference to reading circular letters and printed matter; our inability to carry mixed stocks of goods; the bugaboo stories of the old line agents about the dangers of the mutual plan.

Your new board of directors must devise ways and means to remove some of these obstacles which we have no doubt that they can do.

The chair here appointed W. H. Millard, Cherokee; J. F. Doty, West Liberty; J. E. Sharpe, Moravia, and F. E. Ritter, Hedrick, as tellers to secure applications for insurance policies, with the result given in Secretary A. R. Sale's report below.

The statistics made by Mr. Sale after the tellers had taken applications for insurance at this meeting, read as follows:

Applications at Kirkwood Hotel	$21,000
Received at meeting	45,000
Applications on file	68,206
Total applications	$134,200
Insurance in force	153,750
Total	$287,950

Our work are embodied in the following:

C. E. Haas, of Le Mars, then delivered an address on

HOW TO MAKE YOUR FIELD AND GARDEN SEEDS PROFITABLE

from which we make the following excerpts:

There are no doubt many Hardware dealers here, like myself, who in connection with Hardware handle Seeds, and have found this branch of the business profitable. In handling this subject of Seeds, I can only speak to you from my own experience, covering a period of over 20 years. With us in our city the handling of Seeds has become a very important factor; it is one of the greatest specialties in connection with our business, and the Seed business, as a whole, in our city is controlled almost entirely by the Hardware trade.

THE HANDLING OF SEEDS IS NOT AN EASY PROPOSITION.

It is a business that calls for the closest attention, and must be understood and closely watched to make a success of it. The merchant who starts out to lay the foundation for a successful Seed business must keep constantly in mind the all important fact—namely, the handling of only good and reliable Seeds. His motto must ever be: "Not quantity, but quality."

QUALITY COUNTS

for more in the purchase of Seeds than in almost any line of merchandise. Too much care cannot be given in the purchase of Seeds. The question of how cheap can I buy Seed ought never to be considered, if the question of quality is left out. Poor Seed will only bring disappointment to the customer, and work harm to the dealer from whom purchased. There is no line of goods where quality is of so much importance as in Seeds. When a person starts out to invest in an article of any kind he has an opportunity of exercising his own judgment, but in the matter of Seeds he has to depend largely on the confidence which he reposes in the dealer. The merchant who is unfortunate enough to sell a man or woman a bill of poor Seeds is surely sowing trouble for himself. The result of poor Seeds means to the innocent purchaser hard labor without recompense, loss of a season's harvest and disappointment.

DOES IT PAY TO HANDLE SEEDS?

In my opinion, it does pay to handle Seeds. To our firm it represents a nice sum added to our annual sales, and this is not all—it brings a very desirable class of people to your place of business. The sale of almost any other article of merchandise is confined to a certain few in every community. You sell a Stove, or a Furnace, or a piece of farm machinery, and sales of this nature reach only a very few or small proportion of the families living in your midst, but not so with Seeds. When Seed time comes you have an article that is wanted, and called for by every family within reach of your place of business. This brings people to your store, not alone to buy Seed, but very often leads to other sales, especially seasonable goods, such as Hoes, Rakes, Spades and other Garden necessities.

CATALOGUE HOUSES DO NOT HANDLE SEEDS.

Another very good reason why it pays to handle Seeds is this: Has it ever occurred to you that here is an article of merchandise that is not handled by catalogue houses? To my knowledge there is not a catalogue house in the country that sells Seed—and, in my judgment, never will be. The merchant need never fear competition from this source. You would find very few people (if they had the opportunity) send their good money in advance to a catalogue house for a bill of

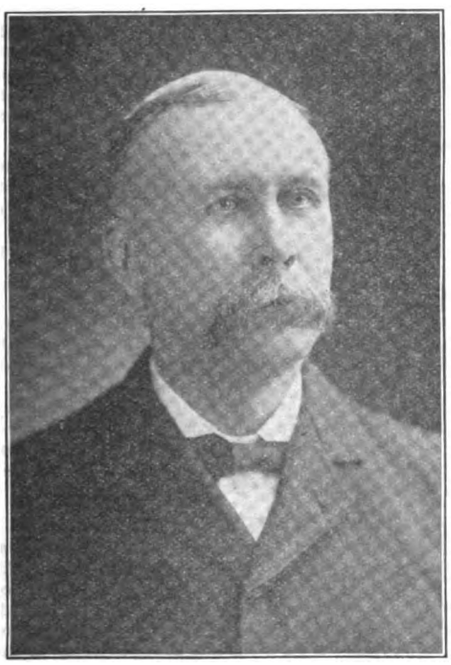
Digitized by Google

Seeds, and wait from seed time until harvest to find only that their crop was a failure. When it comes to taking desperate chances, they will always prefer taking them with the home merchant. The catalogue house fellows evidently know this and will never go into the Seed business.

* * * * * * * * * * *

PACKAGE SEEDS,

as you are all aware, are sent broadcast all over this land and are handled by racket and department stores. In order to check this competition we, years ago, adopted a system of having put up for us our own package Seeds. We make our own selection of varieties of Seeds wanted and have them put up in extra large papers, containing about double the quantity of Seed as compared with the ordinary papers. We have found this plan very satisfactory, and our package Seed trade is growing from year to year.



DISPLAYING SEEDS TO BEST ADVANTAGE.

When the season opens up we bring our stock of Seeds to the front—we give them the most prominent location in the store. The display jars and Seed cabinet are thoroughly cleaned and relabeled. The more bulky Seeds, such as beans, peas, sweet corn, beets, along with Grass and Field Seeds, are displayed in bright new pails and everything made to look fresh and clean and attractive. We make our Seed department look tempting, and many a person is led to buy Seed who would otherwise (if stock looked old and neglected) never give the purchase of Seeds a thought.

* * * * * * * * * * *

OLD SEED CARRIED OVER.

When we take our annual inventory we go over our Seed stock carefully, and any Seed that has lost its germinating power or vitality is thrown to one side—and destroyed by burning it up. We have never yet made the fatal mistake of selling old Seed cheap, or giving

W. A. McINTIRE, EX-PRESIDENT.

it away to get rid of it. No matter if one gave it away, it would fall into the hands of a dissatisfied customer, and the merchant would get the blame for the man's troubles.

* * * * * * * * * * *

GOVERNMENT DISTRIBUTION OF SEED.

Now, this leads me to a thought that, perhaps, is somewhat out of place at this time and upon this occasion. But the subject before us is Seed, and how can we make that branch of our business more profitable? So I am going to touch briefly on the free distribution of Seed by the Government. There may be many of my hearers in the Seed business like myself, who feel as though an injustice was being done to many engaged in the Seed business. In my opinion this free distribution of Seed by the Government, to a great extent at least, is all wrong, and steps ought to be taken to have this custom, as far as it relates to all the common varieties of garden and field seeds, abolished. There are many receiving their entire stock of garden and vegetable Seeds every Spring from the Government—people who are well off, many of them, who ought and would buy their Seeds from the home merchant if it were not for this free Government Seed.

There is no good reason why in this day of agricultural development, when our country is so prosperous and good Seed firms have been established in almost every State in the Union, that this practice should be continued; and we know that the bulk of such Seeds are only the common, every day varieties under an assumed name, and can be bought in any city or town in the United States.

* * * * * * * * * * *

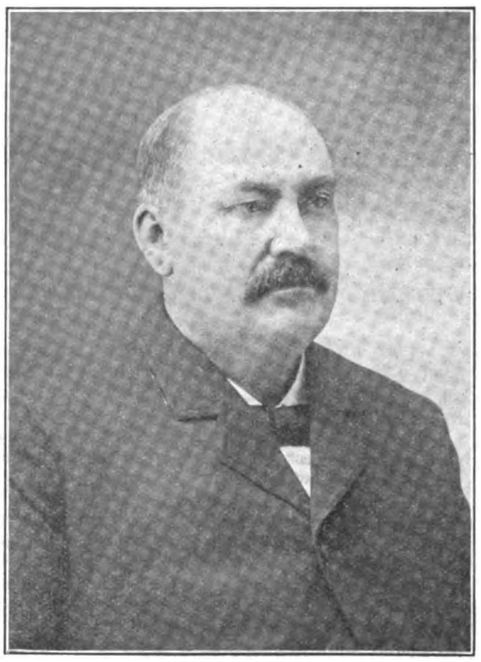
KNOWLEDGE, ENTHUSIASM, PERSEVERANCE.

The Seed business, to be successful, requires knowledge, enthusiasm and perseverance. The man who makes a study of Seeds, carries on experiments at his own home—and in his own garden—makes of himself a general storehouse of information on the subject, and when he talks Seed to his trade he does so intelligently. He grows enthusiastic and people soon look up to him as an authority in regard to such matters, and by perseverance his success is assured. We have left our homes and places of business to join hands here for the purpose of mutual protection. We are here to aid one another—to-day our interests are one. We are assembled as business men to devise ways and means for the advancement of all our interests. We can learn much from one another. I trust that some good seed may fall here that we can take home with us and sow into our business, which will grow into new life and energy, so that we may be better prepared to meet the demands made upon us in the year 1904, and that our efforts will be crowned with success is my earnest wish.

He was followed by J. F. Doty, of West Liberty, who read the following paper on

FURNACES.

The reading of this paper opened up a discussion which was participated in by a number of the delegates present.



CAN FURNACES BE SUCCESSFULLY HANDLED IN A HARDWARE STORE?

BY J. F. DOTY, WEST LIBERTY, IOWA.

It is my intention to discuss this question from a business, and not a scientific, standpoint.

First.—Buy a good Furnace from a responsible manufacturer.

Second.—When you sell a Furnace, sell it with a guarantee to heat the building to a certain temperature when the thermometer is a certain height.

GEORGE LISTER, EX-TREASURER.

If necessary, give a bond to qualify the contract, and collect the bill. This will make the Furnace heat better and give you a better appetite, and you will sleep better, and it will enable you to use the money and pay cash for your Furnaces, thereby getting the benefit of cash buying.

You may think this theoretical and almost impossible, but this has been my policy during six years of experience of selling an average of 50 Furnaces annually, and I have carried it out to the letter and find it the most satisfactory to all parties concerned. It has been my policy to

SELL A FURNACE ON A FAIR MARGIN

and at a price that will warrant the employment of skilled labor, using of good material and the doing of a first-class job. I believe this to be fair between man and man and I do not deviate from this practice. My observation has been that many dealers take a furnace job so cheap that they can neither put in a large enough furnace, employ experienced workmen, use good material, proper sized registers and pipes, set furnace right or collect their bills.

CAUSES OF FAILURE.

Success or failure depend entirely upon size, location and setting of furnace, size of registers and pipes used and their location and cold air ducts to the furnace, also mechanical ability and material used, as upon these elements circulation wholly depends.

CIRCULATION.

Without perfect circulation the natural and unfortunate result must be failure. The prime factor in successful hot air heating is circula-

Digitized by Google

tion. Better results can be obtained from the use of one ton of coal with furnace set right and with good circulation than with two and furnace poorly set and poor circulation, and this item is all important with seller and user and it has been an experience of gratification to the writer to learn that a fair minded man can be made to see this, that it is money saved in the long run to pay an experienced furnace man his price and have his house well heated and ventilated rather than take a chance with a cheap man who has but one aim and that to get the job.

* * * * * * * * * *

To conduct a successful Furnace business requires experience, study and close attention to detail work. Detail work is very important, and many dealers give no thought to this phase of the business. There should be a good reason for locating a register here or there and for using a smaller pipe in one place and a larger one somewhere else. It is important that no changes be made, as this is annoying, and often expensive to your customer as well as yourself, and invariably results in a botched job.

I have known dealers who never estimated the time of their men in setting a Furnace, making pipe, time consumed in travel, waste of material, etc. They figure, if they figure at all, that they have to keep the men anyway, and while they were traveling they were resting, so that they would work harder when they got to their destination, and the waste material they could use to tack over rat holes in the store, and, best of all, they got the job away from the other fellow, this being their sole ambition.

Practical instruction should be given to each furnace user for operating, cleaning and firing their furnace. If they are from Missouri, show them; for upon this depends the life of furnace, consumption of fuel and temperature of rooms. The writer tries to impress earnestly upon the furnace user the importance of caring for the furnace when it becomes his property.

PROGRESS LEADS THE FUTURE.

Progress leads the future by the hand. The furnace is yet in its infancy and if the rapid strides of progress in hot air heating continue in the future as in the past, circulation will be acknowledged by scholars of science to be the true method of heating.

To prove my position to be correctly taken relative to circulation being a great and natural method we will review for a moment ancient history. Circulation was first employed in the creation of man and he has been circulating ever since.

F. L. Marvin, of Grinnell, then read the following paper on

PAINTS,

which had been prepared by G. L. Miles, of that city. The paper in part was as follows:

PAINTS—WHY THIS BUSINESS BELONGS TO THE HARDWARE DEALER.

BY G. L. MILES, GRINNELL, IOWA.

The paint, oil and glass business rightly belongs to the Hardware dealer, and he is a wise man who insists on having his share of it, in spite of all comers. It belongs to him because he needs it; it naturally fits into his stock of builders' goods, and he can handle it to better advantage and more economically than any other retailer.

A COMBINED HARDWARE, PAINT AND GLASS STOCK

is popular with the contractor and builder, as it enables him to largely concentrate his purchases, and make it more convenient for him to order his supplies. He will, all other things being equal, prefer to buy his paints, etc., with his other builders' material. The Hardware dealer is in the best position to get the paint business, especially on new work, and he can talk paint while looking after his other lines, without in any way interfering with his regular business.

The exclusive paint store is becoming a thing of the past, and the trade is rapidly drifting into other channels. The Hardware dealer is neglecting a fairly profitable proposition if he does not add this side line, which can be handled without a dollar of added expense for help and rent.

* * * * * * * * * *

THE PAINT BUSINESS HAS ITS UNPLEASANT FEATURES.

There seems to be something wonderfully demoralizing about it. There is no class of mechanics so thoroughly averse to paying their bills as some who buy and use paint. There is no class of retailers who are, as a rule, so determined to sell their most staple goods close to the cost line as are those who retail white lead and oil. And I know of no class of manufacturers who adulterate their goods so unblushingly and make the loudest claims for their purity as some manufacturers and mixers of painters' supplies.

Yet with all these drawbacks I do not think there is a more satisfactory branch of my varied stock than the paint, oil and glass business.

* * * * * * * * * *

Many of the large, reliable Hardware jobbers are handling a full line of paints, and glass, and it is very convenient, and a saving of freight and drayage, to combine your paint and Hardware orders. This enables a person to carry a smaller stock, as goods can be profitably ordered in smaller quantities than if paint and Hardware are shipped separately.

It may be that linseed oil and white lead are sold with little or no profit at times, and mixed paints and high grade varnishes do not afford as good margin of profit, perhaps, as many articles in Shelf Hardware. Yet the little things, the specialties, the small package goods, household paints, stains, enamels, brushes and glass pay a good profit. There is no waste, and little or no dead stock, if the buying is carefully done. These goods sell all the year around and money can be turned often.

Buy small quantities to begin with, and aim to keep a variety rather than a large quantity of any article, and by all means do not allow a salesman to load you up with a large stock order. Feel your way carefully.

THE ARTICLES NEEDED

for a paint stock is a question for the inexperienced dealer to study carefully. Lead, oil and turpentine, of course, must be kept, but a big lot of lead and oil does not constitute a profitable stock and should not be bought if it prevents the dealer from putting in the hundreds of profitable little things that are needed in every home at all seasons. Better buy a few gallons of oil at an advanced price and a small quantity of lead, and the multitude of little things, rather than barrels of oil and tons of lead, and the popular sundries left out.

PROFITABLE SELLERS.

Floor paints, buggy paints, family paints in small packages, screen wire paints, varnish stains, enamel paints, floor stains, carriage top dressing, blackboard slating, paint and varnish remover, bronze powders, bronzing liquids, gold paint, radiator enamels, bath tub enamels, graphite paint, crack and crevice filler, floor wax, shingle stains, asphaltum, iron enamel, roof coating, pitch and even common coal tar are all sellers and afford a good profit.

BETTER BUY LITTLE AND OFTEN.

It is not necessary to put much money into any one article. Better buy little and often until you find what your demand is. Some manufacturers put up small assorted cases of these articles, costing $5 to $10, which makes a convenient quantity for the inexperienced to buy.

A small quantity of paste filler in one, two and five pound cans, a few gallons of liquid filler, shellacs, japans and dryers in half and one gallon cans and a few one pound cans of the leading colors in oil are necessary for a good paint stock.

Dry venetian red, white and yellow ocher, whiting and mineral purple can be bought in 50 or 100 pound drums or in barrels holding about 350 pounds. These cost but little and pay a better profit than the general line of Hardware. A small keg of dry red lead and a few pounds of leading dry colors help to round out the paint stock.

* * * * * * * * * *

A single gallon of good outside spar varnish, a very little coach and furniture varnish, a few gallons of good floor varnish, several gallons of good interior varnish and a few gallons of hard oil in quart, half-gallon and gallon cans will give sufficient variety and stock of varnish. Encourage the use of good varnish. Keep in mind that quality is remembered long after price is forgotten.

* * * * * * * * * *

HANDLE FLOOR DRESSINGS.

Many dealers are finding it profitable to make a special effort to supply durable and satisfactory floor dressings and varnish, and be able to advise the purchaser how best to treat both soft and hard wood floors. The public wants this information and wants such floor finishes as will permit the use of more rugs and fewer carpets. Some of the much advertised floor finishes are ready sellers and seem to be quite satisfactory. Floor wax and weighted waxing brushes are being sold very largely each year.

BRUSHES.

There is good money in brushes and it is well to carry a good assortment rather than a large number of a few kinds. The painter wants good brushes and will use no other. He takes good care of them and they last well. Most people buy cheap and medium price brushes and let them dry up after once using them. The most profit is made on the medium priced goods and of course more of these should be kept. Ten dollars, $25 or $50 invested in brushes will pay better profit than twice this amount invested in tools and general Hardware. If properly bought the brush stock can be turned over many times during the year.

GLASS.

Hardware dealers should, by all means handle glass, even if they do not sell paint. There is good profit in it, it is staple, there is little breakage, it never becomes dead stock, and is a seller all through the year. It is best not to keep too many sizes. A study of the glass list will show that several sizes cost the same per light, and of course one box will supply these different sizes without loss. Many more sizes can be made with very little loss by cutting down larger sizes.

FIXTURES.

It is not necessary to buy many expensive fixtures. A good glass board is almost a necessity and a dozen ten-cent steel glass cutters are about as satisfactory for cutting glass as a high priced diamond. Glass stock can be kept very nicely in the original boxes set on end.

SELL GOOD GOODS.

In conclusion let me repeat that the paint business belongs to the Hardware dealer; sell good goods, get posted so you can educate your customers, and push the sale and create a demand for the little things—the specialties that your trade will gladly buy if you show them that they can buy them and use them without much trouble; stimulate the paint habit among your customers and receive your reward in a larger business and increased profits.

A vote of thanks was extended to M. L. Corey, W. P. Bogardus and A. T. Stebbins for their attendance at the convention and their appreciated additions to its proceedings.

The meeting adjourned at 5.30.

Digitized by Google

THURSDAY EVENING

was devoted to a banquet given to the Association under the auspices of the Des Moines Hardware & Implement Jobbers. The committees having this affair in charge were as follows:

Committee on Arrangements—J. F. Kratzer, T. E. Hurley, J. A. Gunn and F. H. Luthe.

Programme Committee—J. F. Kratzer, T. E. Hurley, E. O. Faeth, J. A. Gunn, F. H. Luthe, C. S. Walker and J. A. Hosmer.

Reception Committee—C. S. Walker, W. F. Marsh, T. E. Hurley, F. H. Luthe, C. J. Luthe, E. O. Faeth, J. A. Hosmer, L. A. Smith, J. B. Green, F. O. Green, W. W. Tully, C. N. Carper, O. J. Goodwin, A. R. Dempster, L. H. Kurtz, J. A. Gunn, G. H. Bathrick, W. S. Brown, E. W. Brown, H. A. Crawford, H. C. Hargrove, R. J. Shank, N. A. Cruzan, S. D. Wadsworth, C. W. Levis, A. L. Zimmerman and W. A. Marble.

AT THE FRIDAY MORNING SESSION

C. H. Thomas, of Kent, read the following paper which had been prepared by F. W. Woodruff, Correctionville, on

HAY TOOLS IN A HARDWARE STORE,

in the course of which he said:

HAY TOOLS IN A HARDWARE STORE.

BY F. W. WOODRUFF.

* * * * * * * * * *

IN THE SALE OF HAY TOOLS,

like every other line that is auxiliary to the Hardware trade, the dealer himself plays an important part in educating his customers. He should, by all means, make himself familiar with his goods, if he is to inspire any great degree of confidence and avoid to the utmost the exposure of his own ignorance.

I remember quite well when the farmers in my territory began to use the hay carrier in their barns. The track was a crude affair, and, although clumsy, it answered the purpose and greatly facilitated the handling of a large hay crop. My faith at that time was just as strong as it is now, but the large barns were not there, hay was worth only $3 per ton and customers were scarce. I have on hand now a few old style Porter carriers for wood track, which I am likely to keep until I sell out or quit the business. I continued to buy improved goods as the trade demanded, until the purchase of a stock of hay tools became as important as that of any other line. For a number of years

MY SCHEME FOR MAKING SALES

has been to suspend 20 feet of track from the ceiling of my wareroom adjoining my store, and near the front door where it can be seen. There are many farmers yet who are not familiar with the hay carrier, and they have to be shown, so I put a hay car on one end and a sling car on the other, both well oiled and with enough Manila rope to show the prospective customer just how they would look and work in his barn. The exhibition seldom fails to make a sale.

* * * * * * * * * * *

Experience teaches me that it is not only good policy but profitable to carry a first-class article. A poor one is not only dangerous to those using them, but the expense of breakage and time wasted in repairing soon destroy a legitimate profit. Buy the best, for it costs but a little more. See that you get a carrier made of malleable iron that is not liable to break. Get one that has a first-class track, one that will carry either a fork or a sling without springing.

* * * * * * * * * * *

I am opposed to the practice of sending long lists of names to the manufacturer, for this reason, that many things are advertised, not in your line, but competitive to your stock, and when you send out the printed matter yourself your customer feels that you are showing a personal interest in him and he is more likely to respond.

* * * * * * * * * * *

I do not advocate reckless advertising. I try to do a conservative business and let the merits of the goods increase my trade, but I believe that we should not hesitate to speak out and show the people that we have unlimited confidence in the goods we offer for sale. The most important feature of the hay tool trade is a good stock of hay and sling cars, track and hangers, forks and slings and plenty of rope. Be ready for your customer when he comes and you can hold a whip row over the dealer who is always just out, but expecting some in a few days.

Secretary H. S. Vincent, Ft. Dodge, then read his report as follows:

REPORT OF SECRETARY VINCENT.

PROGRESS OF ASSOCIATION HAS BEEN SATISFACTORY.

The progress of the association this year has been very satisfactory to the officers and executive committee. Up to the time of the calling of this convention we added 102 new members since our convention last year. Most of these members were added owing to the efforts of the solicitor of the Iowa Retail Grocers' Association, with whom we joined in soliciting members throughout the State of Iowa. We are enabled to get this assistance through the kind auspices of the executive committee of the Retail Grocers' Association of this State, with whom we joined in an effort to secure legislation for the benefit of the retail merchants, both grocery and Hardware.

SHOULD ADVANCE CAUSE OF GARNISHEE BILL.

And I wish to take this opportunity of requesting each member of the association who has any influence with either the senator or representative from his district in the State to use this influence for advancing the cause of the garnishee bill. This bill, as most of you know, will be enacted for the purpose of making 25 per cent. of a person's salary liable to garnishment. This bill should appeal to every member who has accounts on his books, that the debtor may not laugh at him when he asks for payment of the same.

BILL TO PREVENT SALE OF STOCKS IN BULK.

The dealers are also interested in the bill now before the legislature to prevent the sale of stocks of goods in bulk for the purpose of defrauding the creditors. The idea of this bill, as I understand it, is to prevent a person who becomes seriously involved financially from transferring his stock to a relative or friend, and allowing the jobber to whistle for his pay, and oftentimes these stocks are put upon the market and sold at 50 cents on the dollar, or thereabouts, in direct competition with the legitimate retail dealer. In this way and on this account this bill is of interest to the retail dealer, and I hope you will all use your influence to help the passage of the bill.

WILL COME AWAY FILLED WITH ENTHUSIASM.

It was the pleasure of your secretary to attend the meeting of the secretaries of the various States affiliated with the National Association in Chicago last March, and I wish to say that if every member of this association could have attended that meeting as I did they would come away filled with enthusiasm and confident in the success of the good cause.

In closing, I wish to thank each and every member of the association and my friends on the outside of the association who have aided me in the work of the year. It was all new work to me, and if it has been successful it is due as much to your help as to my efforts.

The Committee on Resolutions reported the usual vote of thanks to those contributing to the interest and enjoyment of the convention which met unanimous approval.

The new constitution and by-laws of the Iowa Retail Hardware Dealers' Association were then read and adopted.

This was followed by the reports of the several committees. The report of the nominating committee was as follows:

President—S. R. Miles, Mason City.

Vice-President—H. S. Vincent, Ft. Dodge.
